TABLE OF CONTENTS

PART I. GENERAL PROVISIONS.....	1
§1. Purpose	1
§2. Definitions.....	1
§2-2. Calculations of Trading Days.....	1
§3. Price of Immediately Executable Limit Quotation.....	2
§3-2. Breakdown of Markets.....	2
§3-3. Trading Hours	2
§4. Change of Trading Hours due to System Failures.....	3
§4-2. Markets Eligible for Night Trading.....	4
§4-3. Guidelines for Connecting to Member Systems, etc.....	4
PART II. LISTED PRODUCTS.....	4
CHAPTER1. GENERAL PROVISIONS	4
§4-4. Listing of New Derivative Products.....	5
§4-5. Quotation Quantity Unit and Trading Quantity Unit	5
CHAPTER2. TRADING OF EQUITY DERIVATIVES	5
Section1. Trading of Stock Index Futures	5
§4-6. Underlying Assets	5
§4-7. Delivery Months, Etc.	6
§4-8. Multipliers.....	7
§4-9. Quotation Price Units.....	7
§5. Last Trading Day, Final Settlement Day and Final Settlement Price	8
Section 2. Trading of Stock Price Index Options	8
§5-2. Underlying Assets	8
§5-3. Expiration Months, etc.....	9
§5-4. Delivery Weeks, etc.....	9
§6. Establishment of Exercise Prices.....	11
§6-2. Multipliers and Quotation Price Units	13
§7. Last Trading Day, Option Exercise Settlement Day and Base Price of Option Exercise Settlement, etc.	14
Section 3. Trading of Volatility Index Futures.....	15
§7-2. Underlying Assets	15
§7-3. Delivery Months, etc.....	15
§7-4. Multipliers and Quotation Price Units	15
§7-5. Last Trading Day, Last Settlement Day and Final Settlement Price	15
Section 4. Trading of Single Stock Futures.....	16
§8. Selection of Underlying Stocks	16
§8-2. Exclusion of Underlying Stocks.....	17
§8-3. [Deleted on June 29, 2023]	17
§8-4. Delivery Months, etc.....	17
§8-5. Multipliers.....	18
§9. Adjustment of Multipliers	18
§10. Adjustment of Quantity of Open Interests.....	18
§10-2. Quotation Price Unit	19
§11. Last Trading Day, Final Settlement Day and Final Settlement Price	19
§12. [Deleted on August 28, 2014].....	21
Section 5. Trading of Single Stock Options	21
§13. Selection Criteria for Underlying Stocks	21
§13-2. Expiration Months, etc.....	21
§14. Establishment of Exercise Prices.....	22

§15. Adjustment of Exercise Price	24
§15-2. Multipliers	24
§16. Adjustment of Multipliers.....	24
§17. Adjustment of Quantity of Open Interests.....	24
§18. Special Setting of Exercise Price.....	25
§18-2. Quotation Price Units.....	25
§19. Last Trading Day, Exercise Settlement Day and Base Price for Exercise Settlement, etc.	25
§20. [Deleted on November 3, 2014]	26
Section 6. Trading of ETF Futures.....	26
§20-2. Underlying Assets	26
§20-3. Delivery Months, etc.....	27
§20-4. Multipliers and Quotation Price Units	27
§20-5. Last Trading Day, Final Settlement Day and Final Settlement Price	27
CHAPTER 3. TRADING OF INTEREST RATE FUTURES.....	28
Section 1. KTB Futures	28
§20-6. Underlying Assets and Trading Units	28
§20-7. Delivery Months, etc.....	29
§20-8. Multipliers, Quotation Price Units and Methods of Quoting Prices	29
§20-9. Last Trading Day, Final Settlement Day, Final Settlement Price, etc.	29
§21. ~ §25. [Deleted on October 20, 2010]	30
Section 2. Short-term Interest Rate Futures.....	30
§25-2. Underlying Assets and Trading Units	31
§25-3. Delivery Months, etc.....	31
§25-4. Multipliers, Quotation Price Units and Methods of Quoting Prices	31
§25-5. Last Trading Day, Final Settlement Day and Final Settlement Price, etc.	31
CHAPTER 4. TRADING OF CURRENCY DERIVATIVES	32
Section 1. Currency Futures	32
§25-6. Underlying Assets and Trading Units	32
§25-7. Delivery Months, etc.....	33
§25-8. Multipliers, Quotation Price Units and Methods of Quoting Prices	33
§25-9. Last Trading Day, Final Settlement Day and Final Settlement Price, etc.	34
§26. [Deleted on August 21, 2009].....	34
§27. Notification of Details of Delivery and Receipt.....	34
§28. Delivery and Receipt of Currency and Settlement Amount	35
Section 2. Currency Options	35
§28-2. Underlying Assets and Trading Units	35
§28-3. Expiration Months, etc.	35
§29. Establishment of Exercise Prices of Currency Options	36
§29-2. [Deleted on August 28, 2014]	36
§29-3. [Deleted on August 28, 2014]	36
§29-4. Multipliers, Quotation Price Units and Methods of Quoting Prices	36
§29-5. Last Trading Day, Exercise Settlement Day, Exercise Settlement Price, etc.	37
CHAPTER 5. TRADING OF COMMODITY FUTURES	37
§29-6. Trading Units and Delivery Months, etc.	37
§29-7. Multipliers, Quotation Price Units and Methods of Quoting Prices	38
§30. Last Trading Day	39
§31. [Deleted on August 28, 2014].....	39
§32. [Deleted on August 28, 2014].....	39
§32-2. Final Settlement Day and Final Settlement Price, etc.	39
§33. ~ §45. [Deleted on October 28, 2015]	41
CHAPTER 6. TRADING OF FUTURES SPREADS	41
§46. Contracts of Intra-product Spreads.....	41

§46-2. Quotation Price Units and Methods of Quoting Prices	42
§47. Deemed Execution Price following Execution of Intra-product Spread Trades.....	42
§47-2. Contracts of Inter-product Spreads	43
§47-3. Classification Methods, etc. of Buying and Selling in Inter-product Spreads	43
§47-4. Quotation Price Units, etc. of Inter-product Spread Trades	43
§47-5. Deemed Execution Prices, etc. following Execution of Inter-product Spread Trades	43
CHAPTER 7. TRADING OF FLEX FUTURES	44
§47-6. Underlying Assets, Trading Units and Multipliers, etc.	44
§47-7. Last Trading Day, Final Settlement Day and Final Settlement Price, etc.	44
PART III. TRADE EXECUTION.....	46
CHAPTER 1. QUOTATIONS.....	46
Section 1. Input and Receipt of Quotations	46
§48. Quotation Details to be Inputted.....	46
§49. Definition of Arbitrage and Hedge.....	48
§49-2. Verification of Suitability of Quotations, etc.	50
§50. Restriction on Quotation Input	51
§51. Quotation Receiving Hours	53
§52. Conversion, Receipt and Recording of Limit-to-Market-on-Close Quotations	53
§53. Validity of Quotations.....	54
§53-2. Validity of Quotations	54
§54. Correction of Quotations	55
§54-2. Mass Order Cancellation.....	56
Section 2. Base Price and Quantity Limit of Quotations.....	56
§55. Base Price of Futures.....	56
§56. Price Limits in Futures Trading.....	58
§56-2. Price Limits by Phase of Single Stock Futures Trades.....	58
§57. Base Price in Options Trading.....	59
§58. [Deleted on October 1, 2010]	61
§59. Price Limits in Options Trading	61
§59-2. Price Limit by Phase of Options of Equity Derivative Products.....	62
§59-3. Establishment of Lowest Upper Limit Prices of Options of Equity Derivative Products.....	62
§60. Price Limits for Intra-product Spread Trading	63
§60-2. Price Limits for Inter-product Spread Trading.....	63
§60-3. Trades and Contracts subject to Real-time Price Limits	64
§60-4. Real-time Price Limit Price Fluctuations.....	65
§60-5. Release from Application of Real-time Price Limits	65
§61. Quotation Quantity Limits and Accumulated Quotation Quantity Limits.....	66
CHAPTER 2. TRADE EXECUTION.....	66
Section 1. Methods of Trade Execution	66
§62. Priority of Quotations at Upper/Lower Limit Prices for Periodic Call Auction.....	66
§63. Exceptions to Transactions by Call Auction.....	67
§64. Range of Quotations for Call Auction	68
§65. Deemed Price of Market Quotations at Periodic Call Auction.....	69
§66. Exceptions to Periodic Call Auction.....	70
§67. Deemed Price of Market Quotations during Continuous Auction.....	70
§67-2. Change of Market Quotations and Record, etc.	71
Section 2. Special Cases of Methods of Trade Execution	71
§67-3. Restrictions of Negotiated Trades	71
§67-4. Trades eligible for Negotiated Block Trading	72
§68. Hours for requesting Negotiated Block Trading.....	72
§69. Price of Negotiated Block Trade	72
§70. Requesting Quantity of Negotiated Block Trading	73

§71. Requesting Details and Methods for Negotiated Block Trading	73
§72. [Deleted on August 21, 2009]	74
§72-2. Target, Price Range, and Requesting Hours and Quantity for Exchange of Futures for Physicals	74
§72-3. Details and Methods of Requesting Exchange of Futures for Physicals	74
§72-4. Delivery and Receipt of US Dollar and Amount	75
§72-5. Requesting Hours of Negotiated FLEX Trades	75
§72-6. Price Range of FLEX Trades	76
§72-7. Requesting Quantity of Negotiated FLEX Trades	76
§72-8. Details to be specified and Method of Requesting Negotiated FLEX Trades	76
§72-9. [Deleted on May 29, 2025]	77
§72-10. [Deleted on May 29, 2025]	77
§72-11. [Deleted on May 29, 2025]	77
§72-12. [Deleted on May 29, 2025]	77
§72-13. [Deleted on May 29, 2025]	77
Section 3. Trade Suspension	77
§73. Criteria for Discretionary Trade Suspension	77
§74. Discretionary Suspension of Trades of Single Stock Futures and Single Stock Options	78
§74-2. Discretionary Suspension of ETF Futures Trades	78
§75. Compulsory Suspension of Trading of Stock Index Futures, etc.	79
§75-2. Products Not Eligible for Night Trading under Compulsory Suspension of Trading	79
Section 4. Notification of Trading Details, Publication of Market Price, etc.	79
§76. Trading Details to be Notified	79
§77. Methods of Correcting Transaction Errors	80
§78. Settlement of Gains/Losses Arising from Correction of Transaction Errors Made by the Exchange	81
§78-2. Requirements for Resolving Large-sized Transaction Errors by Investors	82
§78-3. Request for Resolution of Large-sized Transaction Errors by Investors	82
§78-4. Methods of resolving Large-sized Transaction Errors by Investor	83
§78-5. Publication of Trade Cancellation	84
§79. Publication of Market Prices, etc. and Methods Thereof	85
CHAPTER 3. [Deleted on May 29, 2025]	86
§79-2. [Deleted on May 29, 2025]	86
§79-3. [Deleted on May 29, 2025]	86
§79-4. [Deleted on May 29, 2025]	86
§79-5. [Deleted on May 29, 2025]	86
§79-6. [Deleted on May 29, 2025]	86
§79-7. [Deleted on May 29, 2025]	86
§79-8. [Deleted on May 29, 2025]	86
§79-10. [Deleted on May 29, 2025]	86
CHAPTER 4. MARKET MAKERS	86
§80. Qualifications of Market Maker	86
§81. Products, Contracts and Periods for Market Making	87
§82. Entering into or Terminating Written Agreements for Market Making	88
§83. Methods of Submitting Market Making Quotations	88
§84. [Deleted on August 28, 2014]	90

§86. [Deleted on August 28, 2014]	90
§87. [Deleted on August 28, 2014]	90
§88. [Deleted on December 18, 2012]	90
§89. Assessment of Market Makers	90
§90. Compensation for Market Makers	90
§90-2. Compensation for Non-Market Makers	91

§90-3. Underlying Asset Conversion Rates of Market Makers, etc.	92
PART IV. MEMBER MARGIN AND SETTLEMENT BETWEEN EXCHANGE AND MEMBER.....	93
CHAPTER 1. MEMBER MARGIN.....	93
§91. Deposit Limits of Substitute Securities, Foreign Currencies and Foreign Securities.....	93
§92. Types and Valuation, etc. of Foreign Currencies	93
§92-2. Types and Evaluation of Foreign Securities, etc.	95
§93. Calculation of Member Margins per Account and Reporting of Accounts, etc.....	96
§94. Net Exposure Member Margins	97
§94-2. Member Margin for Credit Risk.....	98
§94-3. Verification, etc. of Calculation Methods of Margins	99
§94-4. Assessment of Eligibility of Substitute Securities and Invalidation of Ineligible Substitute Securities, etc.....	99
§94-5. Deposit Limits per Issue of Substitute Securities and Deduction Methods, etc.....	100
§95. ~ §101. [Deleted on October 26, 2009]	101
§102. Deposit and Withdrawal of Member Margins	101
§102-2. Operation of Member Margins.....	101
§102-3. Calculation and Imposition, etc. of Additional Intraday Member Margin	102
§102-4. Depositing of Additional Intraday Member Margins, etc.	104
§102-5. Release from Imposition of Additional Intraday Member Margin.....	104
CHAPTER 2. CLEARING AND SETTLEMENT BETWEEN THE EXCHANGE AND MEMBERS.....	104
Section 1. Settlement Price of Futures	104
§103. Settlement Price of Futures	104
§104. Exceptions in Calculation of Settlement Difference for Previous Day's Open Interests	107
Section 2. Option Exercise.....	108
§105. Deemed Value for Reporting Option Exercise	108
§106. Methods of Reporting Option Exercise and Reporting Deadline.....	108
§107. Allotment Methods of Option Exercises	108
§108. Notification Methods of Allotment of Option Exercises.....	108
Section 3. Methods of Delivering/Receiving Settlement Amounts, etc.	109
§109. Deadline for Physical Delivery	109
§110. Methods of Calculating Net Settlement Cash, etc.	109
§111. Designation of Settlement Bank and Termination of Designation Thereof.....	109
§111-2. Notification of Settlement Capability, etc. by Clearing Members	110
§111-3. Risk Management Training	110
§112. Amount Equivalent to Value of Underlying Asset.....	111
§112-2. Types of Financial Resources for Settlement, etc.....	111
§112-3. Receiver of Settlement Instruction for Net Settlement Underlying Assets	111
§112-4. Calculation Methods, etc. of Losses caused by Settlement Delay	112
§112-5. Settlement Support by Exchange Staff.....	113
§112-6. Closing out of Open Interests of Trade-suspended Members	113
§113. Transfer of Open Interests of Trade-suspended Members.....	114
PART V. ENTRUSTMENT OF TRADES	114
CHAPTER 1. CONDITIONS OF ENTRUSTMENT	114
Section 1. Opening of Derivatives Accounts and Issuance of Terms and Conditions, etc.....	114
§114. Derivatives Account Number, etc.....	114
§114-2. Foreign Financial Investment Business Entities eligible to open Foreigner's Consolidated Accounts, etc.	115
§114-3. End-investors Classification Codes and Reporting Methods of Foreigner's Consolidated Accounts.....	116
§114-4. Report on Transfer of Open Interests within A Foreigner's Consolidated Account	116

§114-5. Exceptions to Margins, Position Limits, High-speed Algorithmic Trades, etc. of Foreigner's Consolidated Accounts	117
§114-6. Transfer of Open Interests in Foreigner's Consolidated Account	117
§114-7. Publication of Order Entrustment Methods, etc.	118
§114-8. Matters to Be Entered in Terms and Conditions for High-speed Algorithmic Trading.....	119
§115. Customer Information.....	120
Section 2. Entrustment Method and Conditions	122
§116. Order Details	122
§117. Order Entrustment by Written Document and Recording of Order Details.....	122
§117-2. Order Entrustment over Telephone, etc. and Recording of Order Details.....	122
§117-3. Order Entrustment via Electronic Communication Method.....	123
§118. Entrustment of Negotiated Trade.....	124
§118-2. [Deleted on May 29, 2025]	125
§119. Refusal to Accept Entrustment, etc.....	125
§120. Notification of Trading Details to Customers	127
CHAPTER 2. CUSTOMER MARGIN.....	127
Section 1. General Provisions.....	127
§121. Entrustment Prices of Market Orders, etc.	127
§121-2. [Deleted on October 20, 2011]	128
§122. Amount of Basic Deposits	128
§122-2. Opening, etc. of Hedge-dedicated Accounts	129
Section 2. Substitute Securities, Foreign Currencies and Foreign Securities.....	129
§123.Types and Assessment of Foreign Currencies, etc.	129
§123 -2. Types and Appraisal of Foreign Securities, etc.	131
§124. Exceptions to Base Price of Substitute Securities	132
§125 ~ §131 [Deleted on July 8, 2013]	133
Section 3. Deposit of Customer Margins.....	133
Sub-Section 1. Management of Qualified Institutional Investors.....	133
§132. Criteria for Selection of Qualified Institutional Investors and Request for Materials.....	133
§132-2. Management of Risk Exposure Amount of Ex-post Customer Margin Account	134
§132-3. Guidelines for Risk Management of Qualified Institutional Investors	135
Sub-Section 2. Deposit of Upfront Initial Customer Margin	136
§133. Deposit of Upfront Initial Customer Margin Rate.....	136
§134. Upfront Customer Margin for Net Exposure.....	137
§135. [Deleted on October 26, 2009]	138
§136. [Deleted on October 26, 2009]	138
§137. Estimated Settlement Amount	138
§138. [Deleted on May 26, 2015].....	139
§139. [Deleted on October 26, 2009]	139
§140. [Deleted on October 26, 2009]	139
§141. [Deleted on October 26, 2009]	139
§142. [Deleted on October 26, 2009]	139
§143. [Deleted on October 26, 2009]	139
§144. Amount of Customer Margin for Gross Exposure of Product Group, etc.....	140
§145. Upfront Cash Deposit Requirement	141
Sub-Section 3. Deposit of Ex-post Customer Margins.....	143
§146. Deposit of Ex-post Customer Margins	143
§147. Scope of Arbitrage and Hedge eligible for Customer Margin Discount.....	143
§148. Ex-post Cash Deposit Requirement.....	145
Section 4. Payment, Appropriation and Additional Deposit of Customer Margins	146
§149. Repayment and Appropriation of Customer Margins and Restriction Thereabout	146
§150. Shortfall in Total Deposit	148

§151. Shortfall in Cash Deposit.....	150
§151-2. Additional Deposit of Customer Margin during Market Hours	151
§151-3. Release of Additional Deposit of Intraday Customer Margin	152
§151-4. Exceptions of Calculation Method of Margin, etc. in Additional Deposit of Intraday Customer Margins	153
§152. Measures against Customers' Non-fulfillment of Deposit Obligations, etc.	154
CHAPTER 3. SETTLEMENT BETWEEN MEMBER AND CUSTOMER	155
§153. [Deleted on October 20, 2010]	155
§154. Settlement of Currency Futures by Physical Delivery	155
§155. [Deleted on October 28, 2015]	156
§156. [Deleted on October 28, 2015]	156
§157. Deadline for Reporting Option Exercise by Customer.....	156
§158. Physical Delivery Deadline	156
§159. Measures against Customers' Failure to fulfill Settlement Obligations, etc.....	156
PART VI. MARKET MANAGEMENT	156
§160. Criteria for Designation as Low Liquidity Products	156
§161. Criteria for Designation as Product warned for Delisting	158
§162. Methods of Determining Quantity of Open Interests of KOSPI 200 Futures and Options Trades, etc.	158

PART I. GENERAL PROVISIONS

§1. Purpose

The purpose of these Enforcement Rules is to stipulate the matters necessary for the enforcement of the Derivatives Market Business Regulation (hereinafter referred to as “the Regulation”). (Amended on October 26, 2009)

§2. Definitions

(1) The terms used in these Enforcement Rules shall have the meanings given to them in following subparagraphs: (Amended on August 28, 2014)

1. The term “base price of underlying asset” means the price of underlying asset (if no such price is available, it shall be the price of the day moved forwarded sequentially) specified in [Annex 1].

2. The term “business day” means the day to which the market closing time belongs. (Amended on October 26, 2009; May 29, 2025);

3. The term “deemed execution price” means the execution price of the delivery month contract that is assumed to have been executed consequent to the execution of futures spread trade.

(2) The terms used in these Enforcement Rules, other than those referred to in paragraphs (1), shall have the same meanings given to them in the Act and the regulations governing the business of the Exchange, except in cases where these Enforcement Rules stipulate otherwise. [May 29, 2025]

(Wholly amended on January 20, 2009)

§2-2. Calculations of Trading Days

(1) From the start time of the night trading hours on the immediately preceding business day to the time immediately before the start time of the night trading hours on the relevant business day shall be calculated as one (1) trading day.

(2) With regard to the last trading day and the trading start date, the period of the day shall be from the start time of the night trading hours on the day before the relevant day to the start time of the night trading hours on the relevant day, and whether the day is a holiday shall be determined based on the regular trading holiday. Provided that this paragraph shall not apply to [§25-9], [§29-5], and [§30].

(3) Quotations submitted during quotation hours for opening price by call auction in night trading shall be considered to have been submitted on the trading day to which the relevant

night trading hours belong.

[May 29, 2025]

§3. Price of Immediately Executable Limit Quotation

(1) “Price stipulated in the Enforcement Rules” in [§2(1)15(d)] of the Regulation shall refer to the price noted in each of the following subparagraphs: (Amended on October 26, 2009; August 20, 2014; August 28, 2014)

1. In the case of immediately executable limit quotation for ask order: the highest price of bid quotation. Provided that, when there is no bid quotation, it shall be the price (when the relevant price is lower than the lower limit price noted in [§56 or §59], it shall be such lower limit price) obtained by subtracting the quotation price unit from the lowest price of ask quotation; and when there are no offer and bid quotations, it shall be the most recent contract price.

2. In the case of immediately executable limit quotation for bid order: the lowest price of ask quotation. Provided that, when there is no ask quotation, it shall be the price (when the relevant price is higher than the upper limit price noted in [§56 or §59], it shall be such upper limit price) obtained by adding the quotation price unit to the highest price of ask quotation, and when there are no offer and bid quotations, it shall be the most recent contract price.

(2) Notwithstanding paragraph (1), in cases where the price noted in paragraph (1)1 comes to be lower than the real-time lower limit price (referring to the real-time lower limit price noted in [§70-2(1)]; the same hereinafter), the real-time lower limit price is designated as the price of the immediately executable limit quotation for ask order, and in cases where the price noted in paragraph (1)2 comes to be higher than the real-time upper limit price (referring to the real-time upper limit price noted in [§70-2(1)]; the same hereinafter), the real-time upper limit price is designated as the price of the immediately executable limit quotation for bid order.

(Wholly amended on August 20, 2014)

§3-2. Breakdown of Markets

Pursuant to [§3(3)] of the Regulation, detailed breakdown of the markets shall be as shown in subparagraph 1 of [Annex 1-2]. (Amended on July 18, 2023)

[March 13, 2017]

§3-3. Trading Hours

(1) Pursuant to the proviso to [§4(1)1] of the Regulation, the regular trading hours of the market where regular trading hours can be set differently shall be as shown in subparagraph 2 of [Annex 1-2]. (Amended on July 18, 2023; May 29, 2025)

(2) Pursuant to the proviso to [§4(2)] of the Regulation, the regular trading hours of a contract [in the case of futures spreads, it shall be a contract for which the last trading day of any of the two (2) constituent contracts has arrived] for which the last trading day has arrived shall be as shown in subparagraph 3 of [Annex 1-2]: (Amended on February 16, 2022; July 18, 2023)

(Wholly amended on March 13, 2017)

§4. Change of Trading Hours due to System Failures

“As stipulated in the Enforcement Rules” in [§4(4)1] of the Regulation shall refer to the cases falling under any of the following subparagraphs: (Amended on December 10, 2010; August 28, 2014; March 13, 2017)

1. Case of a derivatives market (referring to the detailed markets noted in [§3-2]; the same hereinafter) where, due to a failure in the derivatives system (hereinafter referred to as “the Exchange derivatives system”) of the Korea Exchange (hereinafter referred to as “the Exchange”), it is deemed impractical to execute trades of derivative products or receipt of quotations is delayed for more than ten (10) minutes;

2. Case of the derivatives market where, due to a failure in the member derivative system, the derivative products (excluding products designated as low liquidity products and products warned for delisting pursuant to [§153] of the Regulation) of which the aggregated number of execution quantities of the members, who cannot input the quotations or receive the notification of trading details, exceeds 75/100 of the total execution quantity of all members. In such cases, the execution quantity of each member shall be calculated pursuant to method in each of the followings: (Amended on August 28, 2014; May 29, 2025)

(a) The period of one (1) year (including the night trading hours immediately preceding the first regular trading day and excluding the night trading hours that start on the last business day during the relevant period) counting retroactively from the last business day of the month preceding the month in which the regular trading hours of the trading day in which the member derivatives system experienced a failure shall be set as contract execution quantity calculation period (hereinafter referred to as the “contract quantity calculation period” in this subparagraph); [May 29, 2025]

(b) In the case where a failure occurs during regular trading hours, the quantity of contracts executed in regular trading hours during the contract quantity calculation period shall be added; [May 29, 2025]

(c) In the case where a failure occurs during night trading hours, the quantity of contracts executed in night trading hours during the contract quantity calculation period shall be added. and [May 29, 2025]

(d) In the case where a member joins or withdraws during the contract quantity calculation period, such fact shall be taken into account when calculating the contract quantity. [May 29, 2025]

3. In addition, as the cases where the failure of the Exchange derivatives system or the member derivatives system has occurred, when the Exchange deems it necessary to change the trading hours.

§4-2. Markets Eligible for Night Trading

The markets where transactions are made during the night trading hours pursuant to the latter part of [§4(1)2] of the Regulation shall be as stipulated in subparagraph 4 of [Annex 1-2]. (Amended on December 10, 2020; May 29, 2025)

(Wholly amended on March 13, 2017)

§4-3. Guidelines for Connecting to Member Systems, etc.

(1) “Matters which are stipulated in the Enforcement Rules” in [§8-2(1)] of the Regulation shall refer to the matters noted in each of the following subparagraphs: (Amended on August 28, 2014)

1. Network connection method between the members and the Exchange;
2. Methods of applying for and allotting the communication lines between the member and the Exchange and the sessions;
3. Prerequisites of security device of member system;
4. Criteria for allocation and operation of member sessions; and
5. In addition, the matters that the Exchange deems necessary for the efficient and reliable system operation.

(2) “Communication lines” noted in paragraph (1) shall refer to the physical lines used to transmit and receive the quotations and trading details between the member and the Exchange, and “sessions” shall refer to the logical circuit that electronically transmits and receives the quotations and trading details. (Amended on February 28, 2014)

[December 28, 2011]

PART II. LISTED PRODUCTS

CHAPTER1. GENERAL PROVISIONS

[August 28, 2014]

§4-4. Listing of New Derivative Products

When listing new derivative products, the Exchange shall confirm that the relevant product is eligible for listing in terms of investor protection, prevention of unfair trades and compliance with related acts and subordinate statutes, etc. [March 13, 2017]

§4-5. Quotation Quantity Unit and Trading Quantity Unit

(1) Pursuant to [§9-2(1)] of the Regulation, the quotation quantity unit for derivatives trade (hereinafter referred as “quotation quantity unit”) shall be one (1) contract.

(2) Pursuant to [§9-2(1)] of the Regulation, the trading quantity unit for derivatives trade (hereinafter referred as “trading quantity unit”) shall be one (1) contract.

[August 28, 2014]

CHAPTER2. TRADING OF EQUITY DERIVATIVES

(Amended on August 28, 2014)

Section1. Trading of Stock Index Futures

§4-6. Underlying Assets

(1) “Stock price indices stipulated in the Enforcement Rules” in subparagraph 1 of [§10] of the Regulation shall refer to the stock price indices classified in each of the followings: [March 13, 2017] (Amended on March 15, 2018; April 5, 2024; November 1, 2024)

1. For KOSPI 200 futures and Mini KOSPI 200 futures: KOSPI 200 (referring to a market capitalization weighted stock price index based on 200 issues listed on the KOSPI Market, which is calculated by the Exchange using the base index of 100 on the base date of January 3, 1990; the same hereinafter);

2. For KOSDAQ 150 futures: KOSDAQ 150 (referring to a market capitalization weighted stock price index based on 150 issues listed on the KOSDAQ Market, which is calculated by the Exchange using the base index of 1,000 on the base date of January 4, 2010; the same hereinafter);

3. For KRX 300 futures: KRX 300 (referring to a market capitalization weighted stock price index based on 300 issues, from among the stocks listed on the KOSPI Market and the stocks listed on the KOSDAQ Market, which is calculated by the Exchange using the base index of 1,000 on the base date of January 4, 2010; the same hereinafter); and

4. For KOSDAQ Global futures: KOSDAQ Global (referring to a market capitalization weighted stock price index based on stocks designated by the Exchange in accordance with

[§3] of the Guidelines for Designation of Global Corporations in the KOSDAQ Market, which is calculated by the Exchange using the base index of 1,000 on the base date of November 18, 2022; the same hereinafter).

(2) “Stock price indices stipulated in the Enforcement Rules” in subparagraph 3 of [§10] of the Regulation shall refer to the stock price indices stipulated in [Annex1-3]. (Amended on March 13, 2017)

(3) [Deleted on April 18, 2025]

(Wholly amended on June 20, 2016)

§4-7. Delivery Months, Etc.

(1) Pursuant to [§11(1)] of the Regulation, the delivery months of stock index futures shall be the months classified in each of the followings: [March 13, 2017] (Amended on March 15, 2018; April 5, 2024; November 1, 2024)

1. For the trades of KOSPI 200 futures, KOSDAQ 150 futures, KRX 300 futures, KOSDAQ Global futures and sector index futures: March, June, September and December (hereinafter referred to as the “quarterly months”); and (Amended on April 18, 2025)

2. For Mini KOSPI 200 futures: Every month.

(2) Pursuant to [§11(1)] of the Regulation, the number of delivery months of stock index futures shall be the number classified in each of the following subparagraphs: (Amended on July 3, 2015; October 28, 2015; June 20, 2016; March 13, 2017; March 15, 2018; August 17, 2018; July 13, 2021; March 14, 2022; November 24, 2023: April 5, 2024; November 1, 2024)

1. For the trades of KOSPI 200 futures, KOSDAQ 150 futures and sector index futures (excluding the trades of KRX BBIG index futures, KRX Secondary Battery index futures, and KRX Bio index futures; hereinafter the same in this Article): Seven (7) among the quarterly months (one in March, one in September, two in June, three in December; the same hereinafter in [§5-3(2)1]);

2. For Mini KOSPI 200 futures trades: Six (6) consecutive months;

3. For KRX 300 futures, KOSDAQ Global futures, and sector index futures trades: Four (4) among the quarterly months; and

4. [Deleted on April 18, 2025]

(3) The trading periods of each delivery month of stock index futures pursuant to [§11(1)] of the Regulation shall be the periods classified in each of the following subparagraphs: (Amended on July 3, 2015; October 28, 2015; June 20, 2016; March 13, 2017; March 15, 2018; July 13, 2021; March 14, 2022: April 5, 2024; November 1, 2024)

1. For the trades of KOSPI 200 futures and KOSDAQ 150 futures: the period classified in

each of the following items:

- (a) For the contracts in March and September, one (1) year;
- (b) For the contracts in June, two (2) years; and
- (c) For the contracts in December, three (3) years.

2. For Mini KOSPI 200 futures trades: six (6) months

3. For KRX 300 futures, KOSDAQ Global futures, and sector index futures trades: one (1) year

4. [Deleted on April 18, 2025]

(4) [Deleted on April 18, 2025]

[August 28, 2014]

§4-8. Multipliers

Pursuant to [§12] of the Regulation, the multipliers of stock index futures shall be the figures classified in each of the following subparagraphs: (Amended on March 15, 2018; April 5, 2024; November 1, 2024)

- 1. For KOSPI 200 futures trades: 250,000;
- 2. For Mini KOSPI 200 futures and KRX 300 futures trades: 50,000;
- 3. KOSDAQ 150 futures and KOSDAQ Global index trades: 10,000; and
- 4. For sector index futures trades: The figures set forth in [Annex 1-3];
- 5. [Deleted on April 18, 2025]

(Wholly amended on March 13, 2017)

§4-9. Quotation Price Units

Pursuant to [§12] of the Regulation, the quotation price units of stock index futures shall be the figures classified in each of the following subparagraphs: (Amended on July 3, 2015; October 28, 2015; March 21, 2016; June 20, 2016; March 13, 2017; March 15, 2018; June 7, 2021; July 13, 2021; November 24, 2023; April 5, 2024; November 1, 2024)

- 1. For KOSPI200 futures trades: 0.05 points;
- 2. For Mini KOSPI 200 futures trades: 0.02 points;
- 3. For KOSDAQ 150 futures and KOSDAQ Global futures trades: 0.10 points; and

4. For KRX 300 futures and sector index futures trades: 0.20 points. Provided that, for KOSPI Dividend index futures trades, KRX BBIG index futures, KRX Secondary Battery index futures, and KRX Bio index futures trades, it shall be 0.50 points.

5. [Deleted on April 18, 2025]

[August 28, 2014]

§5. Last Trading Day, Final Settlement Day and Final Settlement Price

(1) Pursuant to [§14(2)] of the Regulation, the last trading day of stock index futures shall be the second Thursday of the delivery month (shall be moved forward sequentially if it is a market holiday). (Amended on June 20, 2016; April 18, 2025)

1. [Deleted on April 18, 2025]

2. [Deleted on April 18, 2025]

(2) Pursuant to [§14(2)] of the Regulation, the final settlement day of stock index futures shall be the trading day following the last trading day. (Amended on June 20, 2016; April 18, 2025)

1. [Deleted on April 18, 2025]

2. [Deleted on April 18, 2025]

(3) The final settlement price of stock index futures stipulated in [§14(2)] of the Regulation shall be the closing value of the relevant stock price index on the last trading day. Provided that, in cases where there is no such stock index value or the calculation of such stock price index is not possible on the last trading day, it shall be the value of stock price index (hereinafter referred to as “the special final settlement price”) calculated by the Exchange in accordance with the calculation method of the relevant stock price index on the basis of the opening price [including the special quotation prices of the stock markets noted in [§4(4)2] of the Regulation (hereinafter referred to as the “stock markets”)] of its constituents on the next trading day. (Amended on June 20, 2016; March 14, 2022; April 18, 2025)

1. [Deleted on April 18, 2025]

2. [Deleted on April 18, 2025]

Section 2. Trading of Stock Price Index Options

§5-2. Underlying Assets

“Stock price indices that are specified in the Enforcement Rules” in [§15] of the Regulation

shall refer to the stock price indices classified in each of the followings: (Amended on March 15, 2018)

1. KOSPI 200; and
2. KOSDAQ 150.

§5-3. Expiration Months, etc.

(1) Pursuant to [§16(1)] of the Regulation, the expiration month of stock index options shall be every month. [March 13, 2017]

(2) Pursuant to [§16(1)] of the Regulation, the number of expiration months of stock index options shall be the numbers classified in following subparagraphs: (Amended on July 3, 2015; March 13, 2017; March 15, 2018)

1. For KOSPI 200 options trades: eleven (11) in total -seven (7) from the quarterly months and four (4) from the months which are not the quarterly months (hereinafter referred to as “non-quarterly months”);
2. For Mini KOSPI 200 options trades: six (6) consecutive months; and
3. For KOSDAQ 150 options trades: six (6) in total - two (2) from the non-quarterly months and four (4) from the quarterly months.

(3) Pursuant to [§16(1)] of the Regulation, the trading period of each expiration month of stock index options shall be as noted in each of the following subparagraphs:(Amended on July 3, 2015; March 13, 2017; March 15, 2018)

1. In the case of KOSPI 200 options trades:
 - (a) For the contracts in non-quarterly months: six (6) months;
 - (b) For the contracts in March and September: one (1) year;
 - (c) For the contracts in June: two (2) years; and
 - (d) For the contracts in December: three (3) years.
2. In the case of Mini KOSPI 200 options trades, six (6) months
3. In the case of KOSDAQ 150options trades:
 - (a) For the contracts in the non-quarterly months: three (3) months; and
 - (b) For the contracts in the quarterly months: one (1) year.

[August 28, 2014]

§5-4. Expiration Weeks, etc.

(1) “Stock index options specified in the Enforcement Rules” in [§16(2)] of the Regulation shall refer to the KOSPI 200 options and KOSDAQ 150 options. (Amended on October 1, 2025)

(2) Pursuant to the latter part of [§16(2)] of the Regulation, the expiration week of a stock index options trade shall be every week. (Amended on June 29, 2023; June 11, 2026)

(3) Delivery week trade shall be classified according to the following subparagraphs: (Amended on June 29, 2023).

1. Delivery week trade (hereinafter referred to as the "Monday delivery week trade") for which the last trading date falls under [h7(1)2a]; and
2. Delivery week trade (hereinafter referred to as the "Thursday delivery week trade") for which the last trading date falls under [§7(1)2b].

(4) Trade commencement day shall be classified according to the following subparagraphs: [June 29, 2023]

1. For Monday delivery week trade, Monday (if it falls on a market holiday, it shall be moved forward sequentially); and
2. For Thursday delivery week trade, Thursday (if it falls on a market holiday, it shall be moved forward sequentially).

(5) Trading period of the delivery week trade shall be classified according to the following subparagraphs: [June 29, 2023]

1. For Monday delivery week trade, from the trade commencement day under subparagraph 1 of [§4] to the last trading day under [§7(1)2a] which arrives first; and
2. For Thursday delivery week trade, from the trade commencement day under subparagraph 2 of [§4] to the last trading day under [§7(1)2b] which arrives first.

(6) Notwithstanding paragraph (4), the delivery week trade that falls under any of the following subparagraphs shall not be commenced. In this case, whether the delivery week trade falls under subparagraphs 1, 2, and 4 apply shall be determined by comparing transactions with the same underlying asset: [June 29, 2023] (Amended on October 1, 2025)

1. Delivery week trade in case where the last trading day is the same as the last trading day of the delivery month trade;
2. Delivery week trade in case where the last trading day is the same as the last trading day of the delivery week trade for which trading has already commenced;
3. Delivery week trade in case where the trade commence day is the same as the last trading day, and thus the trading period is one (1) trading day; or (Amended on October 1, 2025)

4. Monday delivery week trade in case where the last trading day is the same as the last trading day of the Thursday delivery week trade in cases other than subparagraphs 1 through 3.

[July 30, 2019]

§6. Establishment of Exercise Prices

(1) Pursuant to [§16(4)] of the Regulation, the number of exercise prices of stock index options established on the first trading day of each expiration month or expiration week shall be as noted in each of the following subparagraphs: (Amended on July 3, 2015; November 10, 2017; March 15, 2018; July 30, 2019; November 25, 2021)

1. For KOSPI200 options trades, the number classified in each of following items:
 - (a) For contracts in non-quarterly months, March and September: forty-nine (49);
 - (b) [Deleted on November 25, 2021]
 - (c) For contracts in June and December (hereinafter referred to as “half-yearly months”): twenty-five (25); and
 - (d) For contracts in expiration weeks: ninety-seven (97). (Amended on April 6, 2026)
2. For Mini KOSPI200 options trades: forty-nine (49) (Amended on April 6, 2026)
3. For KOSDAQ 150 options trades: seventeen (17)

(2) Pursuant to [§16(4)] of the Regulation, the exercise price shall be established according to the methods prescribed in each of the following subparagraphs on the first trading day of each expiration month or expiration week of stock price index options: (Amended on July 3, 2015; November 10, 2017; March 15, 2018; July 30, 2019; November 25, 2021)

1. For KOSPI200 options trades: the methods classified in each of the following items:
 - (a) For contracts in non-quarterly months, March and September: with 5-point increments as the exercise price unit (referring to the minimum price unit establishing the exercise prices; the same hereinafter), there shall be an exercise price at-the-money [as the price that is an integral multiple of the exercise price unit, the exercise price (when there are two such exercise price, it shall be the higher exercise price) that is nearest to the base price of underlying asset on the immediately preceding trading day: the same hereinafter] and consecutive each twenty-four (24) exercise prices above and below the at-the-money exercise price; (Amended on May 29, 2025)
 - (b) [Deleted on November 25, 2021]
 - (c) For contracts in half-yearly months: with 10-point increments as the exercise price unit, there shall be an exercise price at-the-money and consecutive each twelve (12) exercise prices above and below the at-the-money exercise prices; and
 - (d) For contracts in expiration weeks: with 2.5-point increments as the exercise price unit,

there shall be an exercise price at-the-money and consecutive each forty-eight (48) exercise prices above and below the at-the-money exercise prices. (Amended on April 6, 2026)

2. For Mini KOSPI200 Options trades: with 5-point increments as the exercise price unit, there shall be an exercise price at-the-money and consecutive each twenty-four (24) exercise prices above and below the at-the-money exercise prices. (Amended on April 6, 2026)

3. For KOSDAQ 150 options trades: with 25-point increments as the exercise price unit, there shall be an exercise price at-the-money and consecutive each eight (8) exercise prices above and below the at-the-money exercise price.

(3) Pursuant to [§16(4)] of the Regulation, in cases where there is an exercise price, which has not been introduced, among the exercise prices in each of the following subparagraphs after the trading day following the first trading day of each expiration month or expiration week of stock index options, that exercise price shall additionally be introduced. Provided that, in cases where the at-the-money exercise price is changed and there is an exercise price that has not been introduced based on the exercise price unit between the at-the-money exercise price of the immediately preceding trading day and the changed at-the-money exercise price, that exercise price shall additionally be introduced.: (Amended on November 25, 2021; April 5, 2024; May 29, 2025)

1. For KOSPI200 options trades: the exercise prices classified in each of the following items:

(a) For contracts in three (3) expiration months of which the last trading days arrive earlier (referring to the consecutive three (3) expiration months): with 2.5-point increments as the exercise price unit, an exercise price at-the-money and consecutive forty-eight (48) exercise prices above or below the at-the-money exercise price; (Amended on April 6, 2026)

(b) For contracts in five (5) expiration months from the fourth nearest expiration month (referring to the expiration month coming on the fourth; hereinafter the same) to the eighth nearest expiration month: with 5-point increments as the exercise price unit, an exercise price at-the-money and consecutive twenty-four (24) exercise prices above or below the at-the-money exercise price;

(c) For contracts in three (3) expiration months of which the last trading day arrives later (referring to three (3) expiration month of which the last trading day arrives later among half-yearly expiration months): with 10-point increments as the exercise price unit, an exercise price at-the-money and consecutive twelve (12) exercise prices above or below the at-the-money exercise price; and

(d) For contracts in expiration weeks: with 2.5-point increments as the exercise price unit, an exercise price at-the-money and consecutive forty-eight (48) exercise prices above or below the at-the-money exercise price. (Amended on April 6, 2026)

2. For Mini KOSPI200 options trades: the exercise prices classified in each of the following

subparagraphs:

(a) For contracts in three (3) expiration months of which the last trading day arrives earlier (referring to the consecutive three (3) expiration months): the exercise price under subparagraph 1(a); and

(b) For contracts in three (3) expiration months of which the last trading day arrives later (referring to the expiration month that does not fall under (a) among the consecutive three (3) expiration months): with 5-point increments as the exercise price unit, an exercise price at-the-money and consecutive twenty-four (24) exercise prices above and below the at-the-money exercise price. (Amended on April 6, 2026)

3. For KOSDAQ 150 options trades: with 25-point increments as the exercise price unit, an exercise price at-the-money and consecutive eight (8) exercise prices above or below the at-the-money exercise price.

(4) Notwithstanding paragraph (3), on the first trading day of each expiration month for KOSPI200 option trades and Mini KOSPI200 option trades, an exercise price shall additionally be introduced in accordance with the following subparagraphs, and then the exercise price pursuant to paragraph (3)1 [excluding item (d)] or paragraph (3)2 shall additionally be introduced : (Amended on November 25, 2021)

1. For KOSPI200 option trades: additional exercise prices that are integral multiple of 2.5 points within the range of the existing exercise prices set with 5-point increments shall be introduced to the third (3rd) nearest expiration month, and when the trade of half-yearly expiration months begins, additional exercise prices that are integral multiple of 5 points within the range of the existing exercise prices set with 10-point increments shall be added to the eighth (8th) nearest expiration month; and

2. For Mini KOSPI200 option trades: additional exercise prices that are integral multiple of 2.5 points within the range of the existing exercise prices set with 5-point increments shall be introduced to the third (3rd) nearest expiration month

(5) Notwithstanding paragraphs (1) through (4), the Exchange may change the number of exercise price or exercise price unit if it is deemed necessary for the market management. (Amended on August 28, 2014)

§6-2. Multipliers and Quotation Price Units

(1) Pursuant to [§19] of the Regulation, the multipliers of stock index options shall be the figures classified in each of the following subparagraphs: (Amended on March 15, 2018)

1. For KOSPI 200 options trades: 250,000;
2. For Mini KOSPI 200 options trades: 50,000; and
3. For KOSDAQ 150 options trades: 10,000.

(2) Pursuant to [§19] of the Regulation, the quotation price units of stock index options shall

be as noted in each of the following subparagraphs:(Amended on July 3, 2015; November 26, 2015; March 15, 2018)

1. For KOSPI200 options, the figures classified in each of the following items:

- (a) For the quotation prices less than ten (10) points: 0.01 points; and
- (b) For the quotation prices of ten (10) points or more: 0.05 points.

2. For Mini KOSPI200 options, the figures classified in each of the following items:

- (a) For the quotation prices less than three (3) points: 0.01 points;
- (b) For the quotation prices of three (3) or more and less than ten (10) points: 0.02 points; and
- (c) For the quotation prices of ten (10) points or more: 0.05 points.

3. For KOSDAQ 150 options, the figures classified in each of the following items:

- (a) For the quotation prices less than fifty (50) points: 0.1 points; and
- (b) For the quotation prices of fifty (50) points or more: 0.5 points.

(Wholly amended on March 13, 2017)

§7. Last Trading Day, Option Exercise Settlement Day and Base Price of Option Exercise Settlement, etc.

(1) Pursuant to [§21(2)] of the Regulation, the last trading day of stock index options shall be as classified in each of the following subparagraphs: (Amended on July 30, 2019; June 29, 2023)

1. For delivery month trades: Second Thursday of an expiration month (it shall be moved forward sequentially if it falls on a market holiday); and

2. For delivery week trades: The day falling under any of the followings:

- (a) Monday of delivery week (if it falls on a market holiday, it shall be moved backward sequentially); and
- (b) Thursday of delivery week (if it falls on a market holiday, it shall be moved forward sequentially).

(2) Pursuant to [§21(2)] of the Regulation, the stock index options shall be exercised only on the last trading day of expiration month.

(3) Pursuant to [§21(2)] of the Regulation, the settlement day for the options exercised (referred to as “option exercise settlement day”) shall be the next trading day following the option exercise day.

(4) The base price for exercise settlement of stock index options under [§21(2)] of the Regulation shall be the closing value of the relevant stock price index on the option exercise day. Provided that, if there is no such relevant stock price index or it is not possible to calculate the relevant stock price index on the option exercise day, it shall be the value of special final settlement price. (Amended on March 15, 2018)

(Wholly amended on August 28, 2014)

Section 3. Trading of Volatility Index Futures

[November 3, 2014]

§7-2. Underlying Assets

“Volatility indices specified in the Enforcement Rules” in [§21-2] of the Regulation shall refer to V-KOSPI 200 (referring to an index that is calculated by the Exchange to indicate the volatility of KOSPI 200 of a certain future period of time using the prices of the delivery month contracts, etc. listed on the KOSPI 200 options market; the same hereinafter). [March 13, 2017]

§7-3. Delivery Months, etc.

(1) Pursuant to [§21-3] of the Regulation, the delivery months of volatility index futures shall be every month. [March 13, 2017]

(2) Pursuant to [§21-3] of the Regulation, the number of delivery months of volatility index futures shall be six (6) consecutive months. (Amended on March 13, 2017)

(2) Pursuant to [§21-3] of the Regulation, the trading period of each delivery month of volatility index futures shall be six (6) months. (Amended on March 13, 2017)

[November 3, 2014]

§7-4. Multipliers and Quotation Price Units

(1) Pursuant to [§21-4] of the Regulation, the multiplier of volatility index futures shall be 250,000.

(2) Pursuant to [§21-4] of the Regulation, the quotation price unit of volatility index futures shall be 0.05 points.

(Wholly amended on March 13, 2017)

§7-5. Last Trading Day, Last Settlement Day and Final Settlement Price

(1) Pursuant to [§21-5(2)] of the Regulation, the last trading day of volatility index futures shall be the day before thirty (30) days counting retroactively from the day to which the regular

trading hours of the last trading day of KOSPI 200 options (excluding delivery week trades) belong in the month following the expiration month (it shall be moved forward sequentially if it falls on a holiday of the regular trading market; the same hereinafter in this Article). (Amended on July 30, 2019; May 29, 2025)

(2) Pursuant to [§21-5(2)] of the Regulation, the final settlement day of volatility index futures shall be the business day following the last trading day. (Amended on May 29, 2025)

(3) Pursuant to [§21-5(2)] of the Regulation, the final settlement price of volatility index futures shall be the closing value of V-KOSPI 200 on the last trading day.

[November 3, 2014]

Section 4. Trading of Single Stock Futures

(Amended on November 3, 2014)

§8. Selection of Underlying Stocks

(1) “Those stocks that are specified in the Enforcement Rules” in [§22(1)1] of the Regulation shall be the stocks that are selected by the Exchange (hereinafter referred to as the “underlying stocks”) from among the stocks that fall under each of the following subparagraphs: (Amended on April 5, 2024; November 1, 2024)

1. Constituent stocks of KOSPI 200;
2. Constituent stocks of the KOSDAQ 150; or (Amended on April 9, 2026)
3. In addition, stocks recognized by the Exchange as equivalent to those in subparagraphs 1 or 2 considering trade demand, etc.

(2) Pursuant to [§22(2)] of the Regulation, the Exchange may select stocks falling under any of the subparagraphs of paragraph (1) as underlying stocks as of the last trading day of June delivery month contract or December delivery month contract of KOSPI200 futures (hereinafter referred to as the “base date for selection of underlying stocks”).

(3) In addition to the selection of underlying stocks in accordance with paragraph (2), the Exchange may, in the case of falling under any of the following subparagraphs, select stocks (in case of subparagraph 2, it is limited to re-listed stocks) falling under any of subparagraphs of paragraph (1) as of a date set by the Exchange separately as underlying stocks:

1. In the case where it is deemed necessary, such as rebalancing of constituent stocks of a stock price index, trading demand, etc.; or
2. In the case where a cause under [§8-2(1)2] occurs.

(4) Notwithstanding paragraphs (1) through (3), the Exchange may not select stocks that are deemed inappropriate to be selected as underlying stocks in view of market management in consideration of the business continuity, management stability, listing eligibility, investor

protection, etc. of the corporations that issued the stocks.

(Wholly amended on June 29, 2023)

§8-2. Exclusion of Underlying Stocks

(1) Pursuant to [§22(2)] of the Regulation, the Exchange may exclude the stocks that fall under each of the following subparagraphs from underlying stocks as of the base date for the selection of underlying stocks: (Amended on April 5)

1. Cases that do not fall under any of the subparagraphs of [§8(1)]; (Amended on April 6, 2026)
2. Cases that do not fall under any of the subparagraphs of [§8(1)] due to a listing change, a transfer listing, etc.;
3. Cases that are designated as administrative issues, or cases where a cause of delisting (including the case of being determined to be subject to the listing maintenance review; the same hereinafter) occurs; and
4. Other cases where the Exchange deems necessary to exclude from underlying stocks in consideration of market management and investor protection, etc.

(2) In addition to the exclusion of underlying stocks pursuant to paragraph (1), the Exchange may, in the case of any event falling under any of the subparagraphs of paragraph (1), exclude the stocks to which the relevant event has occurred as of a date determined by the Exchange separately from underlying stocks.

(3) Notwithstanding paragraphs (1) and (2), the Exchange may maintain stocks deemed inappropriate to be excluded from underlying stocks for market management in consideration of trading demand, investor protection, etc. as underlying stocks.

(Wholly amended on June 29, 2023)

§8-3. [Deleted on June 29, 2023]

§8-4. Delivery Months, etc.

(1) Pursuant to [§24] of the Regulation, the delivery months of single stock futures shall be every month. [March 13, 2017]

(2) Pursuant to [§24] of the Regulation, the total number of delivery months of single stock futures shall be six (6) in total - two (2) from the non-quarterly months and four (4) from the quarterly months. (Amended on October 28, 2015; April 5, 2024)

(3) The trading periods of delivery months of single stock futures pursuant to [§24] of the Regulation shall be the periods classified in each of the following subparagraphs: (Amended

on October 28, 2015; April 5, 2024)

1. For the contracts in non-quarterly months, three (3) months; and
2. For the contracts in quarterly months, one (1) year.
3. [Deleted on April 5, 2024]
4. [Deleted on April 5, 2024]

[August 28, 2014]

§8-5. Multipliers

Pursuant to [§25(1)] of the Regulation, the multiplier of single stock futures shall be set at 10. [March 13, 2017]

§9. Adjustment of Multipliers

(1) Pursuant to the main sentence of [§25(2)] of the Regulation, the multiplier of single stock futures shall be adjusted in accordance with the methods specified in each of the following subparagraphs. In such cases, the adjusted multiplier shall be rounded off at the 9th decimal place. (Amended on August 28, 2014)

1. In the case of ex-dividend, etc. noted in the main sentence of [§25(2)] of the Regulation, (hereinafter referred to as the “ex-dividend, etc.”): The value calculated using the following calculation method:

$\text{Multiplier before adjustment} \times (\text{Closing price of underlying stock on immediately preceding trading day} \div \text{Adjusted base price of underlying stock})$

2. Additionally, if it is deemed necessary to adjust the multiplier: The value determined by the Exchange for each case

(2) “Adjusted base price of underlying stock” in paragraph (1) shall, when adjusting the base price of underlying stock pursuant to [§30] of the Enforcement Rules of the KOSPI Market Business Regulation or [§17] of the Enforcement Rules of the KOSDAQ Market Business Regulation due to ex-dividend, etc., into the price other than the closing price of the immediately preceding trading day, be the price (rounded off at the 9th decimal place: hereinafter referred to as “the adjusted base price of underlying stock”) determined by applying the calculation method for the corresponding base price. (Amended on August 21, 2009; July 8, 2013; August 28, 2014; November 3, 2014; December 24, 2014; July 3, 2015; May 29, 2025)

(3) Notwithstanding paragraph (2), when it is deemed necessary for market management, the Exchange may change the adjusted base prices of underlying stocks.

§10. Adjustment of Quantity of Open Interests

Pursuant to [§25(3)] of the Regulation, the number of open interests of single stock futures shall be adjusted according to the method specified in each of the following subparagraphs: (Amended on August 28, 2014; July 3, 2015)

1. In cases where the underlying stock splits up in the integral multiples: The quantity resulting from multiplying the quantity of open interests of Single Stock Futures by the relevant integral multiple; and
2. Additionally, in cases where it is deemed necessary for the market management: The quantity determined by the Exchange for each case.

§10-2. Quotation Price Unit

Pursuant to [§25(4)] of the Regulation, quotation price units of single stock futures shall be prices classified in each of the following subparagraphs: (Amended on December 21, 2022)

1. In cases where the quotation price is less than KRW 2,000: KRW 1;
2. In cases where the quotation price is higher than KRW 2,000, but less than KRW 5,000: KRW 5;
3. In cases where the quotation price is higher than KRW 5,000, but less than KRW 20,000: KRW 10;
4. In cases where the quotation price is higher than KRW 20,000, but less than KRW 50,000: KRW 50;
5. In cases where the quotation price is higher than KRW 50,000, but less than KRW 200,000: KRW 100;
6. In cases where the quotation price is higher than KRW 200,000, but less than KRW 500,000: KRW 500; and
7. In cases where the quotation price is higher than KRW 500,000: KRW 1,000.

[Wholly amended on March 21, 2016]

§11. Last Trading Day, Final Settlement Day and Final Settlement Price

(1) The last trading day of single stock futures referred to in [§27(2)] of the Regulation shall be the second Thursday of the delivery month (shall be moved forward sequentially if it is a market holiday) [August 28, 2014]

(2) The final settlement day of single stock futures referred to in [§27(2)] of the Regulation shall be the trading day following the last trading day. [August 28, 2014]

(3) The final settlement price of single stock futures referred to in [§27(2)] of the Regulation shall be the closing price of the underlying stock on the last trading day. Provided that, in cases

where there is no such closing price of the underlying stock on the last trading day, it shall be the base price of the underlying stock of the last trading day. [August 28, 2014]

(4) In the case where any of the following subparagraphs occurs in the underlying stock, the Exchange shall, notwithstanding paragraph (1), change the last trading day of single stock futures of the relevant underlying stock in accordance with the provision of the relevant subparagraph. Provided, the single stock futures for an underlying stock for which the reasons in subparagraphs 1 and 3 occur from the close of the market on the trading day immediately preceding the last trading day to within the last trading day are excluded: (Amended on July 3, 2015; April 5, 2024; May 29, 2025)

1. In cases where trading is suspended due to the occurrence of reasons for delisting: The last trading date of all single stock futures contracts based on an underlying stock is changed to the trading day on which trading of the underlying stock is resumed; (Amended on May 29, 2025)

2. In cases where trading is suspended for electronic registration of new, changed, or cancelled underlying stocks subsequent to the decision on corporate spin-off, merger and capital reduction (referring to cases where paid-in capital is reduced due to reverse stock-split or stock retirement for stocks held by minority shareholders), stock swap or transfer (referring to the case of delisting of underlying stocks due to stock swap or transfer), etc.: The last trading day of all single stock futures contracts based on an underlying stock is changed to the trading day immediately preceding the trading day on which trading of the underlying stock is suspended; (Amended on May 29, 2025)

3. In cases where the trading is suspended due to the designation of administrative issue, investment risk issue, investment alert issue, and unfaithful disclosure corporation, stock split and reverse stock split (referring to cases where paid-in capital is not reduced), request for inquired disclosure, etc.: The last trading day of single stock futures contracts of which the last trading day arrives during the period of trading suspension of an underlying stock is changed to the trading day on which trading of the underlying stock is resumed; (Amended on May 29, 2025)

4. In cases where an underlying stock is excluded pursuant to [§8-2(1)]: The last trading day of far month contract is changed to the second Thursday of the delivery month separately announce by the Exchange (if it is a holiday, it is sequentially brough forward); and

5. In other cases where the Exchange deems it necessary for market management: Changed to a trading day determined by the Exchange for each case. (Amended on May 29, 2025)

(5) In cases where the last trading day of single stock futures is changed pursuant to each subparagraph in paragraph (4), the first trading day of new delivery month shall be the first trading day after the changed last trading day. Provided that, in the case of underlying stock that uses the first execution price as the base price, the trading day next to the trading day of determining the first price of the relevant stock shall be the first trading day of the new delivery month. (Amended on August 21, 2009; July 8, 2013; August 28, 2014; May 29, 2025)

(6) Notwithstanding paragraphs (4)1 through (4)4, when it is deemed necessary for the market management, the Exchange may change the last trading day to the trading day other than

trading days specified in paragraphs (4)1 through (4)4. (Amended on August 28, 2014; May 29, 2025)

§12. [Deleted on August 28, 2014]

Section 5. Trading of Single Stock Options (Amended on November 3, 2014)

§13. Selection Criteria for Underlying Stocks

(1) “Underlying stocks stipulated in [§28(1)] of the Regulation” shall refer to the stocks selected by the Exchange from among those falling under any of each subparagraph of [§8(1)].

(2) Pursuant to [§28(2)] of the Regulation, [§8(2) through (4)] shall apply *mutatis mutandis* to the selection of the underlying stocks for single stock options and [§82] shall apply *mutatis mutandis* to the exclusion from the underlying stocks for single stock options.

(Wholly amended on June 29, 2023)

§13-2. Expiration Months, etc.

(1) Pursuant to [§30(1)] of the Regulation, the expiration months of volatility index futures shall be every month. [March 13, 2017]

(2) Pursuant to [§30(1)] of the Regulation, the number of expiration months of single stock options shall be six (6) in total -four (4) from the quarterly months and two (2) from non-quarterly months. (Amended on March 13, 2017; August 17, 2018)

(2) Pursuant to [§30(1)] of the Regulation, the trading periods of each expiration month of single stock options shall be the periods classified in each of the following subparagraphs:(Amended on March 13, 2017; August 17, 2018)

1. For the non-quarterly month contracts, three (3) months; and
2. For the quarterly month contracts, one (1) year.
3. [Deleted on August 17, 2018]
4. [Deleted on August 17, 2018]

[November 3, 2014]

§13-3. Expiration Week, etc.

(1) “Single stock options trades specified in the Enforcement Rules” in [§30(2)] of the Regulation shall refer to single stock options trades based on underlying assets of stocks selected pursuant to [§13(1)].

(2) Pursuant to the latter part of [§30(3)] of the Regulation, the expiration week of a single stock options trade shall be every week.

(3) For expiration week trades, Thursday shall be the trade commencement day and the following Thursday shall be the last trading day. In this case, if the trade commence day or the final trading day falls on a market holiday, it shall be moved forward sequentially.

(4) Notwithstanding paragraph (3), the expiration week trade that falls under any of the followings shall not be commenced:

1. Expiration week trade in case where the last trading day is the same as the last trading day of the expiration month trade: or
2. Expiration week trade in case where the trade commence day is the same as the last trading day and thus the trading period is one (1) trading day.

[June 11, 2026]

§14. Establishment of Exercise Prices

(1) Pursuant to [§30(4)] of the Regulation, the number of exercise prices of each expiration week or month of single stock options shall be at least the number in the following subparagraphs. In this case, the exercise price adjusted pursuant to [§15(1) and (2)] is not included in the number. (Amended on April 5, 2024; June 11, 2026)

1. For the expiration week contract and the nearest month contract through the third nearest month contract: Nine (9). In this case, it consists of the at-the -money price (if there is an ex-dividend, etc., the base price of an underlying asset of the immediately preceding trading day shall be the adjusted base price of underlying stock; hereinafter the same in this Article) and each four (4) prices above and below the at-the-money price; and (Amended on May 29, 2025; June 11, 2026)

2. For the fourth nearest month contract through the sixth nearest month contract: Three (3). In this case, it consists of the at-the -money price and each one (1) price above and below the at-the-money price.

(2) Pursuant to [§30(4)] of the Regulation, on the first trading day of each expiration week trade or expiration month trade of single stock options contract, an at-the-money exercise price and upper and lower exercise prices consecutive to the at-the-money exercise price shall be set until they reach the upper and lower limits of the exercise price setting range (referring to the upper and lower ranges set according to Appendix 2; hereinafter the same in this Article), using the price specified in each of the following subparagraphs as the exercise price unit. Provided

that the exercise price units of the nearest fourth month contract through the nearest sixth month contract shall be four (4) times the price determined in the following subparagraphs: (Amended on August 17, 2018; April 5, 2024; June 11, 2026)

1. In cases where the exercise price is less than KRW 5,000: KRW 100;
2. In cases where the exercise price is KRW 5,000 or higher, but less than KRW 10,000: KRW 200;
3. In cases where the exercise price is KRW 10,000 or higher, but less than KRW 20,000: KRW 500;
4. In cases where the exercise price is KRW 20,000 or higher, but less than KRW 50,000: KRW 1,000;
5. In cases where the exercise price is KRW 50,000 or higher, but less than KRW 100,000: KRW 2,000;
6. In cases where the exercise price is KRW 100,000 or higher, but less than KRW 200,000: KRW 5,000;
7. In cases where the exercise price is KRW 200,000 or higher, but less than KRW 500,000: KRW 10,000;
8. In cases where the exercise price is KRW 500,000 or higher, but less than KRW 1,000,000: KRW 20,000; and
9. In cases where the exercise price is KRW 1,000,000 or higher: KRW 50,000.

(3) Pursuant to [§30(4)] of the Regulation, if, based on the exercise price unit pursuant to paragraph 2, there is a trading day with an exercise price that is not set, among the at-the-money exercise price and other consecutive exercise prices that are up or down from the at-the-money exercise price to the upper and lower limits of the exercise price setting range, after the next trading day following the first trading day of each expiration week trade or expiration month trade of single stock options contract, the exercise price that is not set shall be set additionally. (Amended on November 3, 2014; August 17, 2018; April 5, 2024; June 11, 2026)

(4) If the number of exercise prices does not meet the criteria under any of subparagraphs of paragraph (1) even though the exercise prices for each expiration week trade or expiration month trade of stock options contract are set according to paragraph (2) or (3), exercise price shall be additionally set according to the method in paragraph (2) or (3) until the criteria are met. In this case, the exercise price setting range shall not apply. [April 5, 2024] (Previous paragraph (4) moved to paragraph (5) on April 5, 2024; June 11, 2026)

(5) Notwithstanding paragraphs (1) through (4), when it is deemed necessary for market management, the Exchange may change the number of exercise prices and exercise price units. (Amended on November 3, 2014; April 5, 2024) (Moved from paragraph (4) on April 5, 2024)

§15. Adjustment of Exercise Price

(1) Pursuant to [§30(4)] of the Regulation, on trading days when the base prices of an underlying stocks are adjusted due to ex-dividend, etc., the exercise prices of the relevant underlying stocks shall be adjusted. [November 3, 2014] (Amended on May 29, 2025; June 11, 2026)

(2) Pursuant to paragraph (1), the exercise prices of single stock options shall be adjusted in accordance with the methods noted in each of the following subparagraphs. In such cases, the exercise prices shall be rounded off at the 9th decimal place: (Amended on November 3, 2014)

1. In the case of going ex-dividend, etc., the price calculated by using the following formula:

Exercise price before adjustment $\times$ (Adjusted base price of underlying stock $\div$ Closing price of underlying stock on immediately preceding trading day) (Amended on November 3, 2014; May 29, 2025)

2. Other cases where it is deemed necessary to adjust the exercise price: The price determined by the Exchange in each case.

(3) Notwithstanding the latter part of paragraph (2) other than each subparagraph, the adjusted exercise prices of single stock options shall be rounded off at the unit of KRW 10 and expressed in the unit of KRW 100. In such cases, if there are exercise prices that are expressed identically, such exercise prices shall be expressed after sequentially rounding off at the unit of KRW 1 and the 1st decimal place, etc. until the different exercise prices are attained. (Amended on November 3, 2014)

(4) For the exercise price adjusted according to paragraphs (1) and (2), the exercise prices shall not be established additionally. [November 3, 2014]

§15-2. Multipliers

Pursuant to [§35(1)] of the Regulation, the multiplier of single stock options shall be set at 10. [March 13, 2017]

§16. Adjustment of Multipliers

Pursuant to the main sentence of [§35(2)] of the Regulation, the multiplier of single stock options shall be adjusted by applying each subparagraph of [§9(1)] *mutatis mutandis*. In such cases, the multiplier being adjusted shall be rounded off at the 9th decimal place. (Amended on November 3, 2014)

§17. Adjustment of Quantity of Open Interests

Pursuant to [§35(3)] of the Regulation, the number of open interests of single stock options shall be adjusted by applying each subparagraph of [§10] *mutatis mutandis*. (Amended on November 3, 2014)

§18. Special Setting of Exercise Price

(1) Pursuant to [§35(4)] of the Regulation, special setting of exercise price of single stock options on the trading day of ex-dividend, etc. and the additional setting of exercise price from the trading day following the special setting day shall be conducted by applying [§14] *mutatis mutandis*. (Amended on April 5, 2024; May 29, 2025)

(2) [Deleted on April 5, 2024]

(Wholly amended on November 3, 2014)

§18-2. Quotation Price Units

Pursuant to [§35(5)] of the Regulation, the quotation price units of single stock options shall be as noted in each of the followings:

1. For the quotation prices less than KRW 1,000: KRW 10;
2. For the quotation prices higher than KRW 1,000, but less than KRW 2,000: KRW 20;
3. For the quotation prices higher than KRW 2,000, but less than KRW 5,000: KRW 50;
4. For the quotation prices higher than KRW 5,000, but less than KRW 10,000: KRW 100;
- and
5. For the quotation prices higher than KRW 10,000: KRW 200.

[November 3, 2014]

§19. Last Trading Day, Exercise Settlement Day and Base Price for Exercise Settlement, etc.

(1) Pursuant to [§37(2)] of the Regulation, the last trading day of single stock options shall be classified as follow: (Amended on November 3, 2014; June 11, 2026)

1. For expiration month trades: The second Thursday of the expiration month (it shall be moved forward sequentially if it falls on a market holiday); and [June 11, 2026]
2. For expiration week trades: Thursday of the expiration week, excluding the last trading day of the expiration month trades (it shall be moved forward sequentially if it falls on a market holiday). [June 11, 2026]

(2) Pursuant to [§37(2)] of the Regulation, the type of options exercise of single stock options shall be the type where options can be exercised only on the last trading day. [November 3, 2014]

(3) Pursuant to [§37(2)] of the Regulation, the option exercise settlement day of single stock options shall be the trading day following the option exercise day. [November 3, 2014]

(4) Pursuant to [§37(2)] of the Regulation, the base price for option exercise settlement of shall

the closing price of underlying stock on the option exercise day. Provided that, in cases where there is no closing price of underlying stock on the option exercise day, it shall be the base price for underlying stock on the option exercise day. [November 3, 2014]

(5) Notwithstanding paragraph (1), when it is deemed necessary for the market management, including the case of suspending the trading of underlying stocks, the Exchange may change the last trading day and the first trading day of single stock options by applying [§11(4) through (6)] of the Regulation *mutatis mutandis*. [November 3, 2014]

(Wholly amended on November 3, 2014)

§20. [Deleted on November 3, 2014]

Section 6. Trading of ETF Futures

[June 15, 2017]

§20-2. Underlying Assets

(1) “ETFs that are specified in the Enforcement Rules” in [§37-2] of the Regulation shall refer to the ETFs that are set forth in [Annex 1-4] (hereinafter referred to as the “underlying ETFs”) taking into account such factors as market capitalization, etc. from among the ETFs that meet all of the requirements noted in each of the following subparagraphs (referring to the EFT securities under subparagraph 3 of [§99] of the KOSPI Market Listing Regulation; the same hereinafter) as of the base date for selection of underlying ETFs. (Amended on March 15, 2018)

1. It shall be listed on the stock markets. Provided that the ETFs that are not eligible to be substitute securities pursuant to the KOSPI Market Business Regulation shall be excluded;

2. The number of times designated as an administrative issue pursuant to [§115] of the KOSPI Market Listing Regulation within the thirty-six (36) months retroactive from the month immediately preceding the month in which the base date for selection of underlying ETFs falls (referred to as the “latest month” hereinafter in this Article) shall be one (1) or less;

3. The number of units issued shall be one million (1,000,000) or more; and

4. The annual trading value in the stock markets shall be KRW 50 billion or more.

(2) The market capitalization noted in paragraph (1) shall be the average monthly market capitalization for twelve (12) months retroactive from the immediately preceding month. In such cases, the market capitalization of each month shall be the amount obtained by multiplying the closing prices of ETFs on the last trading day (referring to trading day of the stock market) of each month by the number of units issued. (Amended on May 29, 2025)

(3) The annual trading value noted in paragraph (1)4 shall be the trading value for the twelve

(12) months retroactive from the latest month. In such cases, the trading value of an ETF that was listed during that period shall be calculated by converting the trading value after the listing date into the trading value of twelve (12) months.

[June 15, 2017]

§20-3. Delivery Months, etc.

(1) The delivery months of ETF futures pursuant to in [§37-3] of the Regulation shall be the quarterly months.

(2) The number of delivery months of ETF futures pursuant to in [§37-3] of the Regulation shall be four (4).

(3) The trading period of each delivery month of ETFs futures pursuant to in [§37-3] of the Regulation shall be one (1) year.

[June 15, 2017]

§20-4. Multipliers and Quotation Price Units

(1) The multiplier of ETF futures pursuant to in [§37-4(1)] of the Regulation shall be set at 100.

(2) The quotation price unit of ETF futures pursuant to [§37-4(4)] of the Regulation shall be the price in each of the following subparagraphs: (Amended on November 24, 2023)

1. In cases where the quotation price is less than KRW 2,000: KRW 1; and

2. In cases where the quotation price is KRW 2,000 or higher: KRW 5;

[June 15, 2017]

§20-5. Last Trading Day, Final Settlement Day and Final Settlement Price

(1) The last trading day of ETF futures noted in [§37-5(2)] of the Regulation shall be the second Thursday of the delivery month (if it falls on a market holiday, it shall be moved forward sequentially).

(2) The final settlement day of ETF futures noted in [§37-5(2)] of the Regulation shall be the trading day following the last trading day.

(3) The final settlement price of ETF futures noted in [§37-5(2)] of the Regulation shall be the closing price of the underlying ETF on the last trading day. Provided that, in cases where there is no such closing price of the underlying ETF on the last trading day, it shall be the base price of the underlying ETF of the last trading day.

(4) In the case of falling under each of the following subparagraphs, the Exchange shall,

notwithstanding paragraph (1), change the last trading day of ETF futures to the trading day set forth in the applicable subparagraph: (Amended on May 29, 2025)

1. In cases where an underlying EFT is delisted and the last trading day of the ETF futures underlying the relevant ETF arrives after two (2) business days immediately preceding the delisting date: The two (2) business days immediately preceding the delisting date of the underlying ETF; and (Amended on May 29, 2025)

2. In other cases where the Exchange deems it necessary for market management: The trading day determined by the Exchange for each case. (Amended on May 29, 2025)

[June 15, 2017]

CHAPTER 3. TRADING OF INTEREST RATE FUTURES

(Amended on August 28, 2014)

Section 1. KTB Futures

[February 16, 2022]

§20-6. Underlying Assets and Trading Units

(1) “Deliverable grade KTBs specified in the Enforcement Rules” in [§38(1)] of the Regulation shall refer to the deliverable grade KTBs classified in each of the following subparagraphs: (Amended on February 5, 2024)

1. For 3-year KTB futures: Deliverable grade KTBs with a face value of KRW 100, a maturity of 3 years, a coupon rate of 5 percent per annum, and interest-payments on a semiannual basis;

2. For 5-year KTB futures: Deliverable grade KTBs with a face value of KRW 100, a maturity of 5 years, a coupon rate of 5 percent per annum, and interest-payments on a semiannual basis;

3. For 10-year KTB futures: Deliverable grade KTBs with a face value of KRW 100, a maturity of 10 years, a coupon rate of 5 percent per annum, and interest-payments on a semiannual basis; and

4. For 30-year KTB futures: Deliverable grade KTBs with a face value of KRW 100, a maturity of 30 years, a coupon rate of 5 percent per annum, and interest-payments on a semiannual basis.

(2) Pursuant to [§38(2)] of the Regulation, the trading unit of KTB futures shall be face value of KRW 100 million.

[March 13, 2017]

§20-7. Delivery Months, etc.

(1) Pursuant to [§39] of the Regulation, the delivery months of KTB futures shall be the quarterly months. [March 13, 2017]

(2) Pursuant to [§39] of the Regulation, the number of delivery months of KTB futures shall be two (2). (Amended on March 13, 2017)

(3) Pursuant to [§39] of the Regulation, the trading period of each delivery month of KTB futures shall be six (6) months. (Amended on March 13, 2017)

[August 28, 2014]

§20-8. Multipliers, Quotation Price Units and Methods of Quoting Prices

(1) Pursuant to [§40] of the Regulation, the multiplier of KTB futures shall be one (1) million. [March 13, 2017]

(2) Pursuant to [§40] of the Regulation, the quotation price unit of KTB futures shall be each of the following subparagraphs: (Amended on February 5, 2024)

1. For 3-year KTB futures, 5-year KTB futures, and 10-year KTB futures: 0.01; and
2. For 30-year KTB futures: 0.02.

(3) Pursuant to [§40] of the Regulation, the prices of KTB futures shall be quoted in Korean currency per face value of KRW 100. (Amended on March 13, 2017)

[August 28, 2014]

§20-9. Last Trading Day, Final Settlement Day, Final Settlement Price, etc.

(1) Pursuant to [§42(2)] of the Regulation, the last trading day of KTB futures shall be the third Tuesday of the delivery month (it shall be moved forward sequentially, if it is a market holiday) (Amended on March 13, 2017)

(2) Pursuant to [§42(2)] of the Regulation, the final settlement day of KTB futures shall be the trading day following the last trading day. (Amended on March 13, 2017)

(3) Pursuant to [§42(2)] of the Regulation, the final settlement price of KTB futures shall be the amount calculated (to be rounded off at the third decimal place) according to each of the

following subparagraphs. In such cases, “*r*” in the formula in each of the following subparagraphs shall be the settlement yield of the underlying basket bonds for final settlement. (Amended on March 13, 2017; February 5, 2024)

1. For 3-year KTB futures:

$$\text{Final settlement price} = \sum_{i=1}^6 \frac{5/2}{(1+r/2)^i} + \frac{100}{(1+r/2)^6}$$

2. For 5-year KTB futures:

$$\text{Final settlement price} = \sum_{i=1}^{10} \frac{5/2}{(1+r/2)^i} + \frac{100}{(1+r/2)^{10}}$$

3. For 10-year KTB futures:

$$\text{Final settlement price} = \sum_{i=1}^{20} \frac{5/2}{(1+r/2)^i} + \frac{100}{(1+r/2)^{20}}$$

4. For 30-year KTB futures:

$$\text{Final settlement price} = \sum_{i=1}^{60} \frac{5/2}{(1+r/2)^i} + \frac{100}{(1+r/2)^{60}}$$

(4) The underlying basket bonds for final settlement in the latter part of paragraph (3) shall be the KTBs paying interests on a semiannual basis, which the Exchange designates on the trading day immediately preceding the first trading day of the relevant delivery month. (Amended on May 29, 2025)

(5) The settlement yield in the latter part of paragraph (3) shall be determined by averaging the yields of underlying basket bonds in each of following subparagraphs, which are published by the Korea Financial Investment Association and rounded off at the 4th decimal place. In such cases, if there is more than one underlying basket bonds for final settlement, the yield shall be the average of yields of those underlying basket bonds for final settlement, which is rounded off at the 4th decimal place.

1. The yields as at 11:30 hours on the last trading day; and
2. The yields as at 10:00 hours, 10:30 hours and 11:00 hours on the last trading day, excluding the highest and lowest values.

[August 28, 2014. 2014]

§21. ~ §25. [Deleted on October 20, 2010]

Section 2. Short-term Interest Rate Futures

[February 16, 2022]

§25-2. Underlying Assets and Trading Units

(1) The “interest rate specified in the Enforcement Rules” in [§43-2(1)] of the Regulation shall, in the case of 3-month risk free benchmark interest rate, refer to the interest rate obtained by compounding for 3 months (hereinafter referred to as the “KOFR 3-month compound interest rate”) the Korea risk free interest rate (hereinafter referred to as the “benchmark interest rate”, which is expressed as percentage and replaced with an interest rate if the Korea Securities Depository publishes the substitute interest rate) produced by the Korea Securities Depository (hereinafter referred to as the “KSD”).

(2) Pursuant to [§43-2(2)] of the Regulation, the trading unit of 3-month risk free benchmark interest rate futures shall be KRW 1 billion.

[February 16, 2022]

§25-3. Delivery Months, etc.

(1) Pursuant to [§43-3] of the Regulation, the delivery months of 3-month risk free benchmark interest rate futures shall be every month.

(2) Pursuant to [§43-3] of the Regulation, the number of delivery months of 3-month risk free benchmark interest rate futures shall be eight (8) in total - four (4) from non-quarterly months and four (4) from quarterly months.

(3) Pursuant to [§43-3] of the Regulation, the trading periods of each delivery month of the 3-month risk free benchmark interest rate futures shall be six (6) months for non-quarterly month contracts and one (1) year for quarterly month contracts.

[February 16, 2022]

§25-4. Multipliers, Quotation Price Units and Methods of Quoting Prices

(1) Pursuant to [§43-4] of the Regulation, the multipliers of 3-month risk free benchmark interest rate futures shall be 2.5 million.

(2) Pursuant to [§43-4] of the Regulation, the quotation price unit of 3-month risk free benchmark interest rate futures shall be 0.005.

(3) Pursuant to [§43-4] of the Regulation, the price of 3-month risk free benchmark interest rate futures is expressed as 100 minus the KOFR 3-month compound interest rate.

§25-5. Last Trading Day, Final Settlement Day and Final Settlement Price, etc.

(1) Pursuant to [§43-5(2)] of the Regulation, the last trading day of 3-month risk free benchmark interest rate futures shall be the business day immediately preceding the third

Wednesday of the delivery month. (Amended on May 29, 2025)

(2) Pursuant to [§43-5(2)] of the Regulation, the final settlement day of 3-month risk free benchmark interest rate futures shall be the third business day counting from last trading day. (Amended on May 29, 2025)

(3) Pursuant to [§43-5(2)] of the Regulation, the final settlement price of 3-month risk free benchmark interest rate futures shall be 100 minus the KOFR 3-month compound interest rate calculated according to the formula below. The KOFR 3-month compound interest rate shall be calculated using the fixed benchmark interest rate corresponding to the reference period (referring to the period from the third Wednesday of the month three months before the settlement month to the third Wednesday of the settlement month. In this case, the first day is included and the last day is excluded) and rounded to the fifth decimal place.

$$\text{KOFR 3-month compound interest rate} = \left[\frac{365}{N} \left\{ \prod_{i=1}^x \left(1 + \frac{R_i}{100} \times \frac{d_i}{365} \right) - 1 \right\} \right] \times 100$$

In such cases, “N” refers to the number of days during the reference period, “ $\prod_{i=1}^x$ ” refers to the multiplication of the first term to the xth term of the sequence, “x” refers to the number of base dates for calculating the benchmark interest rate for the reference period, “ R_i ” refers to the benchmark interest rate by base date for calculation, and “ d_i ” refers to the number of days ($\sum_{i=1}^x d_i = N$) applied to the benchmark interest rate by base date for calculation.

[February 16, 2022]

CHAPTER 4. TRADING OF CURRENCY DERIVATIVES

(Amended on August 28, 2014)

Section 1. Currency Futures

[November 3, 2014]

§25-6. Underlying Assets and Trading Units

(1) The “foreign currencies specified in the Enforcement Rules” in [§44(1)] of the Regulation shall refer to US dollar, Japanese Yen, EUR and Chinese Yuan.

(2) Pursuant to [§44(2)] of the Regulation, the trading units of currency futures shall be as

follows:

1. For USD futures: USD 10,000;
2. For JPY futures: JPY 1,000,000;
3. For EUR futures: EUR 10,000; and
4. For CNY futures: CNY 100,000.

[March 13, 2017]

§25-7. Delivery Months, etc.

(1) Pursuant to [§45] of the Regulation, the delivery months of currency futures shall be every month. [March 13, 2017]

(2) Pursuant to [§45] of the Regulation, the number of delivery months of currency futures shall be as follows: (Amended on June 20, 2016; March 13, 2017)

1. For USD futures: Twenty (20) in total -eight (8) from non-quarterly months and twelve (12) from quarterly months; and
2. For JPY futures, EUR futures and CNY futures: Eight (8) in total -four (4) from non-quarterly months and four (4) from quarterly months.

(3) Pursuant to [§45] of the Regulation, the trading periods of each delivery month of currency futures shall be as follows: (Amended on June 20, 2016; March 13, 2017)

1. For USD futures, the periods classified in each of the following items:
 - (a) For non-quarterly month contracts: One (1) year; and
 - (b) For quarterly month contracts: Three (3) years.
2. For JPY futures, EUR futures and CNY futures, the periods classified in each of the following items:
 - (a) For non-quarterly month contracts: Six (6) months; and
 - (b) For quarterly month contracts: One (1) year.

[August 28, 2014]

§25-8. Multipliers, Quotation Price Units and Methods of Quoting Prices

(1) Pursuant to [§46] of the Regulation, the multipliers of currency futures shall be as follows: [March 13, 2017]

1. For USD futures, JPY futures and EUR futures: 10,000; and
2. For CNY futures: 100,000.

(2) Pursuant to [§46] of the Regulation, the quotation price unit of currency futures shall be 0.10. Provided that, in the case of CNY futures, it shall be 0.01. (Amended on September 16, 2015; March 13, 2017)

(3) Pursuant to [§46] of the Regulation, the prices of currency futures shall be quoted by the methods classified in each of the following subparagraphs: (Amended on September 16, 2015; March 13, 2017)

1. For USD futures: Korean Won per USD 1;
2. For JPY futures: Korean Won per JPY 100;
3. For EUR futures: Korean Won per EUR 1; and
4. For CNY futures: Korean Won per CNY 1.

[August 28, 2014]

§25-9. Last Trading Day, Final Settlement Day and Final Settlement Price, etc.

(1) Pursuant to [§48(2)] of the Regulation, the last trading day of currency futures shall be the third Monday of the delivery month (it shall be moved forward sequentially, if it falls on a market holiday)

(2) Pursuant to [§48(2)] of the Regulation, the final settlement day of currency futures shall be the third trading day counting from last trading day.

(3) Pursuant to [§48(2)] of the Regulation, the final settlement amount of currency futures shall be calculated by the following formula:

Final settlement price × Final quantity × Multiplier

(4) Pursuant to [§48(2)] of the Regulation, the final settlement price of currency futures shall be the settlement price on the last trading day.

[August 28, 2014]

§26. [Deleted on August 21, 2009]

§27. Notification of Details of Delivery and Receipt

(1) Pursuant to [§48(3)] of the Regulation, the Exchange shall, after the market closing on the last trading day, notify the clearing members the details of delivery and receipt such as the final settlement quantity of currency futures traded, delivery and receipt amount of currency and the final settlement amount, etc. (Amended on July 8, 2013; August 28, 2014)

(2) When a clearing member has received the payment and receipt details of currency futures traded from the Exchange pursuant to paragraph (1), such clearing member shall notify non-

clearing members of the delivery and receipt details of the relevant non-clearing members without delay. (Amended on July 8, 2013)

§28. Delivery and Receipt of Currency and Settlement Amount

(1) Pursuant to [§48(3)] of the Regulation, the delivery and receipt of the currency and final settlement amount for the final settlement of currency futures shall be accomplished in a manner noted in each of the following subparagraphs: (Amended on December 30, 2009; July 8, 2013; August 28, 2014)

1. The clearing member who is obligated to deliver shall deliver the currency or final settlement amount to the Exchange by the physical delivery deadline noted in [§109] and the Exchange shall deliver the currency or final settlement amount to the clearing member (referring to the clearing member who has completed the delivery of the currency or final settlement amount that it is required to deliver) to whom they are due pursuant to [§105-2] of the Regulation; and

2. The designated clearing member and non-clearing member shall deliver the currency or final settlement amount according to [§104(3)] of the Regulation.

(2) The delivery and receipt of currency pursuant to paragraph (1) shall be accomplished by delivering or receiving the currency through the account with the settlement bank that has been opened for the trade settlement. (Amended on August 28, 2014)

Section 2. Currency Options

[November 3, 2014]

§28-2. Underlying Assets and Trading Units

(1) “Foreign currencies specified in the Enforcement Rules” in [§49(1)] of the Regulation shall refer to US dollar.

(2) Pursuant to [§49(2)] of the Regulation, the trading unit of currency options shall be USD 10,000.

[March 13, 2017]

§28-3. Expiration Months, etc.

(1) Pursuant to [§50(1)] of the Regulation, the expiration months of currency options shall be every month. [March 13, 2017]

(2) Pursuant to [§50(1)] of the Regulation, the number of expiration months of currency options shall be four (4) in total - two (2) from non-quarterly months and two (2) from quarterly months.

(3) Pursuant to [§50(1)] of the Regulation, the trading period of each expiration month of currency options shall be the periods classified in each of the following subparagraphs:

1. For the non-quarterly month contracts, three (3) months; and
2. For the quarterly month contracts, six (6) months.

[August 28, 2014]

§29. Establishment of Exercise Prices of Currency Options

(1) Pursuant to [§50(3)] of the Regulation, the number of exercise price of currency options listed on the first trading day of each expiration month shall be seven (7). [August 28, 2014]

(2) Pursuant to [§50(3)] of the Regulation, there shall be an at-the-money exercise price and each three (3) consecutive exercise prices above and below the at-the-money exercise price on the first trading day of currency options, established using KRW 10 as the exercise price unit. (Amended on August 28, 2014)

(3) Pursuant to [§50(3)] of the Regulation, when a trading day arrives where each number of exercise prices above and below the at-the-money exercise price is less than three (3) due to the change of the at-the-money exercise price, additional exercise price shall be introduced based on the exercise price unit until each number of exercise prices above and below the at-the-money exercise price reaches to three (3) from the highest or lowest exercise price. (Amended on August 28, 2014; November 3, 2014)

(4) Notwithstanding paragraphs (1) through (3), when it is deemed necessary for the market management, the Exchange may change the number of exercise price and the exercise price unit. (Amended on August 28, 2014)

§29-2. [Deleted on August 28, 2014]

§29-3. [Deleted on August 28, 2014]

§29-4. Multipliers, Quotation Price Units and Methods of Quoting Prices

(1) Pursuant to [§53] of the Regulation, the multiplier of currency options shall be set at 10,000. [March 13, 2017]

(2) Pursuant to [§53] of the Regulation, the quotation price unit of currency options shall be 0.01. (Amended on March 13, 2017)

(3) Pursuant to [§53] of the Regulation, the prices of currency options shall be quoted in Korean Won. (Amended on March 13, 2017)

[August 28, 2014]

§29-5. Last Trading Day, Exercise Settlement Day, Exercise Settlement Price, etc.

(1) Pursuant to [§55(2)] of the Regulation, the last trading day of currency options shall be the third Monday of the expiration month (it shall be moved forward sequentially if it falls on a market holiday; the same hereinafter in this Paragraph). Provided that, if the third Monday of the settlement month is a non-business day of the Seoul Money Brokerage Service, the last trading day shall be changed to the day classified in each of following subparagraphs:

1. In cases where it was non-business day before the first trading day of the relevant contract: The previous trading day of the third Monday of the expiration month; and

2. In cases where it become non-business day after the first trading day of the relevant contract: The business day following the third Monday of the expiration month. (Amended on May 29, 2025)

(2) Pursuant to the provision of [§55(2)] of the Regulation, the type of options exercise of currency options shall be the type where options can be exercised only on the last trading day.

(3) Pursuant to the provision of [§55(2)] of the Regulation, the option exercise settlement day of currency options shall be the business day following the option exercise day. (Amended on May 29, 2025)

(4) Pursuant to the provision of [§55(2)] of the Regulation, the base prices for exercise settlement of currency options shall be the base rate that the head of a foreign exchange brokerage company notifies to the Minister of Strategy and Finance by thirty (30) minutes before the business opening on the next day pursuant to subparagraph 7 under [§1-2] of the Foreign Exchange Transaction Regulation and [§4-3] of the Enforcement Rules of the Foreign Exchange Transaction Regulation. Provided that, in the case of falling under each of following subparagraphs, the price noted in the relevant subparagraph shall be the base price for exercise settlement:

1. In cases where there is no base rate noted in the main sentence on the last trading day: The first base rate published by the Seoul Money Brokerage Service on the business day following the option exercise day (referring to the business day of the Seoul Money Brokerage Service); and

2. Other cases that are deemed necessary for market management: The prices determined by the Exchange for each case.

[August 28, 2014]

CHAPTER 5. TRADING OF COMMODITY FUTURES

[August 28, 2014]

§29-6. Trading Units and Delivery Months, etc.

(1) Pursuant to [§56(2)] of the Regulation, the trading units of commodity futures shall be as classified in each of the following subparagraphs: [March 13, 2017]

1. For Gold futures: Weight of 100 grams; and
2. For Lean Hog futures: Weight of 1,000 kilograms.

(2) Pursuant to [§57] of the Regulation, the delivery months of commodity futures shall be every month. [March 13, 2017]

(3) Pursuant to [§57] of the Regulation, the numbers of expiration months of commodity futures shall be as classified in each of the following subparagraphs: (Amended on October 28, 2015; March 13, 2017)

1. For Gold futures: Seven (7) in total - six (6) from February, April, June, August, October and December (referred as the “even number months” hereinafter in this Article) and one (1) additional month from the months other than the even months (referred as the “odd number months” hereinafter in this Article); and
2. For Lean Hog futures: Six (6) in total - two (2) from the quarterly months and four (4) from the non-quarterly months.

(4) Pursuant to [§57] of the Regulation, the trading periods of each expiration month of commodity futures shall be as classified in each of the following subparagraphs: (Amended on October 28, 2015; March 13, 2017)

1. For Gold futures: The periods noted in each following item:
 - (a) For the contracts in the even number months, one (1) year; and
 - (b) For the contracts in the odd number months, two (2) months.
2. For Lean Hog futures: Six (6) months.

[August 28, 2014]

§29-7. Multipliers, Quotation Price Units and Methods of Quoting Prices

(1) Pursuant to [§58] of the Regulation, the multipliers of commodity futures shall be the figures classified in each of the following subparagraphs: [March 13, 2017]

1. For Gold futures: 100; and
2. For Lean Hog futures: 1,000.

(2) Pursuant to [§58] of the Regulation, the quotation price units of commodity futures shall be the prices classified in each of following subparagraphs: (Amended on October 28, 2015; March 13, 2017)

1. For Gold futures: KRW 10; and

2. For Lean Hog futures: KRW 5.

(2) Pursuant to [§58] of the Regulation, the prices of commodity futures shall be quoted in the manner classified in each of the following subparagraphs: (Amended on October 28, 2015; March 13, 2017)

1. For Gold futures: Korean Won per gram; and
2. For Lean Hog futures: Korean Won per kilogram.

[August 28, 2014]

§30. Last Trading Day

(1) Pursuant to [§60(2)] of the Regulation, the last trading day of commodity futures shall be the third Wednesday of the delivery month (in cases where it falls on a market holiday, it shall be moved forward sequentially; the same hereinafter in this Article). [August 28, 2014]

(2) Notwithstanding paragraph (1), in case where the third Wednesday of the delivery month falls on the market holidays specified in [§5(1)6] of the Regulation, the last trading day of Lean Hog futures shall be changed to the business day following the relevant market holiday. Provided that, if the market holidays specified in [§5(1)6] of the Regulation last longer than six (6) consecutive days counting from the third Wednesday of the delivery month, it shall be the sixth market holiday. (Amended on October 28, 2015; May 29, 2025))

(3) Notwithstanding paragraph (2), when it is deemed necessary for the market administration, the Exchange may not change the last trading day or may change it to a day that is not specified in paragraph (2). (Amended on August 28, 2014; October 28, 2015)

(4) When changing the last trading day according to paragraphs (2) and (3), the first trading of new delivery month contract shall be the business day following the last trading day. [August 28, 2014] (Amended on May 29, 2025)

§31. [Deleted on August 28, 2014]

§32. [Deleted on August 28, 2014]

§32-2. Final Settlement Day and Final Settlement Price, etc.

(1) Pursuant to [§60(2)] of the Regulation, the final settlement day of commodity futures shall be the day in each of the following subparagraphs: (Amended on October 28, 2015; May 29, 2025))

1. For Gold futures, the business day following the last trading day; and (Amended on May 29, 2025)
2. For Lean Hog futures, the third (3rd) business day counting from the last trading day.

(Amended on May 29, 2025)

(2) Notwithstanding paragraph (1)2, in cases where the average daily price of lean hog (referred to the daily price of lean hog pursuant to [§56(1)2] of the Regulation; the same hereinafter) is not published until the business day (the market holidays pursuant to [§5(1)6] of the Regulation shall not apply; the same hereinafter in this Paragraph) following the last trading day, the final settlement day of Lean Hog Futures shall be changed to the business day following the business day on which the average daily price of lean hog is published for the first time after that day. Provided that, in the cases where it is deemed necessary for the market management, the Exchange may change the final settlement date to a date that is not noted in the main sentence. (Amended on October 28, 2015; May 29, 2025))

(3) [Deleted on October 28, 2015]

(4) Pursuant to the provisions of [§60(2)] of the Regulation, the final settlement prices of commodity futures shall be as classified in each of the following subparagraphs: (Amended on March 12, 2015; October 28, 2015; September 20, 2017)

1. In the case of gold futures, the last price of gold bullions (referring to the gold bullions with a weight of 1,000 grams; the same hereinafter) on the last trading day in the KRX Gold Market; and

2. [Deleted on October 28, 2015]

3. In the case of Lean Hog futures, the average daily price of lean hog published for the first time after the last trading day. Provided that, in the case of falling under each of the following items, it shall be the price specified in the relevant item:

(a) Where the final settlement day is changed pursuant to the proviso to [§30(2)]: The average daily price of lean hog published first after the last trading day before the change; and

(b) Where the trading of Lean Hog futures has not been resumed on the last trading day after the trading suspension pursuant to [§76(1)5] of the Regulation: The trading volume weighted execution price (to be rounded off at the 4th decimal place) that the Exchange calculates according to the following formula on the basis of execution price (excluding the deemed execution price) established on the last trading day. Provided that, if there is no execution price on the last trading day, it shall be the average daily price of lean hog published on the last trading day.

$$\text{Sum of trading amounts of the day of the relevant contract} \div (\text{Sum of trading volume of the day of the relevant contract} \times \text{Multiplier})$$

(5) Notwithstanding the proviso to paragraph (4)3, if it is deemed necessary for the market administration, the Exchange may change the final settlement price to the price determined case by case. (Amended on October 28, 2015)

[August 28, 2014]

§33. ~ §45. [Deleted on October 28, 2015]

CHAPTER 6. TRADING OF FUTURES SPREADS

(Amended on August 28, 2014)

§46. Contracts of Intra-product Spreads

(Amended on October 30)

(1) Contracts of intra-product spreads under [§62(1)] of the Regulation shall be the contracts classified in each of the following subparagraphs:(Amended on July 3, 2015; September 16, 2015; October 28, 2015; June 20, 2016; June 15, 2017; March 15, 2018; October 30, 2019; July 13, 2021; February 16, 2022; March 14, 2022; November 24, 2023; February 5, 2024; April 5, 2024; November 1, 2024)

1. For 3-year KTB futures spreads, 5-year KTB futures spreads, 10-year KTB futures spreads, and 30-year KTB futures spreads: One (1) contract between the nearest month contract and the farther month contract (referred to as the farther month contract noted in [§62(2)] of the Regulation; the same hereinafter);

2. [Deleted on April 18, 2025]

3. For the KRX 300 futures spreads, KOSDAQ Global futures spreads, sector index futures spreads, and ETF futures spreads: Three (3) contracts between the nearest month contract and each of the farther month contracts;

4. For the 3-months risk free benchmark interest rate futures spreads; Three (3) contracts between the nearest month contract and each of the farther month contracts (limited to 3 contracts with the last trading day arriving first);

5. For the Mini KOSPI 200 futures spreads, V-KOSPI 200 futures spreads, single stock futures spreads, and Lean Hog futures spreads: Five (5) contracts between the nearest month contract and each of the farther month contracts;

6. For the KOSPI 200 futures spreads, KOSDAQ 150 futures spreads, and gold futures spreads: Six (6) contracts between the nearest month contract and each of the farther month contracts;

7. For the JPY futures spreads, EUR futures spreads and CNY futures spreads: Seven (7) contracts between the nearest month contract and each of the farther month contracts;

8. [Deleted on April 5, 2024]

9. For USD futures spreads: Nineteen (19) contracts between the nearest month contract and each of the farther month contracts.

(2) Notwithstanding paragraph (1), contracts of intra-product spreads that involve a contract for which trading has not been executed and, from among single stock futures spread contracts, contracts of intra-product spreads of which multiplier of the nearest month contract is different from that of a farther month contract shall be excluded. (Amended on October 30, 2019)

§46-2. Quotation Price Units and Methods of Quoting Prices

(1) The quotation price units of intra-product spreads under [§62(5)] of the Regulation shall be the quotation price units of futures products making up the futures spreads. In such cases, the quotation price units of single stock spreads and ETF spreads shall be the lower price among the quotation price units that correspond to the base prices of futures contracts making up the futures spread. (Amended on October 30, 2019; April 6, 2026)

(2) Pursuant to [§62(5)] of the Regulation, the price of intra-product spreads shall be quoted as zero (0), positive numbers or negative numbers. (Amended on October 30, 2019)

[August 28, 2014]

§47. Deemed Execution Price following Execution of Intra-product Spread Trades

(Amended on October 30, 2019)

(1) Pursuant to [§64] of the Regulation, the deemed execution prices of intra-product spread trades shall be the prices falling under any of the following subparagraphs: (Amended on October 30, 2019; April 5, 2024)

1. In the case of the nearest month contract: The most recent execution price of the nearest month contract before the execution of the relevant intra-product spread trade. Provided that, in the case where an execution price of intra-product spread trade is determined through the method of call auction, it shall be the most recent execution price of the nearest month contract before starting the quotation receiving hours for call auction under [§64(1)]; and

2. In the case of the farther month contract: The price calculated by adding the execution price of the relevant intra-product spread trade to the deemed execution price of the nearest month contract noted in paragraph (1). Provided that, in the case of interest rate derivatives, it shall be the price obtained by subtracting the execution price of the relevant intra-product spread trade from the deemed execution price of the nearest month contract.

(2) Notwithstanding paragraph (1), in cases where the deemed execution price of the farther month contract under paragraph (1)2 is higher than the upper limit price under [§56(1)], the deemed execution price of the farther month contract shall be the upper limit price; and in cases where the deemed execution price under paragraph (1)2 is lower than the lower limit price under [§56(2)], the deemed execution price of the farther month contract shall be the lower limit price. In such cases, the deemed execution price of the nearest month contract shall be the price calculated by subtracting the execution price of the relevant intra-product spread trade from the deemed execution price of the farther month contract (in the case of interest rate products, it shall be the price obtained by adding the execution price of the relevant intra-product spread trade to the deemed execution price of the distant month contract). (Amended on October 30, 2019)

(3) [Deleted on April 5, 2024]

§47-2. Contracts of Inter-product Spreads

(1) Contracts of inter-product spreads under [§63-2(1)] of the Regulation shall be the inter-KTB futures spread contracts, which are the two (2) contracts between the contracts with the same last trading day of 3-year KTB futures and 10-year KTB futures.

(2) Notwithstanding paragraph (1), an inter-product spread contract that involves a contract for which trading has not been executed shall be excluded.

[October 30, 2019]

§47-3. Classification Methods, etc. of Buying and Selling in Inter-product Spreads

(1) Pursuant to [§63-2(2)] of the Regulation, buying in an inter-KTB futures spreads shall be a trade in which three (3) contracts of 3-year KTB futures are bought and one (1) contract of 10-year KTB futures is sold; and selling shall be a trade in which three (3) contracts of 3-year KTB futures are sold and one (1) contract of 10-year KTB futures is bought.

(2) The prices of inter-KTB futures spread under [§63-2(2)] of the Regulation shall be the prices calculated by the following formula:

$$(\text{Price of 3-year KTB futures} - \text{Base price of 3-year KTB futures}) \times \text{Number of 3-year KTB futures contracts} \div \text{Number of 10-year KTB futures contracts} - (\text{Price of 10-year KTB futures} - \text{Base price of 10-year KTB futures})$$

[October 30, 2019]

§47-4. Quotation Price Units, etc. of Inter-product Spread Trades

(1) The quotation price unit of inter-KTB futures spread trades under [§63-2(2)] of the Regulation shall be 0.01.

(2) Pursuant to [§63-2(2)] of the Regulation, the price of intra-KTB futures spread trades shall be quoted as zero (0), positive numbers or negative numbers.

[October 30, 2019]

§47-5. Deemed Execution Prices, etc. following Execution of Inter-product Spread Trades

(1) The deemed execution price of intra-KTB futures spread trades under [§63-3] of the Regulation shall be as specified in each of the following subparagraphs:

1. In the case of a 3-year KTB futures contract: The base price of the relevant 3-year KTB futures contract; and

2. In the case of a 10-year KTB futures contract: The price calculated by subtracting the execution price of the relevant intra-product spread trade from the base price of the relevant contract.

(2) Pursuant to [§63-3] of the Regulation, the deemed execution quantity per contract of the inter-KTB futures spread trades shall be three (3) contracts of 3-year KTB futures and one (1) contract of 10-year KTB futures.

[October 30, 2019]

CHAPTER 7. TRADING OF FLEX FUTURES

§47-6. Underlying Assets, Trading Units and Multipliers, etc.

(Amended on October 30, 2019)

(1) Pursuant to [§64-3(1)] of the Regulation, the underlying assets of FLEX futures shall be US dollar.

(2) Pursuant to [§64-3(2)] of the Regulation, with respect to the trading units, multipliers, quotation price units and the methods of quoting prices of FLEX futures, the provisions on USD FLEX futures in [§25-6] and [§25-8] shall apply *mutatis mutandis* thereto.

[March 13, 2017]

§47-7. Last Trading Day, Final Settlement Day and Final Settlement Price, etc.

(Amended on October 30, 2019)

(1) Pursuant to [§64-5(2)] of the Regulation, with respect to the delivery and receipt of underlying assets of USD FLEX futures, [§27] and [§28] shall apply *mutatis mutandis*. In this case, “currency futures” is considered “USD FLEX futures.” [October 1, 2025]

(2) Pursuant to [§64-5(3)] of the Regulation, the last trading day of USD FLEX futures shall be the days in the period from the trading day on which negotiated FLEX trade by each contract is requested to two (2) trading days before the last trading day of USD futures of the 6th near month contract, excluding the days noted in each of the following subparagraphs: (Amended on August 28, 2014; May 29, 2025)

1. In cases where the trade of the contract of the relevant USD FLEX futures spread has not executed, the trading day on which negotiated FLEX trade is requested; (Amended on May 29, 2025)

2. The last trading day and trading days immediately before and after the last trading day of each delivery month contract of USD futures; and

3. In addition, the trading day that the Exchange deems necessary for the market management. (Amended on May 29, 2025)

(3) Pursuant to [§64-5(3)] of the Regulation, the final settlement day of USD FLEX futures shall be trading day specified in each of following subparagraphs: [August 28, 2014]

1. For contracts for which the underlying asset is delivered, the third trading day counting from the last trading day; and

2. For contracts for which cash is paid: the next trading day following the last trading day.

4) Pursuant to [§64-5(3)] of the Regulation, the final settlement amount for USD FLEX futures shall be calculated by the following formula: [August 28, 2014]

The final settlement price × The final settlement quantity × Multiplier

(5) Pursuant to [§64-5(3)] of the Regulation, the final settlement price of USD FLEX Futures shall be the price (rounded up at the fifth decimal place) obtained by calculating the trading volume-weighted average of the US dollar spot rates (referring to exchange rates established in the US dollar spot market operated by the Seoul Money Brokerage Services; hereinafter the same) formed for thirty (30) minutes before the deadline of the request for negotiated FLEX trade. Provided that, in the case of falling under following subparagraphs, it shall be the price specified in each of the following subparagraphs: [August 28, 2014] (Amended on June 25, 2024)

1. In cases where the number of the US dollar spot rates for thirty (30) minutes before the deadline for requesting negotiated FLEX trade is less than five (5) cases: the trading volume-weighted average of the most recent five (5) US dollar spot rates established before the deadline for requesting negotiated FLEX trade of the day (to be rounded up at the 5th decimal place); and

2. In cases where fewer than five (5) USD/KRX spot exchange rates are available from 9:00 a.m. on the trade date until the end of the FLEX negotiated transaction application period: the basic exchange rate published on the next day pursuant to the Foreign Exchange Transaction Regulation (if there is no relevant basic exchange rate, the basic exchange rate of the day immediately before) (Amended on July 6, 2026)

(6) Notwithstanding paragraph (5), if the time of submission of the request for negotiated FLEX trade is changed or other matters deemed necessary for the market management, the Exchange may change the final settlement price to the price determined for USD FLEX futures for each time. [August 28, 2014] (Amended on October 1, 2025)

[August 21, 2009]

PART III. TRADE EXECUTION

CHAPTER 1. QUOTATIONS

Section 1. Input and Receipt of Quotations

§48. Quotation Details to be Inputted

(1) “Quotation details stipulated in the Enforcement Rules” in [§65(1)] of the Regulation shall refer to each of the followings: (Amended on August 28, 2014)

1. Member’s ID number assigned by the Exchange;
2. Contract code;
3. Quantity;
4. In the case of the quotation of which price is specified, such price;
5. Classification between bid or ask;
6. Classification between proprietary account trade or customer-account trade (including the trade for the management of entrusted assets of the investment dealing company; hereinafter the same);
7. Indication of limit quotation, market quotation, limit-to-market-on-close quotation, and immediately executable limit quotation;
8. In the case of quotation affixed with each of the following conditions, such condition;
 - (a) The condition specifying to execute, of the quotation quantity, the quantity that can be executed at the receipt time of the relevant quotation and cancel the unexecuted quantity (hereinafter referred to as the “immediate or cancel condition”); and
 - (b) The condition specifying to execute the quotation only if the entire quotation quantity can be executed at the receipt time of the relevant quotation and otherwise to cancel the entire quantity (hereinafter referred to as the “fill or kill condition”).
9. Indication of nationality;
10. Indication of investor category;
11. Identification number of member's business office (referring to the five-digit number that the member has assigned to its main office, branch offices and other business locations and notified to the Exchange; the same hereinafter) and the number of derivatives account (it shall include the account number related to proprietary account trades and, in the case of the foreigner’s consolidated accounts, it shall be the classification code by end-investor under [§114-3(1)]);

12. Number of substitute securities account (referring to the twelve-digit number that a member assigns to the substitute securities account; the same hereinafter), if there is substitute securities account (referring the account used for the securities deposited for the deposition of member margin or customer margin; the same hereinafter);

13. For a quotation of equity derivative products for arbitrage (referring to the stock index arbitrage and single stock arbitrage; the same hereinafter) or hedge (referring to the stock index hedge and single stock hedge; the same hereinafter), such indication. In such cases, it shall include the indication of arbitrage or hedge eligible for discount of member margin pursuant to [§147(1)].

14. Category of entrustment method of trade pursuant to [§118(1)] of the Regulation;

15. Indication of the input methods and identification of order input devices [in the case of item (b), the IP address and MAC address of order input device is excluded] that are specified in each of the following items:

(a) Method of inputting the customer's order that the member received in written form (including order submitted via facsimile) or over telephone, etc. to the Exchange derivatives system: IP address of the order input device of the relevant member.

(b) Method by which the customer directly inputting the order to the member derivatives system via a land communication device.

(c) Method by which the customer directly inputting the order to the member derivatives system via a wireless communication device: Information such as the unique ID number of the relevant wireless communication device.

(d) Method by which the customer directly inputting the order to the member derivatives system via computer network system: IP address and MAC address of the relevant order input device.

(e) Other method of inputting the order information: Information such as the unique identification code of relevant order input device.

16. One of the following items based on the method of generating quotation:

(a) High-speed algorithmic trading quotation;

(b) Algorithmic trading quotation excluding the quotation in item (a); or

(c) Quotations excluding quotations in items (a) and (b).

17. In the case of submitting quotations through high-speed algorithmic trading account, matters in each of the following items:

(a) A number (hereinafter referred to as the "high-speed algorithmic trading number") that combines the trader registration number and risk management number pursuant to [§164-6(5)]. Provided that, among quotation falling under paragraph (1)16(b) or

paragraph (1)16(c), quotations to which paragraph (1)17(b) or paragraph (1)17(c) is not applied shall be excluded.

(b) Quotation group number in Annex Form 6-2 in the case of classifying the scope of application for the mass order cancellation pursuant to [§54-2];

(c) In the case where self-match trades [referring to transactions executed between the quotations already submitted and quotations submitted later by the same person (referring to a high-speed algorithmic trader with the same high-speed algorithmic trade number; hereinafter the same in this paragraph and [§53-2]) at the time of submitting quotations; hereinafter the same] may be executed, whether a condition (hereinafter referred to as the “self-match prevention condition) for cancelling the quotation quantity falling under any of the following items is annexed or not:

- (i) Quantity that has not been executed among the quotations already submitted by the same person;
- (ii) Quantity that has not been executed among the quotation submitted later by the same person; and
- (iii) Each quantity that can be executed between the quotations already submitted and the quotations submitted later by the same person.

18. Additionally, other information that are deemed necessary by the Exchange.

(2) Each member shall, when receiving quotations for an entrusted order from an investment broker, input the nationality noted in paragraph (1)9, the investor category noted in paragraph (1)10 and the derivatives account number noted in paragraph (1)11 on the basis of customer who entrusted the order to the relevant investment broker. (Amended on March 18, 2009)

(3) Each member may input the quotations for orders placed from proprietary accounts of other members. (Amended on September 3, 2020; May 18, 2021)

(4) In cases where a customer or member has two (2) or more substitute securities accounts, the member shall input one (1) substitute securities account that the customer or member has chosen. In such cases, the account chosen by the customer or member shall principally be used for the trading of underlying stock. (Amended on August 28, 2014)

(5) The input code of quotation details in each subparagraph of paragraph (1) shall be those codes shown in [Annex 6].

§49. Definition of Arbitrage and Hedge

(1) “Stock index arbitrage” in [§48(1)13] shall refer to a trade that meets all of the requirements in each of the followings: (Amended on January 31, 2011; June 15, 2017; March 15, 2018)

- 1. A trade intending to benefit from the difference between the price of the product falling under any of the followings, which is linked to a stock price index (hereinafter referred to

as the “index-linked listed stocks, etc.”) and the price of the index futures or index options underlying the relevant stock price index:

(a) A basket of stocks (including a basket of stocks, the constituents of which include single stock futures or single stock options; the same hereinafter);

(b) Equity linked warrants (ELWs) (limited to those listed on the KOSPI Market; the same hereinafter in this Article);

(c) ETFs; and

(d) Exchange Traded Notes (ETNs).

2. A trade of index futures or index options of which the profit and loss structure is opposite to that of the index-linked listed stocks, etc. at the same time or immediately before/after the trading of the index-linked listed stocks, etc.

(2) “Single stock arbitrage” in [§48(1)13] shall refer to a trade that meets all of the requirements in each of following: (Amended on January 31, 2011)

1. A trade intending to benefit from the difference between the price of the stock falling under any of the followings (hereinafter referred to as the “equity-linked listed stocks”) and the price of the single stock futures or single stock options of which underlying asset is the relevant stock:

(a) Underlying stocks; and

(b) ELWs linked to the underlying stocks.

2. A trade of single stock futures or single stock options of which profit and loss structure is opposite to that of underlying stocks at the same time or immediately before/after trading of underlying stocks.

(3) “Stock index hedge” in [§48(1)13] shall refer to a trade of the stock index futures or stock index options underlying a stock price index, which is conducted to avoid or mitigate the losses arising from the fluctuation in the value of any of the followings that is linked to the relevant stock price index: (Amended on August 28, 2014; November 21, 2016)

1. A basket of stocks;

2. Financial investment products under Article 3 of the Financial Investment Services and Capital Markets Act (hereinafter referred to as “the Act”);

3. Assets;

4. Liabilities; and

5. Firm commitments.

(4) “Single stock hedging” in [§48(1)13] shall refer to a trade of the single stock futures or single stock options of which underlying assets are the underlying stocks or the underlying stock to which any of the followings is linked, which is conducted to avoid or mitigate the losses arising from the fluctuation in the value of any of the followings: (Amended on January

31, 2011; August 28, 2014)

1. Financial investment products under Article 3 of the Act;
2. Assets;
3. Liabilities; and
4. Firm commitments.

(5) The trades pursuant to the provisions of paragraphs (1) through (4) shall include the cases of one (1) time trade or two (2) or more split-up trades. (Amended on January 31, 2011; August 28, 2014; March 15, 2018)

(6) [Deleted on January 31, 2011]

(7) [Deleted on January 31, 2011]

§49-2. Verification of Suitability of Quotations, etc.

“Matters stipulated in the Enforcement Rules” in [§65(2)] of the Regulation shall refer to the matters noted in each of the following subparagraphs: (August 28, 2014; May 19, 2015; June 20, 2016; June 15, 2017; November 10, 2017; December 21, 2022; April 5, 2024)

1. Derivatives account numbers under [§48(1)11] (for foreigner’s consolidated accounts, it shall be the classification code by end-investor under [§114-3(1)]);
2. Specifics about contract noted in each of the following items:
 - (a) Contract code under [§48(1)2]; and
 - (b) If the contract is suspended from trading pursuant to the provisions of [§76] and [§77] of the Regulation.
3. Matters about quantity noted in each of the following items:
 - (a) Trading quantity unit; and
 - (b) Quotation quantity limit and accumulated quotation quantity limit pursuant to [§61];
4. Matters about price noted in each of the following items:
 - (a) If the price conforms to the quotation price unit; and
 - (b) If the price complies with the price limit pursuant to [§56], [§59], [§59-3] and [§60]. Provided that, for the trading of equity derivatives, the case where the price limit rate is expanded pursuant to [§56-2] or [§59-2] shall be excluded.
5. If it complies with the restriction on quotation input pursuant to [§50]. Provided that it shall exclude subparagraph 2 of [§50], subparagraph 3 of [§50], subparagraphs 5(c) of [§50], subparagraph 6(b) of [§50], subparagraph 9 of [§50] (limited to the case of expanding the

price limit rate of the trading of equity derivatives pursuant to [§56-2] and [§59-2]) and subparagraph 11 of [§50];

6. Matters noted in each of the following items that are related to order entrustment:

(a) If the customer falls under the reasons for refusal to accept order entrustment noted in [§124] of the Regulation; and

(b) In the case of upfront initial customer margin account noted in [§115(1)7] if the upfront initial customer margin has been deposited pursuant to [132(2)] of the Regulation.

7. Matters in each of the following items when inputting the high-speed algorithmic trade number pursuant to [§48(1)17(a)]:

(a) Whether quotations are submitted through the high-speed algorithmic trading account reported pursuant to [156-4(3)] of the Regulation; and

(b) Whether the high-speed algorithmic trading number linked to account in item (a) above matches the high-speed algorithmic trading number inputted pursuant to [48(1)17(a)].

8. Matters about the trade that the Exchange restricts for market management; and

9. In addition, the matters that the member deems necessary.

[December 28, 2011]

§50. Restriction on Quotation Input

Pursuant to [§65(6)] of the Regulation, members shall be prohibited from inputting the quotations falling under any of the following subparagraphs: (Amended on December 28, 2011; August 28, 2014; May 19, 2015; July 3, 2015; September 16, 2015; March 21, 2016; June 20, 2016; June 15, 2017; December 7, 2018; October 30, 2019; December 21, 2022)

1. In the case of farther month contracts [excluding the next-near month contract (referring to the delivery month contract of which the last trading day arrives the second from the present: the same hereinafter) during the four (4) trading days retroactively counting from the last trading day of the nearest month contract], the market quotations, limit-to-market-on-close quotations, and immediately executable limit quotations;

2. In the case of quotations for periodic call auction, the immediately executable limit quotation. Provided that this provision shall not apply to the cancellation quotation;

3. In the case of the quotation receiving hours for the call auction noted in [§64(1)4] (hereinafter referred to as the “quotation receiving hours for closing price by call auction”) to determine the final contract price (hereinafter referred to as the “closing price by call auction”) pursuant to [§73(1)3] of the Regulation, the limit-to-market-on-close quotations. Provided that this provision shall not apply to the case of cancellation quotations;

4. In the case of a contract of which the last trading day has arrived (excluding the currency futures and Lean Hog futures), the limit-to-market-on-close quotations;

5. In the case of futures spread trading, the quotations falling under any of the following items:

(a) Market quotations, limit-to-market-on-close quotations, and immediately executable limit quotations;

(b) [Deleted on April 5, 2024]

(c) Where the trading session of any of two (2) contracts constituting a futures spread is closed, quotations of the relevant futures spread.

6. In the case of affixing the immediate or cancel condition, or fill or kill condition, the quotations falling under any of the following items:

(a) Limit-to-market-on-close quotations;

(b) Quotations for call auction; and

(c) Quotations placed through the market-making account.

7. In the case of trade using the market-making account; the quotations falling under any of the following items:

(a) Market quotation, limit-to-market-on-close quotations, and immediately executable limit quotations;

(b) Quotations affixed with the immediate or cancel condition, or fill or kill condition; and

(c) [Deleted on April 21, 2011]

8. [Deleted on April 5, 2024]

9. In the case of limit-to-market-on-close quotations: the quotation falling under any of the following items:

(a) The bid quotation at the upper limit price (referring to the upper limit price at the time of verifying the quotation pursuant to [§65(2)]); and

(b) The ask quotation at the lower limit price (referring to the lower limit price at the time of verifying the quotation pursuant to [§65(2)]).

10. In the case of trades or contracts not applying the real-time price limit pursuant to [§60-3], the market quotation, limit-to-market-on-close quotations and immediately executable limit quotations.

11. In the case of terminating the real-time price limit pursuant to [§60-5] for the trades or

contracts applying the real-time price limit pursuant to [§60-3], market quotations and immediately executable limit quotations.

12. In the case of self-match prevention quotations: quotations in any of the following items:

- (a) The market quotation:
- (b) The quotations affixed with the fill or kill condition;
- (c) The limit-to-market-on-close quotations; and
- (d) Quotations without inputting high-speed algorithm trade number.

§51. Quotation Receiving Hours

(1) Pursuant to [§66(2)] of the Regulation, the quotation receiving hours shall be as stipulated in each of the following subparagraphs: (Amended on October 26, 2009; April 4, 2019; July 18, 2023; May 29, 2025)

1. For regular trading: From fifteen (15) minutes before the start of regular trading hours to the time before the market closing. Provided that, the quotation receiving hours for the markets where the regular trading hours do not start at 8:45 according to subparagraphs 2 and 3 of [Annex 1-2] shall be from thirty (30) minutes before the start of regular trading hours to the time before the market closing; and [May 29, 2025]

2. For night trading: From ten (10) minutes before the start of night trading hours to the time before the market closing. [May 29, 2025]

(2) Notwithstanding paragraph (1), when trading is halted pursuant to [§76] and [§77] of the Regulation, only limit to the cancellation quotation is received. Provided that, in cases where trading is halted due to the failure of the Exchange derivatives system pursuant to subparagraphs 1 and 3 of [§4], no quotation shall be received. (Amended on August 28, 2014; May 19, 2015)

(3) Notwithstanding paragraph (1), the Exchange may change the quotation receiving hours when the trading hours is changed pursuant to [§4(4)] of the Regulation or when it is deemed necessary for the market management. (Amended on July 26, 2011)

§52. Conversion, Receipt and Recording of Limit-to-Market-on-Close Quotations

(1) Pursuant to [§67(4)] of the Regulation, the limit to market on close quotation shall be construed to have been converted to and received as a market quotation at the beginning of quotation receiving hour for the periodic auction to determine the closing price. In such cases, the quotation receipt number shall not be given.

(2) The details of market quotation received after converting a limit-to-market-on-close quotation shall be recorded in the Exchange derivatives system, on the basis of the limit-to-market-on-close quotation before the conversion, in the priority order stipulated in [§72(3)] of

the Regulation.

§53. Validity of Quotations

Pursuant to the proviso to [§68(1)] of the Regulation, in the case of falling under following subparagraphs, each of the following quantities from the quantity of the relevant quotation shall be deemed to have been cancelled: (Amended on August 20, 2014; October 30, 2019)

1. For immediate or cancel condition, the unexecuted quantity; and
2. For fill or kill condition, the entire quantity of the relevant quotation if the entire quantity cannot be executed.
3. For the quotation of the trade or contracts applying the real-time price limit (the market quotation is excluded) pursuant to [§60-3], the quantity of quotation for bid at the price higher than the real-time upper limit or the quantity of quotation for ask at the price lower than the real-time lower limit among the already-received quotations.
4. Any other case for quotation deemed necessary not to recognize the effect: quantity determined by the Exchange case by case.

§53-2. Validity of Quotations

(1) Pursuant to the proviso to [§68(1)] of the Regulation, in the case of quotations with self-match prevention condition, the number of quotations in each of the following items, from the number of quotations quoted, shall be deemed cancelled. In such cases, each item shall be classified by the self-match prevention condition affixed with the relevant quotation:

1. For [§48(1)17(c)(i)]: Quantity that has not been executed among the quotations already submitted by the same person;
2. For [§48(1)17(c)(ii)]: Quantity that has not been executed among the quotation submitted later by the same person; and
3. For [§48(1)17(c)(iii)]: Each quantity that can be executed between the quotations already submitted and the quotations submitted later by the same person.

(2) Paragraph (1) shall apply only to the case where the contract price is determined by the method of individual competitive transaction with multiple prices (hereinafter referred to as the “continuous trading”)

(3) For a case corresponding to any of the following items, the effect of paragraph (1) shall not be recognized:

1. Case where the quotation already submitted by the same person is a quotation for call auction to which [§62] applies; or
2. Case where the self-match prevention condition is not affixed to either quotation already

submitted by the same person or quotations submitted later by the same person.

(4) In the case of quotations to which both the self-match prevention condition and the fill-or-kill condition are simultaneously affixed, the effect of quotations with self-match prevention condition noted in paragraph (1) shall take precedence.

[December 21, 2022]

§54. Correction of Quotations

(1) Pursuant to [§69(2)] of the Regulation, members may cancel all or part of the quantity of quotations. [December 21, 2022]

(2) Pursuant to [§69(2)] of the Regulation, members may make correction of quotations in accordance with any of the following methods: (Amended on August 20, 2014; December 21, 2022)

1. In the case of correcting a limit quotation, limit-to-market-on-close quotation and immediately executable limit quotation to the same type of quotation, all or part of the quotation quantity shall be corrected to a different price; and
2. In the case of correcting limit quotation, market quotation, limit-to-market-on-close quotation and immediately executable limit quotation to a different type of quotation, all or part of the quotation quantity shall be corrected to a different type of quotation.

(3) Notwithstanding paragraph (2), the quotation shall not be corrected in the case of falling under any of the following subparagraphs: (Amended on August 20, 2014; December 21, 2022)

1. In the case of receiving quotations for periodic call auction for determination of the closing price, when making a correction between the market quotation and the limit-to-market-on-close quotation;
2. In the case of making a correction between the limit quotation and best limit quotation, when the price before the correction is the same as the price after the correcting;
3. In the case of making a correction into the limit quotation or the limit-to-market-on-close quotation, when the quotation price for bid is higher than the real-time upper limit price after the correction or the quotation price for ask is lower than the real-time lower limit price after the correction;
4. In the case of making a correction of the limit quotation or the best limit quotation into of the market quotation, when the quotation price prior to the correction and the quotation price after the correction is the same by converting the market quotation price corrected into the limit quotation price pursuant to [§67(2)]; and
5. Other cases that the Exchange deems necessary not to recognize the correction of quotation price.

(Wholly amended on August 21, 2009)

§54-2. Mass Order Cancellation

(1) Pursuant to [§69(2)] of the Regulation, members may apply to the Exchange to cancel all quotations received before application at once (hereinafter referred to as the “mass order cancellation”) by designating conditions for each high-speed algorithmic trading number only if all of the following subparagraphs are met. In such case, matters necessary for the application of the mass order cancellation, such as classification of products, conditions for cancellation, etc. shall be as specified in the Annex 1-3:

1. Cases for managing risks; and
2. Cases for submitting quotations through high-speed algorithmic trading account reported pursuant to [§156-4(3)] of the Regulation.

(2) Notwithstanding paragraph (1), the Exchange may not process the application for mass order cancellation of a member in case of a system failure or other cases when it is deemed necessary for market management.

(3) Members shall record and maintain data related to the mass order cancellation for 10 years and submit the data when the Exchange request for the relevant data for market management, etc.

[December 22, 2022]

Section 2. Base Price and Quantity Limit of Quotations

§55. Base Price of Futures

(1) The base prices of futures trading under [§70(2)] of the Regulation shall be any one of the following prices. Provided that, the base price of quarterly month contracts of Mini KOSPI200 futures shall be that of the delivery month of KOSPI200 futures with the same last trading day: (Amended on July 3, 2015; September 16, 2015; June 20, 2016; March 14, 2022)

1. For the period from the trading start day to the day on which the first trade is executed (referring to the first trading day on which a transaction is executed during regular trading hours and including the day when the trade of delivery month contract deems to have been executed subsequent to the execution of futures spread trade: the same hereinafter in this Article and [§57]), the price specified in each of the following items. Provided that, the base price of a quarterly month contract of Mini KOSPI200 futures shall be the base price of the delivery month of KOSPI200 futures of which the last trading day is the same: (Amended on May 29, 2025)

- (a) For futures trades other than items (b): the theoretical price of futures trade (hereinafter referred to as “the theoretical price of futures”) calculated by the calculation formula noted

in [Annex 7] through [Annex 13]. Provided that, in cases where the ex-dividend, etc. have occurred in single stock futures trade, it shall be the adjusted theoretical price of single stock futures; and (Amended on April 18, 2025)

(b) For KOSPI High Dividend 50 futures trade, KOSPI Dividend Growth 50 futures trade, V-KOSPI 200 futures trade and Lean Hog futures trade, the base price of underlying assets on the previous day.

(c) [Deleted on April 18, 2025]

2. For the period after the trading day following the day on which the first trade was executed: The settlement price of the immediately preceding trading day pursuant to [§96] of the Regulation. Provided that, in the case of USD FLEX trade, it shall be the theoretical futures price. (Amended on May 29, 2025)

3. [Deleted on August 28, 2014]

(2) “Adjusted theoretical price of single stock futures” in the proviso to item (a) of paragraph (1) shall refer to the theoretical price calculated by applying the calculation formula in [Annex 8] *mutatis mutandis*. In such cases, “the base price of underlying asset of previous day” shall be construed as “the adjusted base price of underlying stock” and “the cash dividend per share” shall be construed as “the price calculated by multiplying the value, which was obtained by dividing the adjusted base price of underlying stock by the closing price of underlying stock of the day before the adjustment day, by the cash dividend per share (to be rounded off at the 9th place of decimals).” (Amended on October 26, 2009; August 28, 2014))

(3) Notwithstanding paragraph (1), the base price of contract for which the multiplier for single stock futures or the quantity of open interests is adjusted pursuant to [§9] and [§10] shall be adjusted to the prices specified in each of the following subparagraphs: (Amended on August 28, 2014; November 3, 2014)

1. In cases where ex-dividends, etc. have occurred, the price calculated by the following formula (rounding off at the 1st decimal place)

Base price pursuant to paragraph (1) $2 \times (\text{Adjusted base price of underlying stock} \div \text{Closing price of underlying stock of the previous day})$

2. Additionally, in cases where it is deemed necessary to change the base prices of single stock futures, the price determined by the Exchange for each case.

(4) In cases where the price pursuant to paragraph (1) or (3) is not consistent with the quotation price unit, among the prices consistent with the quotation price unit, the price that is closest to the price pursuant to paragraph (1) or (3) shall be the base price (in cases where there are two (2) such prices, it shall be the higher one).

(5) Notwithstanding paragraphs (1) through (4), when there is trading abnormality or it is deemed necessary for market management, the Exchange may change the base prices. [October 1, 2010; November 3, 2014]

§56. Price Limits in Futures Trading

(1) The upper limit price of futures trade pursuant to [§70(2)] of the Regulation shall be the price obtained by adding the futures daily price limit range (referring to the value determined by multiplying each price limit rate noted in [Annex 14] to the base price of futures (in the case of V-KOSPI 200 futures, if the figure is lower than five (5) point, it shall be five (5) point); the same hereinafter) to the base price. Provided that, in cases where the relevant price is not consistent with the quotation price unit, it shall be, among the quotation price units that are lower than the relevant price, the one closest to the relevant price. (Amended on August 28, 2014; November 3, 2014)

(2) The lower limit price of futures trade pursuant to [§70(2)] of the Regulation shall be the price obtained by subtracting the futures daily price limit range from the base price. Provided that, in cases where the relevant price is not consistent with the quotation price unit, it shall be, among the quotation price units that are higher than the relevant price and are consistent with the quotation price unit, the one closest to the relevant price. (Amended on August 28, 2014)

(3) Notwithstanding paragraphs (1) and (2), when an abnormality in trading has been observed or it is deemed necessary for the market management, the Exchange may change the upper or lower price limit or price limit range of futures. (Amended on October 26, 2009; August 28, 2014)

§56-2. Price Limits by Phase of Equity Futures Trades

(1) In the case of applying [§56] to the trading of equity derivatives, the price limit rate of futures trading in the [Annex 14] shall be the 1st phase. (Amended on June 20, 2016; April 18, 2025)

(2) Notwithstanding paragraph (1), in the case of falling under any of the following subparagraphs after fifteen (15) minutes after the start of regular trading hours in the regular session of equity futures, the price limit rate of the relevant futures trade may be expanded to the 2nd phase or the 3rd phase as specified in each of the following subparagraphs. Provided that, during the quotation receiving hours for closing price by periodic call auction, the price limit rate shall not be expanded. (Amended on July 3, 2015; March 15, 2018; June 12, 2018; December 7, 2018; July 18, 2023; April 18, 2025; May 29, 2025)

1. For the case of futures trades other than the subparagraph 2: the price limit rate classified in each of the following items. Provided that, Mini KOSPI 200 Futures trades shall apply with the same price limit rate as that of KOSPI 200 Futures:

(a) Where the execution price [excluding the execution price of the delivery month contract which is deemed to be executed following the execution of futures spread trades and the execution price of negotiated trades; the same hereinafter in Item(b)] of the base contract [referring to the delivery month contract {if there are two (2) or more of such contracts, it shall be the contract of which the last trading day arrives earlier, excluding the contracts of which the last trading days correspond to the immediately preceding trading day and the relevant trading day. Provided that it shall be the nearest contract if the last trading day of all contracts is arrived} that has the largest trading volume during the regular session of

the immediately preceding trading day (excluding the trading volume by futures spread trades and negotiated trades) per futures trade (excluding Mini KOSPI200 Futures trades; the same hereinafter in this Subparagraph) with the same underlying assets; the same hereinafter in this Article] is the upper limit price at the relevant phase: In the case of passing 5 minutes or more since then, the price limit rate of the upper price limit of the relevant futures trade shall be expanded to the 2nd phase or the 3rd phase sequentially. (Amended on May 29, 2025; June 11, 2026)

(b) Where the execution price of the base contract is the lower price limit at the relevant phase: In the case of passing 5 minutes or more since then, the price limit rate of the lower price limit of the relevant futures trade shall be expanded to the 2nd phase or the 3rd phase sequentially. Provided that the case where the price limit rate of the lower price limit of the relevant futures trade has already been expanded to the relevant phase pursuant to the item(c) shall be excluded.

(c) From among the cases of stock index futures trades (excluding sector index futures trades; the same hereinafter in this Item), the cases where the trading of the stock market is suspended pursuant to [§25(1)] of KOSPI Market Business Regulation or [§26(1)] of KOSDAQ Market Business Regulation: when the trading is resumed pursuant to [§77(2)] of the Regulation, the price limit rate of the lower price limit as classified in each of the followings shall be expanded to the 2nd phase or the 3rd phase. Provided that the case where the price limit rate of the lower price limit of the relevant stock index futures trade has already been expanded to the relevant phase pursuant to the item (b) shall be excluded, and in the case of KRX 300 futures, it shall be limited to the case of resuming the trading in the KOSPI Market after trade suspension.

(i) Case of being suspended after the stock market falls 8 percent or more but less than 15 percent: the price limit rate of the lower price limit of stock index futures trading based on the relevant stock market shall be expanded to the 2nd phase.

(ii) Case of being suspended after the stock market falls 15 percent or more: the price limit rate of the lower price limit of stock index futures trading based on the relevant stock market shall be expanded to the 3rd phase.

2. For V-KOSPI 200 futures trades: In cases where the price limit rate of the upper or lower limit price of KOSPI 200 futures trade is expanded pursuant to the subparagraph 1, the price limit rate of the upper or lower limit price of V-KOSPI 200 futures trade shall be expanded simultaneously to the relevant phase.

(3) Notwithstanding paragraph (2), when the Exchange deems necessary due to the change of the market situations or for the market management, it may change the base contract or the expanded hours of the price limit rate pursuant to paragraph (2).

[May 19, 2015]

§57. Base Price in Options Trading

(1) Pursuant to [§70(2)] of the Regulation, the base price for trading options contract shall be

any one of the following prices. Provided that the base price of a contract of Mini KOSPI200 options shall be the base price of a contract of KOSPI200 options of which the type of options (referring to the call options under subparagraph 11 of [§2] of the Regulation and put options under subparagraph 12 of [§2] of the Regulation), the last trading day and exercise price are the same:(Amended on July 3, 2015)

1. During the period from the first trading day to the day when the first trade is executed, the theoretical price of options calculated by using the calculation formula in [Annex 15] through [Annex 17]. Provided that, in cases where the ex-dividend, etc. has occurred in Single Stock Options trade, it shall be the adjusted theoretical price of single stock options;

2. After the trading day following the execution of first trade, the base price for member margin of the immediately preceding trading day pursuant to [Annex 19]; and (Amended on May 29, 2025)

3. [Deleted on August 28, 2014]

(2) “Adjusted theoretical price of single stock options” in paragraph (1)1 shall refer to the theoretical price calculated by applying the calculation formula in [Annex 16] *mutatis mutandis*. In such cases, “the base price of underlying stock of the previous day” shall be regarded as “the adjusted base price of underlying stock”, and “the cash dividend per share” shall be regarded as “the price (to be rounded off at the 9th place of decimals) calculated by multiplying the cash dividend per share by the value resulted from dividing the adjusted base price of underlying stock by the closing price of underlying stock of the previous day. (Amended on October 26, 2009; August 28, 2014)

(3) Notwithstanding paragraph (1), the base price of the single stock option contract, for which exercise price is adjusted pursuant to [§15], shall be adjusted to the price specified in each of the following subparagraphs: (Amended on December 10, 2010)

1. When there has been ex-divided, etc.: the price determined according to the following formula (to be rounded off at the 3rd decimal place):

Base price pursuant to paragraph (1)2× (Adjusted base price of underlying stock ÷ Closing price of underlying stock on previous day)

2. Additionally, when it is deemed necessary to adjust the base price in the options trading: the price determined by the Exchange for each case.

(4) In cases where the prices calculated pursuant to paragraphs (1) through (3) are not consistent with the quotation price unit, the base price shall be the price, among the prices that are consistent with the quotation price unit, which is closest to the calculated price (if there are two (2) such prices, the higher price).

(5) Notwithstanding paragraphs (1) through (4), when there is an abnormality in trading or it is deemed necessary for the market management, the Exchange may change the base price. [October 1, 2010]

§58. [Deleted on October 1, 2010]

§59. Price Limits in Options Trading

(1) The upper limit price in options trading pursuant to [§70(2)] of the Regulation shall be the theoretical price of upside call option when the price of underlying asset rises by the price limit rate in [Annex 14] and the theoretical price of downside put option when the price of underlying asset drops by the price limit rate in [Annex 14]; and the lower limit price shall be the theoretical price of downside call option when the price of underlying asset drops by the price limit rate in [Annex 14] and the theoretical price of upside put option when the price of underlying asset rises by the price limit rate in [Annex 14].

(2) Notwithstanding paragraph (1), in cases where the theoretical prices of upside call option and downside put option pursuant to paragraph (1) is lower than the base price, the base price shall be the upper limit price; and in case where the theoretical prices of downside call option and upside put option is higher than the base price, the base price shall be the lower limit price.

(3) With regard to the calculation of the upper limit price and the lower limit price in options trading, the provisions of [§57(1)1] shall apply *mutatis mutandis*. In such cases, “base price of underlying asset on previous day” and “volatility” in [Annex 15] through [Annex 17] shall be deemed the figures in each of the following subparagraphs: (Amended on May 19, 2015; September 16, 2015; December 2, 2020)

1. Base price of underlying asset on previous day: the figure following each of the following items:

(a) Case of calculating the theoretical prices of upside call option and the theoretical prices of upside put option: Base price of underlying asset on previous day + (Base price of underlying asset on previous day × Price limit rate); and

(b) Case of calculating the theoretical prices of downside call option and the theoretical prices of downside put option: Base price of underlying asset on previous day - (Base price of underlying asset on previous day × Price limit rate)

2. Volatility: The figure in each of the following items:

(a) Case of calculating the upper limit price of option trading (referring to the theoretical price of upside call option and the theoretical price of downside put option: the same hereinafter.): Volatility (in the case of option contract of which trading was executed in the immediately preceding regular session, it shall be annual implied volatility of the relevant option contract, which the Exchange calculates on the immediately preceding trading day, but , in the case of stock option trading, if the annual implied volatility concerned is lower than the annual implied volatility of the underlying stock calculated by the Exchange, it shall be the annual implied volatility of the underlying stock) × 2; and (Amended on May 29, 2025)

(b) Case of calculating the lower limit price of option trading (referring to the theoretical price of downside call option and the theoretical price of upside put option: the same

hereinafter): 3/100

(4) [Deleted on May 19, 2015]

(5) In cases where the price calculated pursuant to paragraph (3) is not consistent with the quotation price unit, the upper limit price shall be the price that, among the prices that are lower than the relevant price calculated and consistent with the quotation price unit, is the closest to the relevant price calculated; and the lower limit price shall be the price that, among the prices that are higher than the relevant price calculated and consistent with the quotation price unit, is the closest to the relevant price calculated. (Amended on May 19, 2015)

(6) Notwithstanding paragraph (1), when an abnormality in options trading has been observed or it is deemed necessary for market management, the Exchange may change the upper and lower limit prices, the method of calculating volatility of the relevant contract and the calculation method of upper and lower limit prices. (Amended on October 26, 2009)

§59-2. Price Limit by Phase of Options of Equity Derivative Products

(1) When the provision of [§59] is applied to the trading of equity derivatives, the price limit rate of options trading in the [Annex 14] shall be deemed as the 1st phase.

(2) Notwithstanding paragraph (1), in the case of expanding the price limit rate of futures trading pursuant to [§56-2(2)1], the price limit rate of options trading with the same underlying assets shall be expanded to the same phase as the relevant futures trading simultaneously pursuant to each of the following subparagraphs:

1. For a case of expanding the price limit rate of the upper price limit of futures trading: the price limit rate in the theoretical price of upside call option and the theoretical price of upside put option shall be expanded; and
2. For a case of expanding the price limit rate of the lower price limit of futures trading: the price limit rate in the theoretical price of downside call option and the theoretical price of downside put option shall be expanded.

[May 19, 2015]

§59-3. Establishment of Lowest Upper Limit Prices of Options of Equity Derivative Products

Notwithstanding [§59] and [§59-2], in cases where the upper limit prices of the options of equity derivatives products are lower than the prices classified in each of following subparagraphs, the corresponding price shall be the upper limit price. (Amended on March 15, 2018)

1. For KOSPI 200 options and Mini KOSPI 200 options: 0.05 points;
2. For KOSDAQ 150 options: 0.5 points; and
3. For single stock options: KRW 50.

[November 10, 2017]

§60. Price Limits for Intra-product Spread Trading

(Amended on October 30, 2019)

(1) The upper limit price for intra-product spreads trading under [§70(2)] of the Regulation shall be the price obtained by adding the daily price limit range of futures spreads{referring to the value calculated by multiplying each price limit rate under[Annex 14] to the base price of futures spread(in the case of V-KOSPI 200 futures spread, if the figure is lower than 1.5 points, it shall be 1.5 points); the same hereinafter in this Article}to the futures spread classified in each of the following subparagraphs. Provided that, in cases where such price is not consistent with the quotation price unit, from among the prices consistent with the quotation price units that are lower than such price, the price closest to such price shall be the upper price limit. (Amended on June 18, 2010; October 1, 2010; August 28, 2014; November 3, 2014; October 30, 2019)

1. For the interest rate futures spreads:

Base price of the nearest month contract– Base price of the farther month contract

2. For the futures spreads other than interest rate futures spreads:

Base price of the farther month contract– Base price of the nearest month contract

(2) The lower limit price for intra-product spreads trading under [§70(2)] of the Regulation shall be the price calculated by subtracting the spread daily price limit range of futures spread from the base price of spread classified in paragraph (1).Provided that, in cases where such price is not consistent with the quotation price unit, from among the prices consistent with the quotation price units that are higher than such price, the price closest to such price shall be the lower price limit. (Amended on June 18, 2010; August 28, 2014; October 30, 2019)

1. [Deleted on August 28, 2014]
2. [Deleted on August 28, 2014]

(3) Notwithstanding paragraphs (1) and (2), in cases where there is an abnormality in trading situation or it is deemed necessary for market management, the Exchange may change upper price limits, lower price limits or price limit ranges for intra-product spread trading. [June 18, 2010] (Amended on October 30, 2019)

§60-2. Price Limits for Inter-product Spread Trading

(1)The upper limit price for inter-KTB futures spreads trading under [§70(2)] of the Regulation shall be the price calculated by adding the daily price limit range of futures spreads (referring to the value determined by multiplying each price limit rate under [Annex 14] to the base price of 3-year KTB futures spreads; the same hereinafter in this Article) to zero (0).Provided that, in cases where such price is not consistent with the quotation price unit, from among the prices consistent with the quotation price units that are lower than such price, the price closest to such price shall be the upper price limit.

(2) The lower limit price for inter-KTB futures spreads trading under [§70(2)] of the Regulation shall be the price calculated by subtracting the spread daily price limit range of futures spread from zero (0). Provided that, in cases where such price is not consistent with the quotation price units, from among the prices consistent with the quotation price units that are higher than such price, the price closest to such price shall be the lower price limit.

(3) Notwithstanding paragraphs (1) and (2), in cases where there is an abnormality in trading situation or it is deemed necessary for market management, the Exchange may change upper price limits, lower price limits or price limit ranges for inter-product spread trading.

[October 30, 2019]

§60-3. Trades and Contracts subject to Real-time Price Limits

(Amended on October 30, 2019)

(1) Pursuant to [§70-2(3)] of the Regulation, the trades applying the real-time upper limit price and the real-time lower limit price (hereinafter referred to as “real-time price limit”) shall be designated as the futures trades (including intra-product futures spread trades) and options trades in each of following subparagraphs. Provided that the real-time price limit shall not apply to the negotiated trades. (Amended on March 15, 2018; August 17, 2018; October 30, 2019; May 29, 2025)

1. KOSPI 200 futures trades;
2. Mini KOSPI 200 futures trades;
3. KOSPI 200 options trades;
4. KOSDAQ 150 futures trades;
5. Single stock futures trades;
6. 3-year KTB futures trade and 10-year KTB futures trades; and
7. USD futures trades.

(2) Pursuant to [§70-2(3)] of the Regulation, the contracts applying the real-time price limit shall be contracts in each of following subparagraphs among contracts falling under each subparagraph in paragraph (1): (Amended December 4, 2014; July 30, 2019; October 30, 2019)

1. For futures and options: The nearest month contract and delivery week contracts. Provided that the second nearest month contract is included for four (4) trading days retroactive the lasting trading day of the nearest month contract; and
2. For intra-product futures spreads: One (1) contract between the nearest month contract and the second-nearest month contract of futures trade [limited to four (4) trading days retroactive the last trading day of the nearest month contract].

(3) Pursuant to [§70-2(3)] of the Regulation, when the real-time upper limit price or the real-time lower limit price noted in [§70-2(1)] of the Regulation does not correspond to the quotation price unit, it shall be designated as the price determined in each following subparagraphs among the prices corresponding to the quotation price unit:

1. For the real-time upper limit price: The nearest price among the prices lower than the real-time upper limit price; and

2. For the real-time lower limit price: The nearest price among the prices higher than the real-time lower limit price.

(4) Notwithstanding paragraph (1)5, the Exchange shall separately determine whether to apply or not to apply the real-time price limit per underlying stock in consideration of the trading circumstances for single stock futures (including single stock futures spreads). (Amended on August 17, 2018)

(5) Pursuant to [§70-2(3)] of the Regulation, the real time price limits shall not apply to quotations submitted before the first contract price (limited to the case where the first contract price noted in [§73(1)1] of the Regulation is determined by the method of continuous auction) noted in subparagraph 1 of [§63] is determined. [December 21, 2022]

[August 20, 1024]

§60-4. Real-time Price Limit Price Fluctuations

(Amended on October 30, 2019)

(1) Pursuant to [§70-2(3)] of the Regulation, the real-time price limit range shall be stipulated in [Annex25].

(2) Notwithstanding paragraph (1), in the case of abnormal trade circumstances or any other cases that are deemed necessary for market management, the Exchange may change the price change range noted in paragraph (1).

[August 20, 2014]

§60-5. Release from Application of Real-time Price Limits

(Amended on October 30, 2019)

(1) Pursuant to [§70-2(2) and (3)] of the Regulation, the Exchange may not apply the real-time price limit in comprehensive consideration of trade execution and market circumstances, the gap between the execution price and the price of underlying asset, etc. In such cases, termination and resumption of the real-time price limit, and other necessary matters for the real-time price limit shall be determined by the Exchange separately.

(2) For the trading of equity derivatives of which price limit rate was expanded pursuant to [§56-2] or [§59-2], notwithstanding the provisions of subparagraphs 1 through 5 of [§60-3(1)], the application of real-time price limit shall be cancelled pursuant to [§70-2(2)] of the Regulation. [May 19, 2015] (Amended on March 15, 2018; August 17, 2018; October 30, 2019)

[August 20, 2014]

§61. Quotation Quantity Limits and Accumulated Quotation Quantity Limits

(1) Pursuant to [§71] of the Regulation, the quotation quantity limit and accumulated quotation quantity limit shall be the quantity noted in [Annex 17-2]. Provided that, when it is deemed necessary for the market management, the Exchange may change the quotation quantity limits and accumulated quantity limits. (Amended on October 26, 2009; June 18, 2010; February 17, 2012; July 8, 2013; August 28, 2014; June 12, 2018)

(2) The accumulated quotation quantity limit noted in paragraph (1) shall apply only to proprietary accounts and ex-post customer margin accounts of a member that conducts trading noted in any of the following subparagraphs (excluding the negotiated trades): (Amended on August 28, 2014; July 3, 2015; March 15, 2018; May 29, 2025)

1. Trading of KOSPI200 futures (including futures spread trades);
2. Trading of KOSPI200 options;
3. Trading of Mini KOSPI200 futures ((including futures spread trades); and
4. Trading of Mini KOSPI200 options.

(3) Notwithstanding paragraph (1), the member may specify the quotation quantity limit and accumulated quotation quantity limit that is within the quantity according to paragraph (1). [July 8, 2013]

(4) Notwithstanding paragraphs (1) and (2), in cases where the block trading (excluding algorithmic trading) deems necessary, the member may adjust the accumulated quotation quantity limit of the relevant trade, which is raised subsequent to the review by the risk management department of member. In such cases, the member shall preserve the documents related to the review by its risk management department for a period of ten (10) years. [July 8, 2013]

CHAPTER 2. TRADE EXECUTION

Section 1. Methods of Trade Execution

§62. Priority of Quotations at Upper/Lower Limit Prices for Periodic Call Auction

(1) Pursuant to [§72(3)2p] of the Regulation, in cases where the contract price of periodic call auction is established at the upper limit price [in the case of the regular session trading of equity derivatives, it shall be limited to the upper price limit of the 3rd phase (including the upper price limit of the 1st phase or the 2nd phase, which is the same as the price): the same hereinafter in this paragraph and the paragraph (2)] or the lower limit price [in the case of the regular session trading of equity derivatives, it shall be limited to lower price limit of the 3rd phase (including lower price limit of the 1st phase or the 2nd phase, which is the same as the price): the same hereinafter in this paragraph and the paragraph (2)], the priority of the bid or ask quotations for periodic call auction placed at the upper limit price or the bid or ask quotations placed at the

lower limit price shall be in the order specified in each of the following subparagraphs, while the quotation with higher quantity having priority over the quotations with lower quantity (between the quotations with the same quantity, the quotation recorded earlier in the Exchange derivatives system shall have priority over the ones recorded later) until it reaches to that quantity. In such cases, when the quantity changes as a result of correction or cancellation of quotation, it shall be based on the remaining quantity. (Amended on May 19, 2015; June 20, 2016; December 21, 2022; April 18, 2025; April 9, 2026)

1. First priority: Trading quantity unit;
2. Second priority: Five (5) times the trading quantity unit;
3. Third priority: Ten (10) times the trading quantity unit;
4. Fourth priority: Twenty (20) times the trading quantity unit;
5. Fifth priority: Fifty (50) times the trading quantity unit;
6. Sixth priority: One hundred (100) times the trading quantity unit;
7. Seventh priority: Two hundred (200) times the trading quantity unit;
8. Eighth priority: 1/2 of the remaining quantity (the quantity less than the trading quantity unit shall be rounded up to trading quantity unit); and
9. Ninth priority: All remaining quantity.

(2) The provisions in paragraph (1) shall apply until the entire quantity of quotations for periodic call auction placed at the upper limit price or lower limit price (in the case of the market quotations, it shall be until they are regarded as the quotations at the prices other than the upper limit price or lower limit price).

(3) Notwithstanding paragraphs (1)1 through (1)7, for the contracts of Single Stock Futures of which the base price is less than KRW 50,000, paragraph (1) shall apply while using the quantity obtained by multiplying ten (10) to the quantity in each relevant subparagraph. (Amended on July 3, 2015)

§63. Exceptions to Transactions by Call Auction

(Amended on December 21, 2022)

Pursuant to the proviso to other part than each subparagraph of [§73(1)3] of the Regulation, the contract price in each of the following subparagraphs shall be determined by continuous auction: (Amended on July 30, 2010; October 20, 2010; July 8, 2013; August 28, 2014; October 28, 2015; June 20, 2016; December 21, 2022)

1. The first contract price of the product in cases where the first contract price noted in [§73(1)1 or 2] of the Regulation is not determined by call auction with quotations participating in the call auction noted in [§64]; and
2. The last closing contract price of the contracts (excluding 3-month risk free benchmark interest rate futures, currency futures, lean hog futures, single stock futures and options of which underlying stock is scheduled to be delisted) of which the last trading day has

arrived; (Amended on April 18, 2025)

3. [Deleted on April 5, 2024]

§64. Range of Quotations for Call Auction

(1) The range of quotation participating in call auctions pursuant to [§73(2)] of the Regulation shall be the quotations received during the period specified in each of the following subparagraphs (referred to as the “quotation receiving hours for call auction”) and the unexecuted quotations that were received earlier. (Amended on August 28, 2014; May 19, 2015; April 4, 2019; December 21, 2022)

1. When determining the first contract price (hereinafter referred to as the “opening price by call auction”) noted in [§73(1)1] of the Regulation: A period in each of the followings (hereinafter referred to as “quotation hours for opening price by call auction”); (Amended on May 29, 2025)

(a) For regular session: A period of fifteen (15) minutes before the opening of regular session. Provided that, in the case of the markets where the regular trading hours do not start at 8:45 according to subparagraphs 2 and 3 of [Annex 1-2], it shall be a period of thirty (30) minutes before the opening of regular session; and [May 29, 2025]

(b) For night session: A period of ten (10) minutes before the opening of night session. [May 29, 2025]

2. When determining the first contract price after the resumption of trading pursuant to [§76(2)] of the Regulation: a period of time determined by the Exchange for each case;

3. When determining the first contract price after the resumption of trading pursuant to [§77(2)] of the Regulation: the first ten (10) minutes after the resumption of trading; and

4. When determining the closing price by call auction: the period of ten (10) minutes immediately before the closing of each regular session and night session. (Amended on May 29, 2025)

(2) Notwithstanding paragraph (1), for the single stock futures, single stock futures spread, and single stock options of which the underlying stock is designated as the issues scheduled to be delisted, the scope of quotations for periodic call auction shall be the quotations received during the period noted in each of the following subparagraphs (hereinafter referred to as the “quotation hour for periodic call auction of the issues scheduled to be delisted”) and the quotations that were received before such hour but have not yet been executed: (Amended on February 28, 2014; May 19, 2015; June 20, 2016; April 5, 2024; November 1, 2024)

1. The period from the beginning of quotation receiving hour for the regular session to the opening of regular session;

2. The period from the start of regular trading hours until the start of trading hours of the

regular session (hereinafter referred to as the “trading hours of KOSPI Market”) pursuant to [§4(3)1] of the KOSPI Market Business Regulation

3. Before the unit time for trade execution in the following items:

(a) The time elapsed each thirty-minute from the start of trading hours of KOSPI Market;

(b) The time elapsed each thirty-minute from the time of the trading resumption when trading is resumed pursuant to [§76(2)] of the Regulation (in cases where trading is on halt pursuant to [§74(2) and (5)] of the Regulation and resumed pursuant to [§76(2)] of the Regulation, item(a) shall apply. Provided that, in cases where the time period from the trading resumption to the nearest unit time for trade execution is less than ten (10) minutes, the following unit time for trade execution.). Provided that, when the unit time for trade execution immediately before 15:30 hours is after 15:20 hours, the period shall be from the unit time for trade execution immediately before 15:00 hours until 15:30 hours (for the contracts of which the last trading day has arrived, if the unit time for trade execution of before 15:00 hours is after 14:50 hours, the period shall be from the unit time for trade execution immediately before 14:30 hours until 15:00 hours).

4. The period from 15:30 hours until 15:45 hours. Provided that, in the case of contracts of which the last trading day has arrived; the period shall be from 15:00 hours until 15:20 hours.

(3) When intending to halt the trading pursuant to [§76(1)] of the Regulation during the quotation receiving hour for periodic call auction pursuant to paragraph (2)2, the trading shall be halted without executing trade by periodic call auction. (Amended on February 28, 2014; May 19, 2015)

(4) Notwithstanding the provisions of paragraphs (1) and (2), the Exchange may change the quotation receiving hour for periodic call auction and the quotation receiving hour for periodic call auction of the issues scheduled to be delisted, when the trading hours are changed, or it is deemed that such change is necessary for the market management.

§65. Deemed Price of Market Quotations at Periodic Call Auction

When determining the contract price by periodic call auction pursuant to [§73(3)] of the Regulation, the deemed price of market quotation shall be the price falling under each of the following subparagraphs: (Amended on August 28, 2014)

1. In cases where there are only bid and offer market quotations, the price in each of the following items:

(a) If the sum of the quantity of offer markets quotations and the sum of the quantity of bid market quotations are the same, the most recent contract price;

(b) If the sum of the quantities of offer market quotations is higher than the sum of the quantities of bid market quotations, the price resulting from subtracting the quotation price unit from the most recent contract price (the lower limit price if such price is lower than the lower limit price: the same hereinafter); and

(c) If the sum of the quantities of bid market quotations is higher than the sum of the quantities of offer market quotations, the price resulting from adding the quotation price unit to the most recent contract price (the upper limit price if such price is higher than the upper limit price: the same hereinafter).

2. For the offer market quotations other than those noted in subparagraph 1, the lowest among the prices noted in each of the following items:

(a) The price resulting from subtracting quotation price unit from the lowest price of ask quotations (excluding the offer market quotations: the same hereinafter in this Article and [§67]);

(b) The lowest price of bid quotations (excluding the bid market quotations: the same hereinafter in this Article and [§67]); and

(c) The most recent contract price.

3. For the bid market quotations other than those noted in subparagraph 1: the highest among the prices noted in each of the following items:

(a) The price resulting from adding a quotation price unit to the highest price of bid quotations;

(b) The highest price of ask quotations; and

(c) The most recent contract price.

§66. Exceptions to Periodic Call Auction

Pursuant to the proviso to the part other than each subparagraph of [§73(4)] of the Regulation, if it falls under the provisions of [§77(1)] of the Regulation during the quotation-receiving hours for periodic call auction for the trade resumption (excluding the trade resumption in the case that the Exchange deems necessary) as stipulated in [§76] of the Regulation, no trades shall be executed by periodic call auction and the trading shall be halted. (Amended on August 28, 2014; May 19, 2015)

§67. Deemed Price of Market Quotations during Continuous Auction

When determining the contract price by means of continuous auction pursuant to [§74(2)] of the Regulation, the deemed price of market quotations shall be the price falling under each of the following subparagraphs: (Amended on August 8, 2014)

1. For offer market quotations, the lowest among the prices noted in each of the following items:

(a) The price resulting from subtracting a quotation price unit from the lowest asks quotation. Provided that, in cases where there is no ask quotation, it shall be the most recent

contract price; and

(b) The lowest price of bid quotations. Provided that, a case where the price of bid quotations with partial execution condition or total execution condition is lower than the real-time lower price limit shall be excluded.

2. For bid market quotations, the highest among the prices noted in each of the following items:

(a) The price resulting from adding a quotation price unit to the highest bid quotation. Provided that, in cases where there is no bid quotation, it shall be the most recent contract price; and

(b) The highest price of ask quotations. Provided that, a case where the price of ask quotations with partial execution condition or total execution condition is higher than the real-time upper price limit shall be excluded.

[August 20, 2014]

§67-2. Change of Market Quotations and Record, etc.

(1) Pursuant to [§74(3)] of the Regulation, in the case of the bid price of market quotation over the real-time upper limit price or the offer price of market quotation under the real-time lower limit price, the market quotations shall be converted into limit quotations. In such cases, the receipt number of quotation shall not be assigned separately.

(2) Pursuant to paragraph (1), the details of limit quotations converted from the market quotations shall be recorded in the Exchange derivatives system by the priority of quotation pursuant to [§72(3)] of the Regulation based on the market quotations prior to the conversion.

[August 20, 2014]

Section 2. Special Cases of Methods of Trade Execution

[November 3, 2014]

§67-3. Restrictions of Negotiated Trades

(1) In accordance with [§75(5)] of the Regulation, a member shall not cancel or correct the request that was made to the Exchange for a negotiated trade. Provided that this provision shall not apply to the case of canceling a negotiated trade that has not yet been executed. (Amended on August 28, 2014)

(2) Pursuant to [§75(5)] of the Regulation, a member shall not make a request for negotiated trades falling under each of the following subparagraphs: (Amended on August 28, 2014; June 15, 2017; June 13, 2021)

1. A request through market-making accounts;

2. A request affixed with the ‘immediate or cancel’ condition or ‘fill or kill’ condition;
3. A request for quotations other than a limit quotation;
4. In the case of trading the exchange of futures for physicals, a request with the quantity that exceeds the quantity of open interests held for the relevant USD futures and a request when the prices in the USD spot market noted in [§72-3(2)] are not available; and
5. Deleted on July 13, 2021

[August 21, 2009]

§67-4. Trades eligible for Negotiated Block Trading

“Trades specified in the Enforcement Rules” in [§75-2(1)] of the Regulation shall refer to the trades classified in each of the following subparagraphs: (Amended on June 15, 2017; March 15, 2018; February 16, 2022; June 29, 2023; April 5, 2024; May 29, 2025)

1. Equity derivatives trades. Provided that volatility index futures trades are excluded;
2. Interest futures trades. Provided that 5-year KTB futures trades are excluded;
3. Currency derivatives trades: Provided that USD options trades are excluded;
4. Commodity futures trades. Provided that Lean Hog futures trades are excluded; and
5. Futures spread trades. Provided that V-KOSPI 200 futures spread trades, 5-year KTB futures spread trades, Inter-KTB futures spread trades, and Lean Hog futures spread trades shall be excluded.

(Wholly amended on June 20, 2016)

§68. Hours for requesting Negotiated Block Trading

“Hours set by the Enforcement Rules” in [§75-2(2)] of the Regulation shall be the regular trading hours or the night trading hours. (Amended on May 29, 2025)

§69. Price of Negotiated Block Trade

“The price stipulated in the Enforcement Rules in [§75-2(3)] of the Regulation shall refer to, from among the prices deemed to be fair and rational in terms of the pricing situation and the trading volume of the relevant market at the time of conclusion of the negotiation, the price corresponding to the quotation price unit in each of the following subparagraphs: (Amended on June 29, 2023; November 24, 2023; April 5, 2024; April 18, 2025)

1. For trades of stock index futures, stock index options, and stock index futures spread: 0.01 points.
2. For trades of single stock futures, single stock options, ETF futures, single stock futures spread, and ETF futures spread: KRW 1;
3. For trades of KTB futures and KTB futures spread: 0.01. Provided that, it shall be 0.02 for 30-year KTB futures and 30-year KTB futures spread trades;
4. For trades of 3-month risk free benchmark interest rate futures and 3- month risk free benchmark interest rate futures spread: 0.005;
5. For trades of currency futures and currency futures spread: 0.10. Provided that, it shall be 0.01 for CNY futures and CNY futures spread; and
6. For trades of gold futures and gold futures spread: KRW 10.

(2) [Deleted on April 5, 2024]

§70. Requesting Quantity of Negotiated Block Trading

The requesting quantity of negotiated block trading noted in [§75-2(4)] of the Regulation shall be the quantities specified in [Annex 26]. (Wholly amended on March 21, 2016)

§71. Requesting Details and Methods for Negotiated Block Trading

(1) Pursuant to [§75-2(4)] of the Regulation, when intending to request a negotiated block trade, the members shall input each of the following details to the Exchange derivatives system via the member derivatives system or member derivatives input device: (Amended on August 21, 2009; June 15, 2017)

1. Name of contract;
2. Price;
3. Quantity;
4. Derivatives account number (for foreigner's consolidated accounts, it shall be the classification code by end-investor under [§114-3(1)]);
5. Classification of ask and bid;
6. Name and derivatives account number (for foreigner's consolidated accounts, it shall be the classification code by end-investor under [§114-3(1)]) of the member who is the counter party of trade;
7. Time when the agreement for negotiated block trading was concluded; and
8. In addition, other matter that the Exchange deems it necessary.

(2) Members shall request the Exchange during the trading hours of the relevant day for negotiated block trades for which negotiation has been concluded from the time of market closing on the immediately preceding trading day to the time of market closing on the relevant day. (Amended on August 28, 2014; March 21, 2016; June 20, 2016; June 29, 2023; April 5, 2024; May 29, 2025)

(3) When requesting for negotiated block trades pursuant to paragraphs (1) and (2), members shall collect and keep the materials that verify details of the negotiation.

(4) In cases where a member requests for negotiated block trades during the regular trading hours and the request time is delayed by more than one (1) hour from the time when the negotiation concluded (in case where the relevant time is out of the regular trading hours, it shall be the opening time of the regular trading), the relevant member shall keep records of the causes for the delay. [March 21, 2016] (Amended on June 29, 2023; April 5, 2024; May 29, 2025)

(5) Members shall keep the materials mentioned in paragraphs (3) and (4) for ten (10) years. [March 21, 2016]

§72. [Deleted on August 21, 2009]

§72-2. Target, Price Range, and Requesting Hours and Quantity for Exchange of Futures for Physicals

(1) “Futures specified in the Enforcement Rules” in [§75-3(1)] of the Regulation shall be the USD futures. [March 13, 2017]

(2) “Price set by the Enforcement Rules” in [§75-3(2)] of the Regulation shall be the price calculated by applying [§69] *mutatis mutandis*. [March 13, 2017] (Amended on June 29, 2023; April 5, 2024)

(3) Pursuant to [§75-3(3)] of the Regulation, the requesting hours for trading the exchange of futures for physicals shall be the regular trading hours. . (Amended on August 28, 2014; April 5, 2024)

(4) Pursuant to [§75-3(3)] of the Regulation, when requesting the trade of the exchange of futures for physicals, 15,000 contracts shall be the maximum quantity.

[August 21, 2009]

§72-3. Details and Methods of Requesting Exchange of Futures for Physicals

(1) Pursuant to [§75-3(3)] of the Regulation, when intending to request a trading of exchange of futures for physicals, the members shall input each of the following details to the Exchange derivatives system via the member derivatives system or member derivatives input device:

1. Matters specified in [§71(1)1] through [§71(1)7];
2. Prices of US dollar in the spot market; and
3. In addition, the matters that the Exchange deems necessary.

(2) Prices of US dollar in the spot market noted in paragraph (1)2 shall be the US dollar spot rates (shall be limited to those occurring after the start of regular trading hours on the trade date) established just before the conclusion of the agreement for trading the exchange of futures for physicals. (Amended on June 25, 2024; July 6, 2026)

(3) The member shall submit the request for trading of exchange of futures for physicals to the Exchange within the regular trading hours of the day after concluding the agreement for trading the exchange of futures for physicals. In this case, if the request for trading the exchange of futures for physicals is delayed by one (1) hour or more from the time when the negotiation concluded, the relevant member shall keep records of the causes for the delay. (Amended on August 28, 2014; April 5, 2024)

(4) [Deleted on June 29, 2023]

[August 21, 2009]

§72-4. Delivery and Receipt of US Dollar and Amount

(1) Pursuant to [§75-3(3)] of the Regulation, the parties trading the exchange of futures for physicals shall deliver and receive US dollar and the amount equivalent to the exchange of futures for physicals after the execution of the trade without delay.

(2) US dollar noted in paragraph (1) shall be the amount determined by multiplying the quantity requested for exchange of futures for physicals by the trading unit of USD futures.

(3) The amount noted in paragraph (1) shall be the amount determined by multiplying the amount of US dollar noted in paragraph (2) by the price of US dollar in the spot market noted in [§72-3(2)].

(4) The delivery and receipt of US dollar and amount between a member and the Exchange, a non-clearing member and a designated clearing member, and a member and a customer shall be accomplished by crediting or debiting the US dollar and amount to the accounts opened at the settlement banks. (Amended on November 3, 2014)

[August 21, 2009]

§72-5. Requesting Hours of Negotiated FLEX Trades

A request for FLEX trades pursuant to [§75-4(2)] of the Regulation shall be submitted from ten (10) minutes after opening of regular session to twenty (20) minutes before closing time of regular session (quotation receiving hours for periodic call auction for the USD futures of

which the last trading day has arrived shall be excluded) but excluding the quotation hours for periodic call auction. Provided that this provision shall not apply to the case of quotation hours for periodic call auction for the USD futures of which the last trading day has arrived. (Wholly amended on August 28, 2014)

§72-6. Price Range of FLEX Trades

(1) Pursuant to [§75-4(3)] of the Regulation, negotiated FLEX trades shall be requested at the price corresponding to the quotation price unit among prices in-between the price produced by subtracting the price limit range of negotiated FLEX (referring to the amount calculated by multiplying 1/100 by the base price of negotiated FLEX trade; the same hereinafter in this Paragraph) from the base price of the negotiated FLEX trade and the price produced by adding the price limit range of negotiated FLEX to the base price of the negotiated FLEX trade. (Amended on August 28, 2014)

(2) The base price for negotiated FLEX trade noted in paragraph (1) shall be the price resulted from the following calculation formula:

The most recent contract price of base contract [it refers to the delivery month contract (excluding contracts whose final trading day arrives on the previous day, and if there are two or more such contracts, it shall be the contract whose the last trading day arrives earlier) with the largest contract quantity (excluding contract quantity through futures spread trading and negotiated trading); the same hereinafter in this paragraph] of USD futures immediately before the conclusion of the negotiation + [the previous day's settlement price of USD futures (if no settlement price is available, the theoretical price determined by the Exchange) –the previous day's settlement price of the base contract of USD futures]. (Amended on August 28, 2014; May 29, 2025)

(3) Notwithstanding paragraph (1), the price of negotiated FLEX trade may be changed in case where the market condition has changed, or it is deemed necessary for the market management.

[August 21, 2009]

§72-7. Requesting Quantity of Negotiated FLEX Trades

The requesting quantity of negotiated FLEX trades pursuant to [§75-4(4)] of the Regulation shall be higher than ten (10) contracts, but less than five thousand (5,000) contracts. (Amended on October 26, 2009)

[August 21, 2009]

§72-8. Details to be specified and Method of Requesting Negotiated FLEX Trades

(1) Pursuant to [§75-4(4)] of the Regulation, when intending to request negotiated FLEX trades, the members shall input each of the following details to the Exchange derivatives system using the member derivatives system or member derivatives input device:

1. Matters specified in [§71(1)1 through 7];
2. The last trading day;
3. The final settlement method; and
4. In addition, the matter that are deemed necessary by the Exchange.

(2) The member shall submit the request for negotiated FLEX trade to the Exchange within ten (10) minutes of concluding the agreement for negotiated FLEX trades. (Amended on August 28, 2014)

[August 21, 2009]

§72-9. [Deleted on May 29, 2025]

§72-10. [Deleted on May 29, 2025]

§72-11. [Deleted on May 29, 2025]

§72-12. [Deleted on May 29, 2025]

§72-13. [Deleted on May 29, 2025]

Section 3. Trade Suspension

§73. Criteria for Discretionary Trade Suspension

(1) “As stipulated in the Enforcement Rules” in [§76(1)1] of the Regulation shall be the cases that falls under each subparagraph of [§4]. (Amended on August 28, 2014)

(2) “Period stipulated in the Enforcement Rules” in [§76(1)2] of the Regulation shall refer to ten (10) minutes. (Amended on August 28, 2014)

(3) “Number of stocks specified in the Enforcement Rules” in [§76(1)2] of the Regulation shall be the stocks noted in each of the followings: (Amended on August 28, 2014; October 28, 2015; March 15, 2018; April 5, 2024; November 1, 2024)

1. For KOSPI 200: one hundred (100) stocks;
 2. For KOSDAQ 150: seventy-five (75) stocks;
 3. For KRX 300: one hundred and fifty (150) stocks;
 4. For KOSDAQ Global: stocks corresponding to 1/2 of the number of constituent stocks;
- and

5. For Sector Index: stocks corresponding to 1/2 of the number of constituent stocks per sector index.

§74. Discretionary Suspension of Trades of Single Stock Futures and Single Stock Options

“Other cases stipulated in the Enforcement Rules” in [§76(1)3] of the Regulation shall be the cases falling under each of the following subparagraphs. In such cases, the provision of each subparagraph shall apply to each stock market in which the underlying stocks are listed. (Amended on August 28, 2014; July 3, 2015; November 25, 2021)

1. Where the stock market is temporary halted pursuant to [§6] of the KOSPI Market Business Regulation or [§6] of the KOSDAQ Market Business Regulation;
2. Where the trading of underlying stocks is halted pursuant to each subparagraph of [§26(1)] of the KOSPI Market Business Regulation or [§25(1)] of the KOSDAQ Market Business Regulation;
3. Where the trading or receipt of quotation for underlying stocks is temporarily halted due to the failure of trading system of KOSPI Market or influx of excessive quotations for certain issues;
4. Where the trading of underlying stocks is suspended pursuant to each subparagraph of [§153(1)] of the KOSPI Market Listing Regulation or [§18(1)] of the KOSDAQ Market Listing Regulation;
5. Where the trading of underlying stocks is suspended pursuant to each subparagraph of [§40(1)] of the KOSPI Market Disclosure Regulation or [§37(1)] of the KOSDAQ Market Disclosure Regulation; and
6. Additionally, case where the Exchange deems it necessary for market management of single stock futures and single stock options.

§74-2. Discretionary Suspension of ETF Futures Trades

“Other cases specified in the Enforcement Rules” in [§76(1)8] of the Regulation shall refer to the cases falling under each of the following subparagraphs:

1. Where the stock market is temporarily halted pursuant to [§6] of the KOSPI Market Business Regulation;
2. Where the trading of underlying ETFs is halted pursuant to each subparagraph of [§26(1)] of the KOSPI Market Business Regulation;
3. Where the trading or quotation receipt of underlying ETFs is suspended due to a failure in the trading system of the stock market or influx of excessive quotations for some issues;
4. Where the trading of underlying ETFs is suspended pursuant to each subparagraph of

[§153(1)] of the KOSPI Market Listing Regulation; and

5. Additionally, case where the Exchange deems it necessary for market management of ETF futures.

[June 15, 2017]

§75. Compulsory Suspension of Trading of Stock Index Futures, etc.

Pursuant to [§77(4)] of the Regulation, the provisions of [§77(1) through (3)] of the Regulation shall apply to the suspension, resumption and conclusion of each of the following futures trades (including spreads between contracts), based on the KOSPI Market: (Amended on July 13, 2021; November 24, 2023; November 1, 2024)

1. KRX 300 futures; and
2. KRX BBIG index futures, KRX Secondary Battery Index futures, KRX Bio Index futures, KRX Semiconductor Index futures, and Korea Value-up Index futures.
(Amended on October 1, 2025)

[December 7, 2018]

§75-2. Products Not Eligible for Night Trading under Compulsory Suspension of Trading

“The market specified in the Enforcement Rules” in the latter part of [§77(3)] of the Regulation shall refer to all markets noted in subparagraph 4 of Annex 1-2.

[May 29, 2025]

Section 4. Notification of Trading Details, Publication of Market Price, etc. (Amended on November 3, 2014)

§76. Trading Details to be Notified

“Trading details stipulated in the Enforcement Rules” in [§79(1)] of the Regulation shall refer to the details noted in each of the following subparagraphs: (Amended on August 28, 2014)

1. Member's ID number that the Exchange assigned to the member;
2. Name of contract;
3. Quantity;
4. Price;
5. Classification between bid and ask;
6. Classification between proprietary account trade and customer-account trade;

7. Category of limit quotation, market quotation, limit-to-market-on-close quotation and immediately executable limit quotation;
8. Trade execution time, day, month and year; and
9. Additionally, the matters that the Exchange deems them necessary.

§77. Methods of Correcting Transaction Errors

(1) Pursuant to [§81(3)] of the Regulation, the Exchange shall correct the transaction errors made by the Exchange (referring to the transaction errors specified in [§81(1)] of the Regulation; the same hereinafter) in a manner noted in each of the following subparagraphs: (Amended on August 21, 2009; November 3, 2014)

1. In the case of a transaction error made in contract name, quantity, price, specification of bid and ask, quotation type, derivatives account number of customer, etc.: The member shall be asked to take over the relevant trade as a proprietary account trade; and
2. In the case of an error made in the classification between proprietary account trade and customer-account trade and classification of investors: Corrections shall be made to be consistent with the classifications.

(2) Pursuant to [§81(3)] of the Regulation, the Exchange shall correct transaction errors made by members in a manner noted in each of the following subparagraphs. Provided that the correction of transaction errors shall not apply to the case of trades of exchange of futures for physicals under [§75-3] of the Regulation: (Amended on November 3, 2014; June 15, 2017; October 30, 2019)

1. In the case of a transaction error made in contract name, quantity, price, specification of bid and ask, quotation type, derivatives account number of customer, etc.: The relevant member shall be asked to take over the relevant trading as a proprietary account trade;
2. In the case of a transaction error made in customer's account number: The error shall be corrected either by having the member to take over the transaction error as its proprietary account trade or by correcting the derivatives account number with the consent of the customer who opened the derivative account through which the transaction error was made; and
3. In the case of a transaction error made in the classification between proprietary account trade and customer-account trade, end-investor classification codes under [§114-3(1)] and classification of investors: Corrections shall be made to be consistent with the classifications. Provided that, in the case of a transaction error related to the end-investor classification codes, it shall be limited to the case where the customer consents or requests.
4. In the case of a transaction error made both in quantity and customer's account number: For the quantity that is consistent with the order details, the error shall be corrected by correcting the derivatives account number with the consent of the customer who opened the derivatives account through which the transaction error was made; and, for the remaining quantity, it shall be corrected by having the member to take over such quantity as its

proprietary account trade.

(3) The correction of a transaction error made by a member pursuant to paragraph (2) shall be requested by the member within the time period in each of the following subparagraphs by submitting a request form of [Annex: Form 4] to the Exchange or by inputting the relevant details to the Exchange derivatives system using the member derivatives system or derivatives input device. (Amended on August 28, 2014; May 29, 2025)

1. If a transaction error occurs during regular trading hours: Up to twenty (20) minutes after the market close on the relevant day; and [May 29, 2025] (Amended on April 6, 2026)

2. If a transaction error occurs during night trading hours: From the start of regular trading hours on the relevant trading day to twenty (20) minutes after the market close. [May 29, 2025] (Amended on April 6, 2026)

(4) Notwithstanding paragraphs (2) and (3), where a large-sized transaction error by investor under [§81(2)] of the Regulation (excluding large-sized transaction errors by investors of the contract of which the last trading day has arrived) also falls under transaction errors by members (from among the transaction errors noted in paragraphs (2) and (3), those in the classification between proprietary account trade and customer-account trade, and classification of investors shall be excluded), the Exchange shall correct the transaction errors by members according to subparagraphs 1, 2 and 4 of paragraphs (2), after resolving the large-sized transaction errors by investors. In such cases, the member shall request the correction by submitting an application prepared in accordance with [Annex: Form 4] to the Exchange or input the details of transaction errors into the Exchange derivatives system through the member derivatives system until 17:00 hours of the trading day following the trading day on which the transaction errors by members occurred after resolving the large-sized transaction errors by investors. [November 3, 2014] (Amended on June 15, 2017; October 30, 2019; May 29, 2025)

(5) The Exchange shall prepare and keep the documents regarding the correction of transaction errors for ten (10) years.

(Wholly amended on February 17, 2012)

§78. Settlement of Gains/Losses Arising from Correction of Transaction Errors Made by the Exchange

(1) In the case of taking over the transaction errors made by the Exchange as a proprietary account trade pursuant to [§77(1)], the member shall promptly conduct offsetting trade (referring to the trade that cancels out the open interests of each bid and offer per contract, except for the futures spread contracts: the same hereinafter) during the regular trading hours by placing a quotation for periodic call auction. Provided that, in the case of USD FLEX trades, the offsetting trade shall be accomplished by conducting a negotiated FLEX trade. [Proviso on August 21, 2009] (Amended on May 29, 2025)

(2) The Exchange shall settle with the member the gains and losses resulting from the offsetting trade pursuant to paragraph (1). In such cases, the expenses associated with the offsetting trade including the commission fees shall be recorded as a loss.

(3) The gains and losses pursuant to paragraph (2) shall be settled on the last business day of the month to which the regular trading hours of the trading day following the trading day when the offsetting trade was made belongs. Provided that, the Exchange may, whenever it is deemed necessary, determine the settlement time for each case while taking into account such factors as the size of gains and losses to be settled.

§78-2. Requirements for Resolving Large-sized Transaction Errors by Investors

Trades that meet the requirements noted in the Enforcement Rules noted in [§81-2(1)] of the Regulation shall refer to the trades that satisfy all requirements noted in each of the following subparagraphs by derivatives account: (Amended on August 28, 2014; May 19, 2015; July 3, 2015; June 15, 2017; October 30, 2019)

1. The amount obtained by multiplying the difference between the execution price of transaction errors caused by investors and the base price for resolving transaction errors specified in [Annex 24] by the execution quantity and multiplier of relevant trade shall be no less than KRW 10 billion by product market. Provided that, for the futures spreads market (excluding the inter-KTB futures spreads market), the relevant amount shall be added to the futures market with identical underlying assets and multipliers;
2. The execution price shall be outside the resolution limit range of transaction errors specified in [Annex 24];
3. The transaction errors shall have been caused by the same error consecutively;
4. No person related to transaction errors shall abuse intentionally the resolution arrangement for the large-sized transaction errors under [§81-2(1)] of the Regulation (hereinafter referred to as “large-sized transaction errors by investors”); and
5. Any other matters deemed necessary to resolve the relevant transaction errors for stable and smooth settlement.

(Wholly amended on August 28, 2014)

§78-3. Request for Resolution of Large-sized Transaction Errors by Investors

(Amended on May 29, 2025)

(1) Pursuant to [§81-2(2)] of the Regulation, the member who brought about the large-sized transaction errors by investors may request for the resolution of transaction errors to the Exchange by the method of inputting the trade details of the relevant transaction errors into the Exchange derivatives system through the system in each of the following subparagraphs or submitting the request form of [Annex: Form 15]. Provided that, in the case of negotiated trades, the request for resolution of transaction errors shall be prohibited. (Amended on August 20, 2014; May 29, 2025)

1. During regular trading hours: Member derivatives system or member derivatives terminal [May 29, 2025]

2. During night trading hours: Member derivatives terminal [May 29, 2025]

(2) The request for the resolution of transaction errors pursuant to paragraph (1) shall be made within thirty (30) minutes after the relevant transaction errors occurred, within the period up to twenty (2) minutes after the market closing. Provided that the Exchange may extend the request period in the case of continued transaction errors or other cases deemed unavoidable including the failure of the member derivatives system. (Amended on August 20, 2014)

(3) A member who requests for the resolution pursuant to the main sentence of paragraph (1) shall submit the explanation on the transaction errors to the Exchange without delay. (Amended on August 20, 2014; April 6, 2026)

(4) In cases where the request form submitted by the member pursuant to paragraph (1) is deemed to be partially missing or the contents of evidence documents submitted by the member pursuant to paragraph (3) are deemed to be insufficient, the Exchange may request the submission again. [August 20, 2014]

[May 9, 2012]

§78-4. Methods of resolving Large-sized Transaction Errors by Investor

(1) Pursuant to [§81-2(2)] of the Regulation, after reviewing the details of the request and the evidence materials submitted by the member pursuant to [§78-3], the Exchange may resolve the corresponding transaction errors if the transaction errors satisfy all requirements noted in each subparagraph of [§78-2]. [August 20, 2014]

(2) The Exchange shall notify its decision on whether or not to resolve transaction errors within twenty (20) minutes after the closing of market on the trading day when it receives the request for the resolution pursuant to [§78-3]. Provided that, in cases where the Exchange deems necessary for market management in comprehensive consideration of the timing and details of resolution request and evidence materials, and other trading activity and market circumstances etc., it may extend its decision on the resolution within twenty (20) minutes after the closing of market on the next trading day. [August 20, 2014] (Amended on May 29, 2025; April 6, 2026)

(3) In cases where large-sized transaction errors by investors are resolved pursuant to paragraph (1) and the main sentence of paragraph (2), the transaction errors shall be relieved by the method of deemed prices in each of the following subparagraphs as execution prices of the large-sized transaction errors by investors at the time of settlement between the Exchange and clearing members, and the designated clearing members and non-clearing members:(Amended on August 20, 2014)

1. In cases where the execution price is higher than the transaction error resolution upper limit (referring to the highest price among prices within the transaction error non-resolution range determined by [Annex 24]; the same hereinafter), a price at the transaction error resolution upper limit; and

2. In cases where the execution price is lower than the transaction error resolution lower limit (referring to the lowest price among the prices within transaction error non-resolution range determined by [Annex 24]; the same hereinafter), a price at the transaction error resolution lower limit.

(4) Notwithstanding paragraph (3), in the case where the resolution for transaction errors is not determined by the time noted in the main sentence of paragraph (2), transaction errors shall be settled based on the prices of the following subparagraphs, and the difference of settlement amount shall be settled according to the results of the determination on whether to provide resolution or not. Provided that, in cases where a clearing member that has requested the resolution the relevant transaction errors is at the same time the counterparty clearing member, the clearing member shall be deemed as the counterparty clearing member:

1. For a clearing member that requested the resolution, the execution price; and
2. For a counterparty clearing member, the price classified by the following items:
 - (a) In the case of offer price higher than the transaction error resolution upper limit: the price at the transaction error resolution upper limit;
 - (b) In the case of bid price lower than the transaction error resolution lower limit: the price at the transaction error resolution lower limit; and
 - (c) In the case of bid price higher than the transaction error resolution upper limit and offer price lower than the transaction error resolution lower limit: the execution price.

(5) The member shall calculate the customer settlement amount and margin *mutatis mutandis* to paragraphs (3) and (4) for a customer who caused large-sized transaction errors noted in paragraphs (1) and (2) and the counterparty customer of the transaction errors. In such cases, 'the Exchange' is deemed 'the member', 'clearing member that has requested' deemed 'customer that has requested' and "counterparty clearing member" deemed "counterparty customer", and the member shall calculate the customer margin of the counterparty customer based on the price when the Exchange notifies the price in each subparagraph of paragraph (3). (Amended on August 20, 2014)

(6) Notwithstanding paragraph (3), in cases where the Exchange deems necessary for the market management in comprehensive consideration of trade and market circumstances and the price level of underlying asset etc., it may change each price noted in paragraph (3). [August 20, 2014]

(7) The Exchange shall retain the documents recording the details about the resolution of large-sized transaction errors by investors for a period of ten (10) years. (Amended on August 20, 2014)

§78-5. Publication of Trade Cancellation

Pursuant to [§81-3(2)] of the Regulation, in the case of cancellation of trade, the Exchange shall make public the corresponding fact immediately through the electronic media operated

by the Exchange such as internet website, or information terminal operated by members or information providers, etc. [August 20, 2014]

§79. Publication of Market Prices, etc. and Methods Thereof

(1) “Details stipulated in the Enforcement Rules” in [§82(1)5] of the Regulation shall refer to the details specified in each of the following subparagraphs: (Amended on March 21, 2016; June 15, 2017; December 21, 2022; April 5, 2024)

1. For quotation receiving hours for call auction, matters in the following subparagraphs:

(a) Expected matching price and quantity;

(b) The prices of three (3) successive expected best quotations including the prices of best quotations per bid and offer and the quantities at such prices. In this case, when it is possible to establish the expected matching price, they shall be based on the best quotation for the case where such transaction has been executed; and

(c) Total quotation quantity and total number of quotations by bid and offer.

2. For quotation receiving hours other than the quotation receiving hours for call auction, matters in the following subparagraphs:

(a) The prices of five (5) successive best quotations (in the case of single stock futures, single stock options and ETF futures, it shall be 10 quotations) including the prices of best quotations, quotation quantity and number of quotations at each price per bid and offer: and

(b) Total quotation quantity and number of quotations per bid and offer.

2. In the case of quotation receiving hours for periodic call auction, the expected contract price, total quotation quantity and number of quotations per bid and ask.

3. [Deleted on March 21, 2016]

(2) In the case of publishing the expected contract price pursuant to [§82(3)] of the Regulation: the members shall not cancel or correct the quotations for periodic call auction during one (1) minute before the closing of the quotation receiving hours for the periodic call auction. (Amended on October 26, 2009; May 9, 2012; August 28, 2014; May 19, 2015)

(3) Pursuant to [§82(3)] of the Regulation, the Exchange shall make public the market prices, etc. through the electronic information delivery channels such as the internet homepage that it operates or the devices of members or information service providers. (Amended on May 19, 2015)

(4) The Exchange may announce each of the following subparagraphs as the information useful for investment pursuant to [§82(3)] of the Regulation. [May 19, 2015] (Amended on March 21, 2016; September 3, 2020)

1. Matters related to changes in market holidays and trading hours;
2. Matters related to margin rate;
3. Matters related to the execution of negotiated block trades;
4. Matters related to the designation of or release from the designation of low liquidity products;
5. Matters related to a trading suspension and a trading resumption of new delivery month contracts (including delivery week contracts) for low liquidity products;
6. Matters related to the designation as a product warned for delisting; and
7. Any other matters deemed necessary for investment decision.

CHAPTER 4. MARKET MAKERS (Amended on November 3, 2014)

§80. Qualifications of Market Maker

(1) Pursuant to [§83(2)] of the Regulation, a company that intends to become a market maker shall meet each of the following requirements: (Amended on March 9, 2021; May 18, 2021; November 1, 2024)

1. To be engaged in the investment dealing business;
2. To be a member; and
3. To designate two or more of its officers and/or employees as a staff-in-charge of market making.
4. In the case of falling under any of the followings, one (1) year or more shall be elapsed since that time:
 - (a) Case where a market making agreement is terminated due to the imposition of demerit points for the non-fulfillment of market making obligation, etc. based on the assessment result of the market maker of the Exchange; and
 - (b) Case where a member has a record of having been subject to a criminal sanction or any measures equivalent to or heavier than penalty surcharge, business suspension, trading suspension or member fine (limited to a fine amounting to KRW 10 million or more), on account of a violation of the relevant statutes on capital markets and the business regulations of the Exchange in the course of performing the tasks of market making.
5. In cases where a market maker submits quotations for covered short sales pursuant to the proviso to the part other than subparagraphs of Article 180(1) of the Act (hereinafter referred to as “covered short sales”) to trade stocks or ETFs for the purpose of avoiding or reducing losses caused by price fluctuations of market making products in the process of performing the market making tasks (hereinafter referred to as the “risk-hedging trades” in this Chapter), the market maker shall have an internal control device that allows the quotations for covered short sales only if the relevant listed stocks are borrowed.

(2) In the case of designating or changing a staff-in-charge of market making, the market maker shall notify it to the Exchange in advance.

§81. Products, Contracts and Periods for Market Making

(1) Pursuant to [§83(4)], the market making products shall be ones selected separately by the Exchange among the products that require liquidity supply. (Amended on December 18, 2012; August 28, 2014; March 9, 2021)

(2) Pursuant to [§83(4)] of the Regulation, the products for which the market-making quotation can be submitted shall be those specified by the market making contract. Provided that the market making quotation shall be submitted as determined by the Exchange for the issues assigned to submit the obligatory market making quotation by the Exchange (hereinafter referred to as the “obligatory market-making quotation”). (Amended on December 10, 2010; January 27, 2011; July 8, 2013; August 28, 2014; March 9, 2021; May 24, 2023)

(3) Pursuant to [§83(4)] of the Regulation, the period (hereinafter referred to as the “market-

making period”) during which the market making quotation can be submitted shall be at the least four (4) quarters, including the quarter to which the starting day of the market-making period for each market-making product belongs. In such cases, if the starting day of the market-making period belongs to the second or third month of the quarter, such quarter shall be excluded from counting. (Amended on June 18, 2010; October 20, 2010; December 18, 2012; August 28, 2014; April 14, 2016)

(4) The Exchange may examine whether the market making shall be continued after the market-making period, by taking into account the liquidity level of market-making products, the degree of participation of market participants other than market makers and other necessary matters as determined separately by the Exchange, and notwithstanding paragraph (3), the Exchange may determine the market making period differently in market making agreements. [April 14, 2016] (Amended on March 9, 2021)

§82. Entering into or Terminating Written Agreements for Market Making

(1) Pursuant to [§83(4)] of the Regulation, a person who intends to become a market maker shall enter into a market making agreement with the Exchange. (Amended on October 20, 2010; August 28, 2014)

(2) The Exchange and the market maker may terminate the market making agreement according to the stipulations of the Exchange. (Amended on June 22, 2011; August 28, 2014; September 6, 2016; March 9, 2021)

(3) When the market making agreement is terminated or expired, the market maker shall close out the open interests held in relation to the relevant agreement or transfer those open interests to proprietary accounts other than the market making accounts by the expiry date of validity period of the relevant agreement. In such cases, when the market maker applies for transfer, the Exchange shall transfer the relevant open interests. (Amended on September 6, 2016)

(4) In cases where the market maker holds the open interests in relation to the market making agreement even after the market close on the expiry date of the term of validity of the relevant agreement, it shall be deemed that the market maker has applied for the transfer of the relevant open interests. (Amended on September 6, 2016)

(5) [Deleted on September 6, 2016]

§83. Methods of Submitting Market Making Quotations

(1) Pursuant to [§83(4)] of the Regulation, the market maker may submit the market making quotations through market making account in the manner of each of the following subparagraphs: (Amended on August 28, 2014)

1. Shall be limit quotations; and
2. Shall be submitted during the quotation receiving hour of the regular sessions.

(2) Notwithstanding paragraph (1), the market maker shall submit the market making

quotations for the obligatory market making products in the manner of each of the following subparagraphs: (Amended on September 6, 2016; March 9, 2021; December 21, 2022)

1. Shall be limit quotations;
2. Shall be submitted during the quotation receiving hours excluding quotation receiving hour for periodic call auction;
3. When submitting any one of ask and bid quotations, the quotation on the other side shall be submitted immediately. Provided that in the case of falling under the requirements separately determined by the Exchange, an exception may be made;
4. The spread between the prices of the bid and ask quotations noted in subparagraph 3 shall be within the range set by the market making agreement; and
5. The quantity of a market making quotation shall be at least the quantity set by the market making agreement.

(3) When intending to open, change or close a market making account noted in paragraph (1), the market maker shall report the details relating to the account at least five (5) business days before the opening, changing or closing by inputting the details into the Exchange derivatives system via the member derivatives system or member derivatives terminal or submitting a written notification to the Exchange. In such cases, the market maker classified in each of the following subparagraphs shall report together with the account specified in the relevant subparagraph: [August 8, 2014] (Amended on March 21, 2016; July 12, 2016; March 9, 2021; May 29, 2025)

1. For a market maker who intends to be exempted from the securities transaction tax pursuant to Article 117 of the Restriction of Special Taxation Act: The account exclusively for the trading of underlying stocks for risk-hedging trades as prescribed in Article 115(2) of the Enforcement Decree of the same Act; and

2. [Deleted on March 9, 2021]

(4) When submitting quotations for risk-hedging trades, the market maker shall comply with each of the following subparagraphs: [March 9, 2021] (Amended on May 18, 2021; April 5, 2024)

1. Once the market making quotation is concluded, the quotations for risk-hedging trades shall be submitted through the reported account pursuant to subparagraph 1 of paragraph (3) or the account previously reported to the Exchange as determined by the Exchange without delay;
2. In cases where covered short sales quotations of the stocks for risk-hedging trades are submitted, the cumulative trading volume of the covered short sales for the relevant stocks on the day shall not exceed the daily exemption limit quantity (referring to the calculated quantity pursuant to paragraphs (9) and (10) of Article 50-7 of the Enforcement Rules of the Restriction of Special Taxation Act) of the market making products whose underlying assets include the relevant stock index and the stocks.

Provided that in the case of falling under the causes determined by the Exchange such as trading suspension of the stock certificate and changes in constituents of the stock index and the weight of constituents, an exception may be made; and

3. In the case of risk-hedging trades in relation to the market making of the product separately determined by the Exchange, the quotations for covered short sales shall not be submitted.

(5) Notwithstanding paragraphs (1) and (2), the Exchange may change the method of submitting the market making quotation or exempt the submission as determined by the Exchange in cases where submission of market making quotation is difficult due to sudden changes in market condition or in cases where it deem necessary for the market management. [August 28, 2014] (Amended on March 9, 2021)

(6) In cases where a market maker submits a market making quotation under paragraphs (1) and (2), the market maker shall not entrust it to other members. [May 18, 2021]

§84. [Deleted on August 28, 2014]

§85. [Deleted on August 28, 2014]

§86. [Deleted on August 28, 2014]

§87. [Deleted on August 28, 2014]

§88. [Deleted on December 18, 2012]

§89. Assessment of Market Makers

(1) Pursuant to [§83(4)] of the Regulation, the Exchange may conduct assessment of the market making performance of a market maker for each market-making product in accordance with the assessment criteria determined by the Exchange. (Amended on August 28, 2014; April 14, 2016; March 9, 2021)

(2) The Exchange may make public the result of performance assessment of market makers per market making product. (Amended on August 28, 2014)

(3) The Exchange may request the market makers to submit the materials that it deems necessary for the assessment of market maker's performance. In such cases, the market makers shall comply with such request without delay.

(4) The publication methods, the request for related documents pursuant to the provisions of paragraphs (2) and (3) and other matters concerning the assessment of market makers shall be determined by the Exchange separately. (Amended on August 28, 2014; March 9, 2021)

§90. Compensation for Market Makers

(1) Pursuant to [§83(4)] of the Regulation, the Exchange may pay the amount (hereinafter

referred to as the “compensation for market making”) within the range of the service fees (referring to the transaction fee and clearing and settlement fee; the same hereinafter in this Article and [§90(2)]) collected during the term of market-making agreement, which varies according to the trading performance for market making. (Amended on September 6, 2010; December 18, 2012; August 28, 2014; April, 14, 2016)

(2) Notwithstanding paragraph (1), the Exchange may pay the separate compensation for market making to market makers within the range of service fee paid to the Exchange for proprietary account trades of market making linked products (referring to the products highly related to market making products and specified by the Exchange; the same hereinafter in this Article) during the term of market-making agreement. (Amended on August 28, 2014; April 14, 2016; June 20, 2016; March 9, 2021)

(3) [Deleted on September 6, 2016]

(4) In cases where the service fees are changed or it is deemed necessary, the Exchange may determine the upper or lower limit of compensation for market making. (Amended on September 6, 2010; June 22, 2011; December 18, 2012; August 28, 2014)

(5) The standard for payment, the scope of market making linked products, the upper or lower limit of compensation pursuant to paragraphs (1) through (4), and other matters necessary for payment of compensation for market making shall be determined by the Exchange separately. (Amended on September 6, 2010; August 28, 2014; June 20, 2016; March 9, 2021)

§90-2. Compensation for Non-Market Makers

(1) Pursuant to [§83(4)] of the Regulation, the Exchange may pay compensation to the parties other than market makers, who have contributed to market activation (hereinafter referred as to the “market contributor”) according to the trade performance of market contributors within the scope of service fees paid by the market contributors to the Exchange (in case where the market contributor is a non-member, it refers to the fees paid by members in relation to the trading involving the market contributor; the same hereinafter in this Article) with an aim of trading those products requiring liquidity supply as specified by a market contribution agreement (hereinafter referred to as the “market contribution products”). (Amended on June 20, 2016)

(2) The Exchange may pay separate compensation distinct from the compensation pursuant to paragraph (1) within the scope of service fees paid by the market contributors to the Exchange during the term of the market contribution agreement to trade the products other than the market contribution products (limited to the products specified in the market contribution agreement). [June 20, 2016]

(3) In order to receive the compensation pursuant to paragraphs (1) and (2), the market contributor shall meet the requirements of each following subparagraphs: (Amended on June 20, 2016)

1. The special account for market contributor shall be reported to the Exchange. In such cases, the non-member shall report the special account for market contribution through

member; and

2. The agreement on the compensation between the Exchange and market contributor (referring to the member making an agreement with the corresponding non-member for the opening of the special account for market contribution if the market contributor is non-member) shall be entered in advance.

(4) The market contribution products and contracts for the market contribution, the standards for compensation for market contributors pursuant to the provisions of paragraphs (1) through (3) and other matters necessary for payment of compensation for market contribution shall be separately determined by the Exchange. (Amended on June 20, 2016)

[August 28, 2014]

§90-3. Underlying Asset Conversion Rates of Market Makers, etc.

(1) Pursuant to [§83(4)] of the Regulation, the conversion rates that aim at exempting market makers from the securities transaction tax (referring to the underlying asset conversion rates of stock index futures trades and stock index options trades as prescribed in Article 50-7(4)1(a) of the Enforcement Rule of the Restriction of Special Taxation Act and the stock trading volume conversion rates of the stock futures trades and stock options trades as prescribed in Article 50-6(2)2 of the same Enforcement Rule; the same hereinafter) shall be the figures in the following subparagraphs applicable to each issue: (Amended on March 21, 2016; May 24, 2023; April 5, 2024)

1. For the trades of stock index futures and stock futures: 1 for buying, and -1 for selling; and

2. For the trades of stock index options and stock options: Figures specified in [Annex 27].

(2) The portion of market capitalization of a constituent stock in the index for stock index futures trades and stock index options trades prescribed in Article 50-7(4)1(a) of the Enforcement Rule of the Restriction of Special Taxation Act that aim at exempting market makers from the securities transaction tax pursuant to [§83(4)] of the Regulation (hereinafter referred to as “portion of market capitalization in the index”) shall be the figures that the Exchange calculates by dividing the current market capitalization of the constituent stock by the current market capitalization of the total constituents. Provided that the Exchange may change the portion of market capitalization in the index in the case of any abnormal trading situation or other cases where it deems necessary for the purpose of efficient market administration. [March 21, 2016] (Amended on May 24, 2023; April 5, 2024)

(3) The Exchange shall notify the market makers of the conversion rates and the portions of market capitalization in the index after the market closing on each trading day. (Amended on March 21, 2016)

[March 12, 2015]

PART IV. MEMBER MARGIN AND SETTLEMENT BETWEEN EXCHANGE AND MEMBER

CHAPTER 1. MEMBER MARGIN

§91. Deposit Limits of Substitute Securities, Foreign Currencies and Foreign Securities

(1) “Limits set by the Enforcement Rules” in [§88(3)] of the Regulation shall refer to the amounts classified in each of the following subparagraphs for securities, foreign currencies and foreign securities:

1. For the substitute securities under subparagraph 2(a) of [§47] of the Enforcement Rules of Securities Market Clearing and Settlement Business Regulation, foreign currencies and foreign securities (referred to as “cash equivalents” hereinafter in this Article): The total amount of member margins deposited with the Exchange; and (Amended on March 24, 2025)

2. For the substitute securities under subparagraphs 1, 2(b) and 3 of [§47] of the Enforcement Rules of Securities Market Clearing and Settlement Business Regulation: The amount obtained by summing up the limits for each account group under each of the following items: (Amended on March 24, 2025)

(a) For derivatives account groups for proprietary account trades of members: An amount equivalent to 40/100 of the net risk-based margin under [§94]; and (Amended on May 29, 2025; April 9, 2026)

(b) For derivatives account groups of customers: An amount equivalent to 70/100 of the member margin for net exposure under [§94]. (Amended on May 29, 2025)

(2) In cases where a member has deposited more than the amount obtained by subtracting the amounts under paragraph (1)2 from the sum of the maximum net loss equivalent and the credit risk loss equivalent calculated according to [§88(1)] of the Regulation in cash or cash equivalents as its member margin, the limits under paragraph (1)2 shall not apply thereto.

(3) In cases where it is deemed necessary for market management, the Exchange may change the limits under paragraph (1).

(Wholly amended on November 27, 2019)

§92. Types and Valuation, etc. of Foreign Currencies

(1) The types of foreign currencies under [§88(4)] of the Regulation shall be the foreign currencies falling under any of the following subparagraphs:

1. US dollar;

2. Japanese Yen;
3. European Union Euro;
4. British Pound;
5. Hong Kong dollar;
6. Australian dollar;
7. Singapore dollar;
8. Swiss Franc;
9. Canadian dollar; and
10. Chinese Yuan.

(2) Pursuant to [§88(4)] of the Regulation, the Exchange shall calculate the price converted into Korean currency (referred to as the “evaluated price” hereinafter in this Article), which is calculated by multiplying the assessment rate by the base market price of the foreign currency on each business day. In such cases, the amount less than KRW 1 shall be discarded. (Amended on May 29, 2025)

(3) The basic market price of foreign currency under paragraph (2) shall be the basic exchange rate (referring to the basic rate of the day determined and published pursuant to the Foreign Exchange Transaction Regulation; but it shall be the basic rate of the previous day, if no basic rate of the day is available) noted in each of the following subparagraphs, and the assessment rates of foreign currencies under paragraph (2) shall be calculated on the last business day of each quarter in accordance with [Annex: Form 19-4] based on the yields of the basic rates of each foreign currency determined and published pursuant to the Foreign Exchange Transaction Regulation and applied from the first business day of the following quarter. (Amended on December 31, 2015; September 19, 2017; May 29, 2025)

1. For US dollar and Chinese Yuan: The basic exchange rate determined and published on the day following the day (hereinafter referred to as “member margin calculation date”) on which the member margin is calculated as of the time of market closing pursuant to the main sentence of [§88(1)] of the Regulation; and (Amended on May 29, 2025)

2. For currencies other than US dollar and Chinese Yuan: the adjusted basic rate determined and published on the member margin calculation date.

(4) Notwithstanding paragraphs (1) through (3), in cases where the collateral value of foreign currency changes, a restriction is placed on the exchange of foreign currency or it is deemed necessary for the market management, the Exchange may limit the types of foreign currencies accepted, change the basic market price and assessment rate, or the revaluation method.

(5) The Exchange shall, after having calculated the evaluated prices of foreign currencies pursuant to paragraphs (2) and (4), make public such prices for each currency type through the electronic information delivery medium operated by the Exchange, including its internet website.

§92-2. Types and Evaluation of Foreign Securities, etc.

(1) The types of foreign securities under [§88(4)] of the Regulation shall be the foreign securities falling under any of the following subparagraphs:

1. US Treasury bills;
2. US Treasury notes;
3. US Treasury bonds; and
4. Other foreign securities that the Exchange accepts.

(2) Pursuant to [§88(4)] of the Regulation, the Exchange shall calculate the price converted into Korean currency (referred to as the “evaluated price” hereinafter in this Article), which is calculated by multiplying the base market price of foreign security by the basic rate and assessment rate on each business day. In such cases, the amount less than KRW 1 shall be discarded. (Amended on May 29, 2025)

(3) The basic market price of foreign security pursuant to paragraph (2) shall be the average (to round off at the 5th decimal place) of the market prices for each issue that the global information and communication service provider provides consecutively in the recent five (5) business days. Provided that, in cases where the market prices per issue was provided for less than five (5) business days, it shall be the average of the market prices provided consecutively. (Amended on May 29, 2025)

(4) The basic rate pursuant to paragraph (2) shall be the basic exchange rate (referring to the basic rate of the day determined and publicized pursuant to the Foreign Exchange Transaction Regulation; but it shall be the basic rate of the previous day, if no basic rate of the day is available) noted in each of the following subparagraphs:(Amended on August 28, 2014; December 31, 2015)

1. For US dollar and Chinese Yuan, the basic rate determined and published on the day after the member margin calculation date; and
2. For currencies other than US dollar and Chinese Yuan, the adjusted basic rate determined and published on the member margin calculation date.

(5) The foreign securities referred to in paragraph 1 shall be categorized into the government bond group under item (a) of subparagraph 2 of [§47] of the Enforcement Rules of Securities Market Clearing and Settlement Business Regulation, and the assessment rates of each foreign security shall be calculated every business day based on the terms to maturity of relevant foreign security and the assessment rates of the foreign currency (referring to the currency in which the relevant foreign security is denominated), etc. under [Annex: Form 19-4] and applied on the following business day.(Amended on September 19, 2017; March 24, 2025; May 29, 2025)

(6) Notwithstanding paragraphs (1) through (5), in cases where it deems necessary for restricting change of collateral value and conversion of foreign securities and market management, the Exchange may restrict the type of foreign securities, or may change the base

market price and assessment rate of foreign securities and revaluation method of foreign securities.

(7) When evaluated prices of foreign securities have been determined according to paragraphs (2) and (6), the Exchange shall make public such prices of each foreign security using such medium as the electronic information delivery device operated by the Exchange.

(8) The clearing member may put a restriction on the types of foreign securities that the trading member for whom it acts as the designated clearing member may utilize to make a deposit of member margin.

[December 18, 2012]

§93. Calculation of Member Margins per Account and Reporting of Accounts, etc.

(1) The net risk-based margin deposited by a clearing member to the Exchange pursuant to [§88(7)] of the Regulation shall be calculated for each derivatives account noted in each of the following subparagraphs. In such cases, when the same person has two (2) or more derivatives accounts, the calculation shall be made per account: (Amended on April 9, 2026)

1. The derivatives accounts for proprietary account trading of the relevant clearing member;
2. The derivatives accounts of each customer (when receiving an entrustment from an investment broker, the customer who made an entrustment to that investment broker shall be included: the same hereinafter in this Article) of the relevant clearing member;
3. The derivatives accounts for proprietary account trading of non-clearing member who has entered into an agreement for settlement entrustment with the relevant clearing member; and
4. The derivatives accounts of customers of a non-clearing member who has entered into an agreement on settlement entrustment with the relevant clearing member.

(2) The derivatives accounts noted in each subparagraph of paragraph (1) shall be classified into the member margin discount account [referring to the derivatives accounts, which were opened by the members or the qualified institutional investors who deposit the ex-post member margin, in order to conduct the trade satisfying the conditions (excluding the conditions noted in [§147(1)3], in the case of a member which is the investment broker or trader specializing in the exchange-traded derivatives business pursuant to Article 12 of the Act) of arbitrage or hedge under [§147(1)]: the same hereinafter] and the member margin regular account (referring to the derivatives accounts, excluding the member margin discount account: the same hereinafter). (Amended on August 28, 2014)

(3) When opening, changing or closing its own or the qualified institutional investors' derivatives accounts (excluding foreigner's consolidated accounts), each member shall immediately report the details about the relevant derivatives account to the Exchange by inputting the details into the Exchange derivatives system through the member derivatives input device. In such cases, when reporting the opening of member margin discount account,

the information on substitute securities account (including the equity linked account pursuant to [§147(1)3] and ex-post customer margin regular account pursuant to [§115(1)8a] in the case of the qualified institutional investors) of the same person shall also be reported. (Amended on March 18, 2009; June 15, 2017)

§94. Net Exposure Member Margins

(1) The amount equivalent to maximum net loss under [§88(7)] of the Regulation (hereinafter referred to as the “net exposure member margin”) shall be the amount calculated according to [Annex 18] while using the market closing time as base (amount less than KRW 10 shall be discarded). In such cases, the “margin for net exposure”, “margin rate”, the “base price for margin calculation”, the “margin interval value” and theoretical price for margin calculation” in [Annex 18] shall be construed as the “net exposure member margin”, the “member margin rate”, the “base price for member margin calculation”, the “member margin interval value” and “theoretical price for member margin calculation”, respectively.

(2) The member margin rate, product group, price correlation ratio, amount of member futures spread margin per contract, minimum margin per contract, base price for member margin calculation for options and theoretical price for member margin calculation for option with regard to the calculation of net exposure member margins under paragraph (1) shall be determined in [Annex 19].

(3) Notwithstanding paragraph (1), when calculating the net exposure member margins for the member margin discount accounts, the option premium margin, the price volatility margin and the futures spread margin noted in [Annex 18] shall be the amounts obtained by multiplying the amounts calculated according to [Annex 18] by the margin discount rate for arbitrating and hedging. (Amended on August 28, 2014)

(4) The member margin discount rate for arbitrating and hedging noted in paragraph (3) shall be 80/100. (Amended on November 3, 2014)

(5) When it is deemed necessary for market management, the Exchange may change the member margin rate, product group, price correlation ratio, amount of futures spread margin per contract, amount of Minimum margin per contract noted in paragraph (2) and the member margin discount rate for arbitrating and hedging noted in paragraph (4).

(6) [Deleted on May 29, 2025]

(7) In the case falling under the proviso to [§88(1)] of the Regulation and corresponding to any of the following subparagraphs, the net exposure member margin shall be the amount calculated by applying paragraph (1) *mutatis mutandis* based on open interests at the closing time of night trading: [May 29, 2025]

1. The member margin calculated at the time of closing of night trading is 120% or more of the member margin calculated at the time of closing of the immediately preceding trading session; and [May 29, 2025]

2. The member margin calculated at the time of closing of night trading is KRW 50 billion

or more than the member margin calculated at the closing time of the immediately preceding trading session. [May 29, 2025]

(Wholly amended on October 26, 2009)

§94-2. Member Margin for Credit Risk

(1) The credit risk loss equivalent noted in [§88(7)] of the Regulation (hereinafter referred to as “credit risk-based”) shall be an amount obtained by deducting the amount of payment guarantee (in case the relevant amount is equal to or less than KRW 0, it shall be KRW 0; hereinafter the same in this Article) that the clearing members have received from the settlement bank from the amount obtained by multiplying the net risk-based margin calculated across each derivatives trading account at the time of market closing for each trading by the imposition rate under [Annex 19-5]. Provided that, in the case of falling under [§94(7)], the member margin for credit risk shall be an amount at the closing time of night trading. (Amended on March 16, 2020; May 29, 2025; April 9, 2026)

(2) The method by which a member pays the member margin for credit risk shall be as follows: (Amended on August 31, 2016; September 19, 2017; January 25, 2019; March 16, 2020; April 9, 2026)

1. In cases where payment is made with the assets of a clearing member: Cash or cash equivalents under [§91]; and (Amended on May 29, 2025; April 9, 2026)
2. In cases where payment is made with the assets of a customer: Cash or foreign currency. (amended on April 9, 2026)

(3) If a member intends to pay the credit risk member margin amount under paragraph (1) with the assets of a customer, the member shall notify the customer of such fact. (Amended on March 16, 2020; May 29, 2025; April 9, 2026)

(4) [Deleted on April 9, 2026]

(5) [Deleted on April 9, 2026]

1. [Deleted on April 9, 2026]
2. [Deleted on April 9, 2026]

(6) [Deleted on April 9, 2026]

(7) [Deleted on April 9, 2026]

1. [Deleted on April 9, 2026]
2. [Deleted on April 9, 2026]

[April 9, 2026]

§94-3. Verification, etc. of Calculation Methods of Margins

(1) Pursuant to [§88(7)] of the Regulation, when the Exchange changes key details in the method of calculating margin or deems necessary for market management, it shall have an independent external institution equipped with verification competency evaluate the eligibility of the margin calculation method, etc. (Amended on September 19, 2017)

(2) When the eligibility check is conducted pursuant to paragraph (1), the Exchange shall report the result of the check to the Risk Management Committee.

[November 13, 2014]

§94-4. Assessment of Eligibility of Substitute Securities and Invalidation of Ineligible Substitute Securities, etc.

(1) In the event that substitute securities deposited as member margin fall under any of the following subparagraphs, the Exchange shall not recognize the validity of the relevant substitute securities pursuant to [§89(2)] of the Regulation: (Amended on March 8, 2009; November 1, 2024)

1. For the stocks and DRs of foreign stocks listed on the KOSPI market or KONEX market; in the case of falling under any of the following items:

(a) When the period of time required for disposal of the securities in a crisis situation, calculated in accordance with [Annex 2] of the Enforcement Rules of Securities Market Clearing and Settlement Business Regulation (hereinafter referred to as the “securitization period”) exceeds ten (10) trading days; (Amended on March 24, 2025)

(b) When the proportion of the number of days when the trade of the relevant security was executed to the number of trading days of the regular session, calculated in accordance with [Annex 2] of the Enforcement Rules of Securities Market Clearing and Settlement Business Regulation (hereinafter referred to as the “proportion of trade execution days”) is below 75 percent. (Amended on March 24, 2025)

2. For the listed debt securities falling under corporate bond groups as classified in [Annex 3] the Enforcement Rules of Securities Market Clearing and Settlement Business Regulation (excluding the bonds falling under subparagraph 3, 4 or 4-2 of [§85] of the KOSPI Market Listing Regulation); when the lowest of the credit ratings issued by qualified external credit rating agencies selected by the Exchange from among those designated by the Financial Supervisory Service is lower than ‘BBB+’. (Amended on March 24, 2025)

3. Unlisted beneficiary certificates from among the beneficiary certificates under Article 189 of the Act and unlisted stocks of investment companies.

4. Among ETFs, ETFs whose index underlying asset type pursuant to [Annex 4] of the Enforcement Rules of Securities Market Clearing and Settlement Business Regulation falls under raw materials or whose classification falls under the equity group (derivative type).

(Amended on March 24, 2025)

5. ETNs whose index underlying asset type pursuant to [Annex 4] of the Enforcement Rules of Securities Market Clearing and Settlement Business Regulation is not a bond type or whose classification falls under the equity group (derivative type). (Amended on March 24, 2025)

(2) The timing for assessment of whether a substitute security falls under each subparagraph of paragraph (1) and the timing for adjustment of the substitute prices of a substitute security of which validity is not recognized according to the assessment results and publication thereof shall be as stipulated in paragraphs (2) and (3) of [§45] of the Enforcement Rules of Securities Market Clearing and Settlement Business Regulation. (Amended on March 24, 2025)

(3) “Company with which it has the relations specified in the Enforcement Rules” in [§89(4)] of the Regulation shall refer to a company that falls under any of the following subparagraphs (hereinafter referred to as “related company”): [July 22, 2019] (Amended on December 21, 2022)

1. The affiliated company prescribed in Subparagraph 12 of Article 2 of the Monopoly Regulation and Fair Trade Act; and

2. The financial holding company, subsidiary, second-tier subsidiary and third-tier subsidiary prescribed in Subparagraphs 1 through 3-2 of Article 2(1) of the Financial Holding Companies Act. (Amended on May 29, 2025)

(4) The Exchange may request a member to submit the relevant materials to confirm whether it has complied with the deposit restrictions for the securities issued by the member, or its related companies stipulated in [§89(4)] of the Regulation. [July 22, 2019]

[September 19, 2017]

[§94-5. Deposit Limits per Issue of Substitute Securities and Deduction Methods, etc.](#)

(1) In the event that the value of each issue of the substitute securities deposited by each member exceeds the deposit limit for each issue of substitute securities under each of the following subparagraphs, by each group of the derivatives accounts of the member for proprietary account trading and the derivatives accounts of customers, the Exchange shall deduct the amount exceeding the relevant deposit limit from the total amount of deposits of the relevant member, respectively, pursuant to [§89(3)] of the Regulation:

1. For the securities falling under the stock groups under subparagraph 1 of [§47] of the Enforcement Rules of Securities Market Business Clearing and Settlement Regulation; the amount equivalent to 50/100 (for the securities falling under subparagraph 1(b) of [§47] of the Enforcement Rules of Securities Market Clearing and Settlement Business Regulation, it shall be 100/100) of the average daily trading value (excluding transactions at multilateral trading companies) per issue of the regular session trading days during the latest one (1) year counting from the date of calculation. Provided that, in the case of newly listed stocks, for the period from the listing date to the end of the quarter following the quarter in which the

listing date falls, it shall be as stipulated in [§46(1)2] of the Enforcement Rules of Securities Market Clearing and Settlement Business Regulation; and (Amended on March 24, 2025)

2. For the securities falling under the corporate bond groups under subparagraph 3 of [§47] of the Enforcement Rules of Securities Market Clearing and Settlement Business Regulation; the amount equivalent to 10/100 of the sum of the issuance amounts per issue of listed debt securities issued by the issuer of the relevant issue as of the date of calculation. Provided that, in the case of the securities falling under subparagraph 3(b) of [§47] of the Enforcement Rules of Securities Market Clearing and Settlement Business Regulation, it shall be as stipulated in [§46(1)4] of the Enforcement Rules of Securities Market Clearing and Settlement Business Regulation. (Amended on March 24, 2025)

(2) The deposit limits per issue of substitute securities under paragraph (1) shall be calculated on the last business day of each quarter and shall apply from the sixth (6th) business day of the quarter following the quarter in which the calculation date falls. (Amended on May 29, 2025)

(3) The Exchange may, when it deems it necessary for market management, change the rates under each subparagraph of paragraph (1) for calculating the deposit limits per issue of substitute securities.

[September 19, 2017]

§95. ~ §101. [Deleted on October 26, 2009]

§102. Deposit and Withdrawal of Member Margins

(1) In the event that a clearing member deposits or withdraws member margin pursuant to [§91(2)] of the Regulation, the clearing member shall accomplish it by submitting a written request to the Exchange in accordance with [Annex: Form 6] through [Annex: Form 8] or inputting the details into the Exchange derivatives system via the member derivatives input device. (Amended on September 5, 2019)

(2) The establishment or deletion of a right of sub-pledge of a clearing member on the substitute securities under [§91(1)2(b)] of the Regulation pursuant to [§91(2)] of the Regulation shall be made in such manner that the relevant clearing member requests the Exchange for confirmation of the establishment thereof or approval of the deletion thereof by specifying the issue, quantity, etc. of the relevant substitute securities, and reflects it to the customer account book of a customer after the Exchange's confirmation or approval of it. [September 5, 2019]

(3) Pursuant to [§91(2)] of the Regulation, each clearing member shall submit the details of sub-pledge established in customer account books under [§91(1)2(b)] of the Regulation on the basis of 17:00 hours of each trading day to the Exchange by 17:30 hours on the same day in accordance with [Annex: Form 8-2]. [September 5, 2019]

§102-2. Operation of Member Margins

(1) Pursuant to [§92(4)] of the Regulation, when operating the member margins deposited in cash or foreign currencies in such a way of depositing them with the settlement banks or the

securities finance companies, the Exchange shall prevent the amount under operation from being concentrated in a single settlement bank or securities finance company in accordance with the standards set by the Exchange separately. (Amended on May 19, 2017)

(2) Pursuant to [§92(4)] of the Regulation, in the case of reckoning the proceeds and expenses, etc. by incorporating them in the member margins, the proceeds to be paid to or the expenses to be collected from each clearing member shall be calculated respectively and added to or subtracted from the member margins in accordance with the standards set by the Exchange separately. [May 19, 2017]

(3) Pursuant to [§92(4)] of the Regulation, in cases where the Exchange operates the member margins deposited in cash or foreign currencies, it shall operate the member margins in the form of general operation and special operation by currency according to standards separately determined by itself. [March 24, 2025]

(4) In addition to paragraphs (1) through (3), the Exchange shall separately determine matters necessary for operating cash or foreign currency deposited as member margins. [March 24, 2025]

§102-3. Calculation and Imposition, etc. of Additional Intraday Member Margin

(1) Pursuant to [§93-2(1) and (5)] of the Regulation, in cases where all of the requirements under each of the following subparagraphs are met based on both the point of one (1) minute and each point of time (hereinafter referred to as “time of calculating intraday member margin”) of every one (1) hour after the start of trading hours of the KOSPI Market (excluding the time right before the market closing), the Exchange shall impose additional intraday member margin on the relevant clearing member at the time one (1) hour after the time of calculating intraday member margin(hereafter referred to as “time of imposition”). (Amended on March 23, 2018; July 18, 2023; November 1, 2024)

1. Where the price fluctuation rate of KOSPI 200 is equal to 80/100 or higher than the member margin rate of KOSPI 200 Futures (the price fluctuation rate shall be the absolute value of the amount obtained by dividing the difference between the underlying asset price at the time of calculating intraday member margin and the underlying asset base price on the previous day by the underlying asset base price on the previous day.); and

2. Where the intraday member margin calculated for each member is equal to or more than 120/100 of the total amount of deposit.

(2) The additional intraday member margin under paragraph (1) shall be calculated by subtracting the total amount of deposit (referring to the sum of the amount of cash deposit, substitute amount of substitute securities and the valuation amount of foreign currencies and foreign securities; the same hereinafter) calculated based on the time of imposition from the intraday member margin calculated based on the time of calculating intraday member margin for each member, and the intraday member margin shall be calculated by summing up the amounts under each of the following subparagraphs. (Amended on May 13, 2016)

1. The net exposure member margin calculated pursuant to the [Annex 18] based on the time

of calculating intraday member margin by applying [§94(1)] *mutatis mutandis*. In such cases, “base price for member margin”, “theoretical member margin price”, “base price for underlying asset”, “delta based on the closing time” in the [Annex 18] shall be construed as the “base price for intraday member margin”, “theoretical intraday member margin price”, “underlying asset price at the time of calculating intraday member margin”, “delta at the time of calculating intraday member margin”, respectively;

2. The member margin for credit risk loss as at the time of market closing on the latest trading day, calculated pursuant to [§94-2];

3. The intraday settlement difference for the day’s trade (referring to the amount calculated by multiplying the difference between the execution price of futures trades concluded on the day to which the time of calculating intraday member margin belongs and intraday settlement price to the execution quantity and multiplier); (Amended on May 29, 2025)

4. The intraday settlement difference for the previous day’s open interests (referring to the amount calculated by multiplying the difference between the settlement price of futures trades of the immediately preceding trading day and intraday settlement price to the quantity of open interests as of the market closing time of immediately preceding trading day and multiplier); and (Amended on May 29, 2025)

5. The intraday option premium (referring to the amount calculated by multiplying the execution price of options trades concluded on the day to which the time of calculating intraday member margin belong by the execution quantity and the multiplier for each option traded). (Amended on May 29, 2025)

(3) The intraday settlement price noted in subparagraphs 3 and 4 of paragraph (2) shall be calculated by applying the provisions of [§103] *mutatis mutandis*. In such cases, “settlement price”, “theoretical settlement price of futures”, “during the regular session of the day”, “the base price for settlement”, “at the market closing time” and “the closing value of the V-KOSPI 200” in [§103] shall be construed as the “intraday settlement price”, “intraday theoretical settlement price of futures”, “within the time of calculating intraday member margin of the day”, “the intraday base price for settlement”, “at the time of calculating intraday member margin” and “value of V-KOSPI 200 at the time of calculating intraday member margin”, respectively, and “the underlying asset base price on the previous day”, “the annual yield in the morning of previous day”, “fixed benchmark interest rate as of the previous day”, “as of the morning of the previous day”, “the day before the previous day” and “clearing and settlement time after the market closing” in [Annex 7] through [Annex 13] shall be construed as “the underlying asset base price at the time of calculating intraday member margin”, “the annual yield in the morning of the day”, “fixed benchmark interest rate as of the day”, “as of the morning of the day (limited to the case of Annex 9-2)”, “the previous day”, and “time of calculating intraday member margin”, respectively. (Amended on May 13, 2016; March 13, 2017; February 16, 2022; September 22, 2023; November 1, 2024)

(4) When imposing additional intraday member margins, the Exchange shall inform the relevant member of such fact, the amount of additional intraday member margin, deadline for deposit, and other necessary matters without delay.

(5) If the number of cases falling under paragraph (1) is two (2) or more, the Exchange shall

impose additional intraday member margin on the basis of the time the requirements are met first, and notwithstanding paragraph (1), the additional intraday member margin may not be imposed in consideration of market situation, etc.

[May 26, 2015]

§102-4. Depositing of Additional Intraday Member Margins, etc.

(1) “Time specified in the Enforcement Rules” in [§93-2(2)] of the Regulation shall refer to a time within two (2) hours after the Exchange informed the fact of imposition of additional intraday member margin pursuant to [§102-3(4)].

(2) “Time specified in the Enforcement Rule” in [§93-2(3)] of the Regulation shall refer to a time that a designated clearing member specifies within the time stated in the paragraph (1).

(3) Notwithstanding paragraphs (1) and (2), where it is deemed necessary for market management, the Exchange may change the date and time of depositing the additional intraday member margins and the additional intraday member margins of non-clearing members.

[May 26, 2015]

§102-5. Release from Imposition of Additional Intraday Member Margin

(1) In cases where the additional intraday member margin calculated based on the time thirty (30) minutes after the time of imposition is less than or equal to the total amount of deposit calculated based on the time one (1) hour after the time of imposition, the Exchange may release the relevant member from imposition of additional intraday member margin.

(2) When releasing a member from imposition of additional intraday member margins, the Exchange shall notify such fact to the relevant member without delay.

[May 26, 2015]

CHAPTER 2. CLEARING AND SETTLEMENT BETWEEN THE EXCHANGE AND MEMBERS

Section 1. Settlement Price of Futures

§103. Settlement Price of Futures

(1) Pursuant to the proviso to [§96(2)] of the Regulation, the settlement price per futures contract shall be the price falling under each of the followings. Provided that, in the case of quarterly month contract of Mini KOSPI200 futures, the settlement price shall be the settlement

price of KOSPI200 futures of which the last trading day is the same, and in the case of USD FLEX futures trades, the settlement price shall be the theoretical futures price: [Proviso on August 21, 2009] (Amended on July 3, 2015; June 20, 2016)

1. If there are the contract prices (excluding the deemed contract prices resulted from the futures spread trade and contract price of negotiated trade: the same hereinafter in this Paragraph) established during the regular session of the day: The contract price established most recently;

2. If there is no price falling under subparagraph 1 or the price stipulated in subparagraph 1 falls under the disparate conditions noted in paragraph (3) (this provision shall not apply to the cases of a contract of which the last trading day has arrived, the contracts of equity futures and interest rate futures): the base price for settlement determined according to paragraph (2);

3. [Deleted on December 10, 2010]

4. [Deleted on December 10, 2010]

(2) The base price for settlement noted in paragraph (1)2 shall be the price noted in each of the following subparagraphs. (Amended on June 20, 2016; March 14, 2022; April 18, 2025)

1. In the cases other than item 3 among futures trade that involves a contract for which the last trading day has arrived, the price noted in each of the following items:

(a) In the case of the nearest month contract, the base price of futures calculated on the day pursuant to [§55]. Provided that, in the case of Lean Hog futures trades, it shall be the real-time average price of lean hog at the market closing time (referring to the real-time average price that the Animal Products Grading Service publishes at one (1) minute interval from 09:00 hours to 17:00 hours pursuant to the Administrative Guidelines for Average Price of Lean Hog; the same hereinafter);

(b) In the case of the next nearest month contract, the theoretical settlement price of futures; and

(c) In the case of farther month contracts, excluding the next nearest month contract, the price obtained by following calculation formula. Provided that, if there is no settlement price of the next nearest month contract, it shall be the theoretical settlement price of futures:

(Theoretical settlement price of futures of the relevant farther month contract – Theoretical settlement price of futures of next nearest month contract) + Settlement price of the next nearest month contract

2. In the cases other than item 3 among futures trade that involves contract for which the last trading day has not arrived, the price noted in each of the following items:

(a) In the case of the nearest month contract, the theoretical settlement price; and

(b) In the case of farther month contract, the price obtained by following calculation formula. Provided that, if there is no settlement price of nearest month contract, it shall be the theoretical settlement price of futures:

(Theoretical settlement price of the relevant farther month contract - Theoretical settlement price of nearest month contract) + Settlement price of the nearest month.

3. In the case of 3-month risk free benchmark interest rate futures trade, the price noted in each of the following items: [February 16, 2022]

(a) In the case where there are both bid quotations and ask quotations at the time of the market closing, the price noted in each of the followings.

(i) Case where there is a theoretical settlement price between the best bid quotation and the best ask quotation at the time of the market closing; Theoretical settlement price of futures

(ii) Case where there is no theoretical settlement price between the best bid quotation and the best ask quotation at the time of the market closing; The best bid price or the best ask price, whichever is closer to the theoretical settlement price of futures

(b) In the case where there is no bid quotation and ask quotation at the time of the market closing or there are quotations only in bid or ask side; Theoretical settlement price of futures

(3) The disparate conditions noted in paragraph (1)2 shall be as noted in each of the following subparagraphs:(Amended on December 10, 2010; September 16, 2015; April 14, 2016)

1. For the farther month contracts in currency futures trade (excluding the next nearest month contract during the four (4) trading days counting retroactively from the last trading day of the nearest month contract): the case where the absolute value of the amount obtained by subtracting the base price for settlement from the price falling under paragraph (1)1 is higher than the value specified in [Annex 19-3]; and

2. For the futures trades other than those noted in subparagraph 1 (excluding the contract whose last trading day has arrived): the case where the value obtained by dividing the absolute value of amount determined by subtracting the base price for settlement from the price falling under paragraph (1)1 by the base price for settlement (to be rounded off at the 6th decimal place) is higher than the value specified in [Annex 19-3].

(4) Theoretical settlement price of futures in paragraphs (1) and (2) shall be the price calculated by applying [§55(1)1a] *mutatis mutandis*. In such cases, “previous day”, “the day before the previous day”, and “calculation date” noted in [Annexes7 through 13] shall be construed as “the day”, “the previous day”, and “the day following the calculation date”, respectively. (Amended on August 21, 2009; December 10, 2010; November 3, 2014; September 16, 2015; September 22, 2023)

(5) Notwithstanding paragraph (4), theoretical settlement price of futures shall be the price classified in each the following subparagraphs: [September 16, 2015]

1. For KOSPI High Dividend 50 futures trades, the last value of KOSPI High Dividend 50;
 2. For KOSPI Dividend Growth 50 futures trades, the last value of KOSPI Dividend Growth 50;
 3. For V-KOSPI 200 futures trades, the last value of V-KOSPI 200
 4. For the contract of USD FLEX futures of which the last trading day arrives, the final settlement price; and
 5. For Lean Hog futures trades, the real-time representative price of lean hog at the market closing.
- (6) In cases where the price (excluding settlement price of quarterly month contract of KOSPI200 futures) according to paragraph (1) is not consistent with the quotation price unit, it shall be, of the prices consistent with the quotation price unit, the price that is closest to the price noted in paragraph (1) (in case there are two (2) such prices, the higher price). [December 10, 2010] (Amended July 3, 2015)
- (7) Notwithstanding paragraph (1), the Exchange may change the settlement price if there is a trading abnormality, or it is deemed necessary for the market management. [December 10, 2010]
- (8) The settlement price noted in [§96(1) and (2)] of the Regulation shall be the settlement price calculated at the time of market closing on the trading day on which the settlement is conducted. [May 29, 2025]

§104. Exceptions in Calculation of Settlement Difference for Previous Day's Open Interests

- (1) Pursuant to the proviso to [§98(1)] of the Regulation, the settlement difference for previous day's open interests on the trading day on which the multiplier or the quantity of open interests of Single Stock Futures are adjusted shall be calculated using the following calculation formula:

(Adjusted settlement price – Settlement price of the relevant trading day) × Multiplier of the relevant trading day × Quantity of open interests at the time of market closing of immediately preceding trading day (when the quantity of open interests is adjusted, it shall be the quantity of open interests adjusted in accordance with [§10]) (Amended on December 10, 2010; November 3, 2014; May 29, 2025)

- (2) The adjusted settlement price noted in paragraph (1) shall be the price determined using the following calculation formula (to be rounded off at the 9th decimal place):

Settlement price of immediately preceding trading day × (Adjusted base price of underlying asset ÷ Closing price of underlying asset on previous day) (Amended on December 10, 2010; August 28, 2014; November 3, 2014; May 29, 2025)

Section 2. Option Exercise

§105. Deemed Value for Reporting Option Exercise

(1) The deemed value for reporting option exercise pursuant to [§100(3)1] of the Regulation shall be each of the following subparagraphs: (Amended on July 8, 2013; November 3, 2014; July 3, 2015; March 15, 2018)

1. For KOSPI 200 options and Mini KOSPI 200 options: 0.01 point;
2. For KOSDAQ 150 options: 0.1 points;
3. For single stock options: KRW 5. Provided that, in the case of a contract for which the exercise price has been adjusted pursuant to [§15], it shall be the amount larger than zero (0); and
4. For currency options: 0.10

(2) When it is deemed necessary by taking into consideration such factors as the level of brokerage commission, the Exchange may change the deemed value for reporting option exercise.

§106. Methods of Reporting Option Exercise and Reporting Deadline

The reporting of option exercise pursuant to [§100(5)] of the Regulation shall be accomplished in accordance with [Annex: Form 9], which shall be inputted to the Exchange derivatives system via the member derivatives system or member derivatives input device or submitting a written document via facsimile or in person or any other method within twenty (20) minutes after the market closing on the option exercise day. (Amended on August 21, 2009; August 28, 2014; April 6, 2026)

§107. Allotment Methods of Option Exercises

The allotment of options exercise pursuant to [§101(1)] of the Regulation shall be done by splitting the quantity of open short interest positions of each option exercise reported into trading quantity unit. (Amended on November 3, 2014)

§108. Notification Methods of Allotment of Option Exercises

Allotment of option exercise pursuant to [§101(3)] of the Regulation shall be notified in accordance with [Annex: Form 10], which is inputted to the member derivatives system or member derivatives input device via the Exchange derivatives system or other means. (Amended on August 28)

Section 3. Methods of Delivering/Receiving Settlement Amounts, etc.

§109. Deadline for Physical Delivery

“Time specified in the Enforcement Rules” in [§103(4)3] of the Regulation shall refer to 12:00 noon on the final settlement day of currency futures. (Amended on October 20, 2010; July 8, 2013; October 28, 2015)

(Wholly amended on August 28, 2014)

§110. Methods of Calculating Net Settlement Cash, etc.

(1) The net settlement cash and net settlement underlying asset that the Exchange delivers to and receives from the clearing members pursuant to [§103(7)] of the Regulation shall be calculated by netting the amounts calculated separately for each of derivative account noted in each subparagraph of [§93(1)]. (Amended on December 30, 2009; October 20, 2010; August 20, 2014; March 24, 2025)

(2) In cases when calculating the net settlement cash noted in paragraph (1), the final settlement difference, settlement difference for the day’s trade, settlement difference for previous day’s open interests and exercise difference of single stock options shall be calculated per contract (the amount less than KRW 1 shall be discarded), and then the amounts calculated shall be added. (Amended on August 28, 2014)

§111. Designation of Settlement Bank and Termination of Designation Thereof

(1) Pursuant to [§104(4)] of the Regulation, the Exchange shall designate settlement banks from among the banks satisfying all of the requirements in each of the following subparagraphs:(Amended on December 30, 2009; April 18, 2014; July 3, 2015; August 31, 2016)

1. The ratio of common equity capital, the ratio of basic equity capital, and the ratio of total equity capital prescribed in [§26(1)1] of the Regulations on Supervision of Banking Business shall be at least 1.2 times the minimum observance ratio as prescribed in [Annex2-9] of the same Regulations. Provided that, for the branches of foreign banks, the equity capital ratio (referring to the ratio of equity capital to risk-weighted assets provided in [§26] of the former Regulation on Supervision of Banking Business (referring to the same Regulation before having been amended by the Financial Supervisory Commission Announcement #2013-22)) shall be 10/100 or higher;

2. The liquidity coverage ratio shall be at least 1.1 times the liquidity coverage ratio prescribed in [§26(1)2] of the Regulations on Supervision of Banking Business; and

3. The lowest of the credit ratings issued by qualified external rating agencies designated by the Financial Supervisory Service shall be ‘AA’ or higher.

(2) In cases where a settlement bank designated by the Exchange falls under any of the

following subparagraphs, the Exchange shall terminate such designation within fourteen (14) business days after it became aware of such fact. Provided that, in cases where it is deemed necessary in consideration of market situation and financial conditions of the relevant bank, etc., the Exchange may postpone the termination of designation of the settlement bank for up to two (2) months, and when the reason for termination is not resolved by the end of the grace period, the Exchange shall terminate the designation within fourteen (14) business days from the end of the grace period. (Amended on July 3, 2015; May 13, 2016; December 5, 2018; May 29, 2025)

1. Case where it fails to reach the minimum capital ratio prescribed in [§26(1)1] of the Regulations on Supervision of Banking Business or the liquidity coverage ratio prescribed in [§26(1)2] of the same Regulations;

- 1-2. Case where it fails to meet the credit rating requirement noted in paragraph (1)3;

2. Case where, pursuant to [§34] through [§36] of the Regulations on Supervision of Banking Business, the Financial Services Commission has recommended the management improvement, requested the management improvement or ordered the management improvement; or

3. Case where, pursuant to [§38] of the Regulations on Supervision of Banking Business, the Financial Services Commission has taken an emergency measure.

§111-2. Notification of Settlement Capability, etc. by Clearing Members

Pursuant to [§104-3(3)] of the Regulation, the Exchange may request the clearing member, who is expected to run into difficulty in fulfilling its settlement obligation, to report the matters noted in each of the following subparagraphs: (Amended on April 18, 2014)

1. Information about the net settlement cash or net settlement underlying asset, of which the settlement is expected to be difficult and the cause for such difficulties;

2. Information about the member margin that is unlikely to be deposited and the reasons; and

3. Additionally, information about the matters that the Exchange deems them necessary for the reliable and efficient settlement.

[December 30, 2009]

§111-3. Risk Management Training

(1) Pursuant to [§104-3(5)] of the Regulation, to cope with the default of a clearing member, the Exchange shall conduct a risk management training, every year or in case when it deems necessary by the Exchange, to check matters determined in each of the following subparagraphs:

1. Application of [§107] and [§109] of the Regulation in assumption of under the default;

2. Other matters deem necessary by the Exchange; and

3. Additionally, information about the matters that the Exchange deems them necessary for the reliable and efficient settlement.

(2) The result of risk management training pursuant to paragraph (1) shall be reported to the Risk Management Committee.

[November 13, 2014]

§112. Amount Equivalent to Value of Underlying Asset

The amount equivalent to the value of underlying asset pursuant to the main sentence of [§105(3)] of the Regulation shall be calculated on the basis of the price specified in [Annex 20]. (Amended on December 30, 2009)

§112-2. Types of Financial Resources for Settlement, etc.

(1) The types of financial resources for settlement under [§105(6)] of the Regulation shall be each of the followings: (Amended on September 20, 2019)

1. Settlement reserve under [§54(1)4] of the “Articles of Incorporation”;
2. Credit lines or foreign exchange swap that the Exchange have established with securities finance companies or financial institutions engaging in banking business;
3. Joint compensation fund;
4. Fidelity guarantee money under Article 395 of the Act; and
5. Other financial resources for settlement that the Exchange deems necessary.

(2) The methods of using financial resources for settlement pursuant to [§105(6)] of the Regulation shall be stipulated separately by the Exchange considering how easily and quickly they can be converted into cash, the settlement deadlines, or other necessary matters.

(3) When, before the Exchange supplies the liquidity for settlement pursuant to [§105(1)] of the Regulation, a clearing member delivered the net cash balance to the Exchange after the settlement deadline, it shall be deemed that the liquidity was supplied from the financial resources for settlement.

[December 30, 2009]

§112-3. Receiver of Settlement Instruction for Net Settlement Underlying Assets

“Parties stipulated in the Enforcement Rules” in subparagraph of [§105-2] of the Regulation

shall be the settlement banks. (Wholly amended on October 28, 2015)

§112-4. Calculation Methods, etc. of Losses caused by Settlement Delay

(1) The loss caused by settlement delay pursuant to [§105-3(1)] of the Regulation shall be the larger one between the amount (amount less than KRW 10 shall be discarded) determined by multiplying the loss rate by net settlement cash not paid by settlement deadline (hereinafter referred to as “overdue settlement amount”) and KRW 10,000. (Amended on October 20, 2011; November 3, 2014)

(2) The loss rate noted in paragraph (1) shall be 2/10,000. Provided that, in cases where the loss caused by settlement delay has been paid within fifteen (15) minutes of settlement deadline, 1/2 of loss rate shall apply. (Amended on October 20, 2011; November 13, 2014)

(3) In cases where the loss rate noted in paragraph (2) is lower than the cost ratio of the financial resources under [§112-2(1)2] (shall be rounded up at the 9th decimal place; hereinafter referred to as “corrected rate”) used to supply the liquidity, the financial resources for settlement and loss rate applied thereto shall be each of the followings: (Amended on November 3, 2014; September 20, 2019)

1. Financial resources used for settlement: The amount noted in each of following items;

(a) In the case of financial resources other than those under [§112-2(1)2]: The amount (the amount less than KRW 10 shall be discarded) determined proportionally according to the overdue settlement amount per clearing member who delayed the settlement (including the clearing member who delayed the settlement in the KOSPI Market and KOSDAQ Market; the same hereinafter); and

(b) In the case of the financial resources under [§112-2(1)2]: The amount determined by subtracting the amount under item (a) from the overdue settlement amount of each clearing member.

2. Applicable loss rates:

(a) In the case of financial resources other than those under [§112-2(1)2]: The loss rate noted in paragraph (2); and

(b) In the case of the financial resources under [§112-2(1)2]: The higher between the corrected rate and the loss rate noted in paragraph (2).

(4) The Exchange shall immediately notify the amount of loss caused by settlement delay calculated to the clearing member who delayed the settlement.

(5) Each clearing member shall pay the loss caused by settlement delay noted in paragraph (1) into the Exchange’s account notified beforehand within three (3) days counting from the day the settlement has been delayed (excluding market holidays; referred to as “payment deadline” hereinafter in the Article).

(6) In cases where the clearing member failed to pay the loss caused by settlement delay by the payment deadline, the amount calculated for each day after the payment deadline by multiplying the rate noted in each of the following subparagraphs by the amount of loss caused by settlement delay noted in paragraph (1) shall be added to the loss caused by settlement delay. In such cases, the amount less than KRW 10 shall be discarded.

1. Where the payment is made within thirty (30) days (excluding the market holiday: the same hereinafter) counting from the day after the payment deadline (in case it is market holiday, it shall be moved back sequentially: the same hereinafter): 6/10,000; and
2. Where the payment is made after thirty (30) days counting from the day after the payment deadline: 8/10,000

[December 30, 2009]

§112-5. Settlement Support by Exchange Staff

(1) The Exchange staff who, pursuant to [§107(6)] of the Regulation, supports the settlement work of a clearing member who has failed to fulfill settlement obligations shall present the instruction for settlement support to the relevant clearing member.

(2) The Exchange staff shall perform his/her duties related to non-fulfillment of settlement obligations in a sincere and fair manner and shall keep confidential the classified information acquired in the course of performing the relevant work.

[December 30, 2009]

§112-6. Closing out of Open Interests of Trade-suspended Members

(1) The Exchange may let another clearing member designated by the Exchange (referred to “closing-out member” hereinafter in this Article) to conduct the ‘closing-out of the open interests’ noted in [§109(2)] or [§109(3)] of the Regulation, by using the member derivatives system or the member derivatives terminal of the trade-suspended member or using the closing-out member’s own member derivatives system, or by other methods that the Exchange deems appropriate.

(2) The closing-out of the open interest pursuant to paragraph (1) shall be deemed to have been conducted under the name of the trade-suspended member and the settlement subsequent to this shall be completed by the trade-suspended member.

(3) The expenses associated with the closing-out of the open interests shall be borne by the trade-suspended member. In such cases, the amount of expenses shall be determined in advance by the consent of the trade-suspended member and the closing-out member, and in cases where the consent was not reached, it shall be the amount mediated by the Exchange.

[December 30, 2009]

§113. Transfer of Open Interests of Trade-suspended Members

(1) A transaction agreement for the transfer of open interests noted in [§109(3)] of the Regulation shall be concluded by way of a bi-lateral transaction between a member who holds the open interests of the customer who intends to transfer (hereinafter referred to as the “transferor member”) and a member who intends to acquire the relevant open interests (hereinafter referred to as the “transferee member”), and the Exchange shall mediate such transaction. In such cases, the transferee member and the customer shall enter into an agreement for opening of derivatives account before concluding the bi-lateral transaction, and the transferor member and the transferee member shall submit to the Exchange a written statement stating the matters set forth by the Exchange with respect to the transfer of open interests. (Amended on August 28, 2014)

(2) The relevant parties and the contract price of the bi-lateral transaction pursuant to paragraph (1) shall be any of the following subparagraphs:

1. Parties of the transaction: The transferor member shall be the relevant party to the position making the offsetting trade of open interests and the transferee member shall be the relevant party to the position purchasing the open interests; and

2. Contract price of the transaction: In the case of futures, it shall be the settlement price of the trading day immediately before the trading day on which the transfer is made and in the case of options, it shall be zero. (Amended on May 29, 2025)

(3) When the bi-lateral transaction for the transfer of open interests is executed pursuant to paragraphs (1) and (2), the customer shall transfer to the transferee member an amount higher than the customer amount deposited with the transferor member.

PART V. ENTRUSTMENT OF TRADES

CHAPTER 1. CONDITIONS OF ENTRUSTMENT

Section 1. Opening of Derivatives Accounts and Issuance of Terms and Conditions, etc.

§114. Derivatives Account Number, etc.

(1) Pursuant to [§110(1)] of the Regulation, the member shall issue twelve (12) digit number to the derivatives account of customer. (Amended on March 18, 2009)

(2) When changing the derivatives account number pursuant to paragraph (1), the member shall notify such change to the Exchange without delay.

(3) When issuing the derivatives account number to an investment broker who intermediates

the entrustment of orders, the member shall separate the number per customer who has entrusted an order to the relevant investment broker.

(4) In cases where a member receives an entrustment of orders from another member pursuant to [§48(3)], the member shall report to the Exchange the matters related to the account that receives the orders (opening, changing, closing, etc.) by inputting the details into the Exchange derivatives system via the member derivatives system in advance in accordance with [Annex: Form 17]. In this case, if a person who places the order is a person who has been approved for the admission or conversion of membership pursuant to Article 5 or Article 16 of the Membership Regulation, the person may make the report immediately after the market closing on the trading day preceding the admission or conversion date. [September 3, 2020] (Amended on November 24, 2023)

(5) Pursuant to [§110(3)] of the Regulation, when the customer who has opened a derivatives account opens an additional derivatives account with the relevant member, the member may neither deliver the derivatives service agreement and derivatives risk warning statement and provide the explanation thereof, collect the acknowledgement of receipt of derivatives risk warning statement nor validate the customer information according to [§112 through §114] of the Regulation. Provided that this provision shall not apply to the case where there is a change in details of those matters. (Amended on November 3, 2014; September 3, 2020)

§114-2. Foreign Financial Investment Business Entities eligible to open Foreigner's Consolidated Accounts, etc.

(1) Pursuant to [§110-2(3)] of the Regulation, any foreign financial investment business entity that intends to open a foreigner's consolidated account shall satisfy each of the following requirements:

1. It shall legitimately run a business falling under investment dealing, investment brokerage or collective investment business in foreign countries;
2. It shall be a financial investment business entity of a country which is a full member of the Financial Action Task Force; and
3. It shall be a person who was acknowledged by a KRX member as a qualified institutional investor specified in [§133] of the Regulation.

(2) The foreign investors who can use the foreigner's consolidated accounts pursuant to [§110-2(3)] of the Regulation (hereinafter referred to as "end-investors") shall be classified as follows. In such cases, the general end-investors under subparagraph 1 and the allocating end-investors under subparagraph 2 shall be the non-resident foreigners (referring to the non-resident foreigners whose 'classification code of resident and non-resident' under the 'classification of investors' in [Annex 6] is '20'; the same hereinafter). (Amended on September 20, 2017)

1. General end-investors (referring to the end-investors who do not fall under subparagraphs 2 and 3);
2. Allocating end-investors (referring to the end-investors who are the collective investment

business entities, pensions or funds, submitting the selling or buying intentions of the ‘sub-end investors’ collectively to the person who has opened the foreigner’s consolidated account and transferring the open interests to the ‘sub-end investors’); and

3.Sub-endinvestors (referring to the end-investors who are the collective investment schemes or asset management units managed or operated by the allocating end-investors under subparagraph 2, submitting their selling or buying intentions to allocating end-investors and receiving the open interests from the allocating end-investors).

[June 15, 2017]

§114-3. End-investors Classification Codes and Reporting Methods of Foreigner’s Consolidated Accounts

(1) Pursuant to [§110-2(3)] of the Regulation, members shall issue 12-digit end-investor classification codes to each end-investor who uses the foreigner’s consolidated accounts. Provided that, in cases where a foreign financial investment business entity that has opened the foreigner’s consolidated account fails to meet any of the requirements noted in [§114-2(1)], the member shall not newly issue an end-investor classification code to the relevant foreign financial investment business entity.

(2) Pursuant to [§110-2(3)] of the Regulation, when opening a foreigner’s consolidated account or changing it, a member shall report such fact to the Exchange within twenty (20) minutes from the market closing time of the trading day immediately preceding trading day on which the member accepts an entrustment of orders through the relevant foreigner’s consolidated account, by inputting it to the Exchange derivatives system via the member’s derivatives system or the member’s derivatives terminals. In such cases, in cases where the report on the transfer of open interests noted in the proviso to [§114-4 (1)] is not made, the member may make the report together with the sub-end investor to whom the relevant open interests are to be transferred. (Amended on November 1, 2024; May 29, 2025; April 6, 2026)

[June 15, 2017]

§114-4. Report on Transfer of Open Interests within A Foreigner’s Consolidated Account

(1) Pursuant to [§110-2(3)] of the Regulation, members shall report the details of the open interests transferred to sub-end investors from allocating end-investors of a foreigner’s consolidated account to the Exchange within twenty (20) minutes from the market closing time of the trading day on which the trades of the relevant open interests are executed or within twenty (20) minutes from the market closing time of the next trading day. Provided that, for a contract of which the last trading day has arrived, the details of the open interests shall be reported to the Exchange within twenty (20) minutes from the market closing time of the trading day on which the trades of the relevant open interests are executed. (Amended on May 29, 2025; April 6, 2026)

(2) In cases where a member has failed to make the report noted in the proviso to paragraph (1), the Exchange shall transfer the relevant open interests to the sub-end investor who was reported in advance pursuant to the latter part of [§114-3(2)].

(3) Members shall record and keep the materials related to the transfer of open interests under paragraph (1).

[June 15, 2017]

§114-5. Exceptions to Margins, Position Limits, High-speed Algorithmic Trades, etc. of Foreigner's Consolidated Accounts

(1) Pursuant to [§110-2(3)] of the Regulation, in the case of a foreigner's consolidated account, the member margins under [§88(1)] of the Regulation, the intraday margins under [§93-2(1)] of the Regulation, the risk exposure amount under [§133(3)] of the Regulation, the ex-post customer margins under [§135(1)] of the Regulation and the member margins that shall additionally be deposited pursuant to [§137-2] of the Regulation shall be calculated for each end-investor within the foreigner's consolidated account and summed up. In such cases, the member may calculate the risk exposure amount under [§133(3)] of the Regulation, the ex-post customer margins under [§135(1)] of the Regulation and the member margins that shall additionally be deposited pursuant to [§137-2] of the Regulation for the allocating final investors by applying [§144(1)2] *mutatis mutandis*.

(2) Pursuant to [§110-2(3)] of the Regulation, in the case of a foreigner's consolidated account, the end-investors within the foreigner's consolidated account shall be deemed to be the customers when applying the position limits under [§154] of the Regulation. (Amended on September 20, 2017)

(3) In cases where a member makes a report of an algorithmic trade account for a foreigner's consolidated account pursuant to [§110-2(3)] of the Regulation, such report shall be made for each end-investor within the foreigner's consolidated account who carries out algorithmic trades (it shall be deemed that the report of algorithmic trades for the foreigner's consolidated account to which the end-investor belongs has also been made). (Amended on July 1, 2019)

(4) In the case of applying the accumulated quotation quantity limit to foreigner's consolidated accounts pursuant to [§71] and [§110-2(3)] of the Regulation, it shall be applied separately for each end-investor within the foreigner's consolidated account. In such cases, "algorithmic trading account" in [Annex 17-2] shall be construed as "end-investor of algorithmic trading" and "non-algorithmic trading account" shall be construed as "end-investor who is not an end-investor of algorithmic trading". [November 25, 2021]

(5) Pursuant to [§110-2(3)] and [§156-4(7)] of the Regulation, the final investor may conduct high-speed algorithmic trades using foreigner's consolidated account. In such cases, a member shall report to the Exchange the final investor's identification code connecting to the high-speed algorithmic trade number in advance. [December 21, 2022]

[June 15, 2017]

§114-6. Transfer of Open Interests in Foreigner's Consolidated Account

(1) Pursuant to [§110-2(3)] of the Regulation, at the request of a customer, members may apply

to the Exchange for the transfer of all or part of the open interests of a sub-end investor to other sub-end investors of the same allocating end-investor within the regular trading session. (Amended on May 29, 2025)

(2) Pursuant to [§110-2(3)] of the Regulation, in cases where a member falls under any of the following subparagraphs, the member may apply to the Exchange for the transfer of open interests within twenty (20) minutes from the market closing. In such cases, the member shall input a number that can identify the customer such as the foreign investment registration number, business registration number, or a number on an identification card of the customer who requested the transfer in each of the following subparagraphs: (Amended on November 25, 2021; September 22, 2023; April 6, 2026)

1. Case where a customer who is a non-resident foreigner makes a request to transfer the entire open interests in a derivatives account opened by the customer to an end-investor (referring to the end-investor who is the same person as relevant customer) in the foreigner's consolidated account; and
2. Case where a foreign financial investment business entity makes a request to transfer the entire open interests of a general end-investor in the foreigner's consolidated account opened by the foreign financial investment business entity to the general end-investor (referring to the same end-investor) in the foreigner's consolidated account opened by the same member.

(3) Members shall record and keep the materials related to the transfer of open interests under paragraphs (1) and (2).

[June 15, 2017]

§114-7. Publication of Order Entrustment Methods, etc.

(1) In cases where the member establishes the details about the order entrustment methods, etc. referred to in [§110-3(4)] of the Regulation, the details noted in the following subparagraphs shall be included: (Amended on June 15, 2017)

1. With regard to the method of accepting the order entrustment, the matters noted in each of the following items:
 - (a) Originator of order;
 - (b) Location where the order originated;
 - (c) Order input device;
 - (d) Order transmitting device; and
 - (e) Order receiving device.
2. With regard to the order processing method, the matters noted in each of the following items:

(a) Verification method of order suitability, etc. according to [§65(2)] of the Regulation and physical location of system used for verification; and

(b) Session types specified in the Guidelines on Connection, etc. to Member System.

3. Conditions of use and user fees per method according to subparagraphs 1 and 2.

4. In addition, the matters that the member deems necessary to explain the differences between order entrustment methods.

(2) When setting or changing the order entrustment methods, etc. under [§110-3(4)] of the Regulation, members shall make public such fact in advance through their internet websites and etc. and notify the details to the Exchange without delay. (Amended on June 15, 2017)

[December 28, 2011]

§114-8. Matters to Be Entered in Terms and Conditions for High-speed Algorithmic Trading

Pursuant to [§111(1)19(b)] of the Regulation, in case where a customer of a member is a person who is required to be registered as a high-speed algorithmic trader, the member shall include each of the following matters in the terms and conditions:

1. The customer shall identify and systemically manage risks that may arise from the high-speed algorithmic trading;

2. The customer shall prepare the procedures for developing and changing the electronic systems including an ordering system, etc. and the program related to the high-speed algorithmic trading, and shall comply with them when operating;

3. The customer shall cooperate in fulfilling the member's obligation to manage high-speed algorithmic traders, including checking the electronic system such as the ordering system, etc.;

4. The customer shall prepare an appropriate control and response system to effectively cope with accidents or system failures related to the high-speed algorithmic trading and to minimize damage therefrom;

5. The customer shall maintain a mutual contact system with members to respond promptly in the event of an emergency, such as errors in the electronic system such as the ordering system, etc.; and

6. In the case where the customer who has conducted the high-speed algorithmic trading through multiple members pursuant to [§164-8] is suspended to submit the orders for high-speed algorithmic trading pursuant to [§156-4(5)], he/she shall notify all other members of the relevant fact and reason.

[December 21, 2022]

§115. Customer Information

(1) “Other matters specified in the Enforcement Rules” in subparagraph 4 of [§114] of the Regulation shall refer to each of the following subparagraphs: (Amended on August 28, 2014; June 15, 2017; October 14, 2019; September 3, 2020)

1. Classification of investors;
 2. [Deleted on September 3, 2020]
 3. In the case of foreign investor, the nationality or country of permanent residence and the residence status in Korea;
 4. When an account has been opened for the payment of substitute securities such as stocks, bonds, and other securities, the number of the relevant account and password;
 5. In the case of having appointed an agent, the matters mentioned in subparagraphs 1 and 2 under [§114] of the Regulation, the relationship with the customer and the range of authority delegated;
 6. Whether or not the customer is judged to be a qualified institutional investor. In such cases, it shall include whether the customer falls under [§132(3)2] of the Regulation;
 7. Classification of upfront customer margin account (referring to the derivatives account for the deposit of upfront initial customer margin: the same hereinafter) and export customer margin account (referring to the derivatives account for deposit to ex-post margin: the same hereinafter);
 8. In the case of ex-post customer margin account, the sub-classification of each of the following derivative accounts:
 - (a) Ex-post customer margin regular account (referring to the derivatives account for the deposit of ex-post customer margin pursuant to [§135(1)] of the Regulation: the same hereinafter); and
 - (b) Ex-post customer margin discount account (referring to the derivatives account for the deposit of lower ex-post customer margin pursuant to [§135(2)] of the Regulation, which was opened for arbitrage or hedge: the same hereinafter).
 9. In the case of general individual investors (referring to the individuals with ‘investors code’ of 8000 under ‘classification of investors’ in [Annex 6] except individual investors falling under Article 9(5) of the Act and non-resident foreigners; the same hereinafter), it shall include whether they have completed education courses on derivatives and derivatives mock trading courses.
 10. In addition, other matters that the member deems necessary.
- (2) When opening, changing or canceling an ex-post customer margin account specified in paragraph (1)8 (excluding foreigner’s consolidated accounts), the member shall report the

matters about the relevant account to the Exchange without delay. In such cases, when reporting the matters about the opening of ex-post customer margin discount account, the securities-linked account (referring to the securities-linked account pursuant to [§147(1)3]) and ex-post customer margin regular account of the same customer shall also be reported. (Amended on June 15, 2017)

(3) Completion of the education courses on derivatives under paragraph (1)9 shall refer to completing derivatives-related education courses provided and operated by the KOFIA for more than the time set by a member, which is at least one (1) hour. (Amended on March 13, 2017; October 14, 2019)

1. [Deleted on October 14, 2019]
2. [Deleted on October 14, 2019]

(4) Completion of mock trading courses under paragraph (1)9 shall refer to completing derivatives mock trading courses provided and operated by the Exchange or derivatives mock trading courses of members certified by the Exchange for more than the time set by a member, which is at least three (3) hours. [March 13, 2017] (Amended on October 14, 2019)

(5) Each member shall set the criteria, by which each customer can be applied with differentiated hours of completion of the education courses on derivatives and the derivatives mock trading courses under paragraph (1)9, taking into account the customer information, etc. under subparagraph 3 of [§114] of the Regulation. [October 14, 2019]

(6) Notwithstanding paragraph (3), when a person has passed examinations falling under any of subparagraphs in [§2-5-3(3)] of the ‘Regulations on Business Conduct and Services of Financial Investment Companies’ of the KOFIA and the passing of the examination remains valid, it shall be deemed that the person has completed the derivatives education course. [March 13, 2017]

(7) Notwithstanding paragraphs (3) and (4), any person who falls under any of following subparagraphs shall be deemed to have completed the derivatives education course and the derivatives mock trading course: [March 13, 2017]

1. A person, among the persons with working career in the area of derivatives business, falling under [§2-5-3(3)2] of the Regulations on Business Conduct and Services of Financial Investment Companies; and
2. A person who has entered into a discretionary investment agreement on the on-Exchange derivatives products with a person engaging in the discretionary investment business [This is limited to the case of being entrusted by the derivatives product account (hereinafter referred to as the “discretionary investment account”) on which the relevant discretionary investment agreement has been entered into.]

(8) In order to be applied with the Class No-action Relief issued by the U.S. Securities and Exchange Commission (referred to as the “Class Relief” hereinafter in this Paragraph), each member shall comply with all terms and conditions set forth in the Class Relief and the requirements separately determined by the Exchange. In such cases, the member shall submit a written confirmation on provision of transaction-related information, etc. to the Exchange, and

shall collect and keep a written confirmation signed by a US investor in relation to the qualifications for trading and the trade-associated risks, etc., before receiving entrustment from such US investor. [August 17, 2018]

(9) The Exchange shall separately determine the matters necessary for the written confirmation under paragraph (8), and if requested by the Exchange, each member shall submit the transaction-related data of US investors to the Exchange. [August 17, 2018] (Amended on October 14, 2019)

Section 2. Entrustment Method and Conditions

§116. Order Details

“Order details specified in the Enforcement rules” mentioned in [§117] of the Regulation shall refer to the details noted in each of the following subparagraphs: (Amended on August 28, 2014; June 15, 2017; December 21, 2022)

1. Order type;
2. Contract name;
3. Quantity;
4. Price, in the case of an order specifying prices;
5. Classification of offer and bid;
6. Derivatives account number (for foreigner’s consolidated accounts, it shall be the end-investor classification code);
7. [Deleted on September 3, 2020]
8. In cases where an order (including the immediate or cancel condition and the fill or kill condition pursuant to [§48(1)8] and self-match prevention condition pursuant to [§48(1)17(c)]) is affixed with a condition, such condition;
9. In cases where the order has a validity period, such validity period;
10. Matters noted in subparagraph 1 under [§114] of the Regulation; and (Amended on May 29, 2025)
11. In addition, the matters that the member deems necessary.

§117. Order Entrustment by Written Document and Recording of Order Details

Pursuant to [§118(3)] of the Regulation, in case where the member receives an order entrustment by written document method, it shall be the order slip where the customer has recorded the order details and put his/her seal or signature thereon. (Wholly amended on December 28, 2011)

§117-2. Order Entrustment over Telephone, etc. and Recording of Order Details

(1) Pursuant to [§118(3)] of the Regulation, in case where the member receives an entrustment of order over the telephone, etc., it shall be the method falling under any of the following subparagraphs:

1. The method of using the order slip where the person receiving the entrustment fills in the order details and puts his/her seal or signature thereon; and
 2. The method where the person receiving the relevant entrustment puts his/her seal or signature on the printed order details (hereinafter referred to as the “electronic order slip”) after inputting the order details into the member derivatives system.
- (2) Notwithstanding paragraphs (1) and (2), in case where the order details and the person who inputted the order details can be verified by using the magnetic tape, magnetic disc or other auxiliary memory devices, it shall deem to be by the method noted in paragraphs (1) and (2).
- (3) In the case of receiving the order entrustment over the telephone, etc., the member may use a recording device and other method to prove the order details.
- (4) The member using the electronic order slip noted in paragraph (1)² shall comply with the matter noted in each of the following subparagraphs:
1. To input the order details into the member derivatives system immediately after receiving the entrustment;
 2. To record such facts as the order input time, the person who inputted and details of order cancellation and order correction in the member derivatives system;
 3. To make a copy of order details and other matters inputted in the member derivatives system using the magnetic tape, magnetic disc or other auxiliary memory devices and keep such copy; and
 4. To make sure that the inputted and recorded order details and the person who inputted the order details pursuant to subparagraphs 1 through 3 can be printed in an easily readable format.

(Wholly amended on December 28, 2011)

§117-3. Order Entrustment via Electronic Communication Method

- (1) Pursuant to [§118(3)] of the Regulation, in the case of receiving an order entrustment via electronic communication method, a member shall enter into an agreement for order entrustment via electronic communication method with the customer in advance.
- (2) In cases where a member receives an order entrustment via electronic communication method, it shall be using the member derivatives system meeting all requirements noted in each of the following subparagraphs:
 1. The member shall be able to verify if the user of member derivatives system is the legitimately authorized user;
 2. In the case of entrusting an order, the customer shall be able to confirm the order details

immediately;

3. The customer shall be able to inquire the order details and trading details noted in [§125(1)] of the Regulation;

4. The member shall be able to record the order details, refusal of order entrustment and other handling details of member derivatives system and keep such record;

5. To be able to prevent inputting of order details, withdrawal and transfer of customer margin and cash, substitute security, foreign currency or foreign securities deposited as the basic deposit by a person other than the entrusting customer, and prevent stealing and leaking of information about the customer;

6. The member shall be able to refuse the order entrustment immediately when it is necessary; and

7. In cases where the customer requests, the member may submit all cancellation quotations noted in such request end bloc.

[December 28, 2011]

§118. Entrustment of Negotiated Trade

(1) When a member accepts the entrustment of negotiated trade from a customer pursuant to [§123(2)] of the Regulation, the matters to be verified shall be each of the followings: (Amended on August 21, 2009; October 1, 2010; August 28, 2014; June 15, 2017; May 29, 2025)

1. Contract name;
2. Price;
3. Quantity;
4. Derivatives account number (for foreigner's consolidated accounts, it shall be the end-investor classification code);
5. Classification of offer and bid;
6. Name and derivatives account number (for foreigner's consolidated accounts, it shall be the end-investor classification code) of the counter party member;
7. Time when the agreement for negotiated block trade was concluded;
- 7-2. In the case of trading the exchange of futures for physicals, the spot price of US dollar noted in [§72-3(2)];
- 7-3. In the case of negotiated FLEX trade, the last trading day and settlement method; and
8. Additionally, the matters that the member deems necessary.

(2) When intending to accept the trade entrustment of exchange of futures for physicals, the member shall receive the deposit of US dollar or amount noted in [§72-4], which is related to the relevant trade, in advance. [August 21, 2009]

§118-2. [Deleted on May 29, 2025]

[August 25, 2010]

§119. Refusal to Accept Entrustment, etc.

(1) Pursuant to the proviso to [§124(1)2] of the Regulation, the member may not refuse the entrustment of orders falling under any of the following subparagraphs. In such cases, if the orders falling under subparagraphs 1 through 3 have been entrusted, the member shall take into account the possibility of the order being executed, etc. (Amended on October 26, 2009; January 31, 2011; October 20, 2011; August 28, 2014; November 3, 2014; May 26, 2015; September 20, 2017)

1. The order for offsetting trade that does not cause the increase of customer margin when many orders received simultaneously or consecutively in an equivalent manner is executed;
2. In cases where only total amount of deposit is insufficient, the order for offsetting trade that does not increase the customer margin and increases only the amount requiring cash deposit within the amount of cash deposited;
3. In cases where only the cash deposit is insufficient, the order for offsetting trade that does not increase the customer margin and increases only the cash deposit requirement within the amount of total deposit;
4. In the case of receiving an entrustment of orders from the customer permitted to pay the ex-post customer margin that paid the ex-post customer margin after the deposit deadline;
5. In the case of receiving an entrustment of orders from the overseas qualified institutional investor who failed to deposit the ex-post customer margin or fulfill the settlement obligation due to the public holiday of overseas banks. In such cases, the member shall keep the records of relevant materials;
6. In the case of receiving an entrustment of orders from overseas qualified institutional investors who have submitted the payment instructions sent to the foreign exchange banks in Korea for the deposit of ex-post customer margins or settlement payments. In such cases, the member shall keep the records of relevant materials.

(2) The cases where the entrustment of orders must be refused according to the proviso to [§124(1)3] of the Regulation shall be stipulated in [Annex 22]. [January 31, 2011]

(3) “Cases of receiving entrustment of trades stipulated in the Enforcement Rules” in [§124(1)5] of the Regulation shall refer to the cases falling under any of the followings: (Amended on January 31, 2011; August 28, 2014; December 24, 2014; February 13, 2015; March 13, 2017; June 15, 2017; September 20, 2017; March 15, 2018; October 14, 2019; September 3, 2020; December 21, 2022)

1. Case of receiving the entrustment of orders that infringes the Regulation, etc. including the order price exceeds the upper or lower limit price;

2. Case of receiving the entrustment of orders that is not consistent with the classification of derivatives account pursuant to [§115(1)7&8];
3. Case of receiving the entrustment of orders through the ex-post customer margin discount account that has failed to submit the documentary evidence for arbitrage or hedge and also failed to deposit the amount of customer margin applicable to the ex-post customer margin regular account;
4. [Deleted on May 29, 2025]
5. [Deleted on May 29, 2025]
6. Case of receiving an entrustment of new trades (referring to the trades that will increase the number of open interests of each of bid and offer per contract except for the contracts of futures spreads; the same hereinafter in this Paragraph) from a general individual investor who has not completed the education courses under [§115(3) and (4)];
7. Case of receiving an entrustment of new trades of V-KOSPI 200 futures or options sale from a general individual investor (excluding a person who falls under [§115(6)2]) who has no experience of holding open interests (excluding open interests of a discretionary investment account) calculated for each member for more than ten (10) trading days during the period from the trading day of opening of the customer's derivatives product account (in the case of an account that entered into a discretionary investment agreement on that trading day, it shall be the trading day following the trading day when the discretionary investment agreement has been terminated) to the trading day when the member was entrusted with the trades. Provided that the same shall not apply to the case of receiving an entrustment of new trades to sell options through a hedge-dedicated account under [§127(3)2] of the Regulation; (Amended on May 29, 2025)
8. [Deleted on October 14, 2019]
9. [Deleted on October 14, 2019]
10. Case of receiving an entrustment for a new trade through a discretionary investment account from any person other than the person who has entered into discretionary investment agreement;
11. Case of receiving an entrustment of trades for buying or selling from a person who has opened foreigner's consolidated accounts and directly received the intention of such trades from a sub-end investor;
12. Case of receiving an entrustment for a new trade from a foreigner's consolidated accounts of a foreign financial investment business entity which has failed to meet the requirements specified in [§114-2(1) 1 or 3];
13. Case of receiving an entrustment of trades from a person who has opened the foreigner's consolidated account and to whom the allocating end-investor of a sub-end investor whose open interests have exceeded the position limits specified in [§154] of the Regulation has

submitted the buying or selling intentions;

14. Case of receiving an entrustment of derivatives trades for hedging (referring to the derivative trades noted in [§122-2(2)]), the amount of which exceeds the assessment value of the assets deposited in the hedge-linked securities account mentioned in [§122-2(1)] from the customer of a hedge-dedicated account;

15. Case of receiving an entrustment of trades that should be rejected as a result of applying *mutatis mutandis* the provisions of [Annex 22] to each of same underlying stocks for KOSDAQ 150 futures, KOSDAQ 150 options, single stock futures and single stock options; and

16. Case of receiving an entrustment of trade that is different from the details reported to the Exchange pursuant to [§114(4)] from other members.

(5) ;[Deleted on May 29, 2025]

§120. Notification of Trading Details to Customers

Pursuant to the proviso to [§125(1)] of the Regulation, the trading details that the member must notify to the customer shall be each of the followings:

1. Trade execution date (year, month and date);
2. Contract name;
3. Quantity;
4. Price;
5. Classification of offer and bid; and
6. In addition, the matters that the member deems it necessary to notify the customer.

CHAPTER 2. CUSTOMER MARGIN

Section 1. General Provisions

§121. Entrustment Prices of Market Orders, etc.

The entrustment prices of market orders, limit-to-market-on-close orders and immediately executable limit orders under [§126(1)] of the Regulation shall refer to the price classified in each of the following subparagraphs: (Amended on August 28, 2014; May 19, 2015; November 10, 2017)

1. For futures trades: Base price of underlying asset of the immediately preceding trading

day; and (Amended on May 29, 2025)

2. For options trades: The upper limit price noted in [§59(1)] Provided that, in the case of the options trading of equity derivatives, it shall be classified as follows: (Amended on October 1, 2025)

(a) In the case of regular trading: The higher price between the upper limit price in the 3rd phase under [Annex 14] and the lowest upper limit price under [§59-3]); or [October 1, 2025]

(b) In the case of night trading: The higher price between the upper limit price in the 1st phase under [Annex 14] and the lowest upper limit price under [§59-3]. [October 1, 2025]

§121-2. [Deleted on October 20, 2011]

§122. Amount of Basic Deposits

(1) The amount of basic deposit under [§127(1)] of the Regulation shall be the amount set by members for each customer by taking into account the customer information under subparagraph 3 of [§114] of the Regulation, which is within the amount falling under any of the following subparagraphs: (Amended on October 14, 2019)

1. For a customer who intends to trade futures except V-KOSPI 200 futures and to conduct options purchasing trades: KRW 10 million or more; and

2. For a customer who intends to trade all derivatives: KRW 20 million or more.

(2) Notwithstanding paragraph (1), the members may set KRW 500,000 or higher as the basic deposit for the customer who opens the derivatives account for the purpose of trading only the Gold futures or Lean Hog futures. [July 30, 2010] (Amended on March 19, 2013; November 3, 2014; October 28, 2015)

(3) The member shall establish the phases of application, the amount applicable for each phase, the application period and other necessary matters (hereinafter referred to as “the guidelines for derivatives basic deposit”) per customer pursuant to paragraph (1).

(4) When establishing or amending the guidelines for derivatives basic deposit, the member shall make public such fact in advance and notify the Exchange within seven (7) business days from the date of application. (Amended on January 31, 2011; May 29, 2025)

(5) In the case of applying [§127(2)] of the Regulation, for the customer who placed an order after the entire quantity of open interests has been closed out, but none of the relevant order was executed and the settlement deadline of closed-out open interests has passed, the member shall collect the derivatives basic deposit or cancel the entire quantity of relevant order. (Amended on August 28, 2014)

(6) Notwithstanding paragraph (1), when it is deemed necessary in view of the trading conditions, the Exchange may change the amount specified in each subparagraph of paragraph (1).

§122-2. Opening, etc. of Hedge-dedicated Accounts

(1) Pursuant to [§127(4)] of the Regulation, members may open hedge-dedicated accounts to general individual investors who meet the following requirements: (Amended on October 14, 2019)

1. Shall complete the education courses on derivatives under [§115(3)] and the derivatives mock trading courses under [§115(4)]; and
2. Shall designate a securities account that is linked to a hedge-dedicated account (hereinafter referred to as “hedge-linked securities account”).

(2) If a customer deposits assets more than the minimum securities quantity or the minimum cash amount in his/her hedge-linked securities account, the customer may conduct a derivatives trade to hedge the deposited assets (referring to a new trade for the sale of futures, purchase of put options and sale of call options) through a hedge-dedicated account within the assessment value of the deposited assets.

(3) The scope of the deposited assets, the minimum securities quantity or the minimum cash amount of the deposit assets, the types of derivatives that can be traded for the hedging of the relevant deposited assets and the transaction limits noted in paragraph (2) shall be stipulated in [Annex 28].

(4) In cases where a customer holds open interests acquired from a derivatives trade for hedging, the member shall not pay the deposited asset which is the subject of the relevant hedging trade to the customer.

(5) Notwithstanding Paragraph (4), in cases where a customer can immediately close out the open interests acquired from a derivatives trade for hedging, the member may pay the deposited asset which is the subject of the relevant hedging trade to the customer. Provided that, when the customer fails to close out the relevant open interests by the time of market closing of the relevant trading day, the member may conduct offsetting trades, taking into considering the assessment value of the deposited assets, after 12:00 noon on the next trading day by applying [§152] *mutatis mutandis*. (Amended on May 29, 2025)

[June 15, 2017]

Section 2. Substitute Securities, Foreign Currencies and Foreign Securities

(Amended on December 18, 2012)

§123.Types and Assessment of Foreign Currencies, etc.

(1) The type of foreign currencies noted in [§127(4)] of the Regulation shall be the foreign currency determined by the members from among the foreign currencies falling under each

subparagraph of [§92(1)].

(2) Pursuant to [§127(4)] of the Regulation, the Exchange shall determine the Korean Won equivalent price (hereinafter referred to as “the evaluated price” in this Article) on each business day by multiplying the assessment rate by the basic price of foreign currency. In such cases, the amount less than KRW 1 shall be discarded.

(3) The base price in paragraph (2) shall be the basic rate (referring to the basic rate of the day determined and publicized pursuant to the Foreign Exchange Transaction Regulation; but the basic rate of the previous day, if no basic rate of the day is available) specified in each of the following subparagraphs, and the calculation methods, calculation timing and application timing of assessment rates for foreign currencies noted in paragraph (2) shall be as stipulated in [§92(3)]. (Amended on December 31, 2015; September 19, 2017)

1. In the case of determining the customer margin during the regular trading session (including the time for receiving quotations for opening price by call auction), the basic rate noted in each of the following items: (Amended on May 29, 2025)

(a) In the case of US dollar and Chinese Yuan: the basic rate determined and announced on the calculation date; and

(b) In the case of foreign currencies other than US dollar and Chinese Yuan: the adjusted basic rate determined and announced on the day before the calculation date.

2. In the case of determining the customer margin after the market closing of the regular trading session and before the time for receiving quotations for opening price by call auction in the night trading session, the basic rate noted in each of the following items: (Amended on May 29, 2025)

(a) In the case of US dollar and Chinese Yuan: the basic rate determined and announced on the day after the calculation date; and

(b) In the case of foreign currencies other than US dollar and Chinese Yuan: the adjusted basic rate determined and announced on the calculation date.

3. In the case of determining the customer margin during the night trading session (including the time for receiving quotations for opening price by call auction): the basic rate noted in each of the following items: (Amended on May 29, 2025)

(a) In the case of US dollar and Chinese Yuan: the basic rate determined and announced on the trading day to which the point of time for calculation belongs; and (Amended on May 29, 2025)

(b) In the case of foreign currencies other than US dollar and Chinese Yuan: the adjusted basic rate determined and announced on the day immediately preceding trading day to which the point of time for calculation belongs. (Amended on May 29, 2025)

(4) Notwithstanding paragraph (3), if the exchange rate of a foreign currency rapidly fluctuates or there is a possibility of sudden change, a member may change the basic rates or apply the

assessment rates for the foreign currency after changing them within the assessment rates under paragraph (3). (Amended on September 19, 2017)

(5) The methods for publication of evaluated prices shall be as specified in [§92(5)].

§123 -2. Types and Appraisal of Foreign Securities, etc.

(1) Pursuant to [§127(4)] of the Regulation, the types of foreign securities shall be determined by members from among the foreign securities falling under any of each subparagraph of [§92-2(1)].

(2) Pursuant to [127-(4)] of the Regulation, the Exchange shall produce the price evaluated in Korean currency (referred to as the “evaluated price; the same hereinafter in this Article) according to the following calculation formula every trading day. In such cases, the amount less than KRW 1 shall be discarded:(Amended on November 3, 2014)

Base market price of foreign security × Basic rate × Assessment rate

(3) The base market price and assessment rate of foreign securities pursuant to paragraph (2) shall be as specified in [§92-2(3) & (5)].

(4) The basic rate pursuant to paragraph (2) shall be the basic exchange rate (referring to the basic rate of the day determined and publicized pursuant to the Foreign Exchange Transaction Regulation; but it shall be the basic rate of the previous day, if no basic rate of the day is available) noted in each of the following subparagraphs:(Amended on December 31, 2015)

1. In the case of calculating the customer margin during the regular trading session (including the time for receiving quotations for opening price by call auction), the basic rate noted in each of the following items: (Amended on May 29, 2025)

(a) In the case of US dollar and Chinese Yuan, the basic rate determined and published on the customer margin calculation date; and

(b) In the case of foreign currencies other than US dollar and Chinese Yuan, the adjusted basic rate determined and published on the day before the customer margin calculation date.

2. In the case of calculating the customer margin after the market closing of the regular trading session and before the time for receiving quotations for opening price by call auction in the night trading session, the basic rate noted in each of the following items: (Amended on May 29, 2025)

(a) In the case of US dollar and Chinese Yuan, the basic rate determined and published on the day after the customer margin calculation date; and

(b) In the case of foreign currencies other than US dollar and Chinese Yuan, the adjusted basic rate determined and published on the customer margin calculation date.

3. In the case of determining the customer margin during the night trading session (including the time for receiving quotations for opening price by call auction): the basic rate noted in each of the following items: (Amended on May 29, 2025)

(a) In the case of US dollar and Chinese Yuan: the basic rate determined and announced on the trading day to which the point of time for calculation belongs; and (Amended on May 29, 2025)

(b) In the case of foreign currencies other than US dollar and Chinese Yuan: the adjusted basic rate determined and announced on the day immediately preceding trading day to which the point of time for calculation belongs. (Amended on May 29, 2025)

(5) Notwithstanding the paragraphs (2) through (4), in case where the collateral value of foreign securities fluctuates suddenly or there is worry about such sudden change of collateral value or the redemption of foreign securities is restricted, the member may change the base market price of foreign securities or apply the assessment rate of foreign securities after adjusting it within the assessment rate pursuant to paragraph (3).

(6) In cases where the evaluated price is calculated according to paragraphs (2) and (5) subsequent to the deposit of foreign securities, the evaluated price shall be made public using the media such as the electronic delivery device operated by the member.

[December 18, 2012]

§124. Exceptions to Base Price of Substitute Securities

Pursuant to [§128(2)] of the Regulation, during the period from the time when the closing prices of substitute securities of the day has been published to the time when the Exchange publishes the substitute price (in the case of night trading, it shall be until the closing time of night trading on the relevant day), the member may apply the substitute price calculated by applying the base price noted in each of the following subparagraphs: (Amended on August 21, 2009; November 12, 2011; March 19, 2013; September 17, 2013; November 3, 2014; June 15, 2017; May 29, 2025)

1. In the case of calculating the customer margin before market closing: the closing price of the day before the calculation date or the base price of the calculation date. Provided that, in the case of a date when a stock has gone ex-dividend, etc., the price that the member determines for each case by taking into account the base price of the relevant listed stock, DR of foreign stock, ETFs and ETNs may be used. (Amended on May 29, 2025)

2. In the case of calculating the customer margin after market closing of the regular trading session and before the time for receiving quotations for opening price by call auction in the night trading session: the closing price on the calculation date or the base price on the following day of the calculation date. Provided that, in cases where the day after calculation date is the day when the stock has gone ex-dividend, etc., the price that the Exchange (in the case of determining an additional customer margin, it shall be the member) determines for each case by taking into account the base price of the relevant listed stock, DR of foreign stock, ETFs and ETNs may be used. (Amended on May 29, 2025)

3. In the case of determining the customer margin during the night trading session (including the time for receiving quotations for opening price by call auction): the closing price on the immediately preceding trading day and the base price on the relevant day. Provided that, in the case of trading day to which the calculation date belongs is the trading day when the stock has gone ex-dividend, etc., the price that the Exchange determines for each case by taking into account the base price of the relevant listed stocks, DRs of foreign stocks, ETFs and ETNs may be used. (Amended on May 29, 2025)

(Wholly amended on July 8, 2013)

§125 ~ §131 [Deleted on July 8, 2013]

Section 3. Deposit of Customer Margins

Sub-Section 1. Management of Qualified Institutional Investors

(Amended on November 3, 2014)

§132. Criteria for Selection of Qualified Institutional Investors and Request for Materials

(1) “Institutional investors who meet the requirements set forth in the Enforcement Rules” in [§133(1)] of the Regulation shall refer to the institutional investors meeting both the tangible requirements noted in subparagraph 1 and the asset size requirements noted in subparagraph 2. Provided that the asset size requirements may not apply to the case where the risk management unit of the member has concluded that the relevant institutional investor has adequate settlement fulfillment capability after having examined such factors as the capability to fulfill the settlement obligations, etc. (Amended on August 25, 2010; January 31, 2011; August 28, 2014; November 21, 2016; July 30, 2019; March 9, 2021)

1. The tangible requirements: Investors falling under any of the following items:

(a) Professional investors under Subparagraph 1 through 3 of Article 9(5) of the Act [excluding the investment advisory company under Article 8(5) of the Act];

(b) Professional investors under Article 10(3) [excluding Subparagraphs 5 through 8, 15 through 17 and 18(d)] of the Enforcement Decree of the Act;

(c) Overseas corporations or organizations, which have equivalent to those specified in item (b);

(d) [Deleted on May 29, 2025]

(e) From among the domestic and foreign corporations that hold the accounts for algorithmic trading pursuant [§156-3(2)] of the Regulation and fall under any of followings, those selected through the assessment by the risk management department of

members.

(i) Wholly-owned subsidiaries of a parent company when the relevant parent company satisfies any of the requirements noted in items (a) through (d).

(ii) Members of the foreign derivatives markets prescribed in Article 184 of the Enforcement Decree of the Act, market makers or a person who acquired the qualifications equivalent thereto.

(iii) A person who received credits from financial institutions with high credit ratings (limited to the case where a risk management agreement is entered into between the corresponding financial institution and the member).

(iv) A person who has KRW 2 billion or more of total deposits in his/her derivatives accounts on the day before the date of examination by member.

2. The asset size requirements: KRW 500 billion or more of total asset or KRW 1 trillion or more of total asset under management.

(2) Members shall obtain the documents proving the requirements noted in paragraph (1) (including the documents required at the time of special examination by the risk management unit of members and those required for the establishment of risk exposure limits) and keep them. In such cases, members shall not select the institutional investor who has failed to submit the documents as a qualified institutional investor. [January 31, 2011]

(3) In cases where a member was aware of the fact that a person who was selected as a qualified institutional investor falls under any of the following subparagraphs, the member shall exclude the relevant investor from the qualified institutional investors: [November 3, 2014] (Amended on October 30, 2019)

1. Where it fails to meet the requirements under paragraph (1). Provided that, the requirements under paragraph (1)(e)(iv) shall be reviewed every two (2) years;

2. Where it has been subject to the measures prescribed in Article 376(1)(c) of the Enforcement Decree of the Act for unfair trading provided in PART IV of the Act by the Securities and Futures Commission; and

3. Where it uses any domestic means of communications or communication technologies such as long-distance wireless communication networks that are recognized by the Exchange to undermine the stability and fairness of the market in consideration of the purpose and effect of using the means of communications, and the impact on the fair competition in accepting entrustment of orders, etc., with respect to the transmission and receipt of prices and transaction information, etc.

§132-2. Management of Risk Exposure Amount of Ex-post Customer Margin Account

(1) “Risk exposure amount calculated according to the method stipulated in the Enforcement Rules” in [§133(3)] of the Regulation shall refer to the customer margin determined by

applying [§133(1)3 and (1)4] *mutatis mutandis* as of the time when order was executed. (Amended on August 28, 2014; November 3, 2014)

(2) Pursuant to the proviso to [§133(4)] of the Regulation, in the case of having received the entrustment of orders for offsetting trade that lowers the risk exposure from the customer with the risk exposure amount exceeded the limit, the member may not turn down that entrustment of order. (Amended on July 8, 2013)

(3) In cases where the customer with the risk exposure amount exceeding the limit has reduced the risk exposure amount below the exposure limit or the case where the risk exposure amount does not exceed the limit as a result of increasing the total entrustment amount, it shall deem that the relevant customer does not to exceed the risk exposure limit from that time onward. (Amended on July 8, 2013)

(4) Pursuant to [§133(7)] of the Regulation, in the case of an ex-post customer margin account where additional deposit of intraday customer margin is required pursuant to [§137-2(1)] of the Regulation, the risk exposure limit of the regular trading session of the relevant trading day and the risk exposure limit of the night trading session of the following trading day shall be set at no more than twice the total amount of deposit (the sales amount of substitute securities for which the settlement deadline has not come may be included). Provided that, in the case of releasing additional deposit of intraday customer margin during trading session pursuant to [§137-2(3)] and [§151-3(1)] of the Regulation, the foregoing may not apply to the risk exposure limit of the night trading session.. [May 26, 2015] (Amended on May 29, 2025)

[January 31, 2011]

§132-3. Guidelines for Risk Management of Qualified Institutional Investors

(1) “Time period specified in the Enforcement Rules” in [§133(6)] of the Regulation shall refer to seven (7) business days from the date of putting the guidelines for risk management of qualified institutional investors into effect. (Amended on August 28, 2014; May 29, 2025)

(2) Pursuant to [§133(7)] of the Regulation, members shall establish the guidelines for risk management of qualified institutional investors, which includes the matters noted in each of the following subparagraphs: (Amended on July 26, 2011)

1. The selection criteria for qualified institutional investors, the materials required for selection and time of reexamination or re-selection;
2. The method for establishing guidelines for setting the risk exposure limits by phase according to the level of ability to perform the settlement, etc. per ex-post customer margin account, materials required at the time of determination and time of re-determination of risk exposure limits;
3. Measures to be taken when the risk exposure amount of ex-post customer margin account exceeds the risk exposure limit;
4. Deposit deadline of ex-post customer margin;

5. Measures to be taken against the qualified institutional investor who has failed to deposit the ex-post customer margin by the deposit deadline or to fulfill the settlement obligation;
6. In addition, the matters that deem to be necessary for the management of risks of qualified institutional investors; and
7. Matters that deem to be necessary for the management of the organization of responsible unit, work procedures and guidelines for risk management of the member.

[January 31, 2011]

Sub-Section 2. Deposit of Upfront Initial Customer Margin

[October 26, 2009]

§133. Deposit of Upfront Initial Customer Margin Rate

(1) In the case of receiving an entrustment of orders from the customer who is required to deposit upfront customer margin pursuant to [§134(2)] of the Regulation, each member shall collect the deposit of amount higher than the sum of the amounts noted in each of the following subparagraphs per derivatives account (hereinafter referred to as “the upfront initial customer margin”). Provided that this provision shall not be applicable in the case of receiving an entrustment of order for offsetting trade pursuant to the proviso to [§134(1)] of the Regulation:(Amended on August 28, 2014; May 26, 2015; October 30, 2019)

1. Customer margin for entrustment of new orders [referring to the sum of amounts noted in [§134(1)1(a) through 1(c)] of the Regulation for the entrustment quantity of new orders (referring to the orders that result in increase in the quantity of open interests per offer and bid of each contract, except for futures spread contracts). In such cases, the entrusted amount for a limit order for futures shall be the amount calculated using the price noted in subparagraph 1 under [§121] as the entrustment price; the same hereinafter];
2. Customer margin for entrustment of futures spread orders {referring to the sum of the amounts noted in subparagraph 1(d) of [§134(1)] of the Regulation for the entrustment quantities for futures spread trades; the same hereinafter}. Provided that, where the entrustment quantity of an intra-product futures spread trade would cancel out the open interests of delivery month contracts, or where the entrustment quantity of an inter-KTB futures spread trade would cancel out the open interests in all of the constituent contracts, the deposit of customer margins for entrustment of futures spread orders for the relevant entrustment quantity may be waived;
3. Upfront initial customer margin for net exposures (referring to the amount corresponding to the maximum net risk caused due to such positions as open interests, in case where the price/value or volatility of underlying asset varies by certain level after market closing on the previous day); and
4. The estimated settlement amount (referring to the sum of net futures loss during the session, net option purchase amount during the session, and settlement amount of the day).

Provided that, in the case of calculating the amount of upfront initial customer margin, the settlement amount of next day shall be excluded.

5. [Deleted on October 20, 2011]

(2) In cases when calculating the entrustment amount noted in [§134(1)1(b)] of the Regulation pursuant to paragraph (1)1, in case where there is an order regarded as an entrustment of new order because any one side of ask or bid order has been executed, the entrustment price per ask and bid of each contract for the unexecuted entrustment quantity shall be the entrustment quantity weighted average entrustment price. (Amended on August 28, 2014; November 3, 2014)

(3) “Price stipulated in the Enforcement Rules” in [§134(1)1(c)] of the Regulation shall be the expected change of option price pursuant to [Annex 19] for option contract for which new ask order has been entrusted. Provided that, in cases where the amount obtained by multiplying the expected change of option price by the multiplier is less than the minimum margin per contract pursuant to [Annex 19], it shall be the minimum margin per contract. (Amended on October 20, 2011; December 18, 2012; November 3, 2014)

(4) The customer margin rate under [§134(2)] of the Regulation shall be determined by the member while using the rate specified in [Annex 19] as the minimum rate. [February 17, 2012]

(5) The customer margin per futures spread order under [§134(2)] of the Regulation shall be determined by the member while setting the amount specified in [Annex 19-2] as the minimum amount:

(6) Notwithstanding paragraph (1), pursuant to [§3-3(2)], after the trading hours of regular sessions of a contract of which the last trading day has arrived, each member may or may not collect the customer margin for entrustment of new orders under subparagraph 1 of paragraph (1) and the customer margin for entrustment of futures spread orders under subparagraph 2 of the same Paragraph for the customer orders of the relevant contract. [December 26, 2019]

(7) Notwithstanding paragraph (5), when it deems it necessary for market management, the Exchange may change the minimum amount noted in paragraph (5). (Amended on August 28, 2014)

(Wholly amended on October 26, 2009)

§134. Upfront Customer Margin for Net Exposure

(1) The upfront customer margin for net exposure pursuant to [§133(1)3] shall be the amount calculated in accordance with [Annex 18]. In such cases, “margin for net exposures”, “margin rate”, “base price for margin calculation”, “margin interval value” and “theoretical price for margin calculation” noted in [Annex 18] shall be construed as “customer margin for net exposures”, “customer margin rate”, “base price for customer margin calculation”, “customer margin interval value” and “theoretical price for customer margin calculation”, respectively.

(2) The customer margin rate related to the calculation of upfront customer margin for net

exposure noted in paragraph (1) shall be determined by the member by setting the rate specified in [Annex 19] as the Minimum rate, and the customer margin per futures spread contract and the Minimum margin per contract shall be determined by the member by setting the amount specified in [Annex 19] as the lowest amount.

(3) The product group, price correlation ratio, base price for customer margin for option trade and theoretical option price for customer margin calculation that are related to the calculation of upfront customer margin for net exposure noted in paragraph (1) shall be determined according to [Annex 19].

(4) When it is deemed necessary for the market management, the Exchange may change the Minimum rate and Minimum amount noted in paragraph (2) and the product group and price correlation ratio noted in paragraph (3). In such cases, this provision shall also apply from the time of market closing immediately preceding the day when the change is put into effect. (Amended on May 29, 2025)

(Wholly amended on October 26, 2009)

§135. [Deleted on October 26, 2009]

§136. [Deleted on October 26, 2009]

§137. Estimated Settlement Amount

(1) The net futures loss during the session, the amount of net option purchase during the session, and the settlement amount of the day pursuant to [§133(1)4] shall be the amount falling under each of the following subparagraphs. (Amended on October 26, 2009; October 20, 2011; May 26, 2015; May 29, 2025)

1. The amount of net futures loss during the session: the sum of the amounts calculated by using the following calculation formula for each of the futures contracts executed during the relevant trading day (referred to as “futures trade executed on the relevant trading day” hereinafter in this Article):

$$(\text{Volume-weighted average purchase price} - \text{Volume-weighted average sales price}) \times \text{Smaller quantity between the executed quantity of ask quotes (including the quantity of open interests resulted from purchase as of the market closing time of the immediately preceding trading day) and executed quantity of bid quotes (including the quantity of open interests resulted from sales as of the market closing time of the immediately preceding trading day)} \times \text{Multiplier}$$
 (Amended on October, 2009; May 29, 2025)

2. The amount of net option purchase during the session: the amount determined by subtracting the sum of execution amounts of ask quotes from the sum of execution amounts of bid quotes of the options executed on the relevant trading day (Amended on May 29, 2025)

3. The settlement amount of the day: the settlement amount (excluding final settlement amount; the same hereinafter in this subparagraph) for which the delivery date arrives (in

the case of night time trading, it shall refer to the day which the regular trading hours of the relevant trading day belongs to is the delivery date), which is calculated by subtracting settlement amount which a customer receives from a member from settlement amount which the customer pays to the member before the delivery date. (Amended on May 29, 2025)

(2) The volume-weighted average purchase price and volume-weighted average sales price in paragraph (1) shall be the price determined in accordance with the calculation formula noted in following subparagraphs: (Amended on October 26, 2009; August 28, 2014)

1. Volume-weighted average purchase price:

(Quantity of open interests resulted from the purchase as of the market closing time of the immediately preceding trading day × Settlement price of the immediately preceding trading day × Multiplier + Sum of execution amounts of bid quotes of the futures trade executed on the relevant trading day) ÷ (Quantity of open interests resulted from the purchase as of the market closing time of the immediately preceding trading day × Multiplier + Sum of executed quantities of bid quotes of the futures trade executed on the relevant trading day x Multiplier) (Amended on May 29, 2025)

2. Volume-weighted average sales price:

(Quantity of open interests resulted from the sales as of the market closing time of the immediately preceding trading day × Settlement price of the immediately preceding trading day × Multiplier + Sum of execution amounts of ask quotes of the futures trade executed on the relevant trading day) ÷ (Quantity of open interests resulted from the sales as of the market closing time of the immediately preceding trading day × Multiplier + Sum of executed quantities of ask quotes of the futures trade executed on the relevant trading day × Multiplier) (Amended on May 29, 2025)

(3) Notwithstanding paragraphs (1) and (2), a member can calculate the amount of net futures loss during the session considering the contract of KOSPI200 futures trade and the contract of Mini KOSPI200 futures trade with same the last trading day as the same contract. In such cases, the executed quantity and the number of open interests shall be the sum of the figures obtained by multiplying the executed quantity and the number of open interests of contracts of KOSPI200 futures trade by five (5) and the executed quantity and the number of open interests of contracts of Mini KOSPI200 futures trade, and the contract multiplier shall be that of Mini KOSPI200 futures trades. [July 3, 2015]

§139. [Deleted on October 26, 2009]

§140. [Deleted on October 26, 2009]

§141. [Deleted on October 26, 2009]

§142. [Deleted on October 26, 2009]

§143. [Deleted on October 26, 2009]

§144. Amount of Customer Margin for Gross Exposure of Product Group, etc.

(1) Pursuant to [§134(2)] of the Regulation, notwithstanding [§134(1)], when it is deemed that there is a danger of customer failing to fulfill settlement obligation in view of the investment purpose and experience, asset and income level, credit standing and quantity of open interests held by the customer or the market conditions, the member may use the amount (only when the amount is larger than the amount pursuant to [§134(1)]) falling under any of the following subparagraphs as the upfront customer margin for net exposure: (Amended on October 26, 2009; July 8, 2013)

1. The amount determined by multiplying the customer margin extra rate by the amount pursuant to [§134(1)];
2. The larger amount between the amount noted in subparagraph 2(a) and the amount noted in subparagraph 2(b):

(a) The sum of the amounts calculated using the formula noted in subparagraphs 2(a)(i) through 2(a)(iv) for each contract:

(i) Quantity of open interests resulted from purchase of futures $\times$ Multiplier $\times$ Base price of underlying asset on the immediately preceding trading day $\times$ Customer margin rate per futures contract (Amended on May 29, 2025)

(ii) Quantity of open interests resulted from sale of put options $\times$ Multiplier $\times$ Base price of underlying asset on the immediately preceding trading day $\times$ Customer margin rate per options contract (Amended on May 29, 2025)

(iii) Quantity of open interests resulted from purchase of futures delivering underlying asset $\times$ Multiplier $\times$ Base price of underlying asset on the immediately preceding trading day $\times$ Customer margin rate per futures contract (Amended on May 29, 2025)

(iv) Final settlement quantity for futures purchase subject to customer margin before determination of final settlement price $\times$ Multiplier $\times$ Base price of underlying asset on the immediately preceding trading day $\times$ Customer margin rate per futures contract (Amended on May 29, 2025)

(b) The sum of the amounts calculated by formula noted in subparagraphs 2(b)(i) through 2b(iv) for each contract:

(i) Quantity of open interests resulted from sale of futures $\times$ Multiplier $\times$ Base price of underlying asset on the immediately preceding trading day $\times$ Customer margin rate per futures contract (Amended on May 29, 2025)

(ii) Quantity of open interests resulted from sale of call option $\times$ Multiplier $\times$ Base price of underlying asset on the immediately preceding trading day $\times$ Customer margin rate per options contract (Amended on May 29, 2025)

(iii) Final settlement quantity for sale of futures delivering underlying asset $\times$ Multiplier $\times$ Base price of underlying asset on the immediately preceding trading day

× Customer margin rate per futures contract (Amended on May 29, 2025)

(iv) Final settlement quantity for sale of futures subject to customer margin before determination of final settlement price × Multiplier × Base price of underlying asset on the immediately preceding trading day × Customer margin rate per futures contract (Amended on May 29, 2025)

(2) The customer margin extra rate noted in paragraph (1)1 shall be determined by the member, while settling 100/100 as the Minimum rate. (Amended on November 3, 2014)

(3) The customer margin rate per futures contract and the customer margin rate per options contract noted in paragraph (1)2 shall be determined by the member, while setting zero percentage as the Minimum rate. (Amended on November 3, 2014)

(4) When it is deemed necessary for the market management, the Exchange may change the Minimum rate noted in paragraphs (2) and (3). In such cases, this provision shall also apply from the time of immediately preceding market closing before the effective date of the change. (Amended on May 29, 2025)

§145. Upfront Cash Deposit Requirement

(1) Pursuant to [§134(2)] of the Regulation, from among the upfront initial margins under [§133], the amount exceeding the amount equivalent to the sum of the amounts noted in each of the following subparagraphs (hereinafter referred to as “upfront cash deposit requirement”) shall be collected in cash: (Amended on October 26, 2009; October 20, 2011; May 26, 2015)

1. Cash deposit requirement for new order (referring to the sum of the amounts noted in each of the following items for the quantity of new entrustment: the same hereinafter):

(a) In the case of futures trade, the amount calculated by the following calculation

Entrustment amount × Customer margin rate × Cash deposit requirement rate

(b) In the case of purchasing options, the entrustment amount; and

(c) In the case of selling options, zero amount. Provided that, in the case of a customer falling under [§144(1)], it may be the amount determined by multiplying the cash rate for option sale by the amount noted in [§134(1)1(c)] of the Regulation.

2. In the case of futures spread trade, zero;

3. Upfront cash deposit requirement for net exposure [referring to the sum of the amount noted in subparagraph 3(a) and the amount noted in subparagraph 3(b); the same hereinafter]:

(a) In the case of futures: the amount obtained by multiplying cash rate for futures by the smaller amount between the amount noted in subparagraph 3(a)(i) and the sum noted in subparagraph 3(a)(ii):

(i) Upfront customer margin for net exposure pursuant to [§134]. In such cases, it shall be calculated by setting the customer margin for delivery and customer margin before determination of final settlement price to be zero; and

(ii) The sum of the amounts calculated by applying, mutatis mutandis, [§134] for the quantity of open interests per futures contract.

(b) In the case of options trade: zero amounts. Provided that, in the case of a customer falling under [§144(1)], it may be the amount determined by multiplying the cash rate for option sale by the smaller amount between the amount noted in subparagraph 3(b)(i) and the sum noted in subparagraph 3(b)(ii):

(i) Upfront initial customer margin for net exposure pursuant to [§134]; and

(ii) Sum of the amounts calculated for the quantity of open interests resulted from sale of each options contract by applying, mutatis mutandis, [§134(1)1(c)] of the Regulation. In such cases, the “entrustment quantity for sale of options” shall be construed as “the quantity of open interests resulted from sale of options”.

4. Amount of net futures loss during the session pursuant to [§137(1)1] and net option purchase during the session pursuant to [§137(1)2]; and

5. Settlement amount of the day pursuant to [§137(1)3].

(2) The cash deposit requirement rate under paragraph (1)1(a) and the cash rate for futures shall be determined by the member within 100/100, while setting 50/100 as the Minimum rate. (Amended on October 20, 2011; February 17, 2012; November 3, 2014)

(3) The cash rate for option sale under subparagraphs 1(c) and 3(b) of paragraphs (1) shall be determined by the member, within 100/100, while setting zero percentage as the lowest rate. (Amended on November 3, 2014)

(4) Notwithstanding paragraph (1)3, for the customer falling under any of subparagraphs of [§144(1)] as the upfront customer margin for net exposure of product group, the member may deem the larger amount between the amount obtained by multiplying the cash rate of total exposure by the amount corresponding to any amount noted in each subparagraph of [§144(1)] and the amount pursuant to paragraph (1)3 as the upfront cash deposit requirement for net exposure. (Amended on October 26, 2009; October 20, 2011; November 3, 2014)

(5) Cash rate of total exposure noted in paragraph (4) shall be determined by the member within 100/100, while setting 50/100 as the lowest rate. (Amended on February 17, 2012; November 3, 2014)

(6) When it is deemed necessary for the market management, the Exchange may change the lowest rate noted in paragraphs (2), (3) and (5). In such cases, this provision shall also apply from the time of immediately preceding market closing before the effective date of the change. (Amended on May 29, 2025)

Sub-Section 3. Deposit of Ex-post Customer Margins

§146. Deposit of Ex-post Customer Margins

(1) The ex-post customer margin for net exposure (referring to the amount corresponding to the maximum net exposure that may result due to positions such as the open interests when the price/value or volatility of underlying asset varies by certain level after the market closing of the day) pursuant to [§135(3)] of the Regulation shall be the amount calculated as of the market closing time of the day by applying [§134 or §144] *mutatis mutandis*. (Amended on October 26, 2009; October 20, 2011)

(2) Pursuant to [§135(3)] of the Regulation, for an ex-post customer margin regular account, the member shall collect the amount (hereinafter referred to as “the amount of ex-post customer margin”), which is higher than the amount determined by adding the ex-post customer margin for net exposure to the settlement amount of the next day [of the settlement amounts before the delivery date arrives after market closing (excluding final settlement amount: the same hereinafter in this Paragraph), it refers to the amount calculated by subtracting the settlement amount which a customer receives from a member from the settlement amount which the customer pays to the member: the same hereinafter.], as the ex-post customer margin by the deposit deadline of the ex-post customer margin pursuant to [§132(4)] of the Regulation. (Amended on October 26, 2009; January 31, 2011; October 20, 2011; July 8, 2013; May 26, 2015)

(3) Pursuant to [§135(2) & (3)] of the Regulation, for the ex-post customer margin discount account, the member shall collect the amount of ex-post customer margin, which is higher than the amount determined through *mutatis mutandis* application of paragraph (2) by the deposit deadline of the ex-post customer margin pursuant to [§133(4)] of the Regulation as the ex-post customer margin. In such cases, the customer margin for options premium, customer margin for price volatility and customer margin for futures spread noted in [Annex 18] shall be the amounts determined by multiplying each amount calculated in accordance with paragraph (1) by the customer margin discount rate for arbitrating and hedging. (Amended on October 26, 2009; January 31, 2011; July 8, 2013)

(4) The customer margin discount rate for arbitrating and hedging shall be determined by the member within 100/100, while setting 80/100 as the lowest rate. (Amended on November 3, 2014)

(5) When it is deemed necessary for the market management, the Exchange may change the lowest rate noted in paragraph (4).

§147. Scope of Arbitrage and Hedge eligible for Customer Margin Discount

(1) The arbitrating pursuant to [§135(3)] of the Regulation shall be the trade that satisfies the requirements specified in subparagraphs 1 and 3 and the hedging pursuant to [§135(3)] of the Regulation shall be the trade that satisfies the requirement specified in subparagraphs 2 and 3: (Amended on July 26, 2011; August 28, 2014; July 30, 2019)

1. In the case of arbitrage, it shall be the trade falling under any of the following items:

(a) Of the index arbitrage pursuant to [§49(1)] (in the case of synthetic index futures, it shall be limited only to the put index options or call index options with identical underlying asset, last trading day and exercise price, respectively; the same hereinafter in this Article), the orders for the trading of basket of stocks, which is conducted in connection with the index arbitrage, and the relevant index arbitrage are submitted concurrently or immediately one after the other; and

(b) Of the single stock arbitrage pursuant to [§49(2)] (in the case of synthetic single stock futures, it shall be limited to the put stock options or call stock options with identical underlying asset, last trading day and exercise price, respectively; the same hereinafter in this Article), the orders for the single stock arbitrage and trading of underlying asset linked with the relevant single stock arbitrage are submitted concurrently or immediately one after the other.

2. In the case of hedging, it shall be the trade that falls under each of the following items:

(a) Of the index hedging pursuant to [§49(3)] (limited to only the selling of index futures and the synthetic index futures for hedging of basket of stocks: the same hereinafter in this Article); and

(b) Of the stock hedging pursuant to [§49(4)] (limited to only the selling of index futures and the synthetic index futures for hedging of underlying stocks: the same hereinafter in this Article)

3. It shall be the arbitrage or hedge through a member who has opened the stock linked account (referring to the account linked to stocks for the purpose of conducting the arbitrage noted in subparagraph 1 and hedging noted in subparagraph 2: the same hereinafter).

(2) In cases where a member acknowledges the arbitrage or hedge pursuant to paragraph (1), the member shall make a rational decision by taking into consideration the relationship between the price of underlying asset and the price of derivatives. (Amended on August 28, 2014)

(3) The member shall maintain the records of the facts such as the extent and basis of acknowledging the arbitrage or hedge pursuant to paragraph (2); obtain the documents proving such facts from the qualified institutional investors by the time of the relevant trading day that the member determined and verify and keep the documents; and submit a copy of such documents to the Exchange without delay. In such cases, if the details of the documentary proof are deemed to be inadequate, the member and Exchange may request the relevant institutional investor to supplement the relevant documentary proof. (Amended on May 29, 2025)

(4) The member may take action falling under any of the following subparagraphs against the qualified institutional investor who has failed to submit the documentary proof pursuant to paragraph (3):

1. To request to deposit the amount of ex-post customer margin applicable to the ex-post customer margin regular account pursuant to [§146(2)];

2. To conduct the offsetting trade for the open interests held by the qualified institutional

investor;

3. To sell the substitute securities, foreign currency or foreign securities deposited as the ex-post customer margin; and

4. When it is after the market closing, an action falling under any of the following items:

(a) To change the ex-post customer margin discount account to the ex-post customer margin regular account or upfront customer margin account; and

(b) To transfer the open interests of qualified institutional investor to the ex-post customer margin regular account or upfront customer margin account.

(5) “Synthetic index futures” in paragraph (1) shall refer to the trade noted in any of the following subparagraphs: [January 31, 2011]

1. A trade where a put index option is purchased at the same time or immediately after/before selling a call index option; and

2. A trade where a put index option is sold at the same time or immediately before/after buying a call index option.

(6) “Synthetic single stock futures” in paragraph (1) shall refer to the trade noted in any of the following subparagraphs: [January 31, 2011]

1. A trade where a put single stock option is purchased at the same time or immediately after/before selling a call single stock option; and

2. A trade where a put single stock option is sold at the same time or immediately before/after purchasing a call single stock option.

§148. Ex-post Cash Deposit Requirement

(1) Pursuant to [§135(3)] of the Regulation, the member shall collect, of the amount of ex-post customer margin for ex-post customer margin regular account pursuant to [§146(2)], in cash, the amount (hereinafter referred to as “the amount of ex-post cash deposit requirement”) higher than the amount determined as of the market closing time by adding the amount resulted from applying [§145(1)3 and §145(2)] *mutatis mutandis* after the market closing on the day, to the settlement amount of the next day. Provided that, for the ex-post margin account of qualified institutional investor, the minimum cash rate for futures may be 0/100 (zero percent). (Amended on October 26, 2009; April 19, 2010; October 20, 2011)

(2) Pursuant to [§135(3)] of the Regulation, the member shall collect, of the amount of ex-post customer margin for ex-post customer margin discount account pursuant to [§146(3)], the amount higher than the amount of ex-post cash deposit requirement determined by applying paragraph (1) *mutatis mutandis* as the ex-post cash deposit requirement. In such cases, the customer margin for option premium, customer margin for price volatility and customer margin for futures spread noted in [Annex 18] shall be the amounts determined by multiplying each of

the amount calculated according to paragraph (1) by the customer margin discount rate for arbitraging and hedging. (Amended on October 26, 2009; October 20, 2011)

Section 4. Payment, Appropriation and Additional Deposit of Customer Margins

§149. Repayment and Appropriation of Customer Margins and Restriction Thereabout

(1) Pursuant to [§136(2)] of the Regulation, the member may reimburse the cash, substitute securities, foreign currency or foreign securities falling under any of the following subparagraphs to the customer or appropriate them for the customer margin to be collected from the customer. [Proviso on October 26, 2009] (Amended on October 20, 2011; December 18, 2012; May 29, 2025)

1. The cash, substitute securities, foreign currency or foreign securities collected as the basic deposit. Provided that, in the case of paying back, it shall be the amount equivalent to the amount of cash that exceeds the amount of basic deposit and the amount of substitute securities, foreign currency or foreign securities that exceeds the amount of basic deposit.

2. In cases where the sum of the total deposit amount and the sales amount of substitute securities before the settlement deadline exceeds the amount noted in each of the following items (as the case of paying back, if the relevant amount is less than the amount of basic deposit, it shall be the relevant amount of basic deposit), the amount of substitute securities, foreign currency or foreign securities that is equivalent to the relevant excess amount (hereinafter referred to as “the excess of total deposit”). Provided that, in the case of paying back, the total deposit amount shall be used as the limit.

(a) For night trading session or regular trading session (including the time for receiving quotations for opening price by call auction in each trading session; the same hereinafter in this Article): the amount falling under the followings. Provided that, item (b) shall be applied to the night trading hours of a customer for whom the member acknowledges that it is not appropriate to apply the main sentence of this item, such as for customers participating only in the regular trading session. (Amended on May 29, 2025)

(i) In the case of upfront customer margin account: the amount of upfront customer margin under [§133]; and

(ii) In the case of ex-post customer margin account: the amount of customer margin comparable with the customer margin applicable to the upfront customer margin account, which is determined by applying [§133] *mutatis mutandis*. In such cases, for the ex-post customer margin discount account, the customer margin for option premium, customer margin for price volatility and customer margin for futures spread noted in [Annex 18] shall be the amounts determined by multiplying each of such amounts by the customer margin discount rate for arbitraging and hedging.

(b) For time other than item (a): the amount falling under the followings (in cases where the amount is less than the amount of maintenance customer margin, it shall be the amount of maintenance customer margin): (Amended on May 29, 2025)

(i) In the case of upfront customer margin account: the amount of customer margin comparable with the customer margin applicable to the ex-post customer margin regular account determined by applying [§146(2)] *mutatis mutandis*; and

(ii) In the case of ex-post customer margin account: the amount of ex-post customer margin under [§146(2)] or [§146(3)].

3. In cases where the sum of the cash deposit and the sales amount of substitute securities (in the case of the regular trading session, limited to the sales amount for which the delivery day has arrived and the sales amount of the day before the delivery date) before the settlement deadline exceeds the amount noted in each of the following items, the amount in cash, which is the lesser of such excess amount (hereinafter referred to as “the excess of cash deposit”) and the excess of total deposit. Provided that, in the case of paying back, the cash deposit amount shall be used as the limit. (Amended on May 29, 2025)

(a) For night trading session or regular trading session: the amount falling under the followings. Provided that item (b) shall be applied to the night trading hours of a customer for whom the member acknowledges that it is not appropriate to apply the main sentence of this item, such as participating only in the regular trading session. (Amended on May 29, 2025)

(i) In the case of upfront customer margin account: the amount of upfront cash deposit requirement under [§145]; and

(ii) In the case of ex-post customer margin account: the amount of cash deposit requirement comparable with the upfront initial customer margin applicable to the upfront initial customer margin account determined by applying [§145] *mutatis mutandis* thereto. In such cases, for the ex-post customer margin discount account, the customer margin for option premium, customer margin for price volatility and customer margin for futures spread noted in [Annex 18] shall be the amounts determined by multiplying each of such amounts by the customer margin discount rate for arbitraging and hedging.

(b) For time other than item (a): the amount falling under the followings: (Amended on May 29, 2025)

(i) In the case of upfront customer margin account: the amount of cash deposit requirement comparable with the customer margin applicable to the ex-post customer margin regular account determined by applying [§148(1)] *mutatis mutandis*; and

(ii) In the case of ex-post customer margin account: the amount of ex-post cash deposit requirement under [§148(1)] or [§148(2)].

4. In the case of converting the excess of cash deposit into the substitute securities: foreign currency or foreign securities, the cash equivalent to the relevant substitute securities, foreign currency or foreign securities.

5. In the case of converting substitute securities: foreign currency and foreign securities

deposited as the basic deposit or customer margin into the cash or different issue of substitute securities, different kind of foreign currency or different issue of foreign securities, the relevant cash amount or the amount of substitute securities, foreign currency and foreign securities equivalent to the relevant different issue of substitute securities, different kind of foreign currency and different issue of foreign securities.

(2) Notwithstanding paragraphs (1)1 and (1)2, when, as a case where there is no customer margin for entrustment of new orders, it falls under any of the following cases, the member may pay back the amount of basic deposit (it shall be the cash or substitute securities/foreign currency/foreign securities equivalent to the amount after deducting such amounts as the settlement amount that the customer owes the member) from the time when such cases have occurred. (Amended on October 26, 2009; December 18, 2012; May 29, 2025)

1. Where the entire quantity of open interests resulted from derivatives trading have been closed out as a result of offsetting trade, final settlement, report/allotment of exercise or expiration of option; and

2. Where, when there are only the open interests resulted from purchase of options, the quote has been submitted for an entrustment of ask order received at the lower limit price pursuant to [§59(1)] for the purpose of closing out the entire quantity of the relevant open interests.

(3) In cases where an entrustment of order is accepted from the customer from whom the basic deposit has been paid back pursuant to paragraph (2), the member shall collect the basic deposit in advance. Provided that this provision shall not apply to the case of accepting an entrustment for the offsetting trade at the lower limit price pursuant to [§59(1)] for the purpose of closing out the entire quantity of open interests resulted from the purchase of options after the trading day following the trading day on which the quote pursuant to paragraph (2)2 has been submitted. (Amended on November 3, 2014; May 29, 2025)

§150. Shortfall in Total Deposit

(1) Pursuant to [§137(6)] of the Regulation, in case where the amount obtained at the market closing time by aggregating the total deposit of a customer subject to upfront initial margin and the sales amount of substitute securities before the settlement deadline is less than the amount of maintenance customer margin, the member shall collect additionally the amount, which is higher than the amount obtained by subtracting the sum of the total deposit and the amount of substitute securities sold before the settlement deadline from the amount equivalent to the customer margin applied to the ex-post margin regular account, which is determined by applying [§146(2)] *mutatis mutandis* thereto (if the amount is less than the amount of maintenance customer margin, it shall be the amount of maintenance customer margin). (Amended on October 26, 2009; July 26, 2011; July 8, 2013; August 20, 2014)

1. [Deleted on July 8, 2013]

2. [Deleted on July 8, 2013]

(2) Notwithstanding paragraph (1), in the case of falling under any of following subparagraphs, it shall be deemed that the customer margin has additionally been deposited: (Amended on August 20, 2014; May 26, 2015; November 10, 2017)

1. Where the customer required to additionally deposit the customer margin requirement satisfies the deposit level equivalent to the upfront customer margin requirement pursuant to [§133] by conducting an offsetting trade or selling of substitute securities before the deadline for additional deposit; and
 2. Where, as the result of calculation of total deposit by applying [§78-4(4)] *mutatis mutandis* pursuant to [§78-4(5)], the total deposit amount increases to satisfy the amount of maintenance customer margin based on the time of the market closing of the trading day on which transaction errors occurred. (Amended on May 29, 2025)
 3. Where, when a member calculates upfront initial customer margin pursuant to [§151-4(2)], a customer who is required to deposit the additional customer margin satisfies the level of the additional deposit amount pursuant to the paragraph (1), through additional deposit, offsetting trade, or selling of substitute securities before the deadline for additional deposit.
- (3) The amount of maintenance customer margin noted in paragraph (1) shall be the amount determined by applying [§146(2)] *mutatis mutandis* thereto. In such cases, “the margin rate” and “margin interval value” noted in [Annex 18] shall deem to be “maintenance margin rate” and “maintenance margin interval value”, respectively. (Amended on October 26, 2009; July 8, 2013)
1. [Deleted on July 8, 2013]
 2. [Deleted on July 8, 2013]
- (4) The maintenance customer margin rate noted in paragraph (3) that is related to the calculation of maintenance customer margin shall be determined by the member while setting rate noted in [Annex 19] as the lowest rate: (Amended on October 26, 2009; August 28, 2014)
- (5) The margin for futures spread per order that is related to the calculation of maintenance customer margin noted in paragraph (3) shall be determined by the member, while setting the amount noted in [Annex 19] as the minimum amount. (Amended on October 26, 2009; August 28, 2014)
- (6) Notwithstanding paragraph (3), in the case of customer falling under [§144(1)], the member may use the higher amount between the amount determined by multiplying the amount calculated at the market closing time of the day by applying [§144] *mutatis mutandis* by the maintenance margin rate for total exposure and the amount pursuant to paragraph (3) as the maintenance customer margin. (Amended on October 26, 2009; August 28, 2014)
- (7) The maintenance margin rate for total exposure in paragraph (6) shall be determined by the member within 3/3, while setting 2/3 as the minimum rate.
- (8) Notwithstanding paragraphs (4), (5) and (7), when it deems necessary for the market management, the Exchange may change the maintenance customer margin rate, the minimum rate of maintenance margin rate for total exposure and the minimum amount of maintenance customer margin per futures spread order. In such cases, this provision shall also apply from the time of market closing immediately prior to the effective date of the change. (Amended on May 29, 2025)

§151. Shortfall in Cash Deposit

(1) Pursuant to [§137(6)] of the Regulation, in cases where the amount determined at the market closing time by aggregating the cash deposit of customer subject to upfront initial margin and the sales amount of substitute securities before the settlement deadline is less than the amount of cash maintenance deposit requirement, the member shall additionally collect the amount, which is higher than the amount determined by subtracting the sum of the cash deposit of customer and the sales amount of substitute securities before the settlement deadline from the amount equivalent to cash deposit requirement applicable to the ex-post customer margin regular account, which is determined by applying [§148(1)] *mutatis mutandis*, as the cash deposit requirement before the deadline for additional deposit. (Amended on October 26, 2009; July 26, 2011; October 20, 2011; July 8, 2013; August 20, 2014)

1. [Deleted on July 8, 2013]
2. [Deleted on July 8, 2013]

(2) Notwithstanding paragraph (1), in the case of falling under any of following subparagraphs, it shall be deemed that the cash deposit requirement has additionally been deposited: (Amended on August 20, 2014; May 26, 2015; November 10, 2017)

1. Where the customer required to additionally deposit the cash deposit requirement satisfies the deposit level equivalent to the upfront cash deposit requirement under [§145] by conducting an offsetting trade or selling of substitute securities before the deadline for additional deposit; and
2. Where, as a result of calculation of cash deposit by applying [§78-4(4)] *mutatis mutandis* pursuant to [§78-4(5)], the cash deposit increases to satisfy the cash maintenance deposit requirement based on the time of market closing of the trading day on which transaction errors occurred. (Amended on May 29, 2025)
3. Case where, when a member calculates upfront cash deposit requirement pursuant to [§151-4(4)], a customer who is required to deposit the additional cash deposit requirement satisfies the level of the cash deposit requirement under paragraph (1), through additional deposit, offsetting trade, or selling of substitute securities before the deadline for additional deposit.

(3) The amount of cash maintenance deposit requirement noted in paragraph (1) shall be the amount determined by following calculation formula: (Amended on October 20, 2011; July 8, 2013; November 3, 2014)

Cash deposit requirement for net exposure of the day, which is calculated pursuant to [§148(1)]
×Cash maintenance deposit requirement rate + Settlement amount of the next day.

(4) The cash maintenance deposit requirement rate noted in paragraph (3) shall be 0/100 (zero). (Amended on October 20, 2011; August 20, 2014; Amended on November 3, 2014)

(5) Notwithstanding paragraph (4), if it is deemed necessary for the market management, the

Exchange may change the cash maintenance deposit requirement rate. In such cases, this provision shall apply from the time of market closing immediately prior to the effective date of the change. (Amended on October 20, 2011; August 20, 2014; May 29, 2025)

§151-2. Additional Deposit of Customer Margin during Market Hours

(1) “Cases specified in the Enforcement Rules” in [§137-2(1)] of the Regulation shall refer to the cases where KOSPI 200 index changes 80/100 or more of the maintenance customer margin rate of KOSPI 200 Futures specified in [Annex 19] against the final KOSPI 200 index of the previous day at the time of calculating intraday customer margin. In such cases, the time of calculating intraday customer margin shall refer to the time satisfying the requirements noted in the former part of this Paragraph first among the point of one (1) minute and each point of time of every one (1) hour after the start of trading hours of the KOSPI Market. (Amended on July 18, 2023; November 1, 2024)

(2) Pursuant to [§137-2(4)] of the Regulation, in cases where it falls under paragraph (1) and the total amount of deposit of a customer (including the sales amount of substitute securities for which the settlement deadline has not arrived; the same in this Article and §151-3) is less than the intraday maintenance customer margin at the time of calculating intraday customer margin (referring to the time when the member calculates customer margin by using margin calculation variables that the Exchange provides at the time of calculating intraday customer margin; the same hereinafter), the member shall collect additionally the amount calculated by subtracting the total amount of customer deposit from the intraday maintenance customer margin or more from the customer.

(3) The amount of intraday maintenance customer margin, stated in paragraph (2), shall not be less than the total of each of the following amounts obtained at the time of calculating customer margin:

1. The upfront customer margin for net exposures calculated by applying [§134(1)] or [§144] *mutatis mutandis*. In such cases, “margin rate”, “base price for margin”, “margin interval value”, “theoretical margin price”, “base price of underlying asset”, and “delta based on the closing price” shall be construed as the “maintenance customer margin rate”, “base price for customer margin”, “maintenance customer margin interval value”, “theoretical customer margin price”, “underlying asset price at the time of calculating customer margin”, and “delta at the time of calculating customer margin”, respectively, in [Annex 18], and “base price of underlying asset on the immediately preceding trading day” and “market closing time of the day” shall be construed as the “underlying asset price at the time of calculating intraday customer margin” and “time of calculating intraday customer margin”, respectively, in [§144]. (Amended on May 29, 2025)

2. The settlement amount of the day shall be pursuant to [§137(1)3].

3. The settlement amount of the next day: the sum of the amounts of the following items:

(a) Intraday settlement difference for the day’s trade (referring to the amount calculated by multiplying the difference between the execution price of futures trade of the trading day to which the calculation time of intraday customer margin belongs and intraday

settlement price to the execution quantity and multiplier.) (Amended on May 29, 2025)

(b) Intraday settlement difference for previous day's open interests (referring to the amount calculated by multiplying the difference between the settlement price of futures trade of the immediately preceding trading day and intraday settlement price to the quantity of open interests as of the market closing time of the immediately preceding trading day and multiplier.); and (Amended on May 29, 2025)

(c) Net option purchase amount during the session pursuant to [§137(1)2].

(4) The amount of intraday customer margin in paragraph (2) shall be at least the amount calculated by applying the paragraph (3) at the time of calculating the amount of intraday customer margin. In such cases, "maintenance customer margin rate" and "maintenance customer margin interval value" shall be construed as the "customer margin rate" and "customer margin interval value", respectively.

(5) The intraday settlement prices noted in items (a) and (b) of paragraph (3)3 shall be the prices calculated by applying [§102-3(3)] mutatis mutandis. In such cases, the "time of calculating intraday member margin" in [§102-3(3)] shall be construed as the "time of calculating intraday customer margin".

(6) Pursuant to [§137-2(4)] of the Regulation, the deadline for the additional deposit shall be the time decided by a member on the day of the occurrence of shortfall. Provided that, it may be a time that is set by the member within the starting time of the quotation receiving hours for the regular trading session of the next trading day considering the matters to be identified by a customer, etc. (Amended on May 29, 2025)

[May 26, 2015]

[§151-3. Release of Additional Deposit of Intraday Customer Margin](#)

(1) "As specified by the Enforcement Rules" in [§137-2(3)] of the Regulation shall refer to the case falling under any of the following subparagraphs;

1. Before the market closing, cases falling under any of the following items:

(a) Where the total amount of deposit is not less than the amount of upfront initial customer margin pursuant to [§151-4(2)] (excluding the amount of [§151-4(2)1]);

(b) Where the total amount of deposit is not less than intraday maintenance customer margin calculated by using margin calculation variable that the Exchange provides after the time of calculating intraday customer margin; or

(c) Where the amount of intraday shortfall in total deposit (referring to the amount obtained by subtracting the amount of deposit from the amount of intraday customer margin: the same hereinafter in this article) calculated by using margin calculation variable at the market closing time of the previous trading day after the time of calculating intraday customer margin decreases no less than the amount of intraday shortfall in total

deposit amount at the time of calculating intraday customer margin.

2. After the market closing, cases falling under any of the following items:

(a) Where the total amount of deposit is not less than the amount of upfront initial customer margin (excluding the amount noted in [§151-4(2)1]) pursuant to [§151-4(2)]; (Amended on May 29, 2025)

(b) Where a customer subject to upfront initial customer margin does not fall under [§150(1)] or deposits customer margin additionally pursuant to [§150(1) or (2)];

(c) Where a customer subject to ex-post customer margin does not fall under [§146(2)] or deposits ex-post customer margin pursuant to [§146(2)]; or

(d) Where a customer makes up for the relevant shortfall amount by additional deposit, offsetting trade, or selling of substitute securities.. (Amended on May 29, 2025)

(2) A member shall incorporate standards relating to the release of additional deposit during the session pursuant to the paragraph (1) into its internal control standards, etc.

[May 26, 2015]

§151-4. Exceptions of Calculation Method of Margin, etc. in Additional Deposit of Intraday Customer Margins

(1) Pursuant to [§137-2(4)] of the Regulation, for the trading day falling under [§151-1(1)], a member may calculate risk exposure amount pursuant to [§132-2], upfront initial customer margin pursuant to [§133], and the amount of upfront cash deposit requirement pursuant to [§145], by using margin calculation variable at the time of calculating intraday customer margin.

(2) Upfront initial customer margin shall be not less than the sum of amounts of the following subparagraphs

1. Customer margin for entrustment of new orders calculated by applying [§133(1)1] *mutatis mutandis* and customer margin for entrustment of futures spread order applying [§133(1)2] *mutatis mutandis*. In such cases, “base price of underlying asset on the immediately preceding trading day” shall be construed as “underlying asset price at the time of calculating intraday customer margin.” (Amended on May 29, 2025)

2. The amount of net futures loss during the session calculated by applying [§137(1)1] *mutatis mutandis*. In such cases, “futures trade executed on the relevant trading day”, “market closing time of the immediately preceding trading day”, and “settlement price of the immediately preceding trading day” shall be construed as “futures trade executed after passing time of calculating intraday customer margin”, “time of calculating intraday customer margin”, and “intraday settlement price”, respectively in [§137(1)1]. (Amended on May 29, 2025)

3. The amount of intraday customer margin pursuant to [§151-2(4)]

(3) Risk exposure amount pursuant to the paragraph (1) shall refer to customer margin calculated at the time of transaction execution applying the subparagraph 2 and 3 of the paragraph (2) *mutatis mutandis*.

(4) The upfront cash deposit requirement under paragraph (1) shall be the amount calculated by applying [§145] *mutatis mutandis*. In such cases, “upfront initial customer margin pursuant to [§133]”, “base price of underlying asset on the immediately preceding trading day”, “upfront customer margin for net exposures pursuant to [§134]”, “amount calculated by applying [§134] *mutatis mutandis*”, and “net futures loss during the session” in [§145] shall be construed as “upfront initial customer margin amount pursuant to [§151-4(2)]”, “underlying asset price at the time of calculating intraday customer margin”, “upfront customer margin for net exposures calculated by applying [§151-2(4)] *mutatis mutandis*”, “amount calculated by applying [§151-2(4)] *mutatis mutandis*”, and “sum of futures loss during the session pursuant to [§151-4(2)2], intraday settlement difference for the day’s trade pursuant to [§151-2(3)3(a)], and intraday settlement difference for previous day’s open interests pursuant to [§151-2(3)3(b)]”, respectively. (Amended on May 29, 2025)

(5) Pursuant to [§137-2(4)] of the Regulation, in cases where a member pays customer margin before the market closing of the trading day falling under [§151-2(1)], the member shall calculate the amount payable by using margin calculation variable at the time of calculating intraday customer margin applying [§149(1)2(a)] and [§149(1)3(a)] *mutatis mutandis*. In such cases, “upfront initial customer margin under [§133]”, “applying [§133] *mutatis mutandis*”, “amount of upfront cash deposit requirement under [§145]”, and “applying [§145] *mutatis mutandis*” shall be construed as “upfront initial customer margin under [§151-4(2)]”, “applying [§151-4(2)] *mutatis mutandis*”, “amount of upfront cash deposit requirement under [§151-4(4)]”, and “applying [§151-4(4)] *mutatis mutandis*”, respectively, in [§149(1)2(a)] and [§149(1)3(a)], but a member may apply margin calculation variable of the previous trading day to the amount under [§151-4(2)1], of upfront initial customer margin calculated by applying [§151-4(2)] *mutatis mutandis*.

[May 26, 2015]

§152. Measures against Customers’ Non-fulfillment of Deposit Obligations, etc.

(1) Pursuant to [§138(1)] of the Regulation, when intending to conduct offsetting trade against the open interests of a customer, a member shall submit a limit quotation (including market-to-limit-on-the-close quotation in the case of trade or contracts applied real-time price limit pursuant to [§60-3]; the same hereinafter in this Article) at the price falling under each of the following subparagraphs after the deposit deadline (referring to the deposit deadline under [§132] of the Regulation, the deadline of additional deposit of daily customer margin under [§137] of the Regulation, or the deadline of additional intraday deposit under [§137-2] of the Regulation) of customer margin (excluding the night trading hours). Provided that, in the case of USD FLEX futures trades, the offsetting trade shall be carried out through the negotiated FLEX trade: [Proviso on August 21, 2009] (Amended on October 26, 2009; November 3, 2014; May 26, 2015; September 20, 2017; October 30, 2019; May 29, 2025)

1. In the case of ask quotation, the price of any of the followings:

(a) The most recent execution price and the nine (9) prices resulting from sequentially subtracting the quotation price units from the most recent execution price; and

(b) The price of the best bid quotation (if there is no price of the best bid quotation, it shall be the price of the best ask quotation) and nine (9) prices resulting from sequentially subtracting the quotation price units from the price of the best bid quotation.

2. In the case of bid quotation, the price of any of the followings:

(a) The most recent execution price and the nine (9) prices resulting from sequentially adding the quotation price units to the most recent execution price; or

(b) The price of the best ask quotation (if there is no price of the best ask quotation, it shall be the price of the best bid quotation) and nine (9) prices resulting from sequentially adding the quotation price units to the price of the best ask quotation.

(2) Notwithstanding paragraph (1), in the case of falling under any of the following subparagraphs, the quotation determined by the corresponding subparagraph may be submitted: (Amended on November 3, 2014; October 30, 2019; December 21, 2022)

1. In the case of periodic call auction session and when there is no quotation during continuous auction, a limit quotation at the price other than the price noted in each subparagraph of paragraph (1); and

2. In the case of trade or contracts applied real-time price limit pursuant to [§60-3] and when the customer consents or requests, a market quotation.

(3) [Deleted on November 3, 2014]

CHAPTER 3. SETTLEMENT BETWEEN MEMBER AND CUSTOMER

§153. [Deleted on October 20, 2010]

§154. Settlement of Currency Futures by Physical Delivery

(1) Pursuant to [§144(3)] of the Regulation, a member shall notify the customer the details of physical delivery, including the final quantity and amount of currency of currency futures to be delivered during the period from the market closing time on the last trading day to the time in that day that is determined by the member. (Amended on July 8, 2013)

(2) Members and customers shall deliver and receive the currency and the final settlement amount, according to the final settlement of currency futures, by the deadline for physical delivery. (Amended on July 8, 2013)

§155. [Deleted on October 28, 2015]

§156. [Deleted on October 28, 2015]

§157. Deadline for Reporting Option Exercise by Customer

The deadline for reporting the option exercise by customers pursuant to [§147(1)] of the Regulation shall be the time determined by the member, which is within twenty (20) minutes from the market closing time on the option exercise day. (Amended on August 21, 2009; April 6, 2026)

§158. Physical Delivery Deadline

“Time set by the Enforcement Rules” in [§149(4)3] of the Regulation, shall be the time before 12:00 noon of the final settlement day of currency futures, which is determined by the member. (Amended on October 28, 2015)

§159. Measures against Customers’ Failure to fulfill Settlement Obligations, etc.

Pursuant to [§152(1)] of the Regulation, the provisions of [§152] shall apply *mutatis mutandis* to the case where the member intends to conduct offsetting trade against the open interests of customer.

PART VI. MARKET MANAGEMENT

§160. Criteria for Designation as Low Liquidity Products

(1) Pursuant to [§153(3)] of the Regulation, the products of which the average quantity of contracts executed during the previous three (3) months (includes the night trading hours immediately preceding the first regular trading hours during the relevant period, but excludes the night trading hours starting on the last business day; the same hereinafter in this Article) based on the first business day of each month is less than the quantity (hereinafter referred to as “the base quantity for liquidity management”) noted in each of the following subparagraphs shall be designated as low liquidity products. Provided that the product for which less than one (1) year has passed since the month following the month to which its listing date belongs (if the listing date is the first business day of the month, it shall be the month to which the listing date belongs) and the USD Flex Futures shall be excluded: (Amended on August 21, 2009; January 27, 2011; August 28, 2014; June 15, 2017; February 16, 2022; May 29, 2025)

1. For the futures and options underlying stock price indices: 300 contracts;
2. For the futures underlying stocks: 300 contracts;

3. For the options underlying stocks: 50 contracts;
4. For the futures underlying ETFs: 300 contracts;
5. For the futures and options underlying interest rates: 200 contracts (for the 3-month benchmark interest rate futures; 20 contracts);
6. For the futures and options underlying currencies: 100 contracts; and
7. For the futures and options underlying commodities: 50 contracts.

(2) Pursuant to [§153(3)] of the Regulation, the designation period of low liquidity products shall be from the date of such designation to the date of designation as a product warned for delisting pursuant to [§161].

(3) In the cases where the average daily contract quantity of a product designated as a low liquidity product pursuant to paragraph (1) exceeds the base quantity for liquidity management for three (3) consecutive times during the three (3) months preceding the first business day of each month, the Exchange shall release the relevant product from the designation as low liquidity product. (Amended on May 29, 2025)

(4) The designation as low liquidity products and release thereafter pursuant to paragraphs (1) and (3) shall be conducted on the trading day after the trading day on which the product falls under the criteria for designation and release. In such cases, the Exchange shall make public such facts without delay. (Amended on August 28, 2014; May 29, 2025)

(5) In cases where a product designated as a low liquidity product pursuant to paragraph (1) (excluding the market-making products noted in [§81(1)]) falls under each of the following subparagraphs, the Exchange may not start the trading of new delivery month contracts (including new delivery week contracts; the same hereinafter in this Article and [§161]), or it may take other necessary measures for the market management. In such cases, the Exchange shall announce this fact without delay through the electronic information delivery mechanism operated by the Exchange, including the internet homepage;

1. When it has elapsed four (4) years from the date of designation as a low liquidity product (in cases where the Exchange deems it is necessary to suspend the trading of new delivery month contracts for the market management, it shall be followed as specified by the Exchange); and
2. Where the sum of appraisal scores according to Annex 21 is six (6) points or more but less than eight (8) points. [July 30, 2020]

(6) The Exchange may perform the appraisal in accordance with the Annex 21 again for the product that has not started the trading of new delivery month contracts pursuant to paragraph (5), considering market revitalization situation, trading demands, other changes in the market environment, etc. [July 30, 2020]

(7) In cases where a product that has not started the trading of new delivery month contracts pursuant to paragraph (5) falls under paragraph (3) or has the sum of appraisal scores of eight (8) points or more in accordance with paragraph (6), the trading of the new delivery month contracts for the concerned product shall be resumed. In such cases, the Exchange may adjust matters related to the trading resumption of the new delivery month contracts including the

timing of the trading resumption, the trading duration, etc., and it may take other necessary measures for the market management. [July 30, 2020]

(8) In cases where the Exchange resumes the trading of new delivery month contracts pursuant to paragraph (7), it shall announce this fact without delay through the electronic information delivery mechanism operated by the Exchange, including the internet homepage. [July 30, 2020]

(9) Notwithstanding paragraphs (1) through (4), the Exchange may determine differently the designation, release from the designation, and publication of low liquidity products if it deems necessary for market management. [April 6, 2026]

§161. Criteria for Designation as Product warned for Delisting

(1) Pursuant to [§153(3)] of the Regulation, in cases where the product designated as a low liquidity product fall under the criteria noted in each of the following subparagraphs (excluding the market making products pursuant to [§81(1)]), the Exchange shall designate the relevant product as a product warned for delisting: (Amended on July 8, 2013; August 28, 2014; July 30, 2019; July 30, 2020)

1. When it has elapsed four (4) years since the date of designation as low liquidity product (in cases where the Exchange deems it is necessary for the market management, it shall comply with what the Exchange specifies); and

2. Where the sum of appraisal scores according to Annex 21 is less than six (6) points.

(2) When designating a product as a product warned for delisting pursuant to paragraph (1), the Exchange shall make public such fact without delay through the electronic information delivery mechanism operated by the Exchange, including the internet homepage.

(3) With regard to the product designated as a product warned for delisting pursuant to paragraph (1), the Exchange may not start the trading of new delivery month contracts, change the last trading days thereof, or take other measures necessary for market management. (Amended on July 30, 2019; July 30, 2020)

(4) The provisions of paragraph (1) through (3) shall apply *mutatis mutandis* in the case where the sum of appraisal scores in accordance with [§160(6)] is less than six (6) points. [July 30, 2020]

§162. Methods of Determining Quantity of Open Interests of KOSPI 200 Futures and Options Trades, etc.

(1) “Quantity of open interests calculated according to the methods specified in the Enforcement Rules” in the main sentence of [§154(1)1(a)(i)] of the Regulation shall be the smaller quantity among the quantities noted in each of the following subparagraphs (if the quantities noted in each subparagraph are the same, that quantity): (Amended on January 31, 2011; August 28, 2014)

1. The quantity determined by applying Delta at the market closing time of the relevant

trading day and the quantity of open interests at the market closing time of the relevant trading day to [Annex 23]; and (Amended on May 29, 2025)

2. The quantity determined by applying Delta at the market closing time of the immediately preceding trading day and the quantity of open interests at the market closing time of the relevant trading day to [Annex 23]. (Amended on May 29, 2025)

(2) “Quantity of open interests calculated according to the methods specified in the Enforcement Rules” in the main sentence of [§154(1)1(a)(ii)] of the Regulation shall refer to the smaller quantity between the quantities noted in each of the following subparagraphs (if the quantities noted in each subparagraph are the same, such quantity): (Amended on January 31, 2011; August 28, 2014; July 12, 2016)

1. The quantity calculated by applying to [Annex 23] Delta at the time of market closing of the contracts of which the last trading has arrived and the quantity of open interests (excluding the quantity related to hedge transactions for the quantity held in the market making account, which a member reported to the Exchange in accordance with [Annex: Form 13-2] by 10:00 hour on the following trading day; the same hereinafter in this Paragraph), at the time of market closing, of the contracts of which the last trading day has arrived; and

2. The quantity calculated by applying to [Annex 23] Delta of contracts at the time of market closing of the immediately preceding trading day, whose last trading day has arrived, and the quantity of open interests of contracts whose last trading day has arrived at the time of market closing. (Amended on May 29, 2025)

(3) “Customers specified in the Enforcement Rules” in the provisos to [§154(1)1(a)(i), (1)1(ii)& (1)(b)] of the Regulation shall refer to the individual classified under the investor classification code 8000 noted in [Annex 6]. (Amended on January 31, 2011; August 28, 2014; November 3, 2014; October 28, 2015)

(4) In accordance with [§154(6)] of the Regulation, the member shall periodically monitor the position limit of open interests by customer pursuant to [§154(1)] and notify the customer, without delay, if the quantity exceeds the position limit. (Amended on January 31, 2011; July 3, 2015)

(5) [Deleted on January 31, 2011]

(6) [Deleted on January 31, 2011]

(7) [Deleted on January 31, 2011]

(8) [Deleted on May 29, 2025]

§162-2. Position Limits of Equity Derivatives

(1) “Quantity specified in the Enforcement Rules” in [§154(1)1(b)] of the Regulation shall refer to the quantities classified in each of the following subparagraphs: (Amended on March 13, 2017; June 15, 2017; September 20, 2017; February 28, 2018; March 15, 2018; August 17, 2018; September 7, 2018; April 5, 2024; November 1, 2024)

1. For KOSDAQ 150 futures and KOSDAQ 150 options: 20,000 contracts based on the open interests calculated pursuant to paragraph (2). Provided that, for the customers falling under [§162(3)], it shall be 10,000 contracts, and for the Exchange-traded fund pursuant to Article 234(1) of the Act (hereinafter referred to as the "ETF") that holds open interests of KOSDAQ 150 futures or KOSDAQ 150 options, it shall be 100,000 contracts;

2. For KRX 300 futures and V-KOSPI 200 futures: 20,000 contracts based on the net open interests (referring to the quantity obtained by subtracting the smaller quantity between the sum of quantities of short open interests and the sum of quantities of long open interests from the larger quantities of the two sums; the same hereinafter). Provided that, for the customers falling under [§162(3)], it shall be 10,000 contracts;

3. For KOSDAQ Global futures: 20,000 contracts based on the net open interests. Provided that, for the customers falling under [§162(3)], it shall be 10,000 contracts, and for the ETFs that hold open interests of KOSDAQ Global futures, it shall be 100,000 contracts;

4. For Sector Index futures (excluding Korea Value-up Index futures): 10,000 contracts for each underlying asset, based on the net open interests. Provided that, for the customers falling under [§162(3)], it shall be 5,000 contracts;

4-2. For Korea Value-up Index futures: 40,000 contracts based on the net open interests. Provided that, for the customers falling under [§162(3)], it shall be 20,000 contracts;

5. [Deleted on April 18, 2025]

6. For single stock futures and single stock options: the quantity (referred to as “position limit” hereinafter in this Article) that is calculated according to the following formula (the quantity less than 1,000 contracts shall be discarded) and officially announced by the Exchange, based on the open interests calculated pursuant to paragraph (2) for each of same underlying stocks: and

$$\text{Max} \{5,000, \text{total number of listed common shares of the underlying stock} \times 3/100 \div \text{Max} (\text{multipliers of the contracts with an identical underlying stock})\}$$

7. For ETFs futures: the quantity set forth in [Annex 1-4] for each underlying asset, based on the net open interests. (Amended on May 29, 2025)

(2) The open interests under subparagraphs 1 and 6 of paragraph (1) shall be the quantities classified in each of the following subparagraphs for each of the same underlying assets: [September 20, 2017] (Amended on March 15, 2018; June 25, 2024)

1. In the case of calculating open interests for all the contracts: the quantity calculated by applying [§162(1)] *mutatis mutandis*; and

2. In the case of calculating open interests for the contracts of which the last trading day has arrived: the quantity calculated by applying [§162(2)] *mutatis mutandis*.

(3) The position limits under paragraph (1)6 shall be made public through such electronic information dissemination media as the internet website, etc., operated by the Exchange, on

the first business day of each year (hereinafter referred to as “publication date of the position limits”), and shall apply after seven (7) business days counting from the publication date of the position limits. (Amended on August 28, 2014; November 3, 2014; March 13, 2017; March 15, 2018; June 25, 2024; May 29, 2025)

(4) The total number of listed common shares noted in paragraph (1)6 shall be based on the last day of the year immediately preceding the year in which the publication date of the position limits falls. (Amended on August 28, 2014; March 13, 2017; March 15, 2018; June 25, 2024)

(5) Notwithstanding paragraphs (3) and (4), the position limits shall be calculated and applied according to the following subparagraphs when the number of listed common shares of the underlying stocks changes by 10 percent or more due to stock dividends, paid-in capital increases and/or bonus stocks issuance, stock splits, etc. (Amended on August 28, 2014; September 20, 2017; September 3, 2020)

1. In the case of adjusting the base price of the underlying stocks due to ex-dividends, etc.: At the time of adjusting the base price of the underlying stocks. In such cases, if there is an adjustment in the multiplier, the position limits shall be calculated and applied even when the last trading day of all the contracts with adjusted multipliers has passed; and

2. Cases other than subparagraph 1: At the time of supplementary listing or listing change of the underlying stocks.

(6) Notwithstanding the provisions of subparagraphs 6 and 7 of paragraph (1) and paragraphs (2) through (5), when it is deemed necessary for market management, the Exchange may change the position limits, the publication date of position limits and the application date of position limits of single stock futures and single stock options, and the position limits of ETF futures. (Amended on September 20, 2017; March 15, 2018; September 7, 2018; June 25, 2024)

(7) In the event that an ETF with an increased position limit on open interests according to each of the following subparagraphs holds the quantity of open interests stipulated in the relevant subparagraphs or more, the relevant member shall report the details of the holding to the Exchange without delay. In such cases, the member shall report the details of the holding to the Exchange without delay in accordance with [Annex: Form 13-3]. [March 15, 2018] (Amended on November 1, 2024; May 29, 2025)

1. Proviso to paragraph (1)1: The quantity of open interests stipulated in the main sentence of the same subparagraph [May 29, 2025]

2. Proviso to paragraph (1)3: The quantity of open interests stipulated in the main sentence of the same subparagraph [May 29, 2025]

3. Note in [Annex 1-4]: The quantity of open interests stipulated in the table in [Annex 1-4] [May 29, 2025]

(8) [Deleted on November 1, 2024]

§162-3. [Deleted on March 13, 2017]

§163. Quantities relating to Arbitrage and Hedge, etc.

(1) “Deadline specified in the Enforcement Rules” in the forepart other than each subparagraph of [§154(4)] of the Regulation shall refer to 10:00 hours of the following trading day. (Amended on January 31, 2011; February 17, 2012; August 28, 2014)

(2) “Manner stipulated in the Enforcement Rules” in [§154(4)1&2] of the Regulation shall refer to submitting the report under [Annex: Form 13] or inputting into the Exchange derivative system via the member derivatives system or the member derivatives terminals. [February 17, 2012]

(3) Pursuant to [§154(6)] of the Regulation, the quantity of open interests acceptable from an identical customer shall apply by dividing it into the trust asset and proprietary asset, and the trust asset shall be divided for each trust asset. In such cases, the Exchange may request members for the details of the quantity of open interests per proprietary asset or trust asset for the purpose of managing the position limits. (Amended on January 31, 2011; September 20, 2017)

(4) Pursuant to [§154(6)] of the Regulation, the quantity relating to arbitrage shall refer to the quantity of open interests resulting from the trades noted in [§49(1) or (2)]. (Amended on January 31, 2011; November 3, 2014)

(5) Pursuant to [§154(6)] of the Regulation, the quantity relating to hedge shall refer to the quantity of open interests resulting for the trade noted in [§49(3) or (4)]. [January 31, 2011] (Amended on November 3, 2014)

§164. Restriction on Trading of Single Stock Futures, etc.

(1) Pursuant to [§155(1)] of the Regulation, in cases where the underlying stock is delisted, the trading of domestic single stock futures, domestic single stock futures spreads and single stock options based on the relevant underlying stock shall not be conducted from the date of delisting. (Amended on February 17, 2012; August 28, 2014; June 20, 2016; June 15, 2017)

(2) Pursuant to [§155(1)] of the Regulation, in cases where a stock falls under any of the following subparagraphs, the Exchange may not commence the trading of the new delivery month contract (including delivery week contract) of the single stock futures or single stock options underlying the relevant stock:(Amended on August 28, 2014; July 3, 2015; June 20, 2016; June 29, 2023; April 5, 2024; June 11, 2026)

1. Where it is excluded from the underlying stock pursuant to [§8-2];
2. Cases that fall under any of subparagraphs of [§11(4)]; and
3. In addition, cases that intend to delist single stock futures and single stock options.

(3) Pursuant to [§155(2)] of the Regulation, in cases where the underlying asset of the overseas

index futures fails to satisfy any of the items of subparagraph 4 of [§10] of the Regulation, the Exchange may restrict the trading of the aforementioned overseas index futures and overseas index futures spread. [June 20, 2016]

(4) Pursuant to [§155(2)] of the Regulation, in the case of falling under any of the following subparagraphs, the Exchange may not initiate the trading of overseas index futures for a new delivery month. In such cases, the Exchange may restrict the trading of the contracts with no open interests: [June 20, 2016]

1. Where the causes for termination specified in an alliance or agreement pursuant to subparagraph 4(d) of [§10] occur or where intending to terminate the aforementioned alliance or agreement;
2. Where the overseas stock indices cannot be calculated (except the case of a temporary discontinuation of calculation); or
3. Other cases that the Exchange deems it appropriate to restrict the trading of overseas index futures.

(5) Pursuant to [§155(3)] of the Regulation, in cases where an underlying ETF is delisted, the trading of ETF futures and ETF futures spreads based on the relevant underlying shall not be conducted from the business day immediately preceding the delisting date. [June 15, 2017] (Amended on May 29, 2025)

(6) Pursuant to [§155(3)] of the Regulation, in cases where an ETF falls under any of the following subparagraphs, the Exchange may not commence the trading of the new delivery month contract of the ETF futures underlying the relevant ETF: [June 15, 2017]

1. Where the ETF is excluded from the underlying assets of ETF futures as it fails to meet the requirements noted in [§20-2(1)]; and
2. Cases of intending to delist the ETF futures.

§164-2. Restriction on Receipt of Excessive Quotation

(1) Pursuant to [§156-2(3)] of the Regulation, the Exchange may take measures as classified in the following subparagraphs for each session that the Exchange provides for the members to process the receipt of quotations: [February 28, 2014] (Amended on August 28, 2014; May 29, 2025)

1. Where the average number of quotations submitted per second during the preceding three (3) seconds exceeds 300 cases, the fact that excessive quotation of a member falls under the criteria restricting the receipt of excessive quotation shall be notified to the member; and
2. Where the average number of quotations submitted per second during the preceding three (3) seconds exceeds 300 cases consecutively after the notification pursuant to paragraph (1)1, the receipt of quotation shall be restricted for the next one (1) second.

(2) [Deleted on May 29, 2025]

1. [Deleted on May 29, 2025]

2. [Deleted on May 29, 2025]

(3) [Deleted on May 29, 2025]

[October 26, 2009]

§164-3. Charge for Excessive Quotations

(1) Pursuant to [§156-2(3)] of the Regulation, the charge for excessive quotations shall be imposed in case where the number of quotations of trades [Referring to KOSPI200 Futures trade (including futures spread trades), Mini KOSPI200 futures trade (including futures spread trades), KOSPI200 options and Mini KOSPI200 options trades; hereinafter the same in this Article] subject to the charge for excessive quotations during the night trading session or regular trading session (including the quotation receiving hours for opening price by call auction in each trading session) of the relevant trading day falls under any of the following subparagraphs: (Amended on March 30, 2015; July 3, 2015; March 13, 2017; December 21, 2022; May 29, 2025)

1. Where the total number of quotations (including the number of quotations cancelled according to the application for mass order cancellation and excluding quotations submitted through a market-making account; hereinafter the same in this subparagraph) is 200,000 (500,000 for Mini KOSPI200 futures trades and Mini KOSPI200 options trades) or higher and the value obtained by dividing the total number of quotations by total number of contracts is fifteen (15) or higher; or

2. Where the number of applications for mass order cancellation is 50 or higher.

(2) The number of quotations in paragraph (1) shall be calculated for each derivative account by distinguishing between regular trading session and night trading session. Provided that, in the case of quotations submitted through high-speed algorithmic trading account, the number of quotations shall be calculated for each high-speed algorithmic trade number by adding the number of quotations of all high-speed algorithmic trading account that the relevant member reported to the Exchange connecting high-speed algorithmic trade number, distinguishing between regular trading session and night trading session. (Amended on December 21, 2022; May 29, 2025)

(3) The amount of the charge for excessive quotations per applicable trade shall be KRW 1,000,000 and charged for each derivatives account or for each high-speed algorithmic trade number according to the calculation method pursuant to paragraphs (1) and (2). (Amended on December 21, 2022)

(4) The Exchange may exempt the charge for excessive quotations up to twice per month for each trade subject to the charge for excessive quotations. Provided that this provision shall not apply to the case where the trade subject to the charge for excessive quotations corresponds to

paragraph (1)1 and the value obtained by dividing the number of total quotations by the number of total contracts as prescribed in paragraph (1)2 exceeds seventy-five (75). (Amended on August 28, 2014; March 30, 2015; July 3, 2015; December 21, 2022; May 29, 2025)

(5) The Exchange shall notify the amount of the charge for excessive quotations noted in paragraphs (1) through (3) to the relevant member after the closing of each trading session. In such cases, the member that received the notification shall deposit the charge for excessive quotations into the account that the Exchange notified beforehand within seven (7) business days of receipt of the notification. (Amended on August 28, 2014; September 6, 2016; December 21, 2022; May 29, 2025)

(6) Notwithstanding paragraphs (1) through (4), the Exchange may relax the criteria regarding trades subject to imposition, the calculation method, and exemptions from the charge for excessive quotations, if deemed necessary for market management, taking into account trading demand, market liquidity, and quotation conditions. [August 18, 2025]

[July 8, 2013]

§164-4. Management of Account for Algorithmic Trading

(1) Pursuant to [§156-3(4)] of the Regulation, the reporting of algorithmic trading account shall be accomplished by way of the member inputting the details of the relevant derivatives account into the Exchange's derivatives system using the member derivatives system. (Amended on August 28, 2014)

(2) In cases where there is a member that submitted two (2) quotations or more per second and five thousand (5,000) quotations or more (excluding negotiated trades) by the market closing time through the derivatives account that was not reported according to paragraph (1) (excluding the market making accounts), the Exchange shall notify such fact to the relevant member. In such cases, the relevant member shall submit to the Exchange the material proving the fact that the relevant derivatives account is not the account for algorithmic trading by the market closing time of the business day following the receipt day of notification. (Amended on August 28, 2014; September 6, 2016; August 17, 2018; May 29, 2025)

[July 8, 2013]

§164-5. Methods of Requesting for Quotation Handling per Account, etc.

(1) Pursuant to [§156-3(4)] of the Regulation, members shall make the request for the quotation handling per account in the manner of inputting each of the following matters into the Exchange derivatives system through member derivatives systems or member derivatives terminals. Provided that the request for quotation handling per account shall be made limited to the accounts that have been reported as algorithmic trade accounts (for foreigner's consolidated accounts, it shall be the end-investor classification codes) by the immediately preceding trading day of request: (Amended on August 28, 2014; June 15, 2017; July 1, 2019; May 29, 2025)

1. The number of derivative accounts performing the algorithmic trades. Provided that, in

the case of a foreigner's consolidated account, it shall be the end-investor classification codes; and

2. Other matters that the Exchange deems necessary.

(2) Members may make a termination request according to the procedures under paragraph (1) only if ten (10) minutes have passed since the request for the quotation handling per account and the Exchange may terminate the quotation handling per account at the time of market closing of night trading session or regular trading session on the relevant trading day in cases where the member does not request the termination. (Amended on May 29, 2025)

(3) Notwithstanding paragraphs (1) and (2), the Exchange may reject the request for the quotation handling per account or termination request for the same when it deems necessary due to system failure or for market management.

(4) Members shall keep the records related to the quotation handling per account including the details of system failure, etc. for a period of ten (10) years.

[February 28, 2014]

[§164-6. Registration of High-speed Algorithmic Trader, etc.](#)

(1) An application for registration or reporting pursuant to [§156-4(7)] of the Regulation shall be made by a member's inputting all matters in each of the following subparagraphs through member derivatives system. Provided that, in the case where a member reports itself as a high-speed algorithmic trader, matters in subparagraphs 1 and 4 shall be excluded:

1. Matters concerning the fulfilment of the requirement in each subparagraph of [§156-4(1)] of the Regulation;
2. Information about a customer or member as information that can identify the subject of registration, such as mane or trade name;
3. Application for registration in accordance with [Annex: Form 18];
4. Confirmation on inspection of registration information, etc. in accordance with [Annex: Form 19]; and
5. Other matters that the Exchange deems necessary.

(2) In the case where there is a change in the matters registered or reported pursuant to paragraph (1), the member shall input the changed matter through the member derivatives system without delay.

(3) "The requirements specified in the Enforcement Rules" in [§156-4(1)3] of the Regulation shall refer to the requirement in each of the following subparagraphs:

1. The customer shall have a management system such as an internal control organization

and two (2) or more of professional personnel in order to efficiently manage risks that may arise from high-speed algorithmic trading. Provided that, with regard to the risks that occurs from high-speed algorithmic trading, any of the following items shall be deemed to meet the relevant requirement:

- (a) When a member directly conducts risk management, and
- (b) Where a member judges that the customer can recognize, evaluate, monitor, and control risks in a timely manner.

2. Other matters that the Exchange deems necessary for market management, etc.

(4) When a member registers or reports itself pursuant to paragraph (1), the Exchange shall process it without delay. In such case, the Exchange may ask the member to supplement if there is a defect in the registration or report.

(5) The Exchange shall issue a trader registration number that can be commonly used in the KOSPI market, KOSDAQ market, KONEX market, and derivatives market for each high-speed algorithmic trader who has completed registration and reporting. In such case, the high-speed algorithmic trader can set the risk management number (referring to the two (2) digit number set by the high-speed algorithmic trader to distinguish the range for applying the self-match prevention condition and the mass order cancellation; the same hereinafter) to the relevant registration number.

(6) Pursuant to [§156-4(7)] of the Regulation, a member shall connect a high-speed algorithmic trading number and a high-speed algorithmic trading account through the member derivatives system and report it to the Exchange.

(7) The “case specified in the Enforcement Rules” in [§156-4(5)3] of the Regulation shall refer to each of the following subparagraphs:

- 1. Where a customer takes out the ordering system from the member computer center, etc.;
or
- 2. Where the Exchange recognizes that it is necessary for investor protection or the stability of trading order in the market and notifies it to the member.

(8) In case where all members that have received orders from a high-speed algorithmic trader cease to receive the orders pursuant to [§156-4(5)] of the Regulation, the Exchange may cancel the registration of the high-speed algorithmic trader of the relevant customer.

[December 21, 2022]

[§164-7. Special Cases for Registration of High-speed Algorithmic Trader](#)

(1) In the case where a customer or a member completes the registration or reporting of a high-speed algorithmic trader in accordance with any of the regulations of the KOSPI market, KOSDAQ market, or KONEX market operated by the Exchange, the registration or reporting

is also deemed to have been completed in the derivatives market.

(2) In the case where multiple customers of a member satisfy all of the following subparagraphs, the member can collectively register them as high-speed algorithmic traders. In such case, the Exchange may issue a single trader registration number that can be jointly used by the relevant customers to a specific customer:

1. The customer shall be an affiliated corporation (including a foreign corporation incorporated under foreign laws and regulations) of a specific customer;
2. The customer and the affiliated corporation shall use the same ordering system; and
3. The member shall verify whether the registration requirements stated in [§156-4(1)] of the Regulation are met for all of the multiple customers.

[December 21, 2022]

§164-8. High-speed Algorithmic Trading through Multiple Members

In case where a member intends to receive orders for high-speed algorithmic trading from a customer who has completed the registration as a high-speed algorithmic trader through other members, the member shall apply for the right to use the trader registration number of the relevant customer to the Exchange in advance. In such cases, the latter part of [§156-4(1)] of the Regulation and [§164-6(1) (excluding subparagraph 3) through (4) and (6)] of these Enforcement Rules shall apply mutatis mutandis to the relevant application.

[December 21, 2022]

§164-9. Member's Obligation to Manage High-speed Algorithmic Trading

(1) Pursuant to [§156-5(1)] of the Regulation, a member shall inspect electronic system in order to verify whether the electronic systems including ordering system, etc. used by a customer has sufficient stability and adequacy to carry out high-speed algorithmic trading as specified in each of the following subparagraphs:

1. Matters concerning inspection of electronic system, etc. related to the registration stated in [§156-4] of the Regulation; A member shall prepare the standards and procedures for electronic system inspection, conduct the inspection of the electronic system thoroughly through the linkage tests with trade ordering system by the customer before applying for the registration, and file the results with the Exchange;
2. Matters concerning regular inspection: A member shall inspect the connection with the customer's electronic system on a regular basis every year. Provided that, if the member conducted the inspection on a timely basis due to the change of electronic system, etc. during the relevant year, it shall be deemed that the inspection pursuant to the main clause is completed and
3. Other matters that the Exchange deems necessary for the stable operation of the

electronic system, etc.

(3) A member shall establish appropriate internal control mechanism for the management of risks and the prevention of financial accidents related to the high-speed algorithmic trading of customers as specified in each of following subparagraphs:

1. Matters concerning the granting of order limits: A member shall grant an appropriate order limit by evaluating the financial stability, credit rating, etc. and check the adequacy of the relevant limit on the regular basis;

2. Matters concerning the monitoring of trades: A member shall monitor and supervise whether a customer complies with relevant regulations and internal control standards through the monitoring of high-speed algorithmic trading; and

3. Matters concerning the response to accidents and failures: A member shall prepare appropriate control and response system including manuals to effectively cope with accidents or failures related to high-speed algorithmic trading of customers and minimize damage.

(3) With respect to the request for submitting materials pursuant to [§156-5(2)] of the Regulation, a member shall record and maintain the following materials for 10 years and submit them if the Exchange requests for the market management, etc.

1. Materials on the registration of high-speed algorithmic traders and their trades; and

2. Results of inspection and supervision conducted pursuant to paragraphs (1) and (2) and related materials.

[December 22, 2022]

[§164-10. Methods to Apply for Cancellation of Disconnected Quotations, etc.](#)

(1) The “case where it is stipulated in the Enforcement Rules” in [§156-6(1)] of the Regulation shall refer to the case where, as a case in which the connection between the member system and the Exchange system is disconnected during the regular trading session or the night trading session and electronic transmission and reception does not occur, there is a determination in advance between the member applying for the cancellation of disconnected quotations and the Exchange. (Amended on May 29, 2025)

(2) Pursuant to [§156-6(2)] of the Regulation, the range of cancellation of disconnected quotations shall be the number (excluding the number changed or cancelled through other sessions) of quotations not executed among quotations submitted through the session requested in advance pursuant to paragraph (3).

(3) Pursuant to [§156-6(2)] of the Regulation, the methods to apply for the cancellation of disconnected quotations and for the termination thereof shall be as specified in [§8(5)] of the Guidelines for Connection, etc. of Member System.

(4) The Exchange may not apply the cancellation of disconnection quotations in case of system failure or other cases where it deems necessary for market management.

[December 21, 2022]

§165. [Deleted on December 28, 2011]

§166. Matters to Be Notified to Members

(1) Pursuant to [§161] of the Regulation, the Exchange shall notify the members the matters falling under any of the following subparagraphs:

1. The Regulation, these Enforcement Rules and other matters about the establishment and abolition of the trading rules and regulations;
2. Matters about the amendments and measures taken on the Regulation and this Enforcement Rule; and
3. Any other matter that the Exchange deems necessary.

(2) Notification pursuant to paragraph (1) shall be sent through any of the following methods:

1. By posting on the electronic information delivery media operated by the Exchange;
2. By posting on the information devices of the information service providers; and
3. By sending a written document.

PART VII. SUPPLEMENTARY PROVISIONS

§167. [Deleted on December 18, 2012]

§168. Methods of Transferring Open Interests to Other Members, etc.

(1) The transaction agreement noted in [§166(4)] of the Regulation shall be concluded by way of a bi-lateral transaction between a member who holds the open interests of a non-clearing member intending to transfer the open interests and a member who intends to acquire the relevant open interests, but the Exchange shall mediate it. In such cases, [§113] shall apply *mutatis mutandis* thereto. (Amended on August 28, 2014)

(2) Pursuant to [§166(4)] of the Regulation, a non-clearing member or a customer shall not transfer the open interest held in a foreigner's consolidated account to the derivatives account

opened with another member, which is not a foreigner's consolidated account. [June 15, 2017]

(3) In relation to 'other necessary matters related to the transfer of open interests' in [§166(4)] of the Regulation, in cases where the members carry out the trade specified in [§48(3)] in accordance with [§166(2)] of the Regulation, the open interests may be transferred by the methods in the following subparagraphs:

1. A member may transfer the open interests of the member, who has entered into an agreement for opening of derivatives trading account, to another member;
 2. A member may transfer the open interests of his/her proprietary account to another member; and
 3. A member may transfer the open interests of the member, who has entered into an agreement for opening of derivatives trading account, to his/her own proprietary account.
- [September 3, 2020]

§168-2. Methods of Taking over Open Interests

(1) In cases where a member takes over the open interests of customer as proprietary account trades pursuant to [§166-2(2)] of the Regulation, the takeover price shall be the price determined by the negotiation between the member and customer, which is within the price range for the relevant negotiated FLEX trade pursuant to [§72-6].

(2) Pursuant to [§166-2(2)] of the Regulation, by reaching an agreement before accepting the entrustment of negotiated FLEX trade of customer, in cases where there is an unfulfilled settlement obligation by the customer, the member may enter into an agreement to take over the open interests of the relevant customer as proprietary account trades in a form of negotiated FLEX trade from the trading day following the trading day on which the settlement default has occurred. In such cases, the price of negotiated FLEX trade shall be the price closest to the settlement price of the immediately preceding trading day, which is within the price range noted in the proviso to paragraph (1). (Amended on May 29, 2025)

[August 21, 2009]

§169. Notification Period of Guidelines for Brokerage Commission Collection

"Time period specified in the Enforcement Rules" in [§167(3)] of the Regulation shall be the period of seven (7) business days from the effective day of the brokerage commission collection guideline. Provided that, in cases where the brokerage commission per contract resulting from the option exercise exceeds the amount determined by multiplying the deemed value of option exercise reported for the relevant product by multiplier, the period of seven (7) business days before the effective day of the brokerage commission collection guideline. (Amended on August 28, 2014) (Wholly amended on July 26, 2011; May 29, 2025)

§170. Exceptions to Settlement Methods in Case of Merger between Members

(1) Notwithstanding [Annex 6] under [§48(5)], when the Exchange deems that it is unavoidable for a member to use the ID number issued before the merger because of a delay in the integration of the member derivatives systems following the merger (including the cases that are equivalent to merger; the same hereinafter in this Article) between members, such members may input the quotations through the member ID numbers given before the merger until the date determined by the Exchange.

(2) The Exchange shall, when the trades have been executed after inputting quotations through each member's ID number pursuant to paragraph (1), notify the details of executed trades for each of the relevant ID number.

(3) Notwithstanding [§110] and [§111], in cases where the quotations were inputted and trading details were notified for each of member ID number pursuant to paragraphs (1) and (2), the Exchange may calculate the settlement amount for each clearing member ID and make settlement accordingly.

§171. Exceptions to Additional Deposit Subsequent to Change of Substitute Prices, etc.

(1) In cases where an additional customer margin is resulted in because of the change of the base price (including such cases as the change of interval value of customer margin caused by ex-dividend, etc.: hereinafter the same in this Article) of substitute securities pursuant to the provisos to subparagraphs 2 and 3 of [§124] or change of basic rate, assessment rate, etc. of foreign currency pursuant to [§92(4) and §123(4)] or the change of base market price, assessment rate, etc. of foreign securities pursuant to [§92-2(6) and §123-2(5)], the member shall notify the customer of such fact immediately and may collect the entire amount or a part of the additional customer margins. (Amended on December 18, 2012; July 8, 2013; May 29, 2025)

(2) In cases where no additional customer margin is resulted in subsequent to the change of the base price of substitute securities pursuant to the provisos to subparagraphs 2 and 3 of [§124] or change of basic rate, assessment rate, etc. of foreign currency pursuant to [§92(4)] and [§123(4)] or the change of base market price, assessment rate, etc. of foreign securities pursuant to [§92-2(6)] and [§123-2(5)], the member shall notify the customer of such fact immediately and may not collect the entire amount or a part of the additional customer margin. (Amended on December 18, 2012; July 8, 2013; May 29, 2025)

§172. Public Opinion Gathering

Public opinion gathering pursuant to [§171-2] of the Regulation shall be governed by the provisions of [§5] of the Internal Regulations Management Regulation and [§6] of the Regulations Management Regulation.

[May 6, 2020]

ADDENDA
(January 24, 2005)

§1. Effective Date

These Enforcement Rules shall become effective on the date when the Exchange is incorporated. Provided that the provisions of [§28], [§117] and [§118] that are concerned with foreign currency shall become effective on October 2, 2006. (Proviso amended on July 19, 2006)

§2. Effective Date of Provisions Relating to Foreign Currency

“Date stipulated in the Enforcement Rules” in [§1] of the Addenda to the Regulation shall be the date specified in the proviso of [§1] of this Addenda.

§3. Abolition of the Former Enforcement Rules

The Enforcement Rules of the Business Regulation of the Korea Futures Exchange shall be abolished on the date these Enforcement Rules is put into effect.

§4. Transitional Measures

Trading of futures and options, which was conducted in accordance with the Enforcement Rules of the Business Regulation of the Korea Futures Exchange before these Enforcement Rules became effective, shall be construed as the trades executed in accordance with these Enforcement Rules.

ADDEMDUM
(February 25, 2005)

This Enforcement Rule shall become effective on March 2, 2005.

ADDENDA
(September 16, 2005)

§1. Effective Date

These Enforcement Rules shall become effective on September 26, 2005.

§2. Effective Date of the Futures Market Business Regulation

“Date stipulated in the Enforcement Rules” in [§1] of the Addenda of the Futures Market Business Regulation (amended on July 22, 2005) shall be September 26, 2005.

§3. Restriction on Input of Quotations for Single Stock Options to Be Settled by Physical Delivery

Pursuant to [§81] of these Enforcement Rules, notwithstanding [§1] of this Addenda, the input of quotation for Single Stock Options to be settled by physical delivery pursuant to [§2] of Addenda of the Futures Market Business Regulation (amended on July 22, 2005) shall be restricted from the day after these Enforcement Rules became effective (in case where it is a market holiday, it shall be moved backward in a sequential order).

§4. Selection Date of Underlying Stocks

The date of the selection of underlying stocks pursuant to [§70(1)] of these Enforcement Rules shall be May 2, 2005.

§5. Exceptions on the Last Trading Day and Trading Period for the Single Stock Options to Be Settled by Cash Payment

(1) The first trading day of the Single Stock Options settled by cash payment pursuant to [§4] of Addenda of the Futures Market Business Regulation (amended on July 22, 2005) shall be the date specified in [§2] of this Addenda.

(2) The last trading days of the four expiration month contracts of Single Stock Options to be settled by cash payment which begin trading on the date pursuant to [§1] of this Addenda shall be the second Thursdays of each of the following months (in case where it is a market holiday, it shall be moved forward in a sequential order):

1. October 2005;
2. November 2005;
3. December 2005; and
4. March 2006.

(3) The trading periods of four expiration month contracts of Single Stock Options to be settled by cash payment which begin trading on the date pursuant to [§1] of this Addenda shall be the period from the first trading day to the last trading day of each of the relevant expiration month contract specified in [§2] of this Addenda.

§6. Exceptions to the Calculation of the Base Price of Single Stock Options to Be Settled by Cash Payment for the First Trading Day

The provisions of [§91(1)1b] of these Enforcement Rules shall apply *mutatis mutandis* to the calculation of the base price of the Single Stock Options to be settled by cash payment for the first trading day. In such cases, the volatility in Footnote 5 shall be the annual volatility calculated by the Exchange, which is based on the price of underlying stocks over a period of 91 days immediately before the first trading day (number of market holidays for underlying stocks are excluded from counting of the day, and in case where the underlying stocks were traded for a period of less than 91 days, the number of the relevant trading days is used).

ADDENDA (November 2, 2005)

§1. Effective Date

These Enforcement Rules shall become effective on November 7, 2005. Provided that [§2] of this Addenda shall become effective on the amendment date of these Enforcement Rules (i.e., November 2, 2005).

§2. Amendment of Enforcement Rules of the Futures Market Business Regulation

The Enforcement Rules of the Futures Market Business Regulation shall be amended as follows on the day (in the case of the market holiday, it shall be deferred to the next business day in a sequential order) after the last trading day of KOSTAR50 futures or KOSTAR50 options expiration months that arrives very last:

The each of the proviso of [§6(2)] and the provisions of [§8(1)5] shall be deleted.

The provisions of [§9(2)] shall be deleted and the “KOSTAR50 options and the options on 3-year KTB Futures” in the proviso to [9(5)] shall be deemed “the options on 3-year KTB Futures”.

The provisions of [§12, §16(2), §17/1p, §18/2, §26(2)5 and §31(2)] shall be deleted.

“Member margin ratio (in the case of KOSTAR50, it shall be 1/2 of the member margin ratio; the same hereinafter in this Paragraph)” in [§32(2)] shall be deemed “member margin ratio”.

The Section 6 (from [§56] to [§59]) and Section 7 ([§60] and [§61]) of Chapter V in Part II shall be deleted.

“[§138(2), §147(2) and §197(2)] of the Regulation” in [§141(1)12] shall be deemed “[§197(2)] of the Regulation” and [§197(27)] shall be deleted.

“2. KOSTAR50 Options (rounded to the nearest second decimal place)” in [Annex 3] shall be deleted.

“2. KOSTAR50 Futures (rounded to the nearest second decimal place)” in [Annex 4] shall be deleted.

[Annex 5] shall be the one attached herewith.

[Annex 7] shall be deleted.

ADDENDA (December 16, 2005)

§1. Effective Date

This Enforcement Rule shall become effective on December 19, 2005.

§2. Exceptions to the First Trading Day and Trading Period

On the first trading day (referring to the effective day pursuant to [§1] of this Addenda; the same hereinafter) of the Single Stock Options relating to stocks of Hana Financial Group Co. Ltd., the trading of the four (4) expiration month contracts of Single Stock Options, of which the last trading day is the second Thursday (in the case of the market holiday, it shall be moved forward in sequential order) of each of the following months shall commence:

1. January 2006;
2. February 2006;
3. March 2006; and
4. June 2006

§3. Exceptions to the Calculation of Base Price on First Trading Day

The provisions of [§92(1)1] of these Enforcement Rules shall apply *mutatis mutandis* to the calculation of base price for the first trading day. In such cases, the volatility in Note 5 shall be the annual volatility of underlying stock that is calculated by the Exchange on the basis of the price of Hana Financial Group Co. Ltd. During the period of 91 days (the market holidays are not included in counting 91 days; in case where the number of trading days of underlying stock is less than 91 days, use that number of trading day) prior to the first trading day.

ADDEMDUM (March 8, 2006)

These Enforcement Rules shall become effective on March 20, 2006. Provided that the amended provisions of [Annex 9-2] and [Annex 11] shall become effective on March 10, 2006.

ADDEMDUM (March 17, 2006)

These Enforcement Rules shall become effective on March 17, 2006.

ADDEMDUM (May 22, 2006)

These Enforcement Rules shall become effective on May 26, 2006.

ADDEMDUM (July 19, 2006)

These Enforcement Rules shall become effective on October 2, 2006.

ADDENDA (November 13, 2006)

§1. Effective Date

These Enforcement Rules shall become effective on December 18, 2006.

§2. Effective Date of the Futures Market Business Regulation

“The date stipulated in the Enforcement Rules” in [§196] of the Futures Market Business Regulation (amended on October 27, 2006) shall be December 18, 2006.

§3. Exceptions to the Market Making Period for the Product Designated as low liquidity product

Notwithstanding the amended provisions of [§2-3(3)] of these Enforcement Rules, when calculating the market making period of products tracking the same underlying assets that have been designated as low liquidity product as of December 18, 2006, the market making period shall begin on December 18, 2006 and ends on the day (if it is a market closing day, it shall be moved forward in sequential order) before the day the product is designated as product warned for delisting.

§4. Exceptions to the Period of Agreement for Market Making for the Product designated as low liquidity product

(1) Notwithstanding the amended provisions of [§2-3(3)] of these Enforcement Rules, the period of market making in the first quarter for the products tracking the same underlying assets, which have been designated as low liquidity product as of December 18, 2006, shall be from December 18, 2006 to the March 31, 2007.

(2) Notwithstanding the amended provisions of [§2-4(3)] of these Enforcement Rules, the first trading day in February and March 2007 may be chosen as the effective date of the agreement for market making. In such cases, the market making period for the first quarter shall be June 30, 2007.

§5. Abolition of Operational Guidelines for Market Maker System

The Guiding Principle 11, the Operational Guidelines for Market Maker System (established on April 6, 2005), shall be abolished as the Enforcement Rules becomes effective.

ADDENDUM (February 5, 2007)

These Enforcement Rules shall become effective on February 7, 2007.

ADDENDUM (February 9, 2007)

These Enforcement Rules shall become effective on February 26, 2007.

ADDENDUM (March 23, 2007)

These Enforcement Rules shall become effective on March 27, 2007.

ADDENDA
(May 3, 2007)

§1. Effective Date

These Enforcement Rules shall become effective on August 27, 2007.

§2. Effective Date of the Futures Market Business Regulation

“The date stipulated in the Enforcement Rules” noted [§1] of Addenda of in the Regulation (amended on January 19, 2007) shall be August 27, 2007.

§3. Abolition of the Principles of Decision-making on Matters Delegated Pursuant to the Futures Market Business Regulation and the Enforcement Rules Thereof.

The Guiding Principle 72, “the Principles of Decision-making on Matters Delegated Pursuant to the Futures Market Business Regulation and the Enforcement Rules Thereof” (amended on February 5, 2007), shall be abolished on the day when these Enforcement Rules become effective.

ADDENDUM (May 28, 2007)

These Enforcement Rules shall become effective on May 29, 2007.

ADDENDUM (July 24, 2007)

These Enforcement Rules shall become effective on July 26, 2007.

ADDENDUM (August 13, 2007)

These Enforcement Rules shall become effective on August 27, 2007.

ADDENDUM (November 16, 2007)

These Enforcement Rules shall become effective on November 26, 2007.

ADDENDUM (December 21, 2007)

These Enforcement Rules shall become effective on December 26, 2007.

ADDENDA
(February 21, 2008)

§1. Effective Date

These Enforcement Rules shall become effective on February 25, 2008.

§2. First Trading Date

“The date stipulated in the Enforcement Rules” in [§2(2)] of Addenda of the Futures Market Business Regulation (Amended on December 21, 2007) shall be February 25, 2008.

§3. Exceptions to the Commencement of Trading and Trading Period of 10-year KTB Futures

Pursuant to [§2(2)] of Addenda of the Futures Market Business Regulation (Amended on December 21, 2007), on the first trading day of 10-year KTB Futures, the trading of three (3) delivery month contracts of 10-year KTB Futures, of which the last trading days shall be the third Wednesday (shall move forward sequentially, if the day is market holiday) of each of the following month, shall commence:

1. June 2008;
2. September 2008; and
3. December 2008.

ADDENDA
(April 25, 2008)

§1. Effective Date

These Enforcement Rules shall become effective on May 6, 2008.

§2. First Trading Day of Single Stock Futures

“The date stipulated in the Enforcement Rules” in [§3(1)] of Addenda of the Futures Market Business Regulation (Amended on December 21, 2007) shall be May 6, 2008.

§3. Selection Day of Underlying Stock of Single Stock Futures

Pursuant to the amended provisions of [§7-2(1)] of these Enforcement Rules, the selection day of underlying stocks of Single Stock Futures shall be June 30, 2007.

§4. Exceptions to the First Trading Day of Single Stock Futures

Pursuant to [§3(2)] of Addenda of the Futures Market Business Regulation (Amended on December 21, 2007), the trading of four (4) delivery month contracts of Single Stock Futures of which the last trading day is the second Thursday of each of the following months shall

begin on the first trading day of the Single Stock Futures:

1. June 2008;
2. September 2008;
3. December 2008; and
4. March 2009.

§5. Exceptions to the Position Limit of Open Interests of Single Stock Futures

Notwithstanding [§103-2(2)] of these Enforcement Rules, the position limit of open interests of Single Stock Futures that is made public on the trade first trading day noted in [§2] of this Addenda shall apply from the publication date.

§6. Exceptions to the first trading day of Single Stock Options

On the first trading day (referring to the Effective date noted in [§1] of this Addenda) of Shinsegae, LG Display and WOORIFINANCIAL, the trading of four (4) expiration month contracts, of which the last trading day is the second Thursday (if it is a market holiday, it shall be moved forward in sequential order) of each of the following months, shall begin:

1. May 2008;
2. June 2008;
3. July 2008; and
4. September 2008.

§7. Exceptions to the Calculation of Base Price for the First Trading Day of Single Stock Options

The provisions of [§46(1)1] of these Enforcement Rules shall apply *mutatis mutandis* to the calculation of base price for the first trading day of Single Stock Options specified in [§6] of this Addenda. In such cases, the volatility in Note 4 shall be the annual volatility of underlying stock, which is calculated by the Exchange on the basis of the price of underlying stocks during the period of ninety-one (91) days (the market holidays are not included in counting the days) prior to the first trading day.

ADDENDA
(July 8, 2008)

§1. Effective Date

These Enforcement Rules shall become effective on July 21, 2008.

§2. Effective Date of the Futures Market Business Regulation

“The date stipulated in the Enforcement Rules” in [§1] of the Addenda of the Futures Market Business Regulation (amended on June 27, 2008) shall refer to July 21, 2008.

§3. Exceptions to the first Trading Day of Lean Hog Futures

Pursuant to [§2] of Addenda of the Futures Market Business Regulation (Amended on June 27, 2008), the trading of six (6) delivery month contracts of Lean Hog Futures, of which the last trading day is the third Wednesday of each of the following months, shall begin on the first trading day of the Lean Hog Futures:

1. August 2008;
2. September 2008;
3. October 2008;
4. November 2008;
5. December 2008; and
6. January 2009.

ADDENDA (October 9, 2008)

§1. Effective Date

These Enforcement Rules shall become effective on October 13, 2008.

§2. Exceptions to the First Trading Day of Single Stock Futures

On the first trading day of KB Financial Group (referring to the effective date noted in [§1] of this Addenda), the trading of four (4) delivery month contracts of Single Stock Futures, of which the last trading day is the second Thursday (if the day is a market holiday, it shall be moved forward sequentially) of each month noted in the following subparagraphs, shall begin:

1. December 2008;
2. March 2009;
3. June 2009; and
4. September 2009.

§3. Exceptions to the First Trading Day of Single Stock Options

On the first trading day of KB Financial Group (referring to the effective date noted in [§1] of this Addenda), the trading of four (4) expiration month contracts of Single Stock Options, of which the last trading day is the second Thursday (if the day is a market holiday, it shall be moved forward sequentially) of each month noted in the following subparagraphs, shall begin:

1. November 2008;
2. December 2008;
3. January 2009; and
4. March 2009.

§4. Exceptions to the Calculation of Base Price for First Trading Day of Single Stock Options

The provisions of [§46(1)1] of these Enforcement Rules shall apply *mutatis mutandis* to the calculation of base price for the first trading day of Single Stock Options specified in [§3] of this Addenda. In such cases, the volatility in Note 4 of [Annex 13] shall be the annual volatility of underlying stock, which is calculated by the Exchange on the basis of the price of underlying stocks during the period of ninety-one (91) days (the market holidays are not included in counting the days) prior to the first trading day.

ADDENDA (January 20, 2009)

§1. Effective Date

These Enforcement Rules shall become effective on February 4, 2009. Provided that the provisions that are concerned with the amount of cash customer margin for interest rate derivatives, currency derivatives and commodity derivatives and the provisions of [§152] shall become effective on April 27, 2009, while taking into consideration the time required for the development of programs relating to the member derivatives system, etc.

§2. Exceptions to the Deposit of Cash Customer Margin

The provisions that are concerned with the deposit of cash customer margin for interest rate derivatives, currency derivatives and commodity derivatives shall apply from the market closing time of the day before [§1p] of this Addenda is put into effect.

§3. Transitional Measures for Calculation of Cash Customer Margin

Notwithstanding [§145(2)] of these Enforcement Rules, in the case of the derivatives accounts through which the customers trade only 3-year KTB Futures, 5-year KTB Futures, 10-year KTB Futures, Monetary Stabilization Bond Futures, USD Futures, JPY Futures, EUR Futures, USD Options, Gold Futures, Lean Hog Futures and USD FLEX Futures, the amount of upfront initial cash customer margin and ex-post cash customer margin shall be calculated by applying 1/12 until October 26, 2009 and 1/6 until June 28, 2010 as the Minimum rate of the cash customer margin rate and the cash rate for futures noted in [§145(2)] of these Enforcement Rules. In such cases, the cash customer margin rate and the cash rate for futures shall apply from the market closing time of the day before the effective date of the change. (Amended on August 21, 2009; April 19, 2010)

§4. Exceptions to the Changes of Margin Rate for Currency Derivatives

When the trading session of trading day immediately before the effective date noted in [§1m] of this Addenda is closed, the upper and lower limit prices, member margin, customer margin and additional customer margin, etc. for currency products shall be calculated pursuant to the amended provisions of the Enforcement Rules.

§5. Abolishment of Futures Market Brokerage Contract Rule

The Enforcement Rules of Futures Market Brokerage Contract Rule shall be abolished on the

effective date noted in [§1*m*] of this Addenda.

§6. Transitional Measures Related to Abolishment of Futures Market Brokerage Contract Rule

With regard to the matters such as the entrustment of futures and options trades that were carried out in accordance with the Enforcement Rules of Futures Market Brokerage Contract Rule before the effective date of these Enforcement Rules shall be regarded as the matters undertaken pursuant to these Enforcement Rules.

ADDENDUM (March 18, 2009)

These Enforcement Rules shall become effective on March 23, 2009.

ADDENDA (April 6, 2009)

§1. Effective Date

These Enforcement Rules shall become effective on April 27, 2009.

§2. Effective Date of the Derivatives Market Business Regulation

“The date stipulated in the Enforcement Rules” noted in [§1] of the Addenda of the Derivatives Market Business Regulation amended on March 4, 2009, which is related to the amended provisions of [§44 and §45] of Derivatives Market Business Regulation, shall refer to April 27, 2009.

§3. Exceptions to the First Trading Date of Currency Futures

Pursuant to [§3] of the Addenda of the Derivatives Market Business Regulation amended on March 4, 2009, the trading of two (2) delivery month contracts of currency futures, of which the last trading day is the third Monday (if it is a market holiday, it shall be moved forward sequentially) of each month noted in the following subparagraphs shall begin on the effective date of these Enforcement Rules:

1. August 2009; and
2. October 2009.

ADDENDA (August 21, 2009)

§1. Effective Date

These Enforcement Rules shall become effective on August 31, 2009.

§2. Effective Date of the Derivatives Market Business Regulation

“The date stipulated in the Enforcement Rules” noted in [§1] of the Addenda of the Derivatives Market Business Regulation amended on March 4, 2009 shall refer to August 31, 2009 (excluding the amended provisions of [§44 and §45] the Derivatives Market Business Regulation).

ADDENDA (October 26, 2009)

§1. Effective Date

These Enforcement Rules shall become effective on November 16, 2009.

§2. Effective Date of the Derivatives Market Business Regulation

“The date stipulated in the Enforcement Rules” noted in the Addenda of the Derivatives Market Business Regulation amended on September 23, 2009 shall refer to November 16, 2009.

ADDENDA (December 4, 2009)

§1. Effective Date

These Enforcement Rules shall become effective on December 14, 2009.

§2. Selection Date of Underlying Stock of Single Stock Futures

In accordance with the amended provisions of [§8(1)] and [Annex 2], the selection date of underlying stocks of Single Stock Futures newly added shall be October 30, 2009.

§3. Exceptions to the First Trading Day of Single Stock Futures

In accordance with the amended provisions of [§8(1)] and [Annex 2], trading of four (4) delivery month contracts of Single Stock Futures newly added, of which the last trading day is the second Thursday (if it is a market holiday, it shall be moved forward sequentially) of each month noted in the following subparagraphs shall begin on the first trading day (referring to the effective date of these Enforcement Rules noted in [§1] of this Addenda):

1. March 2010;
2. June 2010.
3. September 2010, and
4. December 2010.

ADDENDUM (December 30, 2009)

These Enforcement Rules shall become effective on December 31, 2009. Provided that the

amended provisions of [§112-2 and §112-4] shall be put into effect on February 1, 2010.

ADDENDA
(April 19, 2010)

§1. Effective Date

These Enforcement Rules shall become effective on April 20, 2010. Provided that the amended provisions of [§148(1)] shall become effective on June 28, 2010.

§2. Exceptions in change of cash ratio for futures at the time of depositing ex-post cash customer margin

When calculating the ex-post cash customer margin, the amended provision of [§148(1)] concerning the Minimum cash ratio for futures shall apply after the market closing on the day before the effective date noted in [§1] of this Addenda (dated April 19, 2010).

ADDENDA
(June 18, 2010)

§1. Effective Date

These Enforcement Rules shall become effective on June 18, 2010. Provided that the amended provisions of [§60 and §61] shall become effective on July 5, 2010.

§2. Transitional measures subsequent to extension of market making period

The market making period of products, for which the market maker has entered into the agreement for market making with the Exchange pursuant to [§82(1)] before the effective date of these Enforcement Rules, shall deem to be twelve (12) quarters.

ADDENDUM
(June 23, 2010)

These Enforcement Rules shall become effective on June 24, 2010.

ADDENDA
(July 30, 2010)

§1. Effective Date

These Enforcement Rules shall become effective on September 13, 2010.

§2. First Trading day of Mini-gold Futures

“The date specified in the Enforcement Rules” noted in [§1] of Addenda of the Derivatives Market Business Regulation (dated June 23, 2010) shall refer to September 13, 2010.

§3. Exceptions to First Trading Day of Mini-gold Futures

Pursuant to [§2] of Addenda of the Derivatives Market Business Regulation (dated June 23, 2010), trading of seven (7) Mini-gold Futures whose last trading day is the 3rd Wednesday of the months noted in each of the following subparagraphs shall begin on the first trading day:

1. November 2010;
2. December 2010;
3. February 2011;
4. April 2011;
5. June 2011;
6. August 2011; and
7. October 2011.

ADDENDUM (August 13, 2010)

These Enforcement Rules shall become effective on August 16, 2010.

ADDENDA (August 25, 2010)

§1. Effective Date

These Enforcement Rules shall become effective on August 30, 2010.

§2. Transitional Measures with Regard to Estimated Details of Request for Pre-hours Negotiated Trade

The agreement that the Eurex and Exchange signed on December 15, 2008 and October 7, 2009 shall deem to be the agreement pursuant to [§72-11(1) and §72-13(5)] of these Enforcement Rules.

ADDENDUM (September 6, 2010)

These Enforcement Rules shall become effective on September 13, 2010.

ADDENDA (September 13, 2010)

§1. Effective Date

These Enforcement Rules shall become effective on October 11, 2010.

§2. Exceptions to Change of Margin Rate

When the regular session of the day before the effective day pursuant to [§1] of this Addenda (September 13, 2010) has been closed, the customer margin, member margin and additional customer margin, etc. shall be determined according to the amended provisions of these Enforcement Rules.

ADDENDUM (October 1, 2010)

These Enforcement Rules shall become effective on October 11, 2010.

ADDENDA (October 20, 2010)

§1. Effective Date

These Enforcement Rules shall become effective on October 25, 2010.

§2. Exceptions to Trading of 10-year KTB Futures Spread

Notwithstanding the amended provisions of [§46(1)], if there are open interests of delivery month contract of 10-year KTB Futures as of the market closing time of the day before the effective day of these Enforcement Rules, the former provisions of the Enforcement Rules shall apply to the contracts of 10-year KTB Futures spreads.

§3. Exceptions to Restriction on Quotation Input for KTB Futures Spread Trade

In applying [§50/1], if each of delivery month contract of KTB Futures are classified as the distinct contract according to the difference of underlying asset noted in [§2(1)13] of the Regulation, each of the nearest month contract next nearest month contract and farther month contract shall be classified according to the relevant underlying asset.

§4. Transitional Measures for KTB Futures Trade

(1) Notwithstanding amended provisions of [§21 through §25, §50/4, §63, §109, §110(1), §112-3/2, §153 and §158/1] of these Enforcement Rules, the amended provisions of [Annex 1], [Annex 3], [Annex 6], [Annex 9], [Annex 10], [Annex 19], [Annex 19-2] and [Annex 20] and [Annex: Form 1], the provisions of former Enforcement Rules, including the Annex and Form, shall apply to the delivery month contract of KTB Futures that has accumulated an open interest as of the market closing time of the day before the effective day of these Enforcement Rules.

(2) The amended provisions of [§21 through §25, §50/4, §63, §109, §110(1), §112-3/2, §153 and §158/1], amended provisions of [Annex 1], [Annex 3], [Annex 6], [Annex 9], [Annex 10],

[Annex 19], [Annex 19-2] and [Annex 20] and [Annex: Form 1] of these Enforcement Rules shall apply to the delivery month contract of KTB Futures that has not accumulated an open interest as of the market closing time of the day before the effective day of these Enforcement Rules,

ADDENDA
(November 12, 2010)

§1. Effective Date

These Enforcement Rules shall become effective on November 29, 2010.

§2. Exceptions to the Assessment Rate of Substitute Securities

In applying these Enforcement Rules, the provisions of [§127-2 and §127-3] shall apply *mutatis mutandis* to the determination of assessment rate of substitute securities of the quarter to which the effective date of these Enforcement Rules belongs.

ADDENDUM
(December 10, 2010)

These Enforcement Rules shall become effective on December 20, 2010. Provided that the amended provision of [§81] shall be put into effect on January 1, 2011.

ADDENDUM
(January 27, 2011)

These Enforcement Rules shall become effective on February 14, 2011.

ADDENDA
(January 31, 2011)

§1. Effective Date

These Enforcement Rules shall become effective on March 7, 2011. Provided that the amended provisions of [§128(4)] shall be put into effect on February 1, 2011 and the amended provisions of [§122, §132. §132-2, §132-3 and §146] shall be put into effect on March 28, 2011.

§2. Effective Date Specified in the Enforcement Rules of Derivatives Market Business Regulation

The “date specified in the Enforcement Rules” noted in [§1] of the Addendum of the Regulation (dated on January 26, 2011) in relation to the amendments of [§122, §124 and §154] shall refer to March 7, 2011 and the “date specified in the Enforcement Rules” noted in [§1] of the Addendum of the Regulation (dated on January 26, 2011) in relation to the amended provisions

of [§5, §111, §132 and §133] shall refer to March 28, 2011.

ADDENDA
(March 23, 2011)

§1. Effective Date

These Enforcement Rules shall become effective on April 4, 2011.

§2. Exceptions in Changing Margin Rate

When the regular session of the day before the effective date pursuant to [§1] of this Addendum is closed, the member margin, customer margin and additional customer margin shall be determined according to the amended provisions of these Enforcement Rules.

ADDENDUM
(April 21, 2011)

These Enforcement Rules shall become effective on May 3, 2011. Provided that the amended provisions of [§50/7c] shall be put into effect on May 30, 2011.

ADDENDUM
(May 18, 2011)

These Enforcement Rules shall become effective on May 30, 2011.

ADDENDUM
(June 3, 2011)

These Enforcement Rules shall become effective on June 13, 2011.

ADDENDA
(June 22, 2011)

§1. Effective Date

These Enforcement Rules shall become effective on July 1, 2011.

§2. Exceptions to Application

Provided that the amended provisions of [§82 and §90] shall also apply to the agreement for market making that has been entered as of the effective date of these Enforcement Rules.

ADDENDUM
(July 26, 2011)

These Enforcement Rules shall become effective on August 1, 2011.

ADDENDA
(September 23, 2011)

§1. Effective Date

These Enforcement Rules shall become effective on October 10, 2011.

§2. Exceptions to Change of Margin Rate

At the closing time of regular session on the day before the effective date pursuant to [§1] of this Addenda, the member margin, customer margin, additional customer margin, etc. shall be calculated in accordance with the stipulations of the amended Enforcement Rules.

ADDENDA
(October 10, 2011)

§1. Effective Date

These Enforcement Rules shall become effective on October 17, 2011.

§2. Exceptions to Change of Margin Rate

At the closing time of regular session on the day before the effective date pursuant to [§1] of this Addenda the member margin, customer margin, additional customer margin, etc. shall be calculated in accordance with the stipulations of the amended Enforcement Rules.

ADDENDA
(October 20, 2011)

§1. Effective Date

These Enforcement Rules shall become effective on October 31, 2011.

§2. Effective Date of the Derivatives Market Business Regulation

With regard to the amended provisions of [§88], [§110-2], [§124(1)2], [§132], and [§134] through [§137] of these Enforcement Rules, the “date stipulated in the Enforcement Rules” in [§1] of ADDENDA (July 6, 2011) shall refer to October 31, 2011.

ADDENDUM
(November 17, 2011)

These Enforcement Rules shall become effective on November 21, 2011.

ADDENDA
(December 20, 2011)

§1. Effective Date

These Enforcement Rules shall become effective on January 2, 2012.

§2. Exceptions to Change of Margin Rate

At the closing time of regular session on the day before the effective date pursuant to [§1] of this Addenda, the member margin, customer margin, additional customer margin, etc. shall be calculated in accordance with the stipulations of the amended Enforcement Rules.

ADDENDA
(December 28, 2011)

§1. Effective Date

These Enforcement Rules shall become effective on April 2, 2012. Provided that the amended provisions of [§48, §49-2, §50, and §165] shall be put into effect on December 29, 2011.

§2. Effective Date of the Derivatives Market Business Regulation

The date specified in the Enforcement Rules that is noted in [§1] of Addenda (July 6, 2011) of the Derivatives Market Business Regulation shall refer to the date noted in each of the following subparagraphs:

1. December 29, 2011, in the case of the amended provisions of [§65 and §116]; and
2. April 2, 2012, in the case of the amended provisions of [§8-2, §110-2, §118 through §122 and §160-2].

ADDENDA
(February 17, 2012)

§1. Effective Date

These Enforcement Rules shall become effective on March 9, 2012. Provided that the amended provisions of [§77] and [Annex: Form 4] shall be put into effect on April 16, 2012.

§2. Exceptions in Trading of Index Options

Notwithstanding [§1*m*] of this Addenda, the provisions of former version of the Enforcement Rules shall apply to the expiry month contracts of index options noted in each of the following subparagraphs:

1. April 2012;
2. May 2012; and
3. June 2012;

§3. Effective Date of Derivatives Market Business Regulation

The “date specified in the Enforcement Rules” in [§1 (however, of the amended provisions of [§81-2 and §162] of the Regulation, the request for adjustment of transaction error made by investor shall be excluded)] and [§2] of the ADDENDA of the Derivatives Market Business Regulation (Regulation No. 800) shall refer to March 9, 2012.

§4. Exceptions to Change of Cash Deposit Requirement Ratio and Cash Ratio for futures

When the regular session on the day before the effective date pursuant to [§1] of this Addenda is closed, the member shall calculate the cash deposit requirement, additional cash deposit requirement, etc. in accordance with the provisions of the amended Enforcement Rules

ADDENDUM (May 9, 2012)

These Enforcement Rules shall become effective on June 25, 2012.

ADDENDUM (July 3, 2012)

These Enforcement Rules shall become effective on July 16, 2012.

ADDENDUM (September 26, 2012)

These Enforcement Rules shall become effective on October 2, 2012.

ADDENDUM (December 18, 2012)

These Enforcement Rules shall become effective on March 18, 2013. Provided that the amended provisions of [§167] shall be put into effect on December 24, 2012, and the amended provisions of [§81, §82, §84 and §90] shall be put into effect on April 1, 2013.

ADDENDUM
(March 19, 2013)

These Enforcement Rules shall become effective on April 1, 2013.

ADDENDUM
(May 9, 2013)

These Enforcement Rules shall become effective on May 27, 2013. Provided that the amended provisions of [§74] shall be put into effect on the effective date of the KOSPI Market Listing Regulation amended on February 22, 2013.

ADDENDUM
(June 24, 2013)

These Enforcement Rules shall become effective on July 1, 2013.

ADDENDA
(July 8, 2013)

§1. Effective Date

These Enforcement Rules shall become effective on July 9, 2013. Provided that the amended provisions of [§27, §28, §29-2, §29-3, §49-2, §50, §61, §63, §72-12, §77, §79-7, §81, §105, §106, §109, §112-3, §117-3, §122, §132-2, §138, §144 through §146, §150, §151, §154, §157, §158, §164-3 and §164-4], amended provisions of [Annex 1], [Annex 6], [Annex 14], [Annex 17], [Annex 17-2], [Annex 18], [Annex 19], [Annex 20], [Annex 24] and amended [Annex: Form 9] shall be put into effect on September 30, 2013.

§2. Effective Date of the Derivatives Market Business Regulation

Pursuant to [§1] of Addenda dated July 3, 2013 of the Derivatives Market Business Regulation, the amended provisions of [§2, §22, §27, §73, §128, and §156-3 (excluding paragraph (3))] of the Regulation shall be put into effect on July 9, 2013. Provided that the amended provision of [§4, §54, §55, §71, §82-7, §100, §103 through §105, §111, §133, §137, §147 through §149, and §156-2] of the same Regulation shall be put into effect on September 30, 2013.

§3. Exceptions in Beginning of Currency Options and Calculating the Base Price of First Trading Day

(1) Pursuant to [§3] of Addenda dated July 3, 2013 of the Derivatives Market Business Regulation, on the first trading day of Currency Options (referring to the effective date noted in [§2] of Addenda), the trading of four (4) expiry month contracts of Currency Options whose

last trading day is the third Monday (to move forward sequentially if the relevant day is a market holiday) of the month noted in each of the following subparagraphs shall begin:

1. October 2013;
2. November 2013;
3. December 2013; and
4. March 2014.

(2) The provisions of [§57(1)1] shall apply *mutatis mutandis* to the calculation of base price of first trading day of currency option noted in paragraph (1).

§4. Exceptions in Reporting of Algorithmic Trading Account

(1) Pursuant to [§156-3(4)] of the Derivatives Market Business Regulation amended on July 3, 2013, despite [§156-3(2)] of the Derivatives Market Business Regulation, the opening, change of account details or closing of algorithmic trading account may be reported during the period from July 9, 2013 to September 30, 2013. In such cases, the reporting shall be accomplished by submitting the completed [Annex: Form 14] to the Exchange.

(2) The provisions of paragraph (1) shall apply retroactively to the accounts opened as of July 9, 2013, through which the algorithmic trading is carried out.

(3) The member that reported the algorithmic trading account pursuant to paragraphs (1) and (2) shall report the details of account reported pursuant to paragraphs (1) and (2) again according to the method noted in the amended provisions of [§164-4].

ADDENDUM (August 27, 2013)

These Enforcement Rules shall become effective on August 30, 2013. Provided that the amended provisions of [§84] shall be put into effect on September 30, 2013.

ADDENDUM (September 17, 2013)

These Enforcement Rules shall become effective on September 17, 2013.

ADDENDUM (December 30, 2013)

This Enforcement Rule shall become effective on the date determined by the Exchange considering the time period for the development of the computer programs.

ADDENDA (February 28, 2014)

§1. Effective Date

These Enforcement Rules shall become effective on March 3, 2014.

§2. Exceptions to Restriction on the Receipt of Excessive Quotations

Notwithstanding the amended provisions of [§164-2(1)], the Exchange may take measures in each of following subparagraphs by session that it provides for members for processing the receipt of quotations from March 3, 2014 to the day determined by the Exchange except the global trading. (Amended on May 2, 2014)

1. In cases where the average number of quotations submitted per second during the preceding three (3) seconds exceeds 200 cases, the fact that excessive quotation of a member falls under the criteria restricting the receipt of excessive quotation shall be notified to the member; and

2. In cases where the average number of quotations submitted per second during the preceding three (3) seconds exceeds 200 cases consecutively after the notification pursuant to subparagraph 1, the receipt of quotation shall be restricted for the next one (1) second.

ADDENDUM (April 18, 2014)

These Enforcement Rules shall become effective on May 16, 2014.

ADDENDUM (May 2, 2014)

These Enforcement Rules shall become effective on May 7, 2014. Provided that the amended provision in [§79(1)2p] shall become effective on June 2, 2014

ADDENDUM (July 28, 2014)

These Enforcement Rules shall become effective on July 28, 2014.

ADDENDA (August 20, 2014)

§1. Effective Date

These Enforcement Rules shall become effective on March 9, 2012.

§2. Effective Date of the Derivatives Market Business Regulation

“The day determined by the Enforcement Rules” referred to the Addenda of the Business Regulation of the Derivatives Market amended on June 3, 2013 shall be September 1, 2014.

ADDENDA
(February 28, 2014)

§1. Effective Date

These Enforcement Rules shall become effective on March 3, 2014.

§2. Exceptions to Restriction on the Receipt of Excessive Quotations

Notwithstanding the amended provisions of [§164-2(1)], the Exchange may take measures in each of following subparagraphs by session that it provides for members for processing the receipt of quotations from March 3, 2014 to the day determined by the Exchange except the global trading. (Amended on May 2, 2014)

1. In cases where the average number of quotations submitted per second during the preceding three (3) seconds exceeds 200 cases, the fact that excessive quotation of a member falls under the criteria restricting the receipt of excessive quotation shall be notified to the member; and

2. In cases where the average number of quotations submitted per second during the preceding three (3) seconds exceeds 200 cases consecutively after the notification pursuant to subparagraph 1, the receipt of quotation shall be restricted for the next one (1) second.

ADDENDUM
(April 18, 2014)

These Enforcement Rules shall become effective on May 16, 2014.

ADDENDUM
(May 2, 2014)

These Enforcement Rules shall become effective on May 7, 2014. Provided that the amended provision in [§79(1)2p] shall become effective on June 2, 2014

ADDENDUM
(July 28, 2014)

These Enforcement Rules shall become effective on July 28, 2014.

ADDENDA

(August 20, 2014)

§1. Effective Date

These Enforcement Rules shall become effective on March 9, 2012.

§2. Effective Date of the Derivatives Market Business Regulation

“The day determined by the Enforcement Rules” referred to the Addenda of the Business Regulation of the Derivatives Market amended on June 3, 2013 shall be September 1, 2014.

ADDENDA

(August 28, 2014)

§1. Effective Date

(2) The trading of nine (9) expiration month contracts of the Single Stock Options of which the last trading day is the 2nd Thursday of the month that falls under the following subparagraphs shall be started on the day that starts the trading of the Single Stock Options of underlying stocks (referring to the effective date in [§1m] of the Addenda).

1. December 2014;
2. January 2015;
3. February 2015;
4. March 2015;
5. June 2015;
6. September 2015;
7. December 2015;

- 8. June 2016; and
- 9. December 2016

§8. Exceptions to the Last Trading Days of Previous Underlying Stock of Single Stock Options

Notwithstanding the provision of [§1] of the Addenda, the last trading day of all expiration month contracts of Single Stock Options regarding the 32 previous underlying stocks [referring to KB Financial Group, Samsung Electronics, SK Telecom, POSCO, KT, KEPCO, Hyundai Motors, Kangwon Land, KIA Motors, Korean Air, Samsung C&T, Samsung SDI, Samsung Electricity-mechanics, Samsung Securities, Samsung Fire and Marine Insurance, Shinhan Financial Group, CJ, SK Innovation, LG, LG Electronics, LG Chemical, GS Holdings, KT&G, Hana Financial Group, KOGAS, Korea Tire, HanjinShipping, Hyundai Mobis, Hyundai Steels, Hyundai Heavy Industry, E-mart, LG Display] shall be November 5, 2014.

§9. Exceptions to the Rejection of Entrustments

(1) Notwithstanding amended provisions of [§119(3)6 and 7], [§119(3)6 and 7] shall not apply to general individual investors who opened the derivatives account before the effective date in the proviso to [§1] of the Addenda (referring to December 29, 2014; the same hereinafter this Article and [§10] of the Addenda) and whose the number of days holding the open interests calculated by member is 20 trading days or more within last two (2) years based on the effective date in the proviso to [§1] of the Addenda

(2) Notwithstanding amended provisions of [§119(3)6 and 7], in case where general individual investors opened the derivatives account before the effective date in the proviso to [§1] of the Addenda and entrust offsetting trade of the open interests of which the number of days of their holding the open interests calculated by member within last two (2) years based on the effective date in [§1p] of the Addenda is less than 20 trading days, [§119(3)6 and 7] shall not apply.

§10. Transitional Measures in Applying the Basic Deposit Amount

Notwithstanding the amended provisions of [§122(1)], regarding the application of the basic deposit amount, previous provisions shall apply to the derivatives accounts that were opened before the effective date in the proviso to [§1] of the Addenda [limited to those of which the number of days of holding open interests is 20 trading days or more within last two (2) years based on the effective date in the proviso to [§1] of the Addenda (those of which the number of days of holding open interests calculated for each account within last two (2) years based on the entrustment day is less than 20 trading days shall be excluded.); referred to as “existing accounts” hereinafter in this Article], and the derivatives accounts that were opened by a customer in addition to the existing accounts (referred to as “additionally opened accounts” hereinafter in this Article). In such cases, notwithstanding the proviso to [§122(1)] of the previous provisions, the members shall not apply the proviso to [§122(1)] of the previous provisions to the additionally opened accounts of the customers to whom [§122(1)1] of the previous provisions were applied by other members. (Wholly amended on October 28, 2015)

§11. Exceptions to the Report of Equity-linked Accounts by Market Makers

Notwithstanding the amended provisions of [§83(3)], market makers of Sector Index Futures,

Single Stock Futures and Single Stock Options before the effective date of the main sentence of [§1]] of the Addenda shall report the equity-linked accounts to the Exchange within five (5) trading days from the effective date of the main sentence of [§1] of the Addenda.

ADDENDUM
(November 13, 2014)

These Enforcement Rules shall become effective on November 17, 2014. Provided that the amended provision in [§111(3)] shall become effective on January 1, 2015, and the amended provision in [Annex 19] on April 1, 2015.

ADDENDUM
(December 4, 2014)

These Enforcement Rules shall become effective on December 8, 2014.

ADDENDA
(December 24, 2014)

§1. Effective Date

These Enforcement Rules shall become effective on December 29, 2014.

§2. Case of Applying the Number of Days of Holding the Open Interests

The number of days holding the open interests pursuant to amended provision of [§115(3)1] shall apply separately by dividing before and after the effective date of [§1] of the Addenda.

ADDENDUM
(March 12, 2015 / Regulation No. 1154)

These Enforcement Rules shall become effective on March 13, 2015. Provided that the amended provisions of [§90-3(2)] shall become effective on the previous day of the effective date of the main sentence, and the amended provisions of [§30], [§32-2] and [Annex 3-2] shall become effective on March 20, 2015.

ADDENDUM
(March 30, 2015 / Regulation No. 1161)

These Enforcement Rules shall become effective on April 6, 2015.

ADDENDA
(May 19, 2015 / Regulation No. 1187)

§1. Effective Date

These Enforcement Rules shall become effective on June 15, 2015. Provided that, when deemed necessary due to the occurrence of matters related to the market management such as sudden change of the economic situation, etc., they shall become effective on the date the Exchange specifies separately.

§2. Enforcement Date of the Derivatives Market Business Regulation

“The date specified by the Enforcement Rule” in the Addenda of Derivatives Market Business Regulation (amended on April 29, 2015) shall refer to the enforcement date pursuant to [§1] of the Addenda.

ADDENDUM

(May 26, 2015, Regulation No. 1189)

These Enforcement Rules shall become effective on June 15, 2015. Provided that, when deemed necessary due to the occurrence of matters related to the market management such as sudden change of the economic situation, etc., they shall become effective on the date the Exchange specifies separately.

ADDENDA

(July 3, 2015 /Regulation No. 1209)

§1. Effective Date

These Enforcement Rules shall become effective on July 20, 2015. Provided that, the amended provisions of [§67-4], [§69] and [§70] shall become effective on July 27, 2015, and [§8], [§8-2], [§8-3], [§9], [§11], [§74], [§111], [Annex 2] and the amended provisions of subparagraph 2(b) of [Annex 19] shall become effective on August 3, 2015.

§2. Effective Date of the Derivatives Market Business Regulation

Pursuant to Addendum of the Derivatives Market Business Regulation (amended on June 24, 2015), amended provisions in [§3(2)1 and 5 (excluding CNY Futures spread market)], [§10], [§11], [§12], [§19], [§96] and [§154] shall become effective on July 20, 2015

§3. Exceptions to Starting of Trading and Trading Period of Mini KOSPI 200 Futures

Notwithstanding amended provisions of [§4-6(2)], on the effective date of the Addenda [§1m], the trading of six (6) delivery month contracts of the Mini KOSPI 200 Futures of which the last trading day is the 2nd Thursday (to move forward sequentially if the relevant day is a market holiday; the same hereinafter in [§4, 5 and 6]) of the month that falls under the following subparagraphs shall be started:

1. August 2015;
2. September 2015;
3. October 2015;
4. November 2015;
5. December 2015; and
6. January 2016

§4. Exceptions to Starting of Trading and Trading Period of Mini KOSPI 200 Options

Notwithstanding amended provisions of [§5-2(2)], on the effective date of [§1m] of the Addenda, the trading of six (6) expiration month contracts of the Mini KOSPI 200 Options of which the last trading day is the 2nd Thursday of the month that falls under the following subparagraphs shall be started:

1. August 2015;
2. September 2015;
3. October 2015;
4. November 2015;
5. December 2015; and
6. January 2016

§5. Exceptions to Selection Date, Starting of Trading and Trading Period of New Underlying Stock of Single Stock Futures

(1) Pursuant to the amended provisions of [Annex: Form 2], the selection date of 31 stocks selected as new underlying stocks [referring to BNK Financial Holdings, DGB Financial Group, LG, LG Innotek, SKNetworks, SK, C&C, Grand Korea Leisure, Kumho Petro Chemical, Nexen Tire, DaumKaKao, Samsung SDS, Seoul Semiconductor, Celltrion, CJ E&M, Seegene, Amore Pacific, NH Securities, OCI, YG Entertainment, Wonik IPS, Webzen, Cheil Worldwide, Samsung C&T, Paradise, POSCO ICT, Hanwha, Hanwha Life Insurance, Hanwha Chemical, Hyundai Glovis, Hyundai Mipo Dockyard, Hyundai Marine & Fire Insurance] shall be June 30, 2015.

(2) On the day of starting the trading of the Single Stock Futures (referring to the effective date of August 3, 2015 stipulated in [§1p] of the Addenda), the trading of seven (7) delivery month contracts of the Single Stock Futures of which the last trading day is the 2nd Thursday of the month that falls under the following subparagraphs shall be started:

1. September 2015;
2. December 2015;
3. March 2016;
4. June 2016;
5. December 2016;
6. June 2017; and
7. December 2017

§6. Exceptions to Selection Date, Starting of Trading and Trading Period of New Underlying Stock of Single Stock Options

(1) Pursuant to the amended provisions of [Annex: Form 2], the selection date of 10 stocks selected as new underlying stocks [referring to LG U+, SK Innovation, SK Telecom, Samsung SDS, Amore Pacific, LG Chem, Samsung C&T, KT, Hyundai Mobis, and Hyundai Heavy Industries] shall be June 30, 2015.

(2) On the day of starting the trading of the Single Stock Options (referring to the effective date of August 3, 2015 stipulated in the proviso to [§1] of the Addenda), the trading of nine (9) delivery month contracts of the Single Stock Options of which the last trading day is the 2nd Thursday of the month that falls under the following subparagraphs shall be started:

1. August 2015;
2. September 2015;
3. October 2015;
4. December 2015;
5. March 2016;
6. June 2016;
7. December 2016;
8. June 2017; and
9. December 2017

§7. Exceptions to Change of Calculation Variables of Margin Amount

When the regular trading session of the trading day immediately preceding the effective date pursuant to the proviso to [§1] of Addenda (referring to August 3, 2015), member margins, customer margins and additional customer margins shall be calculated according to the provisions of the amended Enforcement Rules.

§8. Exceptions to Liquidity Coverage Ratio

The liquidity coverage ratio noted in amended provision in [§111] shall apply the ratio prescribed in [§3] of Addendum of the Regulations on Supervision of Banking Business (FSC Notice: 2014-43)

ADDENDUM

(August 13, 2015 /Regulation No. 1223)

These Enforcement Rules shall become effective on August 27, 2015. Provided that, the amended provisions of [Annex 19-3] shall become effective on September 21, 2015

ADDENDA

(September 16, 2015 /Regulation No. 1230)

§1. Effective Date

These Enforcement Rules shall become effective on October 5, 2015.

§2. Effective Date of the Derivatives Market Business Regulation

Pursuant to Addendum of the Derivatives Market Business Regulation (amended on June 24, 2015), amended provisions in [§3(2)3 and 5 (excluding Mini KOSPI 200 Futures spread market)], [§44] and [§46] shall become effective on October 5, 2015

§3. Exceptions to Starting of Trading of CNY Futures and Trading Period

Notwithstanding amended provisions of [§25-2], on the effective date of the Addenda [§1], the trading of eight (8) delivery month contracts of the CNY Futures of which the last trading day is the 3rd Monday (to move forward sequentially if the relevant day is a market holiday) of the month that falls under the following subparagraphs shall be started:

1. October 2015;
2. November 2015;
3. December 2015;
4. January 2016;
5. February 2016;
6. March 2016;
7. June 2016; and
8. September 2016

§4. Exceptions to Starting of Trading of KOSPI High Dividend 50, etc. and Trading Period

Notwithstanding amended provisions of [§4-6], on the effective date of [§1] of the Addendum, the trading of seven (7) expiration month contracts of the KOSPI High Dividend 50 Futures and the KOSPI Dividend Growth Futures of which the last trading day is the 2nd Thursday of the month that falls under the following subparagraphs shall be started:

1. December 2015;
2. March 2016;
3. June 2016;
4. September 2016;
5. December 2016;
6. June 2017; and
7. December 2017

ADDENDA

(October 28, 2015 / Regulation No. 1242)

§1. Effective Date

These Enforcement Rules shall become effective on November 23, 2015. Provided that, the amended provisions of [§122(1)] and [§10] of the Addenda of the Enforcement Rules of Derivatives Market Business Regulation (amended on November 13, 2014) shall become effective on November 2, 2015, the amended provisions of paragraph (6) of [Annex 19] shall become effective on the date that is separately set by the Exchange, and the amended provisions of [§8-4], [§46(1)4] (limited to the trades of Single Stock Futures spreads) and [§46(1)6] shall become effective on December 11, 2015. (Amended on November 26, 2015; December 16, 2015)

§2. Effective Date of the Derivatives Market Business Regulation

“The date stipulated in the Enforcement Rules” in the Addendum of the Derivatives Market Business Regulation (amended on October 21, 2015) shall refer to the dates classified in each of the following subparagraphs:

1. For the amended provisions of [§110], [§113], [§114], [§114-2], and [§115] of the Derivatives Market Business Regulation, November 2, 2015;
2. For the amended provisions of [§3], [§4], [§10], [§11], [§12], [§56], [§58], [§60], [§61], [§76], [§104], [§154], and [§165] of the Derivatives Market Business Regulation, November 23, 2015;
3. For the amended provisions of [§24] of the Derivatives Market Business Regulation, December 11, 2015

§3. Exceptions to Starting of Trading and Trading Periods of KOSDAQ 150 Futures

Notwithstanding the amended provisions of [§4-6(2)], on the effective date of the main sentence of [§1] of the Addenda, the trading of seven (7) delivery months contracts of KOSDAQ 150 Futures of which the last trading day is the 2ndThursday (to move forward sequentially if the relevant day is a market holiday; the same hereinafter in [§4]) of the month that falls under each of the following subparagraphs shall be started:

1. December 2015;
2. March 2016;
3. June 2016;
4. September 2016;
5. December 2016
6. June 2017; and
7. December 2017

§4. Exceptions to Starting of Trading and Trading Periods of Single Stock Futures

Notwithstanding the amended provisions of [§8-4(2)], on the effective date of [§1p] of the Addenda (referring to December 11, 2015), the trading of two (2) delivery month contracts of Single Stock Futures of which the last trading day is the 2ndThursday of the month that falls under each of the following subparagraphs shall be started: (Amended on November 26, 2015)

1. April 2016; and
2. May 2016

§5. Exceptions to the Last Trading Day and Starting of Trading of Gold Futures and Mini Gold Futures

(1) Notwithstanding the provisions of [§30(1)], the last trading day of seven (7) delivery month contracts of the former Gold Futures and Mini Gold Futures shall be November 18, 2015 (to move forward sequentially if the relevant day is a market holiday.)

(2) After the last trading days pursuant to paragraph (1), no new delivery month contracts shall be listed.

§6. Exceptions to Starting of Trading and Trading Periods of Gold Futures

Notwithstanding the amended provisions of [§29-6(2)], on the effective date of the main sentence of [§1] of Addenda, the trading of seven (7) delivery month contracts of Gold Futures of which the last trading day is the 3rd Wednesday (to move forward sequentially if the relevant day is a market holiday) of the month that falls under each of the following subparagraphs shall be started:

1. December 2015;
2. January 2016;
3. February 2016;
4. April 2016;
5. June 2016
6. August 2016; and
7. October 2016

ADDENDUM

(November 26, 2015 /Regulation No. 1256)

These Enforcement Rules shall become effective on November 30, 2015. Provided that the amended provisions of [§6-2] shall become effective on January 15, 2016.

ADDENDUM

(December 16, 2015 /Regulation No. 1268)

These Enforcement Rules shall become effective on December 21, 2015.

ADDENDUM

(December 31, 2015 /Regulation No. 1282)

These Enforcement Rules shall become effective on January 4, 2016.

ADDENDUM

(January 14, 2016 /Regulation No. 1285)

These Enforcement Rules shall become effective on January 18, 2016.

ADDENDUM

(March 8, 2016 /Regulation No. 1297)

These Enforcement Rules shall become effective on April 25, 2016.

ADDENDA

(March 21, 2016 / Regulation No. 1299)

§1. Effective Date

These Enforcement Rules shall become effective on March 28, 2016.

§2. Exceptions to Starting of Trading and Trading Periods of Sector Index Futures

On the effective date (referring to the effective day specified in [§1] of this addenda) of the Sector Index Futures underlying the indexes that were newly selected pursuant to the amended provisions of [Annex 1-2] (KOSPI200 Construction, KOSPI200 Heavy Industries and KOSPI200 Health Care), the trading of seven (7) delivery months contracts of Sector Index Futures of which the last trading day is the 2nd Thursday (to move forward sequentially if the relevant day is a market holiday) of the month that falls under each of the following subparagraphs shall be started:

1. June 2016;
2. September 2016;
3. December 2016;
4. March 2017;
5. June 2017;
6. December 2017; and
7. December 2018

§3. Adjustment of Quantity of Open Interests of Sector Index Futures

In the case of the delivery month contract which holds open interests as of the market closing on the trading day immediately preceding the effective date of these Enforcement Rules, among the sector index futures (excluding KOSPI High Dividend 50 Futures and KOSPI Dividend Growth 50 Futures), the quantity of open interests shall be adjusted to the quantity obtained by multiplying the relevant quantity by five (5).

§4. Exceptions to Calculation and Notification of Conversion Rates of Market Makers, etc.

Notwithstanding the provisions of [§1] of this Addenda, the Exchange may calculate the conversion rates and the portions of market capitalization in the index during the period from the effective date specified in the main sentence of [§1] of the Addenda of the partial amendment to the Enforcement Rules of the Restriction of Special Taxation Act (Ministerial Decree No. 555 of Ministry of Strategy and Finance) to the trading day immediately preceding the effective date of these Enforcement Rules, and notify them to the market makers.

§5. Exceptions to Change of Calculation Variables of Margin Amount

(1) When the regular trading session of the trading day immediately preceding the effective date of these Enforcement Rules is closed, member margins shall be calculated according to the provisions of the amended Enforcement Rules.

(2) Notwithstanding the amended provisions of [Annex 18], the previous provisions shall apply in calculating customer margins.

ADDENDUM

(April 14, 2016 / Regulation No. 1308)

These Enforcement Rules shall become effective on April 15, 2016.

ADDENDUM

(April 14, 2016 / Regulation No. 1310)

These Enforcement Rules shall become effective on April 25, 2016.

ADDENDUM

(May 13, 2016 / Regulation No. 1322)

These Enforcement Rules shall become effective on June 28, 2016. Provided that the amended provisions of [§111(1)] and [§111(2)1] shall become effective on May 30, 2016.

ADDENDA

(June 20, 2016 / Regulation No. 1337)

§1. Effective Date

These Enforcement Rules shall become effective on June 27, 2016. Provided that the amended provisions of [§64] shall become effective on August 1, 2016.

§2. Exceptions to Commencement of Trading and Trading Periods of Overseas Index Futures

Notwithstanding the amended provisions of [§4-6(2)], on the effective date noted in the main sentence of [§1] of this addenda, the trading of three (3) delivery months contracts of overseas index futures of which the last trading day is the last trading day of Eurex EURO STOXX 50 futures (to move forward sequentially if the relevant day is a market holiday) of the month that falls under each of the following subparagraphs shall be commenced:

1. September 2016;
2. December 2016; and
3. March 2017.

§3. Exceptions to the Regular Trading Hours for Overseas Index Futures

Notwithstanding the amended provisions of [§3-2], the regular trading hours of overseas index futures during the period from the effective date noted in the main sentence of [§1] of this addenda before August 1, 2016 shall be from 09:00 hours to 15:15 hours.

§4. Exceptions to Commencement of Trading and Trading Periods of USD Futures

Notwithstanding the amended provisions of [§25-2(2)], on the effective date noted in the main sentence of [§1] of this addenda, the trading of twelve (12) delivery months contracts of USD futures of which the last trading day is the 3rd Monday (to move forward sequentially if the relevant day is a market holiday) of the month that falls under each of the following subparagraphs shall be commenced:

1. January 2017;
2. February 2017;
3. April 2017;
4. May 2017;
5. September 2017;
6. December 2017;
7. March 2018;
8. June 2018;
9. September 2018;
10. December 2018;
11. March 2019; and
12. June 2019.

§5. Transitional Measures in applying the Number of Delivery Months and Trading Periods of Trading of USD Futures on CME Globex, etc.

(1) Notwithstanding the amended provisions of [§25-2], in the case of the trades of USD futures on CME Globex, the number of delivery months shall be four (4) from the non-quarterly months and four (4) from the quarterly months, and the trading period for each of the non-quarterly months and the quarterly months shall be six (6) months and one (1) year, respectively, as before until September 25, 2016. (Amended on September 6, 2016)

(2) Notwithstanding the amended provisions of [§25-2(2)], on September 26, 2016, the trading on CME Globex of twelve (12) delivery months contracts of USD futures of which the last trading day is the 3rd Monday (to move forward sequentially if the relevant day is a market holiday) of the month that falls under each of the following subparagraphs shall be commenced:

1. April 2017;
2. May 2017;
3. July 2017;
4. August 2017;
5. December 2017;
6. March 2018;
7. June 2018;
8. September 2018;
9. December 2018;
10. March 2019;

- 11. June 2019; and
- 12. September 2019.

ADDENDUM

(July 12, 2016 / Regulation No. 1349)

These Enforcement Rules shall become effective on July 14, 2016.

ADDENDUM

(August 31, 2016 / Regulation No. 1355)

These Enforcement Rules shall become effective on September 19, 2016.

ADDENDUM

(September 6, 2016 / Regulation No. 1358)

These Enforcement Rules shall become effective on September 12, 2016. Provided that the amended provisions of [Annex 12] and [Annex 17] shall become effective from the time of market close on September 12, 2016.

ADDENDUM

(November 21, 2016 / Regulation No. 1379)

These Enforcement Rules shall become effective on November 28, 2016.

ADDENDA

(March 13, 2017 / Regulation No. 1430)

§1. Effective Date

These Enforcement Rules shall become effective on March 27, 2017.

§2. Effective Date of the Derivatives Market Business Regulation

The “date specified in the Enforcement Rules” in the proviso to the ADDENDUM of the Derivatives Market Business Regulation (amended on February 8, 2017 and referred to as “the Regulation” in this Article) shall refer to March 27, 2017 (limited to [§154(1)1a(i) and a(ii)] of the Regulation).

§3. Special Cases concerning Quantity of Open Interests of KOSPI 200 Futures, etc.

On the effective date of these Enforcement Rules, the quantity of open interests of the settlement month contracts of KOSPI 200 futures, Mini KOSPI 200 futures, V-KOSPI 200

futures, KOSPI 200 options and Mini KOSPI 200 options shall be adjusted to the quantity obtained by multiplying the relevant quantity by two(2).

§4. Special Cases concerning Calculation of Settlement Difference for Previous day's Open Interests, etc. of KOSPI 200 Futures, etc.

On the effective date of these Enforcement Rules, the settlement difference for previous day's open interests, the intraday settlement difference for previous day's open interests and the settlement amount of the next day shall be calculated using the quantity obtained by multiplying the previous day's open interests of KOSPI 200 futures, Mini KOSPI 200 futures, V-KOSPI 200 futures, KOSPI 200 options and Mini KOSPI 200 options by two (2) as the previous day's open interests.

§5. Transitional Measures concerning Completion of Derivatives Education Courses

Notwithstanding the amended provisions of [§115(3)], the person who has completed thirty (30) hours or more of the derivatives education courses pursuant to the previous provisions of [§115(3)] shall be construed as having completed the educations stipulated in the amended provisions of subparagraphs 1 and 2 of [§115(3)].

§6. Special Cases concerning Changing Variables for Margin Calculation, etc.

When the regular trading session of the trading day immediately preceding the effective date noted in [§1] of this ADDENDA is closed, the member margins, the customer margins and the additional customer margins, etc. shall be calculated pursuant to the amended provisions of the Enforcement Rules.

ADDENDA

(May19, 2017 / Regulation No. 1452)

§1. Effective Date

These Enforcement Rules shall become effective on June 1, 2017.

§2. Effective Date of the Derivatives Market Business Regulation

The “date stipulated in the Enforcement Rules” in the ADDENDUM of the Derivatives Market Business Regulation (Regulation No. 1393 amended on December 28, 2016 and referred to as “the Regulation” in this Article) shall refer to June 1, 2017 (limited to [§92(3)& (4)] of the Regulation).

§3. Special Cases concerning Collection of Expenses

The expenses of the quarter in which these Enforcement Rules becomes effective shall be calculated and collected for the period from the effective date to the last day of the quarter.

ADDENDA

(June 15, 2017 / Regulation No. 1460)

§1. Effective Date

These Enforcement Rules shall become effective on June 26, 2017.

§2. Effective Date of the Derivatives Market Business Regulation

The “date specified in the Enforcement Rules” in the proviso to the ADDENDUM of the Derivatives Market Business Regulation (amended on February 8, 2017 and referred to as “the Regulation” in this Article) shall refer to June 26, 2017 {limited to [§3(2)1] (limited to the ETF futures market) and [§3(2)5] (limited to the ETF futures spread market), Section 6 of CHAPTER II under PART II ([§37-2] through [§37-5]), [§76(1)8] (limited to the ETF futures) and [§76(1)9], and [§155] (limited to ETF futures and ETF futures spread) of the Regulation}.

§3. Special Cases concerning Commencement of Trading and Trading Periods of ETF Futures

Notwithstanding the amended provisions of [§20-3(3)], the trading of four (4) delivery months contracts of ETF futures of which the last trading day is the 2nd Thursday of each month of the followings (to move forward sequentially if the relevant day falls on a market holiday) shall be commenced on the effective date noted in [§1] of this ADDENDA:

1. September 2017;
2. December 2017;
3. March 2018; and
3. June 2018.

ADDENDA

(September 19, 2017 / Regulation No. 1492)

§1. Effective Date

These Enforcement Rules shall become effective on September 25, 2017. Provided that the amended provisions of [§94-2(2)1] shall become effective on November 20, 2017.

§2. Special Cases concerning Timing for Calculating and Applying Assessment Rates

Notwithstanding the amended provisions of [§92(3)] and [§92-2(5)] of these Enforcement Rules, the assessment rates of the quarter in which the effective date falls shall be calculated on the day preceding the effective date and applied from the effective date to the end of the quarter following the quarter in which the effective date falls.

§3. Special Cases concerning Invalidation of Substitute Securities Ineligible for Member Margins

Notwithstanding the amended provisions of [§94-4] of these Enforcement Rules, the substitute prices for the substitute securities ineligible for member margin shall be adjusted as follows:

1. The adjustment rate shall be 25 percent from the effective date of these Enforcement Rules to September 24, 2018; and
2. The adjustment rate shall be 50 percent from September 25, 2018 to September 24, 2019.

§4. Special Cases concerning Deposit Limits per Issue of Substitute Securities

Notwithstanding the amended provisions of [§94-5] of these Enforcement Rules, the rates applied for calculation of deposit limits per issue or issuer of substitute securities shall be as follows:

1. In the case of subparagraph 1 of [§94-5(1)]: 100/100 from the effective date of these Enforcement Rules to September 24, 2018; and 75/100 from September 25, 2018 to September 24, 2019. Provided that, in the case of a security falling under subparagraph 1(b) of [§112-2] of the Enforcement Rules of KOSPI Market Business Regulation, it shall be 200/100 and 150/100, respectively; and
2. In the case of subparagraphs 3 and 4 of [§94-5(1)]: 20/100 from the effective date of these Enforcement Rules to September 24, 2018; and 15/100 from September 25, 2018 to September 24, 2019.

ADDENDUM

(September 20, 2017 / Regulation No. 1493)

These Enforcement Rules shall become effective on September 25, 2017. Provided that the amended provisions of [§32-2] shall become effective on September 27, 2017, and the amended provisions of [§72-12], [§79-8], [§118-2] and [§119(1)] shall become effective on October 23, 2017.

ADDENDUM

(November 10, 2017 / Regulation No. 1497)

These Enforcement Rules shall become effective on November 20, 2017.

ADDENDUM

(February 28, 2018 / Regulation No. 1534)

These Enforcement Rules shall become effective on March 5, 2018.

ADDENDA

(March 15, 2018 / Regulation No. 1541)

§1. Effective Date

These Enforcement Rules shall become effective on March 26, 2018.

§2. Special Cases concerning Commencement of Trading and Trading Periods of KRX 300 Futures

Notwithstanding the amended provisions of [§4-7(3)], the trading of four (4) delivery months contracts of KRX 300 futures of which the last trading day is the 2nd Thursday of each month of the followings (to move forward sequentially if the relevant day falls on a market holiday) shall be commenced on the effective date under [§1] of this ADDENDA:

1. June 2018;
2. September 2018;
3. December 2018; and
4. March 2019.

§3. Special Cases concerning Commencement of Trading and Trading Periods of KOSDAQ 150 Options

Notwithstanding the amended provisions of [§5-3(3)], the trading of six (6) expiration months contracts of KOSDAQ 150 options of which the last trading day is the 2nd Thursday of each month of the followings (to move forward sequentially if the relevant day falls on a market holiday) shall be commenced on the effective date under [§1] of this ADDENDA:

1. April 2018;
2. May 2018;
3. June 2018;
4. September 2018;
5. December 2018; and
6. March 2019.

ADDENDUM

(March 23, 2018 / Regulation No. 1547)

These Enforcement Rules shall become effective on March 26, 2018.

ADDENDUM

(June 12, 2018 / Regulation No. 1565)

These Enforcement Rules shall become effective on June 15, 2018. Provided that the amended provisions of [§56-2] shall become effective on July 2, 2018.

ADDENDA

(August 17, 2018 / Regulation No. 1576)

§1. Effective Date

These Enforcement Rules shall become effective on August 17, 2018. Provided that, notwithstanding the amended provisions of [§164-4(2)], the provisions on the foreigner's consolidated accounts shall be effective on the date separately determined by the Exchange.

§2. Special Cases concerning the Last Trading Day of Single Stock Options

Notwithstanding the provisions of [§13-2(3)] and the main sentence of [§1] of this ADDEENDA, the last trading day of each of the following expiration months contracts of singly stock options shall be the thirteenth (13th) day of September 2018. In such cases, the trading of new expiration month contracts for each of following expiration month contracts shall not be commenced:

1. December 2019;
2. June 2020; and
3. December 2020.

§3. Special Cases concerning Commencement of Trading and Trading Periods of ETF Futures

Notwithstanding the amended provisions of [§20-3(3)], the trading of four (4) delivery months contracts of TIGER China CSI 300ETF Futures of which the last trading day is the 2nd Thursday of each month of the followings (to move forward sequentially if the relevant day falls on a market holiday) shall be commenced on the effective date under the main sentence of [§1] of this ADDENDA:

1. December 2018;
2. March 2019;
3. June 2019; and
4. September 2019.

ADDENDUM

(September 7, 2018 / Regulation No. 1578)

These Enforcement Rules shall become effective on September 17, 2018. Provided that the amended provisions of [Annex 19] shall become effective on October 1, 2018.

ADDENDUM

(December 5, 2018 / Regulation No. 1600)

These Enforcement Rules shall become effective on December 10, 2018.

ADDENDUM

(December 7, 2018 / Regulation No. 1610)

These Enforcement Rules shall become effective on December 10, 2018. Provided that the amended provisions of [§50], [§60-2] and [Annex 25] shall become effective on January 2, 2019.

ADDENDUM

(January 25, 2019 / Regulation No. 1635)

These Enforcement Rules shall become effective on January 28, 2019.

ADDENDUM

(April 4, 2019 / Regulation No. 1659)

These Enforcement Rules shall become effective on April 29, 2019.

ADDENDA

(July 1, 2019 / Regulation No. 1692)

§1. Effective Date

These Enforcement Rules shall become effective on July 29, 2019.

§2. Effective Date of the Enforcement Rules of Derivatives Market Business Regulation

“Date separately determined by the Exchange” in [§1] of the ADDENDA of the Enforcement Rules of Derivatives Market Business Regulation, Regulation No. 1576 (amended on August 17, 2018) shall refer to July 29, 2019.

ADDENDA

(July 22, 2019 / Regulation No. 1707)

§1. Effective Date

These Enforcement Rules shall become effective on July 29, 2019.

§2. Effective Date of the Derivatives Market Business Regulation

“Date set by the Enforcement Rules” in the proviso to the ADDENDUM of the Derivatives Market Business Regulation, Regulation No. 1701 (amended on July 10, 2019), in the case of the amended provisions of [§89] of the Regulation concerning the restriction on deposit of member margins in the securities issued by members or related companies of members, shall refer to July 29, 2019.

ADDENDA
(July 30, 2019 / Regulation No. 1709)

§1. Effective Date

These Enforcement Rules shall become effective on September 23, 2019.

§2. Special Cases concerning Commencement of Trading and Trading Periods of Delivery Week Contracts of KOSPI 200 Options

Notwithstanding the amended provisions of [§5-4(2)], the trading of one(1) delivery week contract of KOSPI 200 options, the last trading day of which is the 4th Thursday of September 2019(to move forward sequentially if the relevant day falls on a market holiday) shall be commenced on the effective date of these Enforcement Rules.

ADDENDUM
(September 20, 2019 / Regulation No. 1732)

These Enforcement Rules shall become effective on September 23, 2019.

ADDENDA
(October 14, 2019 / Regulation No. 1739)

§1. Effective Date

These Enforcement Rules shall become effective on December 2, 2019.

§2. Effective Date of the Derivatives Market Business Regulation

“Date set by the Enforcement Rules” in the proviso to the ADDENDUM of the Derivatives Market Business Regulation, Regulation No. 1701 (amended on July 10, 2019), for the amended provisions of [§127] of the Regulation concerning improvement of basic deposit system, refers to December 2, 2019.

§3. Special Cases in applying Provisions on Amount of Basic Deposits

Notwithstanding the amended provisions of [§122(1)], the amounts of basic deposit under the former provisions (1st phase: more than KRW 5,000,000, but less than KRW 15 million; 2nd phase: more than KRW 15 million, but less than KRW 30 million; and 3rd phase: more than KRW 30 million) may apply to the customers who are applied with amounts that are lower than those under the amended provisions based on the trading day immediately preceding the effective date in [§1] of this ADDENDA (referring to December 2, 2019).

§4. Special Cases in applying Provisions on Training and Mock Trading

Notwithstanding the amended provisions of [§115(3)& (4)], the time of derivatives-related training (20 hours or more of derivatives training on futures trades and options purchasing trades or 10 hours or more of derivatives training on options selling trades, etc.) and mock trading (50 hours or more) that a customer has completed by the trading day immediately preceding the effective date in [§1] of this ADDENDA (referring to December 2, 2019) shall be included in the time of completion of the training and mock trading under the amended provisions of [§115(3)& (4)].

ADDENDA

(October 30, 2019 / Regulation No. 1743)

§1. Effective Date

These Enforcement Rules shall become effective on December 2, 2019.

§2. Effective Date of the Derivatives Market Business Regulation

“Date set by the Enforcement Rules” in the proviso to the ADDENDUM of the Derivatives Market Business Regulation, Regulation No. 1701 (amended on July 10, 2019), for the amended provisions of subparagraphs 14 and 22 (limited to the amended provisions of “[§63] and [§63-3]” of [§2], [§3], [§62], [§63], [§63-2] and [§63-3] of the Regulation concerning opening of the inter-KTB futures spreads market, refers to December 2, 2019.

ADDENDUM

(November 27, 2019 / Regulation No. 1752)

These Enforcement Rules shall become effective on July 1, 2020. (Amended on June 15, 2020)

ADDENDUM

(December 26, 2019 / Regulation No. 1767)

These Enforcement Rules shall become effective on January 2, 2020.

ADDENDUM

(March 16, 2020 / Regulation No. 1786)

These Enforcement Rules shall become effective on April 27, 2020. (Amended on April 22, 2020)

ADDENDUM

(March 17, 2020 / Regulation No. 1790)

These Enforcement Rules shall become effective on March 18, 2020.

ADDENDUM

(April 22, 2020 / Regulation No. 1800)

These Enforcement Rules shall become effective on April 27, 2020.

ADDENDUM

(May 6, 2020 / Regulation No. 1814)

These Enforcement Rules shall become effective on May 8, 2020.

ADDENDUM

(May 18, 2020 / Regulation No. 1829)

These Enforcement Rules shall become effective on May 25, 2020.

ADDENDUM

(June 15, 2020 / Regulation No. 1840)

These Enforcement Rules shall become effective on June 12, 2020.

ADDENDA

(July 30, 2020 / Regulation No. 1861)

§1. Effective Date

These Enforcement Rules shall become effective on July 31, 2020.

§2. Transitional Measures concerning Low Liquidity Products

For a product that has been designated as a low liquidity product when the Enforcement Rules were effective for more than four years, measures shall be taken after assessing the product in accordance with Annex 21 based on the day three (3) months later from the first trading day of the next month of the month the effective date of the Enforcement Rules falls.

ADDENDA

(September 3, 2020 / Regulation No. 1867)

§1. Effective Date

These Enforcement Rules shall become effective on September 7, 2020. Provided that, for the

report and negotiated trade which a member inputs the matters related to the derivatives account to the Exchange derivatives system via the member derivative system pursuant to [§114] shall start from the date set by the Exchange. The report of the matters related to the derivatives account before the Effective Date shall be made in writing.

§2. Commencement of ETF Futures Trading and Special Case regarding Trading Period

Notwithstanding [§20(3)3], trading of four (4) delivery month contracts of KODEX Top5PlusTR ETF Futures, of which the last trading day is the second Thursday (if it is a market holiday, it shall be moved forward sequentially) of the months noted in the following subparagraphs shall begin on the Effective Date of [§1] of this Addenda.

1. September 2020;
2. December 2020;
3. March 2021; and
4. June 2021.

ADDENDA

(December 2, 2020 / Regulation No. 1893)

§1. Effective Date

These Enforcement Rules shall become effective on December 7, 2019.

§2. Effective Date of the Enforcement Rules of Derivatives Market Business Regulation

“Date set by the Exchange “in relation to the implementation time of [§114(4)] stated in [§1] of the ADDENDA of the Enforcement Rules of Derivatives Market Business Regulation, Regulation No. 1867 (amended on September 3, 2020), shall refer to December 7, 2020

ADDENDUM

(December 10, 2020 / Regulation No. 1895)

§1. Effective Date

These Enforcement Rules shall become effective on December 21, 2020.

ADDENDUM

(March 8, 2021 / Regulation No. 1919)

These Enforcement Rules shall become effective on March 15, 2021.

ADDENDA

(March 9, 2021 / Regulation No. 1929)

§1. Effective Date

These Enforcement Rules shall become effective on March 15, 2021. Provided that the amended provisions of [§72-9], [§72-13] and [§132] shall become effective on March 22, 2021.

§2. Interim Measures concerning Market Making Products

For a product whose market making agreement has been concluded in accordance with the previous Regulation, and the market making is in progress (referring to KTB futures products, spreads between KTB futures products and currency futures products) as of the effective date of these Enforcement Rules, the previous Regulation and market making agreement shall be effective.

ADDENDUM

(May 18, 2021 / Regulation No. 1962)

§1. Effective Date

These Enforcement Rules shall become effective on May 20, 2021.

ADDENDUM

(June 7, 2021 / Regulation No. 1965)

§1. Effective Date

These Enforcement Rules shall become effective on June 21, 2021.

ADDENDA

(July 13, 2021 / Regulation No. 1973)

§1. Effective Date

These Enforcement Rules shall become effective on July 19, 2021. Provided that, the amended provision of [§72-9] shall become effective from July 26, 2021.

§2. Special Cases concerning Commencement of Trading and Exception to Trading Periods of Newly Listed Products

(1) The trades of KRX K-New Deal index futures newly selected pursuant to the amended provisions of [Annex 1-3] and TIGER US NASDAQ 100 ETF futures newly selected pursuant to the amended provisions of [Annex 1-4] (hereinafter referred to as “the newly listed products” in this Article) shall be commenced on the effective date of these Enforcement Rules.

(4) Notwithstanding [§4-7(3)3] and [§20-3(3)], the trading of four (4) delivery months

contracts of the newly listed products of which the last trading day is the 2nd Thursday of each month of the followings (to move forward sequentially if the relevant day falls on a market holiday) shall be commenced on the effective date under the main sentence of [§1] of this ADDENDA:

1. September 2021;
2. December 2021;
3. March 2022; and
4. June 2022.

ADDENDA

(November 25, 2021 / Regulation No. 2007)

§1. Effective Date

These Enforcement Rules shall become effective on November 29, 2021.

§2. Effective Period for Additional Exercise Prices of KOSPI200 Options and Mini KOSPI200 Options

The amended provisions of [§6(4)] shall be effective until the date separately specified by the Exchange in consideration of the time required for the development of computer program, etc.

§3. Special Cases concerning Exercise Prices of KOSPI200 and Mini KOSPI200

Notwithstanding the amended provisions of [§6(3)], the exercise price of each expiration month contract for KOSI200 option trades and Mini KOSPI200 option trades set in accordance with the previous Regulation at the time when these Enforcement Rules became effective shall be maintained until the last trading day of the relevant expiration month contract.

ADDENDA

(February 16, 2022 / Regulation No. 2023)

§1. Effective Date

These Enforcement Rules shall become effective on March 28, 2022.

§2. Effective Date of the Enforcement Rules of the Derivatives Market Business Regulation

“The day stipulated in the Enforcement Rules” in the Addenda of the Derivatives Market Business Regulation amended on November 24, 2021, Regulation No. 2004, shall be March 28, 2022.

§3. Commencement of 3-month Risk Free Benchmark Interest Rate Futures Trading and

Special Case regarding Trading Period

Notwithstanding [§25(3)3], trading of eight (8) delivery month contracts of 3-month Risk Free Benchmark Interest Rate Futures, of which the last trading day is the trading day immediately preceding the third Wednesday of the months noted in the following subparagraphs, shall begin on the Effective Date of [§1] of this Addenda.

1. April 2022;
2. May 2022;
3. June 2022;
4. July 2022;
5. August 2022;
6. September 2022;
7. December 2022; and
8. March 2023.

ADDENDUM

(March 14, 2022 / Regulation No. 2024)

These Enforcement Rules shall become effective on March 28, 2022.

ADDENDUM

(March 24, 2022 / Regulation No. 2029)

These Enforcement Rules shall become effective on March 28, 2022.

ADDENDA

(December 21, 2022 / Regulation No. 2093)

§1. Effective Date

These Enforcement Rules shall become effective on January 25, 2023.

§2. Enforcement Date of Derivatives Market Business Regulation

“The date stipulated in the Enforcement Rules” in [§1] of Addenda of the Derivatives Market Business Regulation, Regulation No. 2083 (amended on December 7, 2022), shall be January 25, 2023.

ADDENDA

(May 24, 2023 / Regulation No. 2126)

§1. Effective Date

These Enforcement Rules shall become effective on May 30, 2023. Provided that the amended

provisions in the Annexes 12 and 17 shall be effective from the market closing on May 30, 2023.

§2. Application of Market Making Products

The amended provisions of [§81(2)] shall apply from the case where a market making contract is concluded after the enforcement of these Enforcement Rules.

ADDENDUM

(June 29, 2023 / Regulation No. 2137)

These Enforcement Rules shall become effective on July 31, 2023. Provided that the amended provisions of [§8], [§8-2], [§8-3] and [§13] shall become effective on June 30, 2023.

ADDENDA

(July 18, 2023 / Regulation No. 2141)

§1. Effective Date

These Enforcement Rules shall become effective on July 31, 2023.

§2. Effective Date of Derivatives Market Business Regulation

“The date stipulated in the Enforcement Rules” in Addendum of the Derivatives Market Business Regulation, Regulation No. 2138 (amended on July 5, 2023), shall be July 31, 2023.

ADDENDUM

(September 22, 2023 / Regulation No. 2178)

These Enforcement Rules shall become effective after the market closing on October 4, 2023. Provided that the amended provisions of [§114-6(2)] shall become effective on October 4, 2023.

ADDENDUM

(November 24, 2023 / Regulation No. 2190)

These Enforcement Rules shall become effective on November 29, 2023. Provided that the amended provisions of [§20-4] and [§69] shall become effective on December 11, 2023.

ADDENDA

(February 5, 2024 / Regulation No. 2208)

§1. Effective Date

These Enforcement Rules shall become effective on February 19, 2024.

§2. Special Cases concerning Trading Periods of 30-year KTB Futures

Notwithstanding [§20-7(3)], the trading of two (2) delivery month contracts of the 30-year KTB futures of which the last trading day is the 3rd Tuesday of the month corresponding to each of the following items shall be commenced on the effective date of [§1] of these Enforcement Rules:

1. March 2024; and
2. June 2024.

ADDENDA

(April 5, 2024 / Regulation No. 2224)

§1. Effective Date

These Enforcement Rules shall become effective on April 22, 2024.

§2. Special Cases concerning Trading Periods of KOSDAQ Global Index Futures

Notwithstanding the amended provisions of [§4-7(3)3], the trading day of four (4) delivery month contracts of the KOSDAQ Global Index futures of which the last trading day is the 2nd Thursday of the month corresponding to each of the following items shall be commenced on the effective date of these Enforcement Rules:

1. June 2024;
2. September 2024;
3. December 2024; and
4. March 2025.

§3. Special Cases concerning Last Trading Day of Sector Index Futures

Notwithstanding the amended provisions of [§4-7(3)3], the last trading of contracts of which the delivery month falls under any of the following items, among sector index futures listed before the enforcement of these Enforcement Rules, shall be changed to April 19, 2024:

1. June 2025;
2. December 2025; and
3. December 2026.

§4. Special Cases concerning Last Trading Day of Single Stock Futures

Notwithstanding the amended provisions of [§8-4(3)], the last trading of contracts of which the delivery month falls under any of the following items, among single stock futures listed before the enforcement of these Enforcement Rules, shall be changed to April 19, 2024:

1. June 2025;
2. December 2025; and

3. December. 2026.

ADDENDUM

(June 25, 2024 / Regulation No. 2240)

These Enforcement Rules shall become effective on July 1, 2024.

ADDENDUM

(November 1, 2024 / Regulation No. 2263)

These Enforcement Rules shall become effective on November 4, 2024.

ADDENDUM

(March 24, 2025 / Regulation No. 2313)

These Enforcement Rules shall become effective on March 26, 2025.

ADDENDA

(April 18, 2025 / Regulation No. 2324)

§1. Effective Date

These Enforcement Rules shall become effective on May 21, 2025.

§2. Special Cases concerning Last Trading Day of Euro STOXX 50 Futures

- ① The last trading day for the eight (8) delivery months of the Euro Stoxx 50 Futures, which have been listed before these Enforcement Rules become effective, shall be May 16, 2025 (If it falls on a holiday, the date will be brought sequentially).
- ② After the last trading day specified in paragraph 1, new delivery months for Euro Stoxx 50 Futures shall not be listed.

ADDENDA

(May 29, 2025 / Regulation No. 2334)

§1. Effective Date

These Enforcement Rules shall become effective on June 9, 2025.

§2. Enforcement Date of Derivatives Market Business Regulation

“The date stipulated in the Enforcement Rules” in [§1] of Addenda of the Derivatives Market Business Regulation, Regulation No. 2327 (amended on May 2, 2025), shall be June 9, 2025.

§3. Special Case concerning Change of Trading Hours and discretionary suspension of trading due to System Failure

Notwithstanding the amended provisions of [§4(2)3], in order to determine whether the number of cleared contract of members falls under subparagraph 2 of [§4] due to a member derivatives system failure that occurs during night trading hours from the effective date of these Enforcement Rules to a date separately determined by the Exchange, the quantity of cleared contracts during regular trading hours shall be used. (Amended on October 1, 2025)

ADDENDUM

(August 18, 2025 / Regulation No. 2353)

These Enforcement Rules shall become effective on August 22, 2025.

ADDENDA

(October 1, 2025 / Regulation No. 2359)

§1. Effective Date

These Enforcement Rules shall become effective from the start of order receiving hours for call auction for opening price in the regular trading session on October 27, 2025.

§2. Special Cases concerning Commencement of Trading and Trading Period of Newly Listed Products

Notwithstanding the amended provisions of [§4-7(3)3] and [§20-3(3)], the trading day of newly listed products for the four (4) delivery month contracts with the final trading day being the 2nd Thursday (if it is a holiday, the trading day shall be sequentially brought forward) of the month corresponding to each of the following items shall be commenced after the effective date of these Enforcement Rules:

1. December 2025;
2. March 2025;
3. June 2025; and
4. September 2025.

ADDENDUM

(February 9, 2026 / Regulation No. 2409)

These Enforcement Rules shall become effective on February 11, 2026.

ADDENDA

(April 6, 2026 / Regulation No. 2428)

§1. Effective Date

These Enforcement Rules shall become effective on April 27, 2026. Provided that the amended provision of [§6] shall become effective from the start of quotation receiving hours for opening call auction of the night trading session on April 24, 2026.

§2. Special Cases concerning Commencement of Trading and Trading Period of ETF Futures

Notwithstanding the amended provisions of [§20-3(3)], on the effective day of the main sentence of [§1] of the Addenda, trading of TIGER Semi-conduct TOP 10 ETF futures for four delivery month contracts of which the last trading day is the second Thursday (if it is a holiday, it shall be moved forward sequentially) of the month falling under each of the following subparagraphs:

1. June 2026;
2. September 2026;
3. December 2026; and
4. March 2027.

ADDENDA

(April 9, 2026 / Regulation No. 2429)

§1. Effective Date

These Enforcement Rules shall become effective on April 13, 2026.

§2. Application Cases concerning Calculation Standards for Credit Risk Member Margin

In the case of a clearing member for whom an excess state of credit risk member margin has occurred and the resolution period is in progress pursuant to the former Article 94-2 as of the effective date of these Enforcement Rules, the remaining resolution period shall expire from the effective date of these Enforcement Rules, and the calculation standards for credit risk member margin shall be applied in accordance with the amended provision of [§94-2] of these Enforcement Rules.

ADDENDA

(June 11, 2026 / Regulation No. 2450)

§1. Effective Date

These Enforcement Rules shall become effective on June 29, 2026. Provided that the amended provisions of Annex 25 shall take effect from the start of the quotation hours for opening price by call auction in night trading on June 26, 2026.

§2. Effective Date of Derivatives Market Business Regulations

“The date set by the Enforcement Rules” in the Addenda of the Derivatives Market Business Regulations (amended on April 15, 2026), Regulation No. 2432, shall be June 29, 2026.

§3. Special Cases concerning Commencement of Trading and Trading Period of Week Trade Stock Options

Notwithstanding the amended provisions of [§13(3)], on the effective date of these Enforcement Rules, stock options trading for one (1) expiration week whose the last trading is the first Thursday (moving forward sequentially if it is a market holiday) of July 2026 shall start.

ADDENDUM

(July 6, 2026 / Regulation No. 2474)

These Enforcement Rules shall become effective on July 6, 2026.

[Annex 1] Base Prices of Underlying Assets

(Amended on August 21, 2009; July 30, 2010; July 8, 2013; November 3, 2014; July 3, 2015; September 16, 2015; October 28, 2015; June 20, 2016; March 13, 2017; June 15, 2017; March 15, 2018; February 16, 2022; May 24, 2023; February 5, 2024; April 5, 2024; June 25, 2024; November 1, 2024; April 18, 2025; July 6, 2026)

Base Prices of Underlying Assets

(Pertaining to [§2(1)])

Pursuant to [§2(1)], the base price of underlying asset shall be the price (if there is no such price, it shall be the price of the day moved forward in sequential order) of underlying assets falling under each of the following subparagraphs:

1. For KOSPI 200 Futures, Mini KOSPI 200 Futures, KOSPI 200 Options and Mini KOSPI200 Options: the closing value of KOSPI 200;
2. For KOSDAQ 150 Futures and KOSDAQ 150 Options: the closing value of KOSDAQ 150;
3. For KRX 300 Futures: the closing value of KRX 300;
4. For KOSDAQ Global futures: the closing value of KOSDAQ Global
5. For Sector Index Futures: the closing value of Sector Index;
6. [Deleted on April 18, 2025]
7. For V-KOSPI Futures: the closing value of V-KOSPI 200;
8. For Single Stock Futures and Single Stock Options: the closing prices of underlying stock;
9. For ETF futures: the closing price of underlying ETF;
10. For 3-year KTB Futures, 5-year KTB Futures, 10-year KTB Futures, and 30-year KTB Futures: the value obtained by substituting the settlement yield of the formula noted in each item of [§20-9(3)] with the annual yield in the morning (if there is no yield published in the morning, it shall be the annual yield published immediately before; and if the underlying basket of bonds for final settlement is more than one, it shall be the yield resulted from rounding off the arithmetic average of the yields of underlying basket of bonds for final settlement at the 4th decimal place) of the underlying basket of bonds for final settlement, which is published by the Korea Financial Investment Association (“the Association”);
11. For 3-month Risk Free Benchmark Interest Rate Futures: 100 – KOFR 3-month compound interest rate (However, in the case of calculating the margin and the resolution limit range of transaction errors, “100 – the benchmark interest rate” shall be the base price of underlying asset);
12. For USD Futures and USD FLEX Futures: the US dollar spot rate at 15:30;
13. For Currency Options: the basic rate determined and published on the next business day (referring to the business day of Seoul Money Brokerage Services) after producing the US

dollar spot rate at 15:30;

14. For JPY Futures: the KRW/JPY100 exchange rate (to be rounded off at the 3rd decimal place) calculated by multiplying 100 by the value resulted from dividing the base price of underlying asset of USD Futures by the average of selling rate and buying rate of JPY/USD published at 15:30 by an international information service provider designated by the Exchange;

15. For EUR Futures: the KRW/EUR exchange rate (to be rounded off at the 3rd decimal place) calculated by multiplying the base price of underlying asset of USD Futures by the average of selling rate and buying rate of USD/EUR published at 15:30 by an international information service provider designated by the Exchange;

16. For CNY Futures: the closing KRW/CNY exchange rate established in the spot market operated by the Seoul Money Brokerage Services;

17. For Gold Futures: the closing price of gold bullions in KRX Gold Market; and

18. For Lean Hog Futures: the average daily price of lean hog.

Notes:

1. The “international information service provider designated by the Exchange” in subparagraphs 14 and 15 shall refer to Refinitiv. Provided that, when it is deemed necessary for the market management, it shall be the information service provider designated by the Exchange for each case. (Amended on November 3, 2014)

(a) [Deleted on October 28, 2015]

(b) [Deleted on October 28, 2015]

2. In the case of newly designating or changing an international information service provider, the Exchange shall make such fact, without delay, through the electronic information delivery medium operated by the Exchange.

3. [Deleted on October 20, 2010]

4. [Deleted on October 20, 2010]

[\[Annex 1-2\] Detailed Breakdown of Markets and Regular Trading Hours and Night Trading Hours for Market and Product](#)

[March 13, 2017] (Amended on June 15, 2017; March 15, 2018; October 30, 2019; February 16, 2022; July 18, 2023; February 5, 2024; April 5, 2024; November 1, 2024; April 18, 2025; May 29, 2025; October 1, 2025)

Detailed Breakdown of Markets and Regular Trading Hours and Night Trading Hours for Market and Product

(Pertaining to [§3-2], [§3-3] and [§4-2])

1. Breakdown of Markets

Type of markets		Detailed markets
Equity Derivatives Markets	Domestic Index Futures Market	KOSPI 200 Futures Market
		Mini KOSPI 200 Futures Market
		KOSDAQ 150 Futures Market
		KRX 300 Futures Market
		KOSDAQ Global Futures Market
	Sector Index Futures Market	Futures Market for each underlying asset of sector indices noted in [Annex 1-3]
	Domestic Index Options Market	KOSPI 200 Options Market
		Mini KOSPI 200 Options Market
		KOSDAQ 150 Options Market
	Volatility Index Futures Market	V-KOSPI 200 Futures Market
Interest Rate Derivatives Markets	KTB Futures Market	Domestic Single Stock Futures Market
		Futures Market for each underlying stock
		Domestic Single Stock Options Market
		Options Market for each underlying stock
	ETF Futures Market	Futures Market for each underlying ETF
Currency Derivatives Markets	KTB Futures Market	3-year KTB Futures Market
		5-year KTB Futures Market
		10-year KTB Futures Market
		30-year KTB Futures Market
	Short-term Interest Rate Futures Market	3-month Risk Free Benchmark Interest Rate Futures Market
	Currency Futures Market	USD Futures Market
		JPY Futures Market
		EUR Futures Market

		CNY Futures Market
	Currency Options Market	UDD Options Market
Commodity Derivatives Markets	Gold Futures Market	Gold Futures Market
	Lean Hog Futures Market	Lean Hog Futures Market
Futures Spreads Markets	Domestic Index Futures Spreads Market	KOSPI 200 Futures Spreads Market
		Mini KOSPI 200 Futures Spreads Market
		KOSDAQ 150 Futures Spreads Market
		KRX 300 Futures Spreads Market
		KOSDAQ Global Futures Spreads Market
	Sector Index Futures Spreads Market	Futures Spreads Market for each underlying asset of sector indices noted in [Annex 1-3]
	Volatility Index Futures Spreads Market	V-KOSPI 200 Futures Spreads Market
	Domestic Single Stock Futures Spreads Market	Futures Spreads Market for each underlying stock
	KTB Futures Spreads Market	3-year KTB Futures Spreads Market
		5-year KTB Futures Spreads Market
		10-year KTB Futures Spreads Market
		30-year KTB Futures Spreads Market
	Inter-KTB Futures Spreads	Inter-3-year and 10-year KTB Futures Spreads Market
	Short-term Interest Rate Futures Spread Market	3-month Risk Free Benchmark Interest Rate Futures Spread Market
	Currency Futures Spreads Market	USD Futures Spreads Market
		JPY Futures Spreads Market
		EUR Futures Spreads Market
		CNY Futures Spreads Market
	Gold Futures Spreads Market	Gold Futures Spreads Market
	Lean Hog Futures Spreads Market	Lean Hog Futures Spreads Market
FLEX Markets	FLEX Futures Market	USD FLEX Futures Market

2. Regular Trading Hours by Market

Type of Markets		Regular Trading Hours
Commodity Derivatives Market	Lean Hog Futures Market	From 10:15 to 15:45
Futures Spread Market	Lean Hog Futures Spreads Market	From 10:15 to 15:45

[Annex 5] [Deleted on October 28, 2015]

[Annex 6] Codes for Input of Quotation Details

(Amended on March 18, 2009; April 6, 2009; August 21, 2009; October 20, 2010; December 10, 2010; January 27, 2011; July 26, 2011; May 9, 2012; July 3, 2012; July 8, 2013; November 3, 2014; July 3, 2015; September 16, 2015; October 28, 2015; March 21, 2016; June 20, 2016; November 21, 2016; June 15, 2017; March 15, 2018; August 17, 2018; July 30, 2019; October 30, 2019; September 3, 2020; July 13, 2021; February 16, 2022; December 21, 2022; June 29, 2023; February 5, 2024; April 5, 2024; November 1, 2024; April 18, 2025; October 1, 2025; February 9, 2026; April 27, 2026)

Codes for Input of Quotation Details

(Pertaining to [§48(5)])

Quotation details		Input codes
Member ID number		Five-digit number assigned to each member by the Exchange
Method to generate quotation		General quotation: 1, Algorithmic quotation: 2, High-speed algorithmic quotation: 3
Quotation type		Limit quotation: 1; Market quotation: 2; Limit-to-market-on-close quotation: I; Immediately Executable limit quotation: X
Conditions affixed to limit quotation		Immediate or cancel: 3; Fill or kill: 4
For quotations submitted through high-speed algorithmic trading account	High-speed algorithmic trade number	Six-digit number combining trader registration number and risk management number
	Quotation group number	Two-digit number that a member designates to apply the mass order cancellation when inputting quotations
	Self-match prevention code	Not applicable: 0, cancellation of existing quotation: 1, cancellation of new quotation: 2, cancellation of both-direction quotations
Classification of sale and purchase		Sale: 1, Purchase: 2
Contract codes	Trade types	Futures trading: 1; Call options trading: 2; Put options trading: 3; Futures spread trading: 4; Call option on futures: 5; Put option on futures: 6; FLEX Futures trade: 7. Provided that for contracts whose expiration date is arrived after 2026; Futures trading: A; Call options trading: B; Put options trading: C; Futures spread trading: D; Call option on futures: E; Put option on futures: F; FLEX Futures trade: G.
	Types of underlying assets	KOSPI 200: 01 (limited to KOSPI200 Futures and delivery month trades of KOSPI200 Options); V-KOSPI 200 Index: 04; KOSPI200 : 05 (limited to Mini KOSPI200 Futures and Mini KOSPI200 Options trades); KOSDAQ 150: 06; KRX300: 08; KOSPI 200: 09 (limited to Thursday delivery week trades of KOSPI200 Options); KOSPI200 Energy/Chemicals : A0; KOSPI200 Information Technology: A1; KOSPI200 Financial: A2; KOSPI200 Business Consumer Goods: A3; KOSPI High Dividend 50: A4; KOSPI Dividend Growth 50: A5; KOSPI200 Construction: A6; KOSPI200 Heavy Industries: A7; KOSPI200 Heal Care: A8; KOSPI200 Steels/Materials: A9; KOSPI200 Consumer Discretionary: AA; KOSPI200 Industrials: AB. KRX BBIG: AC; KRX Secondary Battery Top 10: AD; KRX Bio Top 10: AE; KOSPI200: AF (limited to Monday delivery week trades of KOSPI200 Options), KOSDAQ Global: AG, KOSDAQ Value-up: AH, KOSDAQ 150: AJ (limited to the Thursday delivery week trade of KOSDAQ 150 options), KOSDAQ 150: AK (limited to Monday delivery week trade, KRX Semiconductor; AL, underlying stocks; Codes of 10~59 and B0~BZ that the Exchange assigns according to the Guideline for Standard Code of Securities and Securities-related Financial Products. KODEX Samsung Group ETF: M0; TIGER Health Care ETF: M1; PLUS High-dividends Stock ETF: M2; TIGER China CSI300 ETF: M3; KODEX Top5Plus TR ETF: M4; TIGER US Nasdaq 100 ETF: M5, PLUS K-Defense ETF: M6, SOL Shipbuilding TOP3 PLUS ETF, M7, TIGER Semi-conduct TOP 10 ETF: M8, Benchmark 3-year KTB:

		65; Benchmark 5-year KTB: 66; Benchmark 10-year KTB: 67; Inter-3-year and 10-year KTB futures spreads: 68; KOFR 3-month compound interest rate: 69; Benchmark 30-year KTB: 70; USD: 75; JPY: 76; EUR: 77; CNY: 78; Gold bar: 85; Average daily price of lean hog: 86; gold bullion: 88	
	Last trading day	Futures, Inter-product spreads and options	The last numbers of the year and the alphabet & number of months which the last trading day belongs to (in the case of October, November, and December, A, B, and C shall be used instead of the alphabet and number of months; the same hereinafter). Provided that the codes for delivery week trades shall be those assigned by the Exchange in accordance with the “Guidelines for Management of Standard Codes of Securities and Related Financial Products”, such as 01~ZZ.
		Intra-product spreads	The last number and the alphabet of the year in which the last trading of the nearest month contract falls and the number of the month, followed by the last number of the year and the alphabet & number of months in which the last trading day of the farther months contract falls, and followed by S.
	Exercise price, etc.	KOSPI 200 Options and Mini KOSPI 200 Options: Integers of the exercise price (when the exercise price is less than 1,000 points), or the number (when the exercise price is 1,000 points or more) assigned sequentially from A01 to Z99 in chronological order (when the setting dates are the same, in ascending order of the exercise price) of the exercise price setting date; KOSDAQ 150 Options and single stock options: The number assigned in ascending order starting from 001, in chronological order of the exercise price setting date (when the setting dates are the same, in ascending order of the exercise price); currency options: Integers of the exercise price excluding the KRW units digit; USD FLEX futures: Codes assigned by the Exchange for the last trading day and final settlement method	
Quantity		The quantity of contracts intending to trade	
Price		The price at which the order be traded	
Classification of customer trade and proprietary trade	Entrusted trade	Trade entrusted: 11; Brokering of entrusted trade 12; Entrusted trade of other members: 13(ID number of the entrusting member shall be inputted together.)	
	Proprietary trade	Proprietary trade of members placing quotation: 31	
Classification of investors	Nationality	The country code (ISO3166-1) established by the International Organization for Standardization	
	Classification code of investors Resident and Non-resident Korean	Financial Investment company: 1000; Insurance companies: 2000; Collective investment vehicle: 3000; Banks: 4000; Other financial company: 5000; Pensions, funds & associations: 6000; Government, local government, international organizations & public services institutions: 7000; Other corporations: 7100; Individual: 8000	
	Classification of resident and non-resident Nationality	Korean: 00; Resident foreigner: 10; Non-resident foreigner: 20	
Account numbers of investors	Numbers of business offices	Five-digit numbers which were assigned by members and notified to the Exchange.	
	Investors' account numbers	Twelve-digit numbers assigned by members (End-investor classification codes for foreigner's consolidated accounts)	
Substitute securities account numbers		Numbers pursuant to [§48(1)12]	
Classification of accounts	Types of accounts	Customer account: 31; Proprietary account: 41; Market-making account: 42; Arbitrage/hedge-dedicated account: 51; Hedge-dedicated	

		account: 52; Algorithmic trading account: 61
	Types of end-investors	Algorithmic trading general end-investor: 63; Algorithmic trading allocating end-investor: 64; Non-algorithmic trading general end-investor: 72; Non-algorithmic trading allocating end-investor: 73
	Types of margins	Regular upfront margin: 10; Regular ex-post margin: 11; Discount ex-post margin: 12
	Classification of program trading	Stock index arbitraging and stock arbitraging: 10; Stock index hedging and stock hedging: 20; Other trades: 00
Classification of entrustment methods		Method of inputting the order information received in written form or via telephone, etc. to the member derivatives system by the employee of member using the input device in office: 1; Method of member placing quotations on the basis of the order information inputted to the member derivatives system via wire communication device by customer: 2; Method of member placing quotations on the basis of the order information inputted via wireless communication device by customers: 3; Method of member placing quotations on the basis of the order information inputted to the member derivatives system via computer by customer: 4; Method of placing quotations by other means: 9

Notes:

1. Detailed classification of “contract codes” shall be made in accordance with the “Guidelines for Managing Securities and Related Financial Products Codes”
2. In classifying the proprietary trade and customer trade, when any entrustment of proprietary trade is received from a member who has been suspended from trading, such entrustment shall be classified into "31"; when an entrustment for the management of trust assets of investment trader has been received, it shall be classified into “11” (note that it cannot be inputted as a proprietary trade).
3. The foreigners who are treated as Korean nationals pursuant to the Regulation on Financial Investment Services of the Financial Services Commission shall be deemed to be Korean.
4. In cases where the investor’s ID number in “account number of investors” has been changed, such fact shall be notified to the Exchange without delay.
5. [Deleted on April 6, 2009]
6. The exclusive account for arbitraging/hedging in “Classification of account refers to the account established for discount of margin (member margin and ex-post margin) for arbitraging and hedging.

[\[Annex 6-2\] Matters Necessary to Apply for Mass Order Cancellation, etc.](#)

[[December 21, 2022] (Amended on February 5, 2024; April 5, 2024; November 1, 2024; April 18, 2025; October 1, 2025)

Matters Necessary to Apply for Mass Order Cancellation, etc.

(Pertaining to [§54-2(1)])

1. Matters necessary to apply for mass order cancellation

Matters necessary to apply for mass order cancellation		Details
Member number		Five-digit number assigned by the Exchange to each member
High-speed algorithmic trade number		Six-digit number combining trader registration number and risk management number
Products		Ten-digit code assigned by the Exchange for each derivative product
Conditions	Contract	Contract code or all contracts
	Call option or put option	Call option: C, put option: P, call and put option: *
	Sell or buy	Sell: 1, buy: 2, sell and buy: 3
	Account number	A specific account or all accounts reported by high-speed algorithmic trader pursuant to [§156-4(3)] of the Regulation
	Quotation group number	A specific group number or the entire quotation group

Notes:

1. “Products” refers to the products noted in the table below, and the ten-digit code is separately announced by the Exchange.
2. The specific classification of “contract code” is as specified in the “Standard Code Management Guidelines for Securities and Related Financial Products”
3. The “quotation group number” refers to two-digit number designated by the member when inputting quotations in order to clarify the range of application for mass order cancellation.

2. Classification of products

Products	Details
KOSPI200 futures	Includes KOSPI200 futures spread
Mini KOSPI200 futures	Includes Mini KOSPI200 futures spread

Lean Hog futures	Includes Lean Hog futures spread

[Annex 7] Theoretical Prices of Stock Price Index Futures

(Amended on October 26, 2009; November 3, 2014; July 3, 2015; September 16, 2015; October 28, 2015; March 13, 2017; March 15, 2018; July 13, 2021; September 22, 2023; April 5, 2024; November 1, 2024; May 29, 2025; October 1, 2025)

Theoretical Prices of Stock Price Index Futures

(Pertaining to [§55(1)])

$$\bullet F = S \times \left(1 + r \times \frac{t}{365}\right) - \sum D_i$$

- KOSPI 200 Futures and Mini KOSPI 200 Futures:

$$D_i = \frac{Div_i}{MC} \times 100 \times \left(1 + f_i \times \frac{t_i}{365}\right)$$

- KOSDAQ 150 Futures, KRX 300 Futures, KOSDAQ Global Futures, and Sector Index Futures (excluding KOSPI Dividend Index Futures; the same hereinafter in this Annex):

$$D_i = \frac{Div_i}{MC} \times 1,000 \times \left(1 + f_i \times \frac{t_i}{365}\right)$$

F: Theoretical futures price (for KOSPI 200 Futures and Mini KOSPI 200 Futures, it is rounded up at the 3rd decimal place and for KOSDAQ 150 Futures, KRX 300 Futures, KOSDAQ Global Futures, and Sector Index Futures, it is rounded up at the 2nd decimal place)

S: Base price of underlying asset on the previous day

r: The interest rate applicable to the period t among the linearly interpolated coupon rates as of the morning of the previous day calculated in accordance with [§3(a)(i)] of the Annex 2 of the Enforcement Rules of the OTC Derivatives Clearing Business Regulations (if there is no coupon rate calculated in the morning, the coupon rate calculated in the morning of the day immediately before shall be used.).

t: Number of days counting from the calculation date to the last trading day

D_i: Dividend index of futures

Div_i: Total cash dividend (referring to the sum of cash dividends paid in the previous fiscal year by the issuing companies of all issues of constituent stocks of index that go ex-dividend on the same day during the remaining calculation period. Provided that, if the amount of relevant cash dividends is deemed to be inappropriate, it shall be the amount calculated by the Exchange)

MC: Base market capitalization of index on the previous day.

t_i: Number of days in remaining ex-dividend period in the remaining calculation period, counting from the ex-dividend day to the last trading day.

f_i: Forward interest rate applied to the period t_i calculated using r

Note :

1. When calculating the theoretical price during night trading hours, “the previous day” shall be considered as “the day before the day to which the regular trading hours of the relevant trading day belongs” and “calculation day” shall be considered as “the day to which the regular trading hours of the relevant trading day belongs”.
2. When calculating the theoretical price during night trading hours, Note 1 shall apply to the calculation of period *mutatis mutandis*.

[Annex 8] Theoretical Prices of Single Stock Futures

(Amended on October 26, 2009; November 3, 2014; March 13, 2017; September 22, 2023; November 1, 2024; October 1, 2025)

Theoretical Prices of Single Stock Futures

(Pertaining to [§55(1)])

$$F = S \times \left(1 + r \times \frac{t}{365} \right) - \sum D_i$$

$$D_i = Div_i \times \left(1 + f_i \times \frac{t_i}{365} \right)$$

F: Theoretical futures price (it is rounded up at the 1st decimal place)

S: Base price of the underlying asset on the previous day

r: The interest rate applicable to the period t among the linearly interpolated coupon rates as of the morning of the previous day calculated in accordance with [§3(a)(i)] of the Annex 2 of the Enforcement Rules of the OTC Derivatives Clearing Business Regulations (if there is no coupon rate calculated in the morning, the coupon rate calculated in the morning immediately before shall be used.).

t: Number of days in the remaining calculation period, counting from the calculation date to the last trading day

D_i : Future value of cash dividend per share

Div_i : Amount of cash dividend per share (referring to the cash dividend per share paid to the minority shareholders in the previous fiscal year by the issuing company of the stock that went ex-dividend during the remaining calculation period. Provided that, if the amount of the relevant cash dividends is deemed to be inappropriate, it shall be the amount calculated by the Exchange)

t_i : Number of days in the remaining ex-dividend period in the remaining calculation period, counting from the ex-dividend date to the last trading day.

f_i : Forward interest rate applied to the period t_i calculated using r

[Annex 8-2] Theoretical Prices of ETF Futures

[June 15, 2017] (Amended on September 22, 2023; November 1, 2024; October 1, 2025)

Theoretical Prices of ETF Futures

(Pertaining to [§55(1)])

$$F = S \times \left(1 + r \times \frac{t}{365} \right) - \sum D_i$$

$$D_i = Div_i \times 100 \times \left(1 + f_i \times \frac{t_i}{365} \right)$$

F: Theoretical futures price (it is rounded off at the 1st decimal place)

S: Base price of the underlying asset on the previous day

r: The interest rate applicable to the period t among the linearly interpolated coupon rates as of the morning of the previous day calculated in accordance with [§3(a)(i)] of the Annex 2 of the Enforcement Rules of the OTC Derivatives Clearing Business Regulations (if there is no coupon rate calculated in the morning, the coupon rate calculated in the morning immediately before shall be used.).

t: Number of days in the remaining calculation period, counting from the calculation date to the last trading day

D_i : Future value of cash distribution per unit

Div_i : Amount of cash distribution per unit (referring to the distribution per unit paid by the asset management company of the ETF during the latest one year. Provided that, if the amount of the relevant distribution is deemed to be inappropriate, it shall be the amount calculated by the Exchange).

t_i : Number of days of the remaining ex-distribution period in the remaining calculation period, counting from the ex-distribution date to the last trading day.

f_i : Forward interest rate applied to the period t_i calculated using r

Theoretical Prices of 3-yr KTB Futures, 5-yr KTB Futures and 10-yr KTB Futures
(Pertaining to [§55(1)])

1. The theoretical price of KTB futures shall be a figure (rounded at three decimal places) calculated according to each of the following items.

- (a) Theoretical Price of 3-year KTBs = $\sum_{i=1}^6 \frac{5/2}{(1+r/2)^i} + \frac{100}{(1+r/2)^6}$
- (b) Theoretical Price of 5-year KTBs = $\sum_{i=1}^{10} \frac{5/2}{(1+r/2)^i} + \frac{100}{(1+r/2)^{10}}$
- (c) Theoretical Price of 10-year KTBs = $\sum_{i=1}^{20} \frac{5/2}{(1+r/2)^i} + \frac{100}{(1+r/2)^{20}}$
- (d) Theoretical Price of 30-year KTBs = $\sum_{i=1}^{60} \frac{5/2}{(1+r/2)^i} + \frac{100}{(1+r/2)^{60}}$

2. In each item of subparagraph 1, “r” refers to the average forward yield of underlying bond basket for final settlement, and shall be calculated according to the following procedures.

(a) The market price of each bond that has been designated as a bond in the underlying bond basket for final settlement (hereinafter referred to as the “individual underlying bond”) shall be calculated by using the following formula while applying the annual yield of individual underlying bond in the morning of the previous day, which is published by the Korea Financial Investment Association (if there is no annual yield published in the morning, it shall be the annual yield published immediately before. Hereinafter, in this subparagraph, it is referred to as the “yield to maturity”):

$$\text{Market price} = \frac{1}{\left(1 + \frac{r_1}{2} \times \frac{d_1}{t_1}\right)} \times \left[\sum_{i=0}^{n-1} \frac{\frac{c}{2}}{\left(1 + \frac{r_1}{2}\right)^i} + \frac{100}{\left(1 + \frac{r_1}{2}\right)^{n-1}} \right] \rightarrow \text{formula (1)}$$

r_1 : Yield to maturity of individual underlying bond

d_1 : Number of days from the calculation date to the next interest payment day

t_1 : Number of days from the most recent interest payment day to the next interest payment day

n : Number of times the interest will be paid until the maturity

c : Coupon rate of individual underlying bond $\times 100$

(b) The forward prices of individual underlying bonds shall be calculated according to the following formula by applying the market price of individual underlying bonds calculated in accordance with (a).

$$\text{Forward price} = (S - I) \times (1 + r^* \times t/365)$$

S: Market price of individual underlying bond

$$I: \text{Current value of ex-interest bond} = \frac{\text{Amount of interest paid during the past six (6) months}}{1 + r_2 \times \frac{d_2}{365}}$$

r₂: In the case of ex-interest bonds, the interest rate applicable from the calculation date to the next interest payment date [referring to the interest rate calculated by linearly interpolating the average overnight call rate as at 11:30 hours of the previous day, which was published by the Korea Money Brokerage Corporation (if there is no such interest rate, it shall be the average overnight call rate as at 16:00 hours of the immediately preceding day) and the annual yields on the day before the previous day of the 91-day CDs (if there is no yield published on the relevant day, it shall be the annual yield published immediately before) and the annual yields in the morning of the previous day the 1-year Monetary Stabilization Bonds, which were published by the Korea Financial Investment Association (if there is no annual yields published in the morning, it shall be the annual yield published immediately before)]

d₂: In the case of ex-interest bonds, the number of days from the calculation date to the next interest payment day

r^{}: The interest rate applicable from the calculation date to the final settlement day [referring to the interest rate calculated by linearly interpolating the average overnight call rate as at 11:30 hours of the previous day, which was published by the Korea Money Brokerage Corporation (if there is no such interest rate, it shall be the average overnight call rate as at 16:00 hours of the immediately preceding day) and the annual yields on the day before the previous day of the 91-day CDs (if there is no yield published on the relevant day, it shall be the annual yield published immediately before) and the annual yields in the morning of the previous day of the 1-year Monetary Stabilization Bonds, which were published by the Korea Financial Investment Association (if there is no annual yields published in the morning, it shall be the annual yield published immediately before)]*

t: Number of days from the calculation date to the final settlement day

(c) The forward yield that is consistent with the forward price of individual underlying bond shall be calculated by using the formula (a) for calculation of the market prices.

(d) The average forward yields of underlying basket of bonds for final settlement shall be calculated by simply averaging the forward yields of individual underlying bonds and then rounding it at the 4th decimal place.

Note :

1. When calculating the theoretical price during night trading hours, “the previous day” shall be considered as “the day before the day to which the regular trading hours of the relevant trading day belongs” and “calculation day” shall be considered as “the day to which the regular trading hours of the relevant trading day belongs”.
2. When calculating the theoretical price during night trading hours, Note 1 shall apply to the calculation of period *mutatis mutandis*.

Theoretical Prices of 3-month Risk Free Benchmark Interest Rate Futures

(Pertaining to [§55(1)])

$F = 100$ – theoretical KOFR 3-month compound interest rate (hereinafter referred to as the “theoretical interest rate”)

F = Theoretical futures price

Theoretical interest rate: calculated by the following process (rounded to 4 decimal places)

1. Case where there are fixed benchmark interest rates during the reference period

$$\text{Theoretical interest rate} = \left[\frac{365}{N} \left\{ \prod_{i=1}^x \left(1 + \frac{R_i}{100} \times \frac{d_i}{365} \right) - 1 \right\} \right] \times 100$$

N = Number of days during the reference period

$\prod$ = Multiplication of the first term to the x th term of the sequence

x = Number of base days for calculating the benchmark interest rate up to the day when the benchmark interest rate is fixed during the reference period + 1

R_i = Benchmark interest rate fixed in the previous day (unit: %. however, if the KSD publishes a substitute interest rate, the substitute interest rate shall be regarded as the fixed benchmark interest rate) or 3-month KTB strip interest rate in the morning of the previous day (unit: %)

d_i = Number of days applied R_i ($\sum_{i=1}^x d_i = N$) (the number of days to which the benchmark interest rate or the 3-month KTB strip interest rate is applied)

2. Case where there is no fixed benchmark interest rate during the reference period

Theoretical interest rate = Forward CD interest rate during the reference period (3 months)
for each contract - Spread

A. Forward CD interest rate during the reference period ($F_{A,B}$) = The interest rate calculated according to the formula below using the discount coefficient in the morning of the previous day calculated according to subparagraph 3(a)(i) of Annex 2 of the Enforcement Rules of the OTC Derivatives Clearing Business Regulations,

which is a forward rate applied from the third Wednesday (A) of the month three months before the delivery month by contract until the third Wednesday (B) of the delivery month (includes the first day, but excludes the last day)

$$F_{A,B} = \left(\frac{DF_A}{DF_B} - 1 \right) \times \frac{365}{D(A,B)}$$

DF_A: Discount coefficient of A in the morning of previous day

DF_B: Discount coefficient of B in the morning of previous day

D(A,B): Number of days from A to B (includes the first day, but excludes the last day)

B. Spread = CD interest rate as of the day before the previous day – 3-month KTB strip interest rate as of the afternoon of the day before the previous day

Note:

1. *R_i* in subparagraph 1 shall be the fixed benchmark interest rate shall be used during the period for which the benchmark interest rate is fixed during the reference period and the 3-month KTB strip interest rate during the period for which the benchmark interest rate is not fixed during the reference period.
2. In the case where the fixed benchmark interest rate is used as *R_i* in subparagraph 1, only the benchmark interest rate fixed at the time of clearing and settlement after the daily market closing shall be reflected.

[Annex 10] [Deleted on October 20, 2010]

[Annex 11] [Deleted on January 27, 2011]

[Annex 12] Theoretical Prices of Currency Futures

(Amended on August 21, 2009; May 9, 2013; September 16, 2015; June 20, 2016; May 18, 2020; May 24, 2023; June 25, 2024; May 29, 2025)

Theoretical Prices of Currency Futures

(USD Futures, JPY Futures, EUR Futures, CNY Futures and USD FLEX Futures)

(Pertaining to [§55(1)])

$$F = S \times \frac{(1 + r \times \frac{t}{365})}{(1 + r_f \times \frac{t}{365})} = S + S \times \frac{(r - r_f) \times \frac{t}{365}}{(1 + r_f \times \frac{t}{365})}$$

F: Theoretical price of futures (to be rounded off at the 2nd decimal place)

S: Base price of underlying asset on the previous day

t: Number of days in the remaining period of calculation from calculation date to the last trading day

r: The interest rate calculated by linear interpolation of the interest rate of each of the followings:

1. The Korean won rates (referring to the Korean won rates calculated using the formula for calculation of the theoretical prices of currency futures and rounded off at the third decimal places) implied in the 1-month, 3-month, 6-month and 12-month FX-swap points (converted by dividing the average of bid and offer quotations by 100), which is published by a global information and communication service provider designated by the Exchange as of 15:30 on the previous day; and

2. The interest rates of cross-currency swaps with maturities of two and three years (the average rate of bid and offer rounded off at the third decimal place) published by the currency swap interest rate information provider designated by the Exchange as of 15:30 on the previous day

r_f: In the case of currency futures following under each of the followings, the interest rate specified in the relevant item:

a. SD Futures and USD Flex futures - The rate calculated by linearly interpolating the 1-month, 3-month, 6-month, and 12-month, 2-year, and 3-year USD SOFR OIS (Overnight Index Swap) rates (the average rate of bid and offer rounded off at the third decimal place) which are provided to the Exchange by a global information and communication service provider designated by the Exchange as of 15:30 on the previous day;

b. JPY Futures - The rate calculated by linearly interpolating the 1-month, 3-month, 6-month, and 12-month TIBOR published by the JBA on the basis of 11:00 hours of previous day;

c. EUR Futures - The rate calculated by linearly interpolating the 1-month, 3-month, 6-month, and 12-month EURIBOR published by the EBF on the basis of 11:00 hours Central European Time; and

d. CNY Futures - The rate calculated by linearly interpolating the 1-month, 3-month, 6-month and 12-month HIBOR published by the TMA on the basis of 11:15 hours Hong Kong Time of the previous day.

Notes:

1. The international information service provider designated by the Exchange shall be the Refinitiv. Provided that, with regard to the application of interest rate for the calculation of theoretical price in case it is not possible to utilize the information service provider due to the unavoidable reasons such as the natural disasters, it shall adopt the procedure that the Exchange establishes separately.

2. The currency swap interest rate information provider designated by the Exchange shall be TullettPrebon. Provided that, with regard to the application of interest rate for the calculation of theoretical price in case it is not possible to utilize the interest rate information due to the unavoidable reasons such as the natural disasters, it shall adopt the procedure that the Exchange establishes separately.

3. In cases where an international information service provider or currency swap interest rate information provider is newly designated or changed, the Exchange shall immediately make such fact public through the electronic information dissemination medium operated by it. 4. When calculating the theoretical price during night trading hours, “the previous day” shall be considered as “the day before the day to which the regular trading hours of the relevant trading day belongs” and “calculation day” shall be considered as “the day to which the regular trading hours of the relevant trading day belongs”.

5. When calculating the theoretical price during night trading hours, Note 1 shall apply to the calculation of period *mutatis mutandis*.

[Annex 13] Theoretical Prices of Gold Futures and Mini-gold Futures

(Amended on October 26, 2009; July 30, 2010; April 21, 2011; October 28, 2015; March 13, 2017; September 22, 2023)

Theoretical Prices of Gold Futures

(Pertaining to [§55(1)])

$$F = S \times (1 + r \times t/365) + I$$

F: Theoretical futures price (to be rounded off to a whole integer)

S: Base price of underlying asset on the previous day

t: Number of days in the remaining period of calculation from the calculation date to the last trading day

I: Storage fee per gram according to the standards of the Korea Securities Depository

r: The interest rate calculated by linearly interpolating the average overnight call interest rate as at 11:30 hours on the previous day, which is published by the Korea Money Broker Corporation (if there is no such interest rate it shall be the average overnight call rate as at 16:00 hours of the immediately preceding day) and the annual yields on the day before the previous day of the 91-day CDs (if there is no yield published on the relevant day, it shall be the annual yield published immediately before) and the annual yields in the morning of the previous day of the 1-year Monetary Stabilization Bonds, which are published by the Korea Financial Investment Association (if there is no annual yields published in the morning, it shall be the annual yield publishes immediately before).

[Annex 14] Rates for Quotation Price Limits

(Amended on August 21, 2009; October 26, 2009; June 18, 2010; July 30, 2010; January 27, 2011; July 8, 2013; November 3, 2014; May 19, 2015; September 16, 2015; October 28, 2015; June 20, 2016; June 15, 2017; October 30, 2019; February 16, 2022; February 5, 2024; April 18, 2025; May 29, 2025)

Rates for Quotation Price Limits

(Pertaining to [§56], [§56-2], [§59], [§59-2] and [§60])

1. Price limit rates in futures trading (Pertaining to [§56(1)] and [§56-2])

Types of trading	Rates
Index Futures	1 st Phase: 8% 2 nd Phase: 15% 3 rd Phase: 20%
Volatility Index Futures	1 st Phase: 30% / 2 nd Phase: 45% / 3 rd Phase: 60%
Single Stock Futures / ETF Futures	1 st phase: 10% / 2 nd phase: 20% / 3 rd phase: 30%
3-year KTB Futures	1.5%
5-year KTB Futures	1.8%
10-year KTB Futures	2.7%
30-year KTB futures	3.9%
3-mongh Risk Free Benchmark Interest Rate Futures	1.3%
USD Futures, USD Flex Futures, CNY Futures	4.5%
JPY Futures / EUR Futures	5.25%
Gold Futures	10%
Lean Hog Futures	21%

2. Price limit rates in options trading (Pertaining to [§59(1)] and §59(2))

Types of trading	Rates
Index options	1 st Phase: 8% / 2 nd Phase: 15% / 3 rd Phase: 20%
Single Stock Options	1 st Phase: 10% / 2 nd Phase: 20% / 3 rd Phase: 30%
Currency Options	4.5%

3. Price limit rates in futures spread trading (Pertaining to [§60(1) & (2)])

Types of trading	Rates
Index futures spreads	Regular session: 5% Night session: 2.5%
Volatility Index Futures spreads / Single Stock Futures spreads / ETF Futures spreads	10%
3-year KTB Futures spreads / Inter-3-year and 10-year Futures spreads	1.5%
5-year KTB Futures spreads	1.8%
10-year KTB Futures spreads	2.7%
30-year KTB Futures spreads	3.9%
3-mongh Risk Free Benchmark Interest Rate Futures Spread	1.3%
USD Futures spreads, JPY Futures spreads, EUR Futures spreads, CNY Futures	3%
Gold Futures spreads	5%
Lean Hog Futures spreads	10%

[Annex 15] Theoretical Prices of Stock Index Options

(Amended on October 26, 2009; November 3, 2014; July 3, 2015; March 13, 2017; March 15, 2018; July 30, 2019; October 14, 2019; November 25, 2021; September 22, 2023; November 1, 2024; May 29, 2025; October 1, 2025)

Theoretical Prices of Stock Index Options (KOSPI 200 Options and KOSDAQ 150 Options) (Pertaining to [§57(1)])

$$C = e^{(-r \times \frac{t}{365})} \times \sum_{k=0}^{49} \left[\frac{49!}{(49-k)!k!} \times P^k \times q^{(49-k)} \times C_{Tk} \right]$$

$$P = e^{(-r \times \frac{t}{365})} \times \sum_{k=0}^{49} \left[\frac{49!}{(49-k)!k!} \times P^k \times q^{(49-k)} \times P_{Tk} \right]$$

$$p = \frac{e^{(r \times \frac{t}{365} \times \frac{1}{49})} - d}{u - d}, \quad q = 1 - p$$

$$C_{Tk} = \text{Max}[(S - \sum D_i) \times u^k \times d^{(49-k)} - X, 0]$$

$$P_{Tk} = \text{Max}[X - (S - \sum D_i) \times u^k \times d^{(49-k)}, 0]$$

KOSPI 200 Options:

$$D_i = \frac{\text{Div}_i}{MC} \times 100 \times e^{(-r_i \times \frac{t_i}{365})}$$

KOSDAQ 150 Options:

$$D_i = \frac{\text{Div}_i}{MC} \times 1,000 \times e^{(-r_i \times \frac{t_i}{365})}$$

$$u = e^{\sigma \times \sqrt{\frac{t}{365} \times \frac{1}{49}}}, \quad d = e^{-\sigma \times \sqrt{\frac{t}{365} \times \frac{1}{49}}}$$

C: Theoretical call option price (to round up at the 3rd decimal place)

P: Theoretical put option price (to round up at the 3rd decimal place)

e: Base of natural logarithm

r: The interest rate applicable to the period t among the linearly interpolated coupon rates as of the morning of the previous day calculated in accordance with [§3(a)(i)] of the Annex 2 of the Enforcement Rules of the OTC Derivatives Clearing Business Regulations (if there is no coupon rate calculated in the morning, the coupon rate calculated in the morning immediately before shall be used.).

t: Number of days in the remaining calculation period, counting from the calculation date to the last trading day.

C_{Tk}: Price of call option at the time of option exercise

P_{Tk}: Price of put option at the time of option exercise

p: Probability of the price of underlying asset going up

q: Probability of the price of underlying asset going down

u: Rate of price increase of underlying asset (rates of increase of stock price indices)

d: Rate of price decrease of underlying asset (rates of decrease of stock price indices)

S: Base price of the underlying asset on the previous day

x: Exercise price

D_i: Dividend index

Div_i: Total amount of cash dividends (referring to the sum of cash dividends paid in the previous fiscal year by the issuing companies of constituent stocks of the indices that go ex-dividend on the same day during the remaining calculation period. Provided that, if the amount of the relevant cash dividends is deemed to be inappropriate, it shall be the amount calculated by the Exchange)

MC: Base market capitalization of the stock price index on the previous day

t_i: Number of days in remaining dividend period, counting from the calculation date to the day before ex-dividend in the remaining calculation period

r_i: The interest rate applicable to the period *t_i* among the linearly interpolated coupon rates as of the morning of the previous day calculated in accordance with [§3(a)(i)] of the Annex 2 of the Enforcement Rules of the OTC Derivatives Clearing Business Regulations (if there is no coupon rate calculated in the morning, the coupon rate calculated in the morning immediately before shall be used.).

σ: Volatilities classified as follows. Provided that, in cases where the relevant volatility is deemed to be inappropriate, it shall be the annual volatility of stock price indices calculated by the Exchange for each case.

1. For KOSPI 200 options: The previous day's linearly interpolated volatilities that the Exchange calculates by linearly interpolating previous day's annual implied volatilities or previous day's linearly interpolated volatilities of a contract with adjacent exercise prices per put option or call option in which the contract subject to calculation for each delivery week trade or delivery month trade belongs (contracts with no transactions shall be excluded), and in cases where there is one single contract adjacent to the contract subject to calculation, previous day's annual implied volatility or previous day's linearly interpolated volatility of the relevant adjacent contract shall be the previous day's linearly interpolated volatility of the relevant contract subject to calculation. Provided that, in cases where there are no transactions for all contracts with adjacent exercise prices, it shall be the volatility in each of the following items:

- (a) Delivery month trades: The previous day's linearly interpolated volatility that the Exchange calculated by linearly interpolating the previous day's annual implied volatility or the previous day's linearly interpolated volatility of a contract, whose number of days in the remaining calculation period is adjacent, per put option or call option to which the contract subject to calculation belongs; and

- (b) Delivery week trades: The average annual implied volatility of KOSPI200 options on the previous day calculated by the method in subparagraph 2(a).

2. For KOSDAQ 150 options:

- (a) Delivery month trades: The average annual implied volatility of the previous day, as calculated by the Exchange using the second calculation formula below, with weighting applied to the strike price weighting calculated according to the first calculation formula below and the previous day's contract quantity, (referring to the ratio calculated by dividing the absolute value obtained by subtracting the exercise price from the previous day's underlying asset reference price by the previous day's underlying asset reference price; the same hereinafter) for each put option or call option to which the contract subject to calculation belongs, among the two near-month contracts (referring to the two (2) contract months whose final trading dates occur first based on the calculation date; the same hereinafter) whose strike price deviation is within 5%.

- (b) Delivery week trades: The average annual implied volatility of the previous day, as calculated by the Exchange according to the second calculation formula, with weighting applied to the strike price weighting calculated according to the first calculation formula below and the previous day's contract quantity, for each put option or call option to which the contract subject to calculation belongs, among contracts whose strike price deviation is within 5%. Provided that, in cases where there are no transactions for any delivery month contracts whose strike price deviation is within 5%, it shall be the average annual implied volatility of the previous

day calculated according to (a).

$$\text{Distance Factor} = \frac{(\text{DistanceRatioOfExercise Price} - 0.05)^2}{0.05^2}$$

Average Annual Implied Volatility

$$= \frac{\sum (\text{Annual Implied Volatility} \times \text{Execution Quantity} \times \text{Price Weighted On Exercise Price})}{\sum (\text{Execution Quantity} \times \text{Price Weighted On Exercise Price})}$$

Note :

1. When calculating the theoretical price during night trading hours, “the previous day” shall be considered as “the day before the day to which the regular trading hours of the relevant trading day belongs” and “calculation day” shall be considered as “the day to which the regular trading hours of the relevant trading day belongs”.
2. When calculating the theoretical price during night trading hours, Note 1 shall apply to the calculation of period *mutatis mutandis*.

[Annex 16] Theoretical Prices of Single Stock Options

(Amended on October 26, 2009; November 3, 2014; March 13, 2017; September 22, 2023; November 1, 2024; October 1, 2025; June 11, 2026)

Theoretical Prices of Single Stock Options

(Pertaining to [§57(1)])

$$C = e^{(-r \times \frac{t}{365})} \times \sum_{k=0}^{49} \left[\frac{49!}{(49-k)!k!} \times P^k \times q^{(49-k)} \times C_{Tk} \right]$$

$$P = e^{(-r \times \frac{t}{365})} \times \sum_{k=0}^{49} \left[\frac{49!}{(49-k)!k!} \times P^k \times q^{(49-k)} \times P_{Tk} \right]$$

$$p = \frac{e^{(r \times \frac{t}{365} \times \frac{1}{49})} - d}{u - d}, \quad q = 1 - p$$

$$C_{Tk} = \text{Max}[(S - \sum D_i) \times u^k \times d^{(49-k)} - X, 0]$$

$$P_{Tk} = \text{Max}[X - (S - \sum D_i) \times u^k \times d^{(49-k)}, 0]$$

$$D_i = \text{Div}_i \times e^{(-r \times \frac{t_i}{365})}$$

$$u = e^{\sigma \times \sqrt{\frac{t}{365} \times \frac{1}{49}}}, \quad d = e^{-\sigma \times \sqrt{\frac{t}{365} \times \frac{1}{49}}}$$

C: Theoretical call option price (to round up at the 3rd decimal place)

P: Theoretical put option price (to round up at the 3rd decimal place)

e: Base of natural logarithm

r: The interest rate applicable to the period *t* among the linearly interpolated coupon rates as of the morning of the previous day calculated in accordance with [§3(a)(i)] of the Annex 2 of the Enforcement Rules of the OTC Derivatives Clearing Business Regulations (if there is no coupon rate calculated in the morning, the coupon rate calculated in the morning immediately before shall be used.).

t: Number of days in the remaining calculation period, counting from the calculation date to the last trading day.

C_{Tk}: Price of call option at the time of option exercise

P_{Tk}: Price of put option at the time of option exercise

p: Probability of the price of underlying asset going up

q: Probability of the price of underlying asset going down

u: Rate of increase of the underlying asset price (rate of increase of underlying stock)

d: Rate of decrease of the underlying asset price (rate of decrease of underlying stock)

S: Base price of the underlying asset on the previous day

x: Exercise price

D_i: Current value of cash dividend per share

Div_i: Cash dividend per share (referring to the cash dividends per share paid in the previous fiscal year by the issuing company of underlying stock that go ex-dividend during the remaining calculation period. Provided that, if the amount of the relevant cash dividends is deemed to be inappropriate, it shall be the amount calculated by the Exchange)

t_i: Number of days in remaining dividend period, counting from the calculation date to the day before ex-dividend day in the remaining calculation period

r_i: The interest rate applicable to the period *t_i* among the linearly interpolated coupon rates as of the morning of the previous day calculated in accordance with [§3(a)(i)] of the Annex 2 of the Enforcement

Rules of the OTC Derivatives Clearing Business Regulations (if there is no coupon rate calculated in the morning, the coupon rate calculated in the morning immediately before shall be used.).

σ: Volatility classified in each of the followings. Provided that, in cases where such average annual implied volatility is deemed to be inappropriate, it shall refer to the annual volatility of underlying stock calculated by the Exchange for each case).

1. Expiration month trade: Previous day's average annual implied volatility calculated by the Exchange according to the second formula below by weighting the exercise price weight produced according to the first formula below and the execution quantity of the immediately preceding trading day, for contracts whose the exercise price disparate ratio (referring to the ratio obtained by dividing the absolute value of the difference between the previous day's underlying asset base price and the exercise price by the previous day's underlying asset base price; the same hereinafter) is within 5%, from among the two (2) nearby month contracts (referring to the two (2) expiration month contracts whose last trading day arrives first based on the theoretical price calculation date) for each put options or call options subject to theoretical price calculation.

2. Expiration week trade: Previous day's average annual implied volatility calculated by the Exchange according to the second formula below by weighting the exercise price weight produced according to the first formula below and the execution quantity of the immediately preceding trading day, for contracts whose the exercise price disparate ratio (referring to the ratio obtained by dividing the absolute value of the difference between the previous day's underlying asset base price and the exercise price by the previous day's underlying asset base price; the same hereinafter) is within 5%, for each put options or call options subject to theoretical price calculation. Provided that, if there are no truncations for any of the contracts whose the exercise price disparate ratio is within 5 %, the average annual implied volatility of the previous day calculated according to item 1 above shall be used.

$$\text{Exercise Price Weight} = \frac{(\text{Distance Ratio of Exercise Price} - 0.015)^2}{0.015^2}$$

Average Annual Implied Volatility

$$\frac{\sum(\text{Annual Implied Volatility} \times \text{Execution Quantity Weight} \times \text{Exercise Price Weight})}{\sum(\text{Execution Quantity Weight} \times \text{Exercise Price Weight})}$$

[Annex 17] Theoretical Prices of USD Options

(Amended on October 26, 2009; September 16, 2015; September 6, 2016; May 24, 2023; June 25, 2024)

Theoretical Prices of USD Options

(Pertaining to [§57(1)])

$$C = S \times e^{(-r_f \times \frac{t}{365})} \times N(d_1) - X \times e^{-r \times \frac{t}{365}} \times N(d_2)$$

$$P = X \times e^{(-r \times \frac{t}{365})} \times N(-d_2) - S \times e^{(-r_f \times \frac{t}{365})} \times N(-d_1)$$

$$d_1 = \frac{\ln(\frac{S}{X}) + (r - r_f + \frac{\sigma^2}{2}) \times \frac{t}{365}}{\sigma \sqrt{\frac{t}{365}}}$$

$$d_2 = d_1 - \sigma \sqrt{\frac{t}{365}}$$

C: Theoretical call option price (to round up at the 2nd decimal place)

P: Theoretical put option price (to round up at the 2nd decimal place)

s: Price of underlying asset on the previous day

σ: Volatility (referring to an average annual implied volatility of the previous day calculated by the Exchange for the two (2) nearby month contracts with the exercise price disparate rate less than 5/100 per put options or call options in which the contract subject to calculation belongs, on the day immediately before the calculation date, which is weighted on the exercise price and execution quantity of the previous day. Provided that, in cases where such average annual implied volatility is deemed to be inappropriate, it shall refer to the annual volatility of underlying stock calculated by the Exchange for each case).

$$\text{Distance Factor} = \frac{(\text{Distance Ratio of Exercise Price} - 0.015)^2}{0.015^2}$$

Average Annual Implied Volatility

$$= \frac{\sum (\text{Annual Implied Volatility} \times \text{Execution Quantity} \times \text{Price Weighted on Exercise Price})}{\sum (\text{Execution Quantity} \times \text{Price Weighted on Exercise Price})}$$

x: Exercise price

r: The interest rate determinate by linearly interpolating the Korean won rates (referring to the Korean won rates calculated using the formula for calculation of the theoretical prices of currency futures in [Annex 12] and rounded off at the third decimal places) implied in the 1-month, 3-month and 6-month FX-swap points (converted by dividing the average of bid and offer quotations by 100), which is published by an international information service provider designated by the Exchange as of 15:30 on the previous day.

r_f: The rate calculated by linearly interpolating the 1-month, 3-month, and 6-month USD SOFR OIS (Overnight Index Swap) rates (the average rate of bid and offer rounded off at the third decimal place) which are provided to the Exchange by a global information and communication service provider designated by the Exchange as of 15:30 on the previous day:

t: Number of days counting from the calculation date to the last trading day

ln: Natural logarithm function

e: Base of natural logarithm

N(d): Cumulative standard normal distribution function

Notes:

1. The international information service provider designated by the Exchange shall be the Refinitiv. Provided that, with regard to the application of interest rate for the calculation of theoretical price in case it is not possible to utilize the information service provider due to the unavoidable reasons such as the natural disasters, it shall adopt the procedure that the Exchange establishes separately.
2. In cases where an international information service provider is newly designated or changed, the Exchange shall immediately make such fact public through the electronic information dissemination medium operated by it.

[\[Annex 17-2\] Quotation quantity limits and accumulated quotation quantity limits](#)

[February 17, 2012] (Amended on July 8, 2013; August 28, 2014; November 3, 2014; July 3, 2015; September 16, 2015; October 28, 2015; June 20, 2016; March 13, 2017; June 15, 2017; March 15, 2018; September 7, 2018; October 30, 2019; February 16, 2022; June 29, 2023; February 5, 2024; November 1, 2024; April 18, 2025; May 29, 2025)

Quotation quantity limits and accumulated quotation quantity limits

(Pertaining to [§61] and [§79-7])

1. Quotation quantity limits

Products		Quotation quantity limits
Futures	KOSDAQ 150 Future, KOSDAQ Global Futures, Sector Index Futures, 3-yr KTB Futures, 5-yr KTB Futures, 10-yr KTB Futures, 30-yr KTB Futures, 3-month Risk Free Benchmark Interest Rate Futures,, Gold Futures, Lean Hog Futures	Regular session: 1,000 (100) contracts Night session: 500 (50) contracts
	KOSPI200 Futures, KRX 300 Futures, V-KOSPI 200 Index Futures, ETF Futures	Regular session: 2,000 (200) contracts Night session: 1,000 (100) contracts
	USD Futures, JPY Futures, EUR Futures, CNY Futures	Regular session: 5,000 (500) contracts Night session: 2,500 (250) contracts
	Mini KOSPI200 Futures	Regular session: 10,000 (1,000) contracts Night session: 5,000 (500) contracts
	Single Stock Futures	The quantity separately determined by the Exchange from among 1,000 (100) contracts, 2,000 (200) contracts, 5,000 (500) contracts and 10,000 (1,000) contracts.
Futures spreads	KOSDAQ 150 Future spreads, KOSDAQ Global Futures spreads, Sector Index Futures spreads, Inter-3-yr and 10-yr KTB Futures spreads	Regular session: 1,000 contracts Night session: 500 contracts
	KOSPI200 Future spreads, KRX 300 Futures spreads, V-KOSPI 200 Index Futures spreads, ETF Futures spreads, 5-yr KTB Futures spreads, 10-yr KTB Futures spreads, 30-yr KTB Futures spreads, Gold Futures spreads, Lean Hog Futures spreads	Regular session: 2,000 contracts Night session: 1,000 contracts
	3-yr KTB Futures spreads, 3-month Risk Free Benchmark Interest Rate Futures Spread	Regular session: 5,000 contracts Night session: 2,500 contracts
	Mini KOSPI200 Futures spreads, USD Futures spreads, JPY Futures spreads, EUR Futures spreads, CNY Futures spreads	Regular session: 10,000 contracts Night session: 5,000 contracts
	Single Stock Futures spreads	The quantity separately determined by the Exchange from among 1,000 contracts, 2,000 contracts, 5,000 contracts and 10,000 contracts.
Options	KOSDAQ 150 Options	Regular session: 1,000 (100) contracts Night session: 500 (50) contracts

	KOSPI200 Options	Regular session: 2,000 (200) contracts Night session: 1,000 (100) contracts
	Currency Options	5,000 (500) contracts
	Mini KOSPI200 Options	Regular session: 10,000 (1,000) contracts Night session: 5,000 (500) contracts
	Single Stock Options	The quantity separately determined by the Exchange from among 1,000 (100) contracts, 2,000 (200) contracts, 5,000 (500) contracts and 10,000 (1,000) contracts.

Note: The number in parentheses of the quotation quantity limit refers to the quotation quantity limit when the product is a low liquidity product.

2. Accumulated quotation quantity limits and calculation methods

(a) Accumulated quotation quantity limits

Account types			Limits on accumulated quotation quantity
Own-account Ex-post margin account	KOSPI200 Futures (including futures spread) and KOSPI200 Options	Algorithmic trading account	Regular session: 15,000 contracts per upward or downward direction Night session: 7,500 contracts per upward or downward direction
		Non-algorithmic trading account	Regular session: 30,000 contracts per upward or downward direction Night session: 15,000 contracts per upward or downward direction
	Mini KOSPI200 Futures (including futures spread) and Mini KOSPI200 Options	Algorithmic trading account	Regular session: 75,000 contracts per upward or downward direction Night session: 37,500 contracts per upward or downward direction
		Non-algorithmic trading account	Regular session: 150,000 contracts per upward or downward direction Night session: 75,000 contracts per upward or downward direction

(b) Calculation methods of accumulated quotation quantity limits

	Calculation methods
Upward direction	$\sum(\text{Quantity of bid quotes of futures} + \text{Quantity of bid quotes of futures already submitted}) + \sum(\text{Quantity of quotes for futures spreads} + \text{Quantity of quotes for futures spreads already submitted}) + \sum(\text{Quantity of bid quotes for call option} + \text{Quantity of bid quotes for call option already submitted}) \times \text{Delta} \times \text{Multiplier ratio} + \sum(\text{Quantity of quotes for put options} + \text{Quantity of quotes for put options already submitted}) \times \text{Delta} \times \text{Multiplier ratio}$

	of ask quotes for put option + Quantity of ask quotes for put option already submitted) × Delta × Multiplier ratio
Downward direction	$\sum(\text{Quantity of ask quotes of futures} + \text{Quantity of ask quotes of futures already submitted}) + \sum(\text{Quantity of quotes for futures spreads} + \text{Quantity of quotes for futures spreads already submitted}) + \sum(\text{Quantity of ask quotes for call option} + \text{Quantity of ask quotes for call option already submitted}) \times \text{Delta} \times \text{Multiplier ratio} + \sum(\text{Quantity of bid quotes for put option} + \text{Quantity of bid quotes for put option already submitted}) \times \text{Delta} \times \text{Multiplier ratio}$

Notes:

1. Quotation quantity refers to the quantity of quotations to be submitted to the Exchange.
2. Quotation quantity already submitted referred to the quantities of quotations already submitted to the Exchange, but not yet matched.
3. Delta refers to the delta at the market closing time of immediately preceding day that are made available by the Exchange for the management of quantity of open interests held.
4. Multiplier ratio = Options multiplier / Futures multiplier
5. The calculation of the accumulated quotation quantity limit for regular session shall be based only on the quotation quantity submitted during quotation receiving hours for regular session and the quotation quantity already submitted, and the calculation of the accumulated quotation quantity limit for night session shall be based only on the quotation quantity submitted during quotation receiving hours for night session and the quotation quantity already submitted.

[Annex 17-3] [Deleted on August 28, 2014]

[Annex 18] Calculation of Net Exposure Margins

(Amended on April 6, 2009; August 21, 2009; October 26, 2009; October 20, 2011; November 17, 2011; July 8, 2013; July 3, 2015; March 8, 2016; March 21, 2016; June 20, 2016; October 14, 2019; May 29, 2025)

Calculation of Net Exposure Margins

(Pertaining to [§94] and [§134])

1. Net exposure margin

As the amount of maximum net loss that may results from the quantity of open interests, final settlement quantity and exercise settlement quantity when the price, value or volatility of underlying asset fluctuate by a certain level, it shall be the sum of the amounts of net exposure margin calculated for each of product groups noted in [Annex 19]. Provided that, if the sum is less than zero, it shall be zero.

$$\text{Net exposure margin} = \text{Max}(\sum \text{Net exposure margin per product group}, 0)$$

2. Net exposure margin of product group

Net exposure margin of product group shall be determined by adding the option premium margin to the larger amount between the sum of price volatility margin, futures spread margin, delivery margin and margin before determination of final settlement price and minimum net exposure margin and the minimum net exposure margin, which were calculated for the trades belong to the same product group.

$$\text{Net exposure margin of product group} = \text{Max} \{ \text{Price volatility margin} + \text{Futures spread margin} + \text{Physical delivery margin} + \text{Margin before determination of final settlement price}, \text{Minimum net exposure margin} \} + \text{Option premium margin}$$

(a) Option premium margin

Option premium margin shall be the sum of option premium margins calculated per contract for the quantity of open interests resulted from option trade.

- Option premium margin = $\sum$ Option premium margin per contract
- Option premium margin per contract
= (Number of open short interest positions x Base price for margin calculation for options x Multiplier) - (Number of open long interest positions x Base price for margin calculation for options x Multiplier)

(b) Price volatility margin

Price volatility margin shall be the highest amount of the amounts that are calculated for the quantity of open interests of derivative trade per same sequence of margin interval value.

(i) Margin interval value

Margin interval value shall be determined as follows, while considering the change of underlying asset price (dividing the difference between the value when the price of underlying asset rises as much as the margin rate and the value when the price of underlying asset drops as much as the margin rate by a fixed interval) and the change of price volatility (rate of increase and decrease of implied volatility per option contract):

- Ⓐ One (1) margin interval of base price of underlying asset;
- Ⓑ Two (2) margin intervals when the base price of underlying asset goes up or goes down as much as the margin rate; and
- Ⓒ As the margin interval values that are within the margin interval values noted in Ⓑ, the values obtained by consecutively subtracting or adding the amount resulted from multiplying the base price of underlying asset by specific percentage (1/15 for customer margin and 1/10 for member margin and maintenance margin) of margin rate from and to the base price of underlying asset.
- Ⓓ Margin interval that takes into account each rate of increase and decrease of volatility (the rate of increase and decrease shall be 30% while taking into account the price volatility of underlying asset) for the interval value under Ⓐ, Ⓑ and Ⓒ.

Margin Interval Values

Member margin (Maintenance margin)					Customer margin				
No.	futures/options cause of price volatility		futures interval value	options interval value	No.	Futures/options Cause of price volatility		futures interval value	options interval value
	Change of underlying asset price	Change of volatility				Change of underlying asset price	Change of volatility		
					1	S ₋₁₅	High	S ₋₁₅	f(S ₋₁₅ H)
					2		Low	S ₋₁₅	f(S ₋₁₅ L)
					.		.	.	.
1	S ₋₁₀	High	S ₋₁₀	f(S ₋₁₀ H)	11	S ₋₁₀	High	S ₋₁₀	f(S ₋₁₀ H)
2		Low	S ₋₁₀	f(S ₋₁₀ L)	12		Low	S ₋₁₀	f(S ₋₁₀ L)
.	.	.	.	.	.	.	.	.	.
21	S ₀	High	S ₀	f(S ₀ H)	31	S ₀	High	S ₀	f(S ₀ H)
22		Low	S ₀	f(S ₀ L)	32		Low	S ₀	f(S ₀ L)
.	.	.	.	.	.	.	.	.	.
41	S ₊₁₀	High	S ₊₁₀	f(S ₊₁₀ H)	51	S ₊₁₀	High	S ₊₁₀	f(S ₊₁₀ H)
42		Low	S ₊₁₀	f(S ₊₁₀ L)	52		Low	S ₊₁₀	f(S ₊₁₀ L)
					.	.	.	.	.
					61	S ₊₁₅	High	S ₊₁₅	f(S ₊₁₅ H)
					62		Low	S ₊₁₅	f(S ₊₁₅ L)

Member (Maintenance) margin: $S_k = S_0 \times (1 + k \times \text{Margin rate}/10)$, $\{k=0, \pm 1, \pm 2, \dots, \pm 10\}$

Customer Margin: $S_k = S_0 \times (1 + k \times \text{Margin rate}/15)$, $\{k=0, \pm 1, \pm 2, \dots, \pm 15\}$

S₀: Base price of underlying asset

H (rising volatility) = Implied volatility x (1 + Rate of volatility increase)

L (falling volatility) = Implied volatility x (1 - Rate of volatility decrease)

f(..): Formula for theoretical option price

(ii) Calculation of price volatility margin

- Ⓐ When there are no trade involving different underlying assets within the same product group

It shall be the amount of price volatility margin at the margin interval value where the margins for price volatility determined by adding the margin for futures price volatility and margin for option price volatility calculated for the margin interval value at the same consecutive order becomes the largest.

- Price volatility margin = Max (Price volatility margin for the margin interval value at the same consecutive order)
- Amount determined for each margin interval value = Futures Price volatility margin for + Options price volatility margin
- Futures price volatility margin = $\sum \{ \text{Quantity of long open interests by contract} \times (\text{Base price of underlying asset} - \text{Margin interval value}) \times \text{Multiplier} \} \times \sum \{ \text{Quantity of short} \}$

open interests by contract $\times$ (Margin interval value – Base price of underlying asset) $\times$ Multiplier}

• Options price volatility margin = Sum of margins for option price volatility per product group + Sum of margins for option price volatility per contract

1. For options contracts of which underlying asset is KOSPI200: Margins for option price volatility per product group. Provided that members may calculate the margins for option price volatility using the method under subparagraph 2 even for options contracts of which underlying asset is KOSPI200.

= Quantity of open interests resulting from call option purchase $\times$ (Base price for Margin – Theoretical margin price) $\times$ Max(Multipliers of contracts with same underlying assets) + Quantity of open interests resulting from call option sale $\times$ (Base price for margin – Theoretical margin price) $\times$ Max(Multipliers of contracts with same underlying assets) + Quantity of open interests resulting from put option purchase $\times$ (Base price for margin – Theoretical margin price) $\times$ Max(Multipliers of contracts with same underlying assets) + Quantity of open interests resulting from put option sale $\times$ (Base price for Margin – Theoretical margin price) $\times$ Max(Multipliers of contracts with same underlying assets)

*Product group: A set of contracts of which underlying assets, option types, exercise prices and last trading days are the same.

**The quantity of open interests per product group shall be the quantity calculated by following formula. In such cases, if the resulting value is in positive (+), it shall be the quantity of long open interests and if the resulting value is in negative (-), it shall be the quantity of short open interests. Provided that, the quantity to apply shall be the absolute value of the quantity of open interests calculated:

$$\sum(\text{Quantity of long open interests} \times \text{Multiplier ratio}) - \sum(\text{Quantity of short open interests} \times \text{Multiplier ratio})$$

***Multiplier ratio = Multiplier of the relevant contract / Max (Multipliers of contracts based on same underlying assets)

2. For options contracts other than subparagraph 1: Margins for option price volatility per contract

= Quantity of open interests resulting from call option purchase $\times$ (Base price for Margin – Theoretical margin price) $\times$ Multiplier + Quantity of open interests resulting from call option sale $\times$ (Base price for margin – Theoretical margin price) $\times$ Multiplier + Quantity of open interests resulting from put option purchase $\times$ (Base price for margin – Theoretical margin price) $\times$ Multiplier + Quantity of open interests resulting from put option sale $\times$ (Base price for Margin – Theoretical margin price) $\times$ Multiplier

⑥ When there are trades involving different underlying assets within the same product group

The amount of price volatility margin shall be the amount obtained by subtracting the following margin reduction amount from the sum of price volatility margin per underlying asset calculated according to ⑥ above:

* (Method of margin reduction) After converting and standardizing delta for the open

interests within the same product group, it shall be determined by multiplying the quantity possible to offset by the margin per contract and price correlation coefficient.

① Calculation of standardized quantity of contract size, etc. by considering delta on the basis of the product for which the price per futures contract is the largest in the same product group.

❶ To determine net delta per underlying asset

Net delta = Positive delta + Negative delta		
	Positive delta	Negative delta
Futures	$\sum(\text{Quantity of long open interests} \times 1 \times \text{Multiplier ratio})$	$\sum(\text{Quantity of short open interests} \times (-1) \times \text{Multiplier ratio})$
Call options	$\sum(\text{Quantity of long open interests} \times \text{Delta} \times \text{Multiplier ratio})$	$\sum(\text{Quantity of short open interests} \times (-1) \times \text{Delta} \times \text{Multiplier Ratio})$
Put options	$\sum(\text{Quantity of short open interests} \times (-1) \times \text{Delta} \times \text{Multiplier ratio})$	$\sum(\text{Quantity of long open interests} \times \text{Delta} \times \text{Multiplier ratio})$

*Multiplier ratio = Multiplier of the relevant contract ÷ Max (Multiplier of contracts based on same underlying asset)

* Delta: Delta based on the closing price per option contract

When calculating member margin, maintenance margin & ex-post margin: Delta at the market closing time of the day.

❷ Within the same product group, the relative size ratio per underlying asset that the Exchange specified ($\hat{r}_j$)

❸ Within the same product group, to determine the standardized quantity per underlying asset

$\text{Standardized contract quantity} = \text{Net delta} \div \text{Relative size ratio } (\hat{r}_j)$

② Calculation of linearized-part margin per underlying asset at the margin interval value for which the price volatility margin has been calculated.

$\begin{aligned} \text{Linearized-part margin} &= \text{Loss for futures} + \text{Loss for options} \\ &= \text{Loss for futures} + (-1) \times \text{Size of underlying asset price change} \times \text{Delta} \times \text{Multiplier} \\ &\quad \times \text{Net open interests on bid-side} \\ (0 &\leq \text{linearized-part margin per underlying asset} \leq \text{Price volatility margin}), \text{ Size} \\ &\text{of underlying asset price change } (S_k - S_0), \text{ Delta (Delta for margin interval value at} \\ &\text{which the price volatility margin per underlying asset is determined)} \end{aligned}$
--

③ Calculation of margin reduction

- ❶ To determine margin per contract of standardized contract quantity for each positive and negative delta

	Margin per contract of standardized contract quantity
Net delta > 0	$B = \frac{\sum_{i=1}^m \text{Linearized - part margin}_i}{\left \sum_{i=1}^m \text{Standardized contract quantity}_i \right }$ * m: No. of underlying asset with positive net delta
Net delta < 0	$S = \frac{\sum_{i=1}^n \text{Linearized - part margin}_i}{\left \sum_{i=1}^n \text{Standardized contract quantity}_i \right }$ * n: No. of underlying asset with negative net delta

- ❷ To determine the standardized contract quantity (C) to be offset

$$C = \text{Min} \left\{ \sum_{i=1}^m |k_i|, \sum_{i=1}^n |l_i| \right\}$$

k_i : Standard contract quantity of underlying asset (i) with positive net delta
 l_j : Standard contract quantity of underlying asset (j) with negative net delta

- ❸ To determine the margin reduction by multiplying the margin amount per contract of standard contract quantity for each positive & negative net delta by the standard contract quantity to be offset and the price correlation coefficient.

$$\begin{aligned}
 &\text{Margin reduction} \\
 &= \text{Margin reduction for positive net delta} + \text{Margin reduction for negative net delta} \\
 &= B \times C \times \text{Price correlation coefficient} + S \times C \times \text{Price correlation coefficient} = \\
 &(B + S) \times C \times \text{Price correlation coefficient}
 \end{aligned}$$

(c) Futures spread margin

The futures spread margin shall be the smaller amount of the amounts determined by multiplying the margin per futures spread contract by quantity of open interests (The number of open interests is netted considering the multiplier between contracts with same last trading day) per long and short for futures whose underlying assets are the same.

- Futures spread margin for product group = $\sum$ futures spread margin per underlying asset
- Futures spread margin per underlying asset = Min ($\sum$ long futures spread margin per product

group), $\sum$ short futures spread margin per product group)

* Product group: A group of products with same underlying asset and the last trading day

•Futures spread margin by contract group

1) Long futures spread margin by contract group

$\text{Max}\{(\sum \text{Quantity of long open interests by contract} \times \text{Futures spread margin per contract} - \sum \text{Quantity of short open interests by contract}) \times \text{Futures spread margin per contract}, 0\}$

2) Short futures spread margin by contract group

$\text{Max}\{(\sum \text{Quantity of short open interests by contract} \times \text{Futures spread margin per contract} - \sum \text{Quantity of long open interests by contract} \times \text{Futures spread margin per contract}), 0\}$

Provided that members may calculate futures spread margin without netting the number of open interests of contracts which have the same underlying asset and the last trading day.

•Futures spread margin for product group = $\sum$ futures spread margin per underlying asset

•Futures spread margin per underlying asset = $\text{Min}(\sum \text{long futures spread margin per contract}), \sum \text{short futures spread margin per contract})$

•Futures spread margin by contract = $\text{Quantity of open interests} \times \text{Futures spread margin per contract}$

(d) Physical delivery margin

Physical delivery margin shall, as the amount equivalent to the loss that may sustain for the final settlement quantity when the price of underlying asset fluctuates, be the amount obtained by adding the sum of the margin for delivery price and the margin for delivery price volatility calculated for the trade where the underlying assets are the same.

• Physical delivery margin = Sum of physical delivery margin per underlying asset

• Physical delivery margin per underlying asset = Margin for delivery price + Margin for delivery price volatility

(i) Margin for delivery price

Margin for delivery price

$= \{\text{Final settlement quantity for bid} \times (\text{Final settlement price} - \text{Base price of underlying asset}) \times \text{Multiplier}\} + \{\text{Final settlement quantity for ask} \times (\text{Base price of underlying asset} - \text{Final settlement price}) \times \text{Multiplier}\}$

(ii) Margin for delivery price volatility

Margin for delivery price volatility

$= \{\text{Final settlement quantity for bid} \times (\text{Base price of underlying asset} - \text{Lowest margin interval value}) \times \text{Multiplier}\} + \{\text{Final settlement quantity for ask} \times (\text{Highest margin interval value} - \text{Base price of underlying asset}) \times \text{Multiplier}\}$

(e) Margin before determination of final settlement price

Margin before determination of final settlement price shall, as the amount equivalent to the loss incurred for the final settlement quantity of the trade, for which the final settlement difference is paid/received on three (3) trading days later counting from the last trading day, be calculated by aggregating the margin before determination of final settlement price per underlying asset for the trades where the underlying assets are the same.

- Margin before determination of final settlement price = Sum of margin before determination of final settlement price per underlying asset
- Margin before determination of final settlement price per underlying asset = Final settlement quantity $\times$ Base price of underlying asset $\times$ Multiplier $\times$ Margin rate

(f) Minimum net exposure margin

Minimum net exposure margin shall be the amount obtained by adding the amounts calculated by multiplying the minimum margin per contract by the quantity of open interests, final settlement quantity and exercise settlement quantity of the trade belonging to the same product group.

Minimum net exposure margin
= (Sum of quantity of open interests for futures trade $\times$ Minimum margin per contract)
+ (Sum of final settlement quantity of futures trade delivering underlying asset $\times$ Minimum margin per contract) + (Sum of quantity of open short positions of options $\times$ Minimum margin per contract) + (Sum of final settlement quantity of trade subject to margin before determination of final settlement price $\times$ Minimum margin per contract)

Notes:

1. In calculating the net exposure margin, the base price for underlying asset shall be as follows:
 - a. Member margin: If calculated based on the time of market closing, it shall be the base price of underlying asset of the trading day to which the calculation time belongs; and if calculated based on the time of market closing of night session, it shall be the base price of underlying asset at the time of immediately preceding market closing.
 - b. Customer margin: Before the market closing on the trading day to which the calculation time belongs, it shall be the base price of underlying asset (if an ex-dividend, etc. have occurred with the Single Stock Futures and Single Stock Options trade, the base price of underlying asset of previous day shall be the adjusted base price of underlying asset) of immediately preceding trading day, and after the market closing on the trading day to which the calculation time belongs, it shall be the base price of underlying asset of the relevant trading day.
2. The physical delivery margin under subparagraph 2(d) shall, in the case of member margins, apply from the market closing time on the last trading day to the deposit deadline of margin pursuant to [§88(5)] of the Regulation, and shall, in the case of customer margin, apply from the market closing time on the last trading day to the settlement deadline for physical delivery noted in [§158].
3. The margin before determination of final settlement price shall, in the case of member margin, apply from the market closing on the last trading day to the deposit deadline of margin pursuant to [§88(5)] of the Regulation and shall, in the case of the customer margin, be applies from the market closing on the last trading

day to the market closing on the day before the final settlement day.

4. When calculating the net exposure margin after the end of night trading session, the open interests are based on the closing time of night trading session, but the member margin base price and member margin theoretical price for each option issue are based on the time of immediately preceding market closing.

[Annex 19] Margin Rates and Variables for Calculation of Margin Amounts

(Amended on October 26, 2009; December 4, 2009; July 30, 2010; September 13, 2010; October 1, 2010; October 20, 2010; January 27, 2011; March 23, 2011; September 23, 2011; October 10, 2011; October 20, 2011; November 17, 2011; December 20, 2011; February 17, 2012; September 26, 2012; July 8, 2013; August 28, 2014; November 3, 2014; November 13, 2014; May 26, 2015; July 3, 2015; August 13, 2015; September 16, 2015; October 28, 2015; March 8, 2016; March 21, 2016; June 20, 2016; March 13, 2017; June 15, 2017; March 15, 2018; September 7, 2018; October 14, 2019; July 13, 2021; September 22, 2023; February 5, 2024; April 5, 2024; November 1, 2024; April 18, 2025; May 29, 2025)

Margin Rates and Variables for Calculation of Margin Amounts

(Pertaining to [§57], [§94], [§102-3], [§133], [§134], [§150] and [§151-2])

1. Margin rates

The member margin rates, customer margin rates and maintenance margin rates, etc. of the Derivatives Market established and operated by the Exchange shall be separately determined by the Exchange, based on the price volatility of underlying assets, pro-cyclicality etc.

2. Product groups and price tradeoff ratio correlations

The product groups, relative size ratios and price correlation coefficient between the underlying assets of the product groups shall be determined separately and officially announced by the Exchange, based on the correlations, etc. between underlying assets.

3. Futures spread margin per contract

The amount of futures spread margin per contract shall be the product of the underlying asset base price and the multiplier and the futures spreads margin rate.

Trade types	Futures spread margin rates		
	Member margin (%)	Customer margin (%)	Maintenance margin (%)
KOSPI 200 Futures Mini KOSPI200 Futures KRX 300 Futures KOSPI Dividend Index Futures	1.2	1.8	1.2
KOSDAQ 150 Futures KOSDAQ Global Futures	2.0	3.0	2.0
Sector Index Futures (excluding KOSPI Dividend Index Futures)	2.0	3.0	2.0
V-KOSPI Index Futures	4.0	6.0	4.0
Single Stock Futures ETF Futures	2.0	3.0	2.0
Lean Hog Futures	5.0	7.5	5.0

3-year KTB Futures 5-year KTB Futures 10-year KTB Futures 30-year KTB Futures	0.20	0.30	0.20
USD Futures JPY Futures EUR Futures CNY Futures USD FLEX Futures	0.20	0.30	0.20
Gold Futures	0.90	1.35	0.90
Lean Hog Futures	5.0	7.5	5.0

4. Minimum margin per contract

Products		Minimum margin per contract
Futures	3-yr KTB Futures, 5-yr KTB Futures, 10-yr KTB Futures, 30-yr KTB Futures	KRW 50,000
	KOSPI 200 Futures, V-KOSPI 200 Index Futures	KRW 25,000
	KRX 300 Futures	KRW 20,000
	KOSDAQ 150 Futures, KOSDAQ Global Futures, Sector Index Futures (excluding KOSPI Dividend Index Futures), USD Futures, JPY Futures, EUR Futures, CNY Futures, Lean Hog Futures, USD FLEX Futures, Gold Futures	KRW 10,000
	Mini KOSPI200 Futures	KRW 5,000
	KOSPI Dividend Index Futures	KRW 2,000
	Single Stock Futures ETF Futures	• If the base price of underlying stock of the day is less than KRW 100,000; KRW 1,000 • If the base price of underlying stock of the day is higher than KRW 100,000; KRW 10,000
Options	KOSPI200 Options	KRW 25,000
	KOSDAQ 150 Options, Single Stock Options, Currency Options	KRW 10,000
	Mini KOSPI200 Options	KRW 5,000

5. Base price of margin in options trade

(a) Base price of member margin

(i) In the case of contract for which execution price established during the regular trading session of the day is available:

The base price of member margin shall be the latest execution price [excluding execution price of negotiated trade: the same hereinafter in (i) of item (c)] executed in the regular trading session of the day per option contract traded. Provided that, in the case of an

abnormal trading circumstances or when deemed necessary for market management, the price may be changed into the price calculated by (ii) etc. which the Exchange deems appropriate.

(ii) In the case of a contract for which no execution price of the regular trading session of the day is available:

It shall be the theoretical option price at the time of market closing of the day, which is determined by applying *mutatis mutandis* the method of calculating theoretical option price noted in [Annexes 15 through 17]. In such cases, among the days noted in [Annex 15] through [Annex 17], “base price of underlying asset on the previous day” shall be construed as “base price of underlying asset of the day”; “the previous day” (except the “previous day of ex-dividend day” in calculating the number of remaining days to the dividend date noted in [Annex 15] and [Annex 16]) as “the day”, and “the calculation date” as “the business day following the calculation date”, respectively.

(b) Base price for customer margin

(i) Before the market closing of the relevant trading day:

Base price of the relevant trading day

(ii) After the market closing of the relevant trading day:

Base price of member margin of the relevant trading day

(c) Base price of intraday member margin

(i) For an issue with an execution price executed within the time of calculating intraday member margin during the regular trading session of the day: The last execution price within the time of calculating member margin per option issue shall be the base price of intraday member margin. Provided that, in case where there is any irregular trading situation or the Exchange deems necessary for the market management, it may be changed into the price calculated pursuant to (ii) below, etc., which the Exchange recognize as appropriate.

(ii) For an issue with no execution price within the time of calculating intraday member margin during the regular trading session of the day: It shall be option theoretical price at the time of calculating intraday member margin of the day, which is calculated by applying the calculation method of option theoretical price in [Annex 15] through [Annex 17] *mutatis mutandis*. In such cases, “base price of underlying asset on the previous day” shall be construed as “price of underlying asset at the time of calculating intraday member margin”; “execution quantity of the previous day” as “execution quantity of the day”; “annual implied volatility of the previous day” as “annual implied volatility at the time of calculating intraday member margin”; “linearly interpolated volatility of the previous day” as “linearly interpolated volatility at the time of calculating intraday member margin” and “average annual implied volatility of the previous day” as “average annual implied volatility at the time of calculating intraday member margin” in [Annex 15] through [Annex 17].

(d) Base price of intraday customer margin

(i) For an issue with an execution price concluded within the time of calculating intraday customer margin during the regular trading session of the day: the last execution price within the time of calculating intraday customer margin per option issue shall be the base price of intraday customer margin. Provided that, in cases where there is any irregular trading situation or of the Exchange deems necessary for the market management, it may be changed into the price calculated pursuant to (ii) below, etc., which the Exchange recognizes as appropriate.

(ii) For an issue with no execution price within the time of calculating intraday customer margin during the regular trading session of the day: it shall be option theoretical price at the time of calculating intraday customer margin of the day (at the time of calculating intraday customer margin), which shall be calculated by applying the [(c)(ii)]. In such cases, the “time of calculating intraday member margin” of [(c)(ii)] shall be construed as the “time of calculating intraday customer margin”.

6. Theoretical price of margin in options trade

(a) Theoretical price of member margin

Theoretical price of member margin shall be calculated by applying the method of calculating theoretical option price noted in [Annex 15] through [Annex 17] *mutatis mutandis*. In such cases, “3rd decimal place” and “2nd decimal place” shall be construed as “7th decimal place”; “base price of the underlying asset on the previous day” and “the previous day” (excluding “the day before the ex-dividend day” in determining the number of remaining days until the ex-dividend day noted in [Annex 15] and [Annex 16]) as “member margin interval value of the calculation date” and “the day”, respectively;; “calculation date” and “number of days in the remaining calculation period (t)” as “business day after the calculation date” and “number of days in the remaining calculation period (t)-2” [in cases where the value is less than one (1), it shall be deemed as one (1)], respectively, but, in the case of a contract of which trades were executed during the regular trading session on the calculation date, the volatility noted in [Annex 15] through [Annex 17] shall be the annual implied volatility of the relevant contract calculated by the Exchange at the time of market closing on the calculation date.

(b) Theoretical price of customer margin

(i) Before the market closing of the relevant trading day

Theoretical price of customer margin before the market closing of the relevant trading day shall be calculated by applying the method of calculating theoretical option price noted in [Annexes 15 through 17] *mutatis mutandis*. In such cases, “3rd decimal place” and “2nd decimal place” shall be construed as “7th decimal place”; “base price of the underlying asset on the previous day” as “customer margin interval value of the calculation date”; “number of days in the remaining calculation period(t)” as “number of days in the remaining calculation period (t)-2” [in cases where the value is less than

one(1), it shall be deemed one (1)], but, in the case of a contract of which trades were executed during the immediately preceding regular trading session, the volatility noted in [Annex 15] through [Annex 17] shall be the annual implied volatility of the relevant contract calculated by the Exchange at the time of market closing of the immediately preceding day.

(ii) After the market closing of the relevant trading day

Theoretical price of customer margin after the market closing of the relevant trading day shall be calculated by applying the method of calculating theoretical option price noted in [Annexes 15 through 17] *mutatis mutandis*. In such cases, the “3rd decimal place” and the “2nd decimal place” shall be construed as the “7th decimal place”; “base price of the underlying asset on the previous day” as “customer margin interval value of the calculation date”; “previous day” (excluding “the day before the ex-dividend day” in determining the remaining number of days until ex-dividend day noted in [Annex 15] and [Annex 16]) as “the day”, respectively; “calculation date” as “business day following the calculation date”; and “number of days in the remaining calculation period (t)” as “number of days in the remaining calculation period (t)-2” [in cases where the value is less than one(1), it shall be deemed one (1)], but, in the case of a contract of which trades were executed during the regular trading session of the relevant trading day, the volatility noted in [Annex 15] through [Annex 17] shall be the annual implied volatility of the relevant contract calculated by the Exchange at the time of market closing of the relevant trading day.

(c) Theoretical price of intraday member margin

Theoretical price of intraday member margin of options trades at the time of calculating intraday member margin shall be calculated by applying the calculation method of option theoretical price in the [Annex 15] through [Annex 17] *mutatis mutandis*. In such cases, “3rd decimal place” and “2nd decimal place” shall be construed as “7th decimal place”; “base price of underlying asset on the day” as “interval value of member margin”; “number of days in the remaining calculation period (t)” as “number of day in the remaining calculation period (t)-2 [where the value is less than one(1), it shall be deemed one (1)]”; “execution quantity of the previous day” as “execution quantity of the day”; “annual implied volatility of the previous day” as “annual implied volatility at the time of calculating intraday member margin”; “linearly interpolated volatility of the previous day” as “linearly interpolated volatility at the time of calculating intraday member margin”; and “average annual implied volatility of the previous day” as “average annual implied volatility at the time of calculating intraday member margin”, but, in the case of a contract of which trades were executed during the regular trading session of the day, the volatility in [Annex 15] through [Annex 17] shall be the annual implied volatility at the time of calculating intraday member margin of the relevant contract calculated by the Exchange.

(d) Theoretical price of intraday customer margin

Theoretical price of intraday customer margin of options trades at the time of calculating intraday customer margin shall be calculated by applying item(c). In such cases, of item (c), “member margin interval value” and “time of calculating intraday member margin”

shall be construed as “customer margin interval value of” and “time of calculating intraday customer margin”, respectively.

(e) Special case of highest or lowest margin interval value for the quantity of open interests resulted from short options

In calculating the option premium volatility margin at the highest or lowest margin interval value according to [Annex 18], it shall be calculated by comparing the theoretical option price for margin calculation and adjusted theoretical option price for margin calculation at the relevant margin interval value. In such cases, the expected change of option price at the highest and lowest margin interval value noted below shall apply to the calculation of price volatility margin at the relevant interval (the expected change of option price noted in [§133(3)] shall apply *mutatis mutandis* to the expected change of option price for the short option open interests).

Number		Open interest	Expect change of option price
Member margin	Customer margin		
41	61	Short call	$\text{Max}\{ (f(S_u) - C_0) \times 30\%, f(S_k) - C_0 \}$
2	2	Long call	$\text{Max}\{ (C_0 - f(S_d)) \times 30\%, C_0 - f(S_k) \}$
1	1	Short put	$\text{Max}\{ (f(S_d) - C_0) \times 30\%, f(S_k) - C_0 \}$
42	62	Long put	$\text{Max}\{ (C_0 - f(S_u)) \times 30\%, C_0 - f(S_k) \}$

S_k : Margin interval value

C_0 : Base price for calculation of option margin

$f(S_k)$: Theoretical price of call/put option margin calculated with margin interval value

Adjust theoretical price for option margin calculation: $f(S_u) = f(S \times (1 + \text{Margin rate} \times 2))$, $f(S_d) = f(S \times (1 - \text{Margin rate} \times 2))$

7. Base price and theoretical price of margin of Mini KOSPI200 Options contract

Notwithstanding subparagraphs 5 and 6, base price and theoretical price of margin of Mini KOSPI200 options contract shall be those of KOSPI200 options contract with same option type, the last trading day and exercise price.

Notes:

- Notwithstanding subparagraph 6, if it is deemed necessary for the market management, the Exchange may change the method of calculating the volatility of relevant contract and adjusted theoretical option price for margin calculation. In such cases, this provision shall also apply to the open interests of the day before the change is put into effect.
- In calculating the net exposure margin, the base price for underlying asset shall be as follows:
 - Member margin: If calculated based on the time of market closing, it shall be the base price of underlying asset of the trading day to which the calculation time belongs; and if calculated based on the time of market closing of night session, it shall be the base price of underlying asset at the time of immediately preceding market closing.
 - Customer margin: Before the market closing on the trading day to which the calculation time belongs, it shall be the base price of underlying asset (if an ex-dividend, etc. have occurred with the

Single Stock Futures and Single Stock Options trade, the base price of underlying asset of previous day shall be the adjusted base price of underlying asset) of immediately preceding trading day, and after the market closing on the trading day to which the calculation time belongs, it shall be the base price of underlying asset of the relevant trading day.

3. When calculating the net exposure margin after the end of night trading session, the member margin base price and member margin theoretical price for each option issue are based on the time of immediately preceding market closing.

[Annex 19-2] Amount of Customer Margin per Futures Spread Contract

[October 26, 2009] (Amended on July 30, 2010; October 20, 2010; January 27, 2011; October 20, 2011; August 28, 2014; November 3, 2014; July 3, 2015; September 16, 2015; October 28, 2015; June 20, 2016; June 15, 2017; March 15, 2018; October 30, 2019; July 13, 2021; February 16, 2022; February 5, 2024; April 5, 2024; November 1, 2024; April 18, 2025; May 29, 2025)

Amount of Customer Margin per Futures Spread Contract

(Pertaining to [§133])

1. For intra-product spreads:

The amount of customer margin per futures spread contract shall be the amount calculated by multiplying the base price of underlying asset of the immediately preceding trading day by the multiplier and the customer futures spread margin rate.

Types of trades	Customer futures spread margin rates
KOSPI 200 Futures spreads Mini KOSPI 200 Futures spreads KRX 300 Futures spreads KOSPI Dividend Index Futures spreads	1.8%
KOSDAQ 150 Futures spreads KOSDAQ Global Futures spreads	3.0%
Sector Index Futures spreads (excluding KOSPI Dividend Index Futures spreads)	3.0%
V-KOSPI Index Futures spreads	6.0%
Single Stock Futures spreads EFT Futures	3.0%
3-year KTB Futures spreads 5- year KTB Futures spreads 10-year KTB Futures spreads 30-year KTB Futures spreads	0.30%
3-month Risk Free Benchmark Interest Rate Futures spreads	0.15%
USD Futures spreads JPY Futures spreads EUR Futures spreads CNY Futures spreads	0.30%
Gold Futures spreads	1.35%
Lean Hog Futures spreads	7.5%

2. For inter-KTB futures spreads:

The amount of customer margin per futures spread contract shall be the amount obtained by subtracting the following margin deduction amounts that are calculated by applying *mutatis mutandis* subparagraph 2(b)(ii)⑥ of [Annex 18] from the sum of customer margins for each

of the products constituting the futures spread.

Types of trades	Margin deduction amount
Inter-3-yr and 10-yr KTB Futures spreads	$\{ \text{Customer margin for entrustment of new orders per 3-yr KTB futures contract} \times \text{Relative size ratio of 3-yr KTB futures} + \text{Customer margin for entrustment of new orders per 10-yr KTB futures contract} \times \text{Relative size ratio of 10-yr KTB futures} \}$ $\times \text{Min} (3 \div \text{Relative size ratio of 3-yr KTB futures}, 1 \div \text{Relative size ratio of 10-yr KTB futures}) \times \text{Price correlation coefficient of KTB product group}$

[\[Annex 19-3\] Disparate Values Applied to Base Price for Settlement](#)

[December 10, 2010] (Amended on January 27, 2011; November 3, 2014; July 3, 2015; August 13, 2015; September 16, 2015; October 28, 2015; January 14, 2016; April 14, 2016)

Disparate Values Applied to Base Price for Settlement

(Pertaining to [§103])

Trading types	Disparate values
The nearest month contracts in USD Futures trades, including the next nearest month contracts during the four (4) trading days counting retroactively from the last trading day of the nearest month contracts.	0.2%
The nearest month contracts in JPY Futures, EUR Futures and CNY Futures trades, including the next nearest month contracts during the four (4) trading days counting retroactively from the last trading day of the nearest month contracts.	0.1%
The farther month contracts in currency futures trades, excluding the next nearest month contract during the four (4) trading days counting retroactively from the last trading day of the nearest month contract.	KRW 0.3
Trades of Lean Hog Futures	10.0%
Trades of Gold Futures	2.0%

Methods for Calculation and Inspection of Assessment Rates of Foreign Currencies and Foreign Securities

(Pertaining to [§92] and to [§92-2])

1. Calculation and inspection methods of assessment rates of foreign currencies

(a) Calculation methods of assessment rates

Assessment rates of foreign currencies shall be calculated according to the formula in the following table based on the yields of the basic rates of each foreign currency determined and published pursuant to the Foreign Exchange Transaction Regulation on the trading days of the foreign exchange market for the latest one (1) year counting from the date of calculation.

Assessment rate = Min [95%, 100% - (Base yield × Procyclicality mitigation factor – Bank buying commission)]

- | |
|--|
| <ul style="list-style-type: none"> • Base yield: The base yield refers to a value corresponding to the 99th percentile by sorting the base yields for the assessment period in descending order. • Calculation of base yields: $\text{Log} (\text{Basic rate}_{t\text{-day}} / \text{Basic rate}_{t-2\text{ day}})$ • Procyclicality mitigation factor: 1.25 • Bank buying commission = Buying rate – Basic rate |
|--|

(b) Checking the appropriateness of the assessment rate calculation methods

The inspection of the appropriateness of the methods for calculating assessment rates shall be carried out once a year, as stipulated separately by the Exchange.

2. Calculation and inspection methods of assessment rates of foreign securities

(a) Calculation methods of assessment rates

- (i) The assessment rate of a foreign security shall be calculated by multiplying the assessment rate by the term to maturity of the government bond group corresponding to the term to maturity of the relevant foreign security by the assessment rate of the foreign currency in which the relevant foreign security is denominated.

Assessment rate of a foreign security* = Assessment rate by term to maturity of government bond group × Assessment rate of the foreign currency in which the foreign security is denominated

* Figures less than 1% are rounded down.

- (ii) The assessment rate of each calculation interval of the government bond group corresponding to the term to maturity of the relevant foreign security shall be the assessment rate of the relevant issue, and the assessment rate of each calculation interval shall be set as

shown in the table below, by dividing the government bond group into five intervals by the term to maturity and assigning a difference of 1% point to 2% points between each interval, based on the rate corresponding to the interval with the shortest term to maturity (hereinafter referred to as the “base rate”).

Classification		Terms to maturity				
Type of issuer	Credit rating	≤ 1 year	> 1 year and ≤ 3 years	> 3 years and ≤ 5 years	> 5 years and ≤ 10 years	> 10 years
Government bond group	n/a	r	r - 1%	r - 2%	r - 3%	r - 5%

* r: base rate

(iii) Base rates: The base rates are calculated by subtracting the ‘reference discount rate’, which is calculated by subtracting ‘100%’ from the minimum margin rate under [Annex 1] of the ‘Detailed Rules of Regulation on Open Market Operation’ of the Bank of Korea at the end of each quarter, from ‘100%’. Provided that, if the reference discount rate fluctuates rapidly during a quarter, the base rate may be changed from time to time.

(b) Checking the appropriateness of the assessment rate calculation methods

The inspection of the appropriateness of the methods for calculating assessment rates shall be conducted once a year, as stipulated separately by the Exchange.

[Annex 19-5] Imposition Rate of Credit Risk Member Margin

[April 6, 2026]

Imposition Rate of Credit Risk Member Margin

(Pertaining to [§112])

1. Calculation method for imposition rate of credit risk member margin

The credit risk member margin imposition rate shall be established as shown in the following table, divided into five (5) ranges based on the ratio (hereinafter referred to as the "net exposure member margin rate") of the sum of the net exposure member margins calculated for each account to the credit risk limit calculated on the 10th business day from the deadline for submitting the quarterly business report pursuant to [§12(1)2] of the Enforcement Rules of the Membership Regulations.

Net exposure member margin rate	1.5 or more ~ Less than 2	2 or more ~ Less than 3	3 or more ~ Less than 4	4 or more ~ Less than 5	5 or more
Imposition rate	2.5%	5.0%	15.0%	20.0%	30.0%

2. Calculation method for credit risk limit amount

(a) For the clearing members who are banks [referring to the banks under the Banking Act, the branches of foreign banks (referring to the branches of foreign banks authorized pursuant to Article 58 of the Banking Act; the same hereinafter), the Korea Development Bank under the Korea Development Bank Act, the Industrial Bank of Korea under the Industrial Bank of Korea Act, the Export-Import Bank of Korea the Export-Import Bank of Korea Act, Nonghyup Bank under the Agricultural Cooperatives Act and the National Federation of Fisheries Cooperatives under the Fisheries Cooperatives Act]:

Two (2) times the equity capital prescribed in Article 2 of the Regulations on Supervision of Banking Business as at the end of each quarter.

(b) For the clearing members other than those noted in subparagraph 2:

One (1) time the net capital (for a clearing member that has a subsidiary, it shall be the net capital based on separate financial statements) prescribed in [§3-6(1)] of the Regulations on Financial Investment Business as at the end of each quarter. Provided that, when calculating the net capital, two (2) percent of the value of credit risk under [Annex 5] of the Detailed Regulations of the Regulations on Financial Investment Business shall apply for the joint compensation fund that the member has paid to the Exchange

3. Changes of imposition rate and credit risk limit amount

In cases where a clearing member submits to the Exchange the matters on the change in net capital, equity capital, etc. and where it is deemed necessary for the management of credit risks, the Exchange may change the imposition rate and credit risk limits.

[\[Annex 20\] Price Used in Calculation of the Amount Equivalent to the Value of Underlying Assets](#)

(Amended on August 21, 2009; July 30, 2010; October 20, 2010; July 8, 2013; September 16, 2015; October 28, 2015; May 24, 2023)

Price Used in Calculation of the Amount Equivalent to the Value of Underlying Assets

(Pertaining to [§112])

The amount equivalent to the value of underlying asset pursuant to [§112] shall be calculated on the basis of the price specified in each of the following subparagraphs:

1. [Deleted on October 20, 2010]

2. In the case of USD Futures, and USD FLEX Futures which is to be settled by physical delivery method, the KRW/USD exchange rate established at 12:00 noon in the USD spot market operated by the Seoul Money Brokerage Service (in case no such exchange rate is available, the rate established immediately before: the same hereinafter).

3. In the case of JPY Futures, KRW/JPY 100 exchange rate calculated by multiplying 100 by the value resulted from dividing the KRW/USD exchange rate established at 12:00 noon in the USD spot market operated by the Seoul Money Brokerage Service by the average of sell rate and buy rate of JPY/USD provided by the international information service provider designated by the Exchange at 12:00 noon (to be rounded off at the 3rd decimal place).

4. In the case of EUR Futures, KRW/EUR exchange rate calculated by multiplying the KRW/USD exchange rate established at 12:00 noon in the USD spot market operated by the Seoul Money Brokerage Service, by the average of sell rate and buy rate of USD/EUR provided by the international information service provider designated by the Exchange at 12:00 noon (to be rounded off at the 3rd decimal place).

5. In the case of CNY Futures, KRW/CNY exchange rate established at 12:00 noon in the CNY spot market operated by the Seoul Money Brokerage Service

6. [Deleted on October 28, 2015]

Notes:

1. “The international information service provider designated by the Exchange” noted in subparagraphs 3 and 4 shall be the Refinitiv. Provided that, when it is deemed necessary for the market management, it shall be the one designated by the Exchange for each case.

2. In cases where the international information service provider is newly designated or changed, the Exchange shall make public such fact through the electronic information dissemination medium operated by it without delay.

[Annex 21] Guidelines for Appraisal of Low Liquidity Products
[January 27, 2011] (Amended on July 30, 2020)

Guidelines for Appraisal of Low Liquidity Products
(Pertaining to [§160] and [§161])

Area to be appraised	Details to be appraised	Score to be assigned			Appraisal score
		High	Average	Low	
Market representativeness	Symbolism and awareness of the relevant product among comparable products, etc.	3	2	1	
Non-substitutability	Availability of substitute product(s) that is able to meet the hedging demand when the relevant product is delisted, etc.	3	2	1	
Possibility of re-listing	Possibility of listing a derivative product based on the same underlying asset, when the relevant product is delisted, etc.	3	2	1	
Possibility of stimulating the trade	Possibility of trading volume increases above the base quantity for liquidity management within the next 3 years, etc.	3	2	1	
Total					

[Annex 22] Refusal of Entrustment of Orders Concerning Position Limits of KOSPI 200 Futures and KOSPI 200 Options, etc.

[January 31, 2011] (Amended on July 3, 2015; May 29, 2025)

Refusal of Entrustment of Orders Concerning Position Limits of KOSPI 200 Futures and KOSPI 200 Options, etc.

(Pertaining to [119(2)])

1. In the case of receiving the entrustment of orders noted in the followings from the customer who has exceeded the position limit on the previous trading day during the night trading hours or after 10:00 hour on the relevant trading day. Provided that this provision shall not apply on the last trading day of KOSPI 200 Futures, Mini KOSPI 200 Futures, KOSPI 200 Options and Mini KOSPI 200 Options.

Trade where Max (Converted quantity of open interests when the matching possibility of order is considered – Position limit, 0) of order entrusted goes up more than Max (Converted quantity of open interests – Position limit, 0) before the entrustment of order.

Converted quantity of open interests when the matching possibility of order is considered:

The converted quantity of open interests determined by applying Delta at the market closing of immediately preceding trading day and quantity of open interests of the relevant trading day (including the quantity when the matching possibility is considered) to [Annex 23].

Converted quantity of open interests:

The quantity determined by applying Delta at the market closing time of immediately preceding trading day and quantity of open interest of the relevant trading day to [Annex 23].

In such cases, when determining the converted quantity of open interests and refusing the entrustment of order, the quantity related to arbitraging and hedging shall be excluded.

2. In cases where for the contracts whose last trading day has arrived, the entrustment of order falling under item(c) was received from the customer falling under item (a) or (b):

(a) Customer whose orders are subject to refusal based on the trading day immediately before the last trading day

Min (The quantity determined by applying Delta at the market closing time and the quantity of open interests at the market closing time of the contract whose last trading day arrives on the next trading day to [Annex 23], the quantity determined by applying Delta at the market closing time on the immediately preceding trading day and quantity of open interests at the market closing time of the contract whose last trading day arrives on the next day to [Annex 23]) is larger than the position limit of open interests.

In such cases, when determining the converted quantity of open interests, the quantity related to arbitraging or hedging shall be included.

(b) Customers whose orders are subject to refusal based on the last trading day

Customer who falls under the following condition at the time of order execution:

The quantity determined by applying Delta at the market closing time on the immediately preceding trading day and the quantity of open interests of contract whose last trading day has arrived to [Annex 23] is larger than the position limit of open interests

In such cases, when determining the converted quantity of open interests, the quantity related to arbitraging or hedging shall be included.

(c) Orders that must be refused

An order that makes $\text{Max} (\text{Converted quantity of open interests considering the order matching possibility} - \text{Position limit}, 0)$ goes up higher than $\text{Max} (\text{Converted quantity of open interests} - \text{Position limit}, 0)$

Converted quantity of open interests when considering the order matching possibility:

Quantity determined by applying Delta at the market closing time on the immediately preceding trading day and the quantity of open interests of contracts on the relevant trading day whose last trading day (including the quantity when considering the order matching possibility) has arrived to [Annex 23].

Converted quantity of open interests:

Quantity determined by applying Delta at market closing time on the immediately preceding trading day and quantity of open interest of contract on the relevant trading day whose last trading day has arrived to [Annex 23].

In such cases, when determining the converted quantity of open interest and refusing the order entrustment, the quantity related to arbitraging and hedging shall be included.

Note: In the case where a member determines that a customer has not exceeded the position limit on open interests on the immediately preceding trading day if the quantity of arbitrage and hedge transactions of the customer scheduled to be reported by 10:00 on the relevant trading day is excluded, the member may, at the member's own responsibility, not apply subparagraph 1 to the transactions of the customer during the night trading hours on the relevant trading day.

[Annex 23] Conversion Methods of Open Interests of KOSPI 200 Futures and KOSPI 200 Options, etc.

[January 31, 2011] (Amended on February 17, 2012; July 3, 2015)

Conversion Methods of Open Interests of KOSPI 200 Futures and KOSPI 200 Options, etc.

(Pertaining to [§162])

Converted quantity = | $\Sigma(\text{Quantity of long open interest of futures}) - \Sigma(\text{Quantity of short open interest of futures}) + \Sigma(\text{Quantity of long open interest of call options} \times \text{Delta of call options}) - \Sigma(\text{Quantity of short open interest of call options} \times \text{Delta of call options}) + \Sigma(\text{Quantity of long open interest of put options} \times \text{Delta of put options}) - \Sigma(\text{Quantity of short open interest of put options} \times \text{Delta of put options})$ |

Converted quantity = | $\Sigma(\text{Converted quantity by multiplier ratio} \times \text{multiplier})$ |

Multiplier ratio = Multiplier of the relevant contract ÷ Max (Multiplier of contracts based on same underlying asset)

Converted quantity by multiplier ratio (Calculated using following formula by multiplier ratio)

Converted quantity = { $\Sigma(\text{Quantity of long open interest of futures}) - \Sigma(\text{Quantity of short open interest of futures}) + \Sigma(\text{Quantity of long open interest of call options} \times \text{Delta of call options}) - \Sigma(\text{Quantity of short open interest of call options} \times \text{Delta of call options}) + \Sigma(\text{Quantity of long open interest of put options} \times \text{Delta of put options}) - \Sigma(\text{Quantity of short open interest of put options} \times \text{Delta of put options})$ }

Notes:

1. Delta refers to Delta calculated by the Exchange.
2. The converted quantity shall be rounded down at the first decimal place.

[Annex 24] Range of Resolution Limit of Transaction Errors

[May 9, 2012] (Amended on December 18, 2012; July 8, 2013; August 20, 2014; November 3, 2014; September 16, 2015; October 28, 2015; June 20, 2016; June 15, 2017; October 30, 2019; February 16, 2022; June 25, 2024; April 18, 2025; May 29, 2025)

Range of Resolution Limit of Transaction Errors

(Pertaining to [§78-2] and [§78-4])

1. Futures and Futures spreads

(a) Base price for resolution of transaction errors

The base price for resolving transaction errors of futures and futures spread shall be the execution price immediately before the execution of large-sized transaction error caused by investor. Provided that, in cases where the Exchange deems that the base price is inappropriate in view of the market condition, the prices such as the theoretical price calculated using the price of underlying asset just before the execution of transaction errors may deem the base price of transaction errors caused by investor.

(b) Resolution limit of transaction errors

The resolution limit of transaction errors of futures shall be the value determined by multiplying the previous day's closing price (in the case of USD futures, this refers to the final US dollar spot rate at 15:30; hereinafter the same in this item) of underlying asset by the resolution limit ratio of transaction errors, and the resolution limit of transaction errors of futures spread shall be the value calculated by multiplying the previous day's closing price of the futures constituting the relevant futures spread (for an inter-KTB futures spread, it refers to the 3-year KTB futures constituting the relevant futures spread) by the resolution limit ratio of transaction errors.

Ratios of Resolution Limit of Transaction Errors of Futures

Types of Futures	Ratios (%)
Index Futures	3.0
V-KOSPI 200 Futures	15.0
Single Stock Futures / ETF Futures	5.0
3-yr KTB Futures	0.5
5-yr KTB Futures	0.6
10-yr KTB Futures	0.9
30-yr KTB Futures	1.3
3-month Risk Free Benchmark Interest Rate Futures	0.43
USD Futures /CNY Futures	1.5
JPY Futures /EUR Futures	3.0
Gold Futures	3.0
Lean Hog Futures	7.0

Ratios of Resolution Limit of Transaction Errors of Futures Spreads

Type of futures spread	Ratios (%)
Index Futures spreads	1.5
V-KOSPI 200 Futures spreads	5.0

Single Stock Futures spreads / EFT Futures spreads	3.0
3-yr KTB Futures spreads / Inter-3-yr and 10-yr KTB Futures spreads	0.5
5-yr KTB Futures spreads	0.6
10-yr KTB Futures spreads	0.9
30-yr KTB Futures spreads	1.3
3-month Risk Free Benchmark Interest Rate Futures	0.43
USD Futures spreads, CNY Futures spreads	1.0
JPY Futures spreads, EUR Futures spreads	3.0
Gold Futures spreads	1.5
Lean Hog Futures spreads	3.0

(c) Adjustment range of transaction errors

The range of resolution of transaction errors of futures and futures spread shall be between the prices determined by adding and subtracting the resolution limit of transaction errors to and from the base price for resolution of transaction errors. Provided that, if it deems necessary for market management, the Exchange may change the prices at the upper or lower resolution range of transaction errors.

2. Options

(a) Base price for resolution of transaction errors

The base price for resolution of transaction errors of options shall be the execution price immediately before the execution of large-sized transaction error by investor. Provided that, if the Exchange deems that such price is not appropriate in view of the market condition, the theoretical price determined by using the price of underlying asset immediately before the execution of transaction errors, etc. may be used as the base price for resolution of transaction errors.

(b) Resolution limit of transaction errors

The resolution limit of transaction errors of options shall be the value determined by multiplying the previous day's closing price (in the case of USD options, this refers to the final US dollar spot rate at 15:30) of underlying asset by the ratio of resolution limit of transaction errors.

Ratios of Resolution Limit of Transaction Errors	
Type of options	Ratios (%)
Index options	3
Stock options	5
Currency Options	1.5

(c) Resolution range of transaction errors

The resolution range of transaction errors shall be between the theoretical prices calculated by adding and subtracting the resolution limit of transaction errors to and from the price of underlying asset (refers to base price of underlying asset if large-sized transaction errors by investor occur during night trading hours) just before the execution of block investor

transaction errors. Provided that, if it deems necessary for market management, the Exchange may change the prices at the upper and lower resolutions of transaction errors.

[Annex 25] Price Fluctuation of Real-time Price Restriction

[August 20, 2014] (Amended on July 3, 2015; September 16, 2015; March 15, 2018; August 17, 2018; December 7, 2018; October 14, 2019; October 30, 2019; April 5, 2024; May 29, 2025; June 11, 2026)

Price Fluctuation of Real-time Price Restriction

(Pertaining to [§60-4])

1. Price Fluctuation Range

The price fluctuation range shall be set as figures calculated by the following formula. Provided that, in cases where it is under the quotation price unit, it shall be set as the quotation price unit.

Division	Calculation Methods of Price Fluctuation Range
Futures	Base price of futures x volatility
Futures spreads	Base price of the nearest month contract in futures spreads x volatility
Options	A. Price fluctuation of call option: Max (①, ②) for regular trading session, [Max (①, ②)] x2 for night trading session ①: rising call option theoretical price – current call option theoretical price ②: dropping call option theoretical price – current call option theoretical price B. Price fluctuation of put option: Max (③, ④) for regular trading session, [Max (③, ④)] x2 for night trading session ③: rising put option theoretical price – current call option theoretical price ④: dropping put option theoretical price – current call option theoretical price

Note:

- (1) If the price fluctuation range of KOSPI 200 options is lower than 0.03 points, it shall be 0.03 points.
- (2) Rising & dropping theoretical prices shall be calculated as follows in consideration of changes of underlying assets price (price when base price of underlying assets rises or drops as much as volatility) and volatility (value when volatility rises or drops as much as volatility change rate).

Division of Option Price	Calculation Methods
Rising call option theoretical price	$f[S \times (1 + \text{volatility}), \text{volatility} \times (1 + \text{volatility change rate})]$
Dropping call option theoretical price	$f[S \times (1 - \text{volatility}), \text{volatility} \times (1 - \text{volatility change rate})]$
Rising put option theoretical price	$f[S \times (1 - \text{volatility}), \text{volatility} \times (1 + \text{volatility change rate})]$
Dropping put option theoretical price	$f[S \times (1 + \text{volatility}), \text{volatility} \times (1 - \text{volatility change rate})]$
Current theoretical price	$f(S, \text{volatility})$

-f(.): Calculation formula of theoretical price of the stock index options in accordance with [Annex15].

-S: Base price of underlying asset on the previous day.

-Volatility: In the case of a contract in which trades were executed on the previous day, the previous day's annual implied volatility calculated by the Exchange; in the case of a contract in which trades were not executed on the previous day, previous day's linearly interpolated volatility or previous day's average annual implied volatility of the relevant contract, which is calculated by the Exchange in accordance with [Annex 15].

-60% of volatility change rate is applied.

2. Volatility Rates

The rates of volatility are as follows.

Division		Volatility Rates
Futures	KOSPI 200 Futures Mini KOSPI 200 Futures KOSDAQ 150 Futures	Regular trading session: 1.0% Night trading session: 2.0%
	Stock Futures	set between 3.0% and 6.0% by the Exchange
	3-year KTB Futures	Regular trading session: 0.5% Night trading session: 1.0%
	10-year KTB Futures	Regular trading session: 0.9% Night trading session: 1.8%
	USD Futures	Regular trading session: 1.0% Night trading session: 2.0%
Futures Spreads	KOSPI200Futures spreads Mini KOSPI 200 Futures spreads KOSDAQ 150 Futures spreads	Regular trading session: 1.0% Night trading session: 2.0%
	Stock Futures spreads	set between 3.0% and 6.0% by the Exchange
	3-year KTB Futures spreads	Regular trading session: 0.5% Night trading session: 1.0%
	10-year KTB Futures spreads	Regular trading session: 0.9% Night trading session: 1.8%
	USD Futures spreads	Regular trading session: 1.0% Night trading session: 2.0%
Options	KOSPI 200 Options	2.0%

[Annex 26] Requesting Quantity of Negotiated Block Trades

[August 28, 2014] (Amended on November 3, 2014; July 3, 2015; September 16, 2015; October 28, 2015; March 21, 2016; June 20, 2016; June 15, 2017; September 20, 2017; March 15, 2018; September 7, 2018; July 30, 2019; February 16, 2022; June 29, 2023; February 5, 2024; April 5, 2024; June 25, 2024; November 1, 2024; April 18, 2025)

Requesting Quantity of Negotiated Block Trades

(Pertaining to [§70])

Trade types	Requesting quantities	
	The nearest month contracts and delivery week contracts	Contracts other than the nearest month contracts and delivery week contracts
KOSPI 200 Futures Mini KOSPI 200 Futures KOSDAQ 150 Futures KRX 300 Futures KOSDAQ Global Futures Sector Index Futures	20 contracts or more, but 5,000 contracts or less	The trading quantity unit or more, but 5,000 contracts or less
KOSPI 200 Options Mini KOSPI 200 Options KOSDAQ 150 Options	20 contracts or more, but 10,000 contracts or less	The trading quantity unit or more, but 10,000 contracts or less
Single Stock Futures	20 contracts or more, but the quantity limits (referring to the quantity limits of open interests published by the Exchange for each underlying stock pursuant to [§162-2]; the same hereinafter in this table) or less	The trading quantity unit or more, but the quantity limits or less
Single Stock Options	The trading quantity unit or more, but the quantity limits or less	
ETF Futures	20 contracts or more, but less than the position limits for each underlying ETF specified in [§162-2(1)7] and [Annex 1-4]	The trading quantity unit or more, but less than the position limits for each underlying ETF specified in [§162-2(1)7] and [Annex 1-4]
3-year KTB Futures 10-year KTB Futures 30-year KTB Futures	100 contracts or more, but 5,000 contracts or less	50 contracts or more, but 5,000 contracts or less
3-month risk free benchmark interest rate futures spreads	10 contracts or more, but 5,000 contracts or less	
USD Futures / JYP Futures EUR Futures / CNY Futures	100 contracts or more, but 15,000 contracts or less	50 contracts or more, but 15,000 contracts or less
Gold Futures	50 contracts or more, but 1,000 contracts or less	
KOSPI 200 Futures Spreads Mini KOSPI 200 Futures Spreads KOSDAQ 150 Futures Spreads KRX 300 Futures Spreads KOSDAQ Global Futures Spreads Sector Index Futures Spreads	20 contracts or more, but 5,000 contracts or less	
Single Stock Futures Spreads	20 contracts or more, but not more than the position limits	
ETF Futures Spreads	20 contracts or more, but not more than the position limits for open interest for each underlying ETF specified in [§162-2(1)7] and [Annex 1-4]	

3-year KTB Futures Spreads 10-year KTB Futures Spreads 30-year KTB Futures Spreads	500 contracts or more, but 5,000 contracts or less
USD Futures Spreads	500 contracts or more, but 15,000 contracts or less
JYP Futures Spreads EUR Futures Spreads CNY Futures Spreads	200 contracts or more, but 15,000 contracts or less
Gold Futures Spreads	50 contracts or more, but 1,000 contracts or less

[Annex 27] Conversion Rates of Stock Futures and Options

[March 12, 2015] (Amended on March 21, 2016; March 13, 2017; September 22, 2023; November 1, 2024; May 29, 2025)

Conversion Rates of Stock Futures and Options

(Pertaining to [§90-3])

1. In the case of options contracts of which the last trading day arrives, figures in the following items:

(a) Case of a call options contract where the base price for exercise settlement exceeds an exercise price or a put options contract where an exercise price exceeds the base price for exercise settlement: 1 for buying call options and selling put options, and -1 for selling put options and buying call options;

(b) Case of loss contracts noted in [§100(2)] of the Regulation: 0

2. In the case of stock options contracts other than those noted in subparagraph 1 above: The figures in the following items (rounded off at the 7th decimal place):

(a) For options contracts in which an execution price is made during the regular trading session on the day relevant, figures are calculated as follows: i) to calculate volatility that makes an execution price at point of each trade execution time during the regular trading session on the relevant day identical to stock options theoretical price obtained from formula in [Annex 16]{excluding volatility (σ)} at the point of each trade the relevant execution time, ii) to produce delta of an options contract obtained by substituting the volatility in the formula in [Annex 16], iii) to calculate figures produced by averaging deltas weighted with trading volume during the regular trading session on the day. In such cases, the “as of the morning of the previous day”, the “calculation date” and the “base price of the underlying asset on the previous day” in [Annex 16] shall be construed as the “as of the morning of the day”, the “business day following the calculation date” and the “immediately previous price of the underlying asset, respectively.

(b) Of the days after the day on which the trade was executed for the first time, for options contracts in which there is no trade during the regular trading session on the day, figures are calculated as follows: i) to calculate volatility that makes the base price for margin on the relevant day identical to stock options theoretical price obtained from formula in [Annex 16]{excluding volatility (σ)} at the time of the market closing, ii) to produce delta of an options contract obtained by substituting the volatility in the formula in [Annex 16]. In such cases, the latter part of item (a) is applied *mutatis mutandis*, provided that the immediately preceding underlying asset price is deemed to be the base price for underlying asset on the calculation date.

(c) Notwithstanding items (a) and (b), in case where an abnormal trading condition occurs or it deems necessary for the market management in a stock options product, the conversion rate may be changed into the figures that the Exchange considers reasonable.

3. In the case of stock index options contracts other than those noted in subparagraph 1: The figures calculated by applying *mutatis mutandis* subparagraph 2 above. In such cases, “stock

options theoretical price” and “Annex 16” shall be construed as “stock index options theoretical price” and “Annex 15”, respectively.

[\[Annex 28\] Scope of Deposited Assets related to Hedge-dedicated Accounts, etc.](#)

[June 15, 2017] (Amended on March 15, 2018; April 5, 2024; May 29, 2025)

Scope of Deposited Assets related to Hedge-dedicated Accounts, etc.

(Pertaining to [§122-2])

1. The scope, minimum securities quantity or minimum cash amount of deposited assets and the type of derivatives trades for deposited assets

Scope of deposited assets	Minimum securities quantity (Minimum cash amount)	Type of derivatives for deposited assets
Underlying stocks	10 shares	Single stock futures and single stock options underlying the relevant stocks
ETFs linked to KOSPI 200	No less than the customer margin for entrustment of new order per contract of futures (referring to the KOSPI 200 futures in the case of KOSPI 200) underlying the relevant assets	KOSPI 200 Futures, Mini KOSPI 200 Futures, KOSPI 200 Options, Mini KOSPI 200 Options
ETFs linked to KOSDAQ 150		KOSDAQ 150 Futures KOSDAQ 150 Options
ETFs linked to KRX 300		KRX 300 Futures
ETFs linked to KOSDAQ Global		KOSDAQ Global Futures
ETFs linked to the underlying assets of sector index futures under [§4-6] of the Enforcement Rules		Sector index futures underlying the relevant assets

Note: An ETF of which price rises when the price or value of the deposited asset declines shall be excluded.

2. Limits of derivatives transaction for hedging

The limit of derivatives transaction that a customer can conduct for hedging purposes through a hedge-dedicated account shall be within the assessment value of the assets deposited in a hedge-linked securities account.

(a) Before market closing on the relevant trading day

The limit of derivatives transaction for hedging purpose = $\Sigma(\text{Closing price of underlying asset on the immediately preceding trading day} \times \text{Multiplier} \times \text{Converted quantity of open interests})$

* Converted quantity of open interests = $\{\Sigma(\text{Quantity of short open interests of futures}) + \Sigma(\text{Quantity of new selling orders of futures})\} + \{\Sigma(\text{Quantity of short open interests of call options} \times \text{Delta of call options}) + \Sigma(\text{Quantity of new selling orders of call options} \times \text{Delta of call options})\} + \{\Sigma(\text{Quantity of long open interests of put options} \times \text{Delta of put options}) + \Sigma(\text{Quantity of new buying orders of put options} \times \text{Delta of put options})\}$

* Delta refers to the absolute value of the delta at the market closing time on the immediately preceding trading day, calculated by the Exchange.

The assessment value of deposited asset = $\Sigma(\text{Closing price of the deposited asset on the immediately preceding trading day} \times \text{Holding quantity})$

(b) After market closing on the relevant trading day

The limit of derivatives transaction for hedging purpose = $\text{Min}\{\Sigma(\text{Closing price of the underlying asset on the immediately preceding trading day} \times \text{Multiplier} \times \text{Converted quantity of open interests calculated by applying the Delta at the market closing time on the immediately preceding trading day}), \Sigma(\text{Closing price of the underlying asset on the relevant trading day} \times \text{Multiplier} \times \text{Converted quantity of open interests calculated by applying the Delta at the market closing time on the relevant trading day})\}$

* Converted quantity of open interests shall be calculated by applying the formula of sub-item (i) *mutatis mutandis*.

* Delta refers to the absolute value of the delta at the market closing time on the immediately preceding trading day or the relevant trading day, calculated by the Exchange. Provided that, in the case of a contract whose final trading day has arrived, it shall be the delta at the trade closing time, not the market closing time on the relevant trading day.

The assessment value of deposited asset = $\Sigma(\text{Closing price of deposited asset on the relevant trading day} \times \text{Holding quantity})$

-------------------	---

Request for Correction of Transaction Errors

To: The Korea Exchange

Pursuant to [§77(3)] of the Enforcement Rules of Derivatives Market Business Regulation, we hereby submit the request for correction of transaction errors as follows:

Month / Date / Year

Name & seal of Representative:

Company name:

(Name of staff in charge:)

(Phone no. of staff in charge:)

(Name of supervisor:)

(Phone no. of supervisor:)

1. Trade details

Serial no.	Account number	Name of contract	Execution number	Bid/Ask	Contract price	Execution quantity

2. Details of request for correction of transaction errors

Serial no.	Reasons for correction	Quantity to be corrected	Account number after correction	Classification of Proprietary account /Customer account after correction

Notes:

1. Do not fill in the column marked with *.

2. [Deleted on November 21, 2016]

3. Account number refers to the derivatives account number (end-investor classification code in the case of a foreigner's consolidated account) that the members assigned to customers.

[Annex: Form 5][Deleted on August 28, 2014]
